International Food Aid: U.S. and Other Donor Contributions

Charles E. Hanrahan
Senior Specialist in Agricultural Policy
Resources, Science, and Industry Division

Carol Canada
Technical Information Specialist
Resources, Science, and Industry Division

Summary

The United States is the world's major provider of international food aid to low-income developing countries. This report provides three indicators of the U.S. contribution to global food aid: (1) shipments of major donors compiled by the International Grains Council, (2) U.S. contributions to the United Nations World Food Program (WFP), and (3) the U.S. commitment under the Food Aid Convention (FAC).

U.S. food aid accounted for 59% of food aid shipments by major donors during 1995-2003. A substantial portion of U.S. food aid is channeled through the WFP. During 1996-2004, around 48% of the food aid distributed by the WFP came from the United States. The Food Aid Convention (FAC), now expired, was an agreement among donor countries to provide a minimum amount of food aid to low-income developing countries. The food aid commitment by all FAC signatories was approximately 4.9 million metric tons (mmt). The United States pledged to provide 2.5 mmt or 51% of the total commitment.

Contributions of Major Donors to International Food Aid

The United States is the major contributor to international food aid, supplying on average, since 1995, around 59% of annual total food aid (see Figure 1) provided by donors who are members of the Food Aid Committee of the International Grains Council and signatories of the 1999 Food Aid Convention.¹ U.S. contributions increased from

¹ Information on the International Grains Council, the Food Aid Convention, and the Food Aid Committee is available at [<http://www.igc.org.uk/>].

Figure 1. Food Aid by Major Donors, 1995-2003

around 2.8 million metric tons (mmt) measured in wheat equivalent in 1995/1996 to about 6.1 mmt in 2002/2003 (see Appendix Table 1).² U.S. contributions averaged 4.8 mmt annually. Food aid from the European Union (including food aid provided by the European Commission and by individual member countries of the EU) has been more stable and averaged around 2.1 mmt or 26% of average annual food aid shipments. Japan and Canada provided 5.7% and 5.2%, respectively, of the total from major donors. Japan's contributions are provided as cash rather than commodities.

Figure 2. Food Aid Contributions to the World Food Programme, 1996-2005*

* Data as of April 11, 2005.

Because food aid data are reported on a July/June marketing year basis, they do not correspond, for example, to fiscal year food aid data reported by the U.S. Department of Agriculture in budget documents or by the U.S. Agency for International Development in annual food aid reports. The source of the data in Figure 1 and

Appendix Table 1 is the annual report *Food Aid Shipments*, prepared by the Food Aid Committee of the International Grains Council.³

² Data on food aid shipments provided by the International Grains Council are reported on a marketing year basis (July-June).

³ International Grains Council, Food Aid Committee, *Food Aid Shipments 2002/2003: Report on Shipments by Members of the Food Aid Convention*, July 2004.

Food Aid Contributions to the World Food Program

Most U.S. food aid is provided on a bilateral basis, but a substantial portion is channeled through the United Nations World Food Program (WFP), the intergovernmental agency that provides food aid for development projects and humanitarian relief in low income countries. More than 56 donors, mainly countries, but also some non-governmental organizations like the International Red Cross, contribute to the WFP. The United States is the major donor, providing over the last nine years around 48% of total WFP contributions (see Figure 2 and Appendix Table 2). Over that same nine-year period, the EU (again combining European Commission with EU member countries' contributions) accounted for around 30% of total WFP contributions. Japan, whose contributions are in cash, provided around 7%. The remaining donors combined provided about 14% to WFP food aid resources. Donor contributions to the WFP are not in addition to, but are included in, the data reported in Figure 1 and Appendix Table 1.

Commitments under the Food Aid Convention

The Food Aid Convention (FAC), first agreed to in 1968 during the Kennedy Round multilateral trade negotiations held under the auspices of the General Agreements on Tariffs and Trade (GATT), was an international agreement that constituted a framework

of cooperation on food aid between major donors. The food aid commitment under the FAC was a minimum commitment and was intended to be a guarantee of food security for low-income developing countries. The signatories of the FAC were Argentina, Australia, Canada, the European Union and its member countries, Japan, Norway, Switzerland, and the United States. Signatories could provide more than their minimum commitment. The current FAC was negotiated in 1999 and expired in 2003.

Under the FAC, the donors could express their annual food aid commitments in either tonnage or in value, but most continue to use the former. Japan is the major exception, although the EU also provides some food aid in the form of cash. The total commitment under the most recent FAC (1999-2003) was 4.9 mmt (see Figure 3 and Appendix Table 2). The United States made the largest commitment, 2.5 mmt or 51% of the total. The combined EU commitment was around 27%. Commitments by Canada, Japan, and Australia were, respectively, 8.6%, 6.1%, and 5.1%. Seven of eight FAC signatories have exceeded their FAC commitments in each of the last six years. Only Argentina has not met its FAC commitment.

Although the FAC expired in 2003, a working committee of the International Grains Council has been established to prepare for its renegotiation.⁴ Concurrently, trade-related aspects of food aid are being negotiated in the multilateral trade round known as the Doha Development Agenda (DDA). The Food Aid Committee of the IGC continues to meet periodically to review donor food aid contributions in relation to commitments under the 1999 FAC and to global food needs and has agreed that the existing FAC should be extended for a further two-year period after July 1, 2005. Renegotiation of the FAC, however, appears unlikely until the DDA trade negotiations have been concluded.

Table 1. Annual Commitments under the 1999 Food Aid Convention
(metric tons wheat equivalent)

Argentina	35,000	0.72%
Australia	250,000	5.11%
Canada	420,000	8.58%
EU	1,320,000	26.97%
Japan	300,000	6.13%
Norway	30,000	0.61%
Switzerland	40,000	0.82%
USA	2,500,000	51.07%
Total	4,895,000	100.00%
