AZTEC, NEW MEXICO

—“The Land of the Big Red Apple”—

IN THE HEART OF THE GREAT FRUIT BELT

Deriving its name from a long departed race whose castles, though in a sad state of decay, still stand within a few hundred yards of its city limits, it will ever remain as a monument to that race. Who were they, this departed race? History can tell but little of them. Discovered at the time Cortez and his followers made their first trip of exploration from Mexico, they soon vanished from the face of the earth. Historians seem to think that they were destroyed by a stronger race while the old Indian legend, handed down from generation to generation, says that they were visited by a plague, that those in the huts at the time of this plague shut up all entrances to these old castles and were there destroyed, while those who were on the outside were advised by their Gods to jump into the river and were then turned into fishes. However as that may be, the Indians of this day and generation will not eat a fish out of the Las Animas river,

west the snow-clad hills are ever in evidence and the cool breezes of the La Platas soothe to sleep in the summer evenings the laborer, resting to his daily task much relieved. Within a few hundred yards beautiful Las Animas river flows upon its way to the ever abundance of whomsoever the fertile valley stretches before the eye, allowing, as is now the case, a view of the splendid orchards of which San Juan county is so proud and whose products are now so famous, being known the world over for unsurpassed flavor, their perfect color and the wonderful bearing qualities of its trees.

Northward the valley stretches in the same manner, many of the leading orchards of this county being located several miles north of Aztec. To the west are also some fine fields. Therefore, surrounded as it is on all

ables, and the prices are very reasonable, in fact so much more reasonable than one would expect.

Competition in trade, however, is a good thing and progressive merchants will still find here openings for many classes of business. A good general's furnishing goods store should do well, another drug store, another hotel

the source of all wealth for the fruit grover and ranchman in San Juan county, according to the report of the territorial engineer, has three-fourths of all the water supply of New Mexico.

The following is taken from the report of the territorial engineer. The projects mentioned have their headquarters at Aztec:

"The Eden Land and Power Company of Aztec owns and controls the Eden Canal, a project which, when successfully completed, will be a good

supply is thus exceptionally steady and certain. The yearly discharge of the Las Animas River is large and is shown on a preceding page (p. 12). One cubic foot per second of water can easily be made to irrigate 100 acres, if not more, in this region. The main canal of this company is 35 miles long, and there are two other

gether with the soil, are adapted to the production of a great variety of crops, including cereals, legumes and fruits. Owing to the topographical conditions of these mesas late killing frosts in the spring seldom occur, hence this section is particularly suited for the fruit industry, the apple doing better than any other fruit.

In addition to the above project, the same parties have another in San Juan county which will divert water out of the Las Animas river in Colorado for the irrigation of about 130,000 acres in New Mexico. This project can be extended so as to cover nearly 700,000 acres if the water supply will warrant. The construction of this project is expensive, owing to the topographical conditions, but when once constructed it will bring under cultivation some of the most fertile land in the territory. The other natural conditions are similar to the Turley-Hollister project on the San Juan.

government in connection with its Las Animas-La Plata project, but was thrown open to entry on September 1, 1907, when the land was immediately entered upon by the parties now purposing to carry out this fine project.

Aztec is the county seat of San Juan county and here are the county buildings, the court house being a model of its kind, being elegantly furnished, its vaults are fire-proof and are fitted with the latest improved fixtures. The county officials are of the courteous, obliging kind and San Juan county is proud of them. Finances of the town and county are in a first-class condition.

The location of the town, at the foot of the hill, gives it a fine location for a gravity water system, which has been talked of for some time and which no doubt will soon be installed. A fine system could be put in at a reasonable cost and when the Eden canal is completed no doubt there will be one. A natural reservoir site is
