PREFACE

A new approach was taken in producing the 1974 Edition of the Personnel Directory. A computer data bank has been developed which will be a viable source of information to serve the overall nuclear standards community. The Directory is essentially an information source for identifying and locating personnel who have expertise in a particular nuclear area or subject, and the ORNL data bank can be utilized as a national information center for personnel involved in the development of voluntary consensus nuclear standards.

A new information form was designed to provide simplicity, no repetition, minimum time required for completion and mailing, and compatibility with a new COBA! computer code package. This personal form approach was chosen, since an individual may be serving on several committees or subcommittees which may transcend several organizations, and/or societies, and all his activities can be reported on one form at one time.

The computer program assigns only one accession number to each individual and compiles a company code-type-address file. Thirteen company-type classifications are now included as compared with the original five broad categories.

The Directory format is based on the following four sections:

1. Personal Name:

All personnel are listed alphabetically, including company affiliation, address, accession number, and committee activities. Chairmen, secretaries, and alternates are also designated (C-S-A).

2. Company Name:

All companies and organizations are listed alphabetically within 13 categories. Company addresses are included, and personnel of each company are listed alphabetically.

3. Standards Organizations and Committees:

Organizations (societies) are listed alphabetically with their committees, subcommittees, tasks, etc., and are listed in alphanumeric sequence, including personnel and their accession numbers. Chairmen, secretaries, and alternates are also designated.

4. Keyword-In-Context (KWIC):

This index lists the titles of all standards organizations, committees, subcommittees, etc., in the Directory. Titles are permuted around various keywords.

The Directory computer code package was designed to also provide for search-and-list rapid retrieval of the following types of information:

1. A selected listing of companies by specific type (1 of 13), including personnel of each company and the total number of personnel listed for that type.
2. A particular company listing, including all personnel and the total number of persons listed for that company.
3. A particular society or standards organization selected listing, including all committees and subcommittees listed in alphanumeric sequence along with their personnel and accession numbers. Chairmen, secretaries, and alternates will also be designated, plus the total number of personnel in the listing.
4. A particular committee, subcommittee, etc., listing of all members of that committee, their accession numbers and designated chairman, secretary, and alternates. The total number of personnel will also be given.
5. A listing of all committee and subcommittee chairmen and secretaries can also be generated.

While the Personnel Directory will be issued only once a year, it will be important to report all new, or change of status, information as soon as possible, since provision has been made for the capability of search-and-list rapid retrieval of information at any time.

Each standards generating organization has an established method of designating their committee, subcommittee, etc., activities. An attempt was made to simplify the information form designation procedures by using acronym and numerical designations, although all committees, etc., will be designated by full title in the KeyWord-In-Context section. A systematic approach was used to collect information. This consisted in contacting individuals for personal standards activity, contacting all "N" committee secretariats, and contacting each technical society active in nuclear standards. (In many cases the individual chairmen and/or subcommittee chairmen had to be contacted for specific, up-to-date, complete information.)

The criterion for listing a specific committee in the Directory was based on the committees' activity in actually preparing nuclear standards and/or providing major basic data and information utilized in the preparation of nuclear standards. In some cases the committees were selected by the sponsoring society.

Your attention is directed to the comments regarding submission of personal data in the Information Forms section of this Directory.

1974 Directory Statistics

Number of personnel in Directory:	7,465
Number of Program Members ¹	12,610
Number of Organizations (Societies)	52
Number of Committees	859
Number of Companies ²	3,583
Number of Companies in each type:	
1. Architect-Engineer Constructor	66
2. Consulting Firm	629
3. Utility, Publicly Owned	7
4. Utility, Investor-Owned	62
5. Government, US AEC (ERDA)	9
6. Government, Other	262
7. National Laboratory	10
8. Nuclear Steam System Supplier	13
9. Nuclear Service Supplier	37
10. Fuel Designer-Fabricator	6
11. Fuel Cycle (Mining, Milling, Reprocessing)	40
12. Equipment Manufacturer	628
13. Other (Industry, University, Insurance, etc.)	1,052

¹Member is one man per position; i.e., a man with four committee memberships is counted as four members.

²Companies includes all companies, organizations, individual consultants, corporations, etc.

ACKNOWLEDGMENTS

Many tasks were involved in gathering, compiling, and processing the vast amount of information contained in this Personnel Directory. The following persons contributed their talents in helping to produce this document and in establishing a viable national information center for personnel involved in the development of voluntary consensus nuclear standards. Primary contributors were F. C. Olden of the Engineering Division and J. H. Owings and M. B. Wright of the Computer Sciences Division. Others were:

Z. S. Trotter

ORGDP FORMS DEPARTMENT

W. J. Grumbach
L. T. Hensley

We also wish to acknowledge the valuable help received from various members of the Information Division.

**PERSONNEL
INVOLVED IN THE DEVELOPMENT OF
NUCLEAR STANDARDS IN THE UNITED STATES
1974**

Section I. PERSONAL NAME

This section is an alphabetical listing of persons working on nuclear standards activities, giving corporate affiliation, address, accession numbers, and assignment(s).

The standards activity shown for each person is listed to the narrowest known degree. It is shown by a one-, two-, three-, or four-component acronym beneath the individual's company name and address. The acronym is separated into its various components in a descending hierarchical order of organization, committee, subcommittee, and task. The title for the last component is given to the right of, and on the line with, that component. For example, if an individual is working on ANS-11.13, that entry will appear below his address, and the last component will be identified to the right of the entry as follows:

ANS-11.13 Concrete Radiation Shields

Organization acronyms (ANS, etc.) are listed at the beginning of Sect. 3 (yellow). If an individual is a member of a main committee only (e.g., ANS-11), only that component will be listed. If he is active in more than one project, all will be listed.

If an individual is chairman, secretary, or designated as an alternate member of an activity, this is shown by a C, an S, or an A opposite the activity. For purposes of this compilation, the first component following a standards organization acronym is considered a committee, the second component is considered a subcommittee, and the third component is considered a task. This nomenclature may or may not agree with that actually used by a given organization.

Section 2. COMPANY NAME

This section is an alphabetical listing of company or organization names and addresses, with employees, in the following 13 categories:

- 1. Architect-Engineer/Constructor**
- 2. Consulting Firm**
- 3. Utility, Publicly Owned**
- 4. Utility, Investor-Owned**
- 5. Government, USAEC**
- 6. Government, Other**
- 7. National Laboratory**
- 8. Nuclear Steam System Supplier**
- 9. Nuclear Service Supplier**
- 10. Fuel Designer/Fabricator**
- 11. Fuel Cycle (Mining, Milling, Reprocessing)**
- 12. Equipment Manufacturer**
- 13. Other (Industry, University, Insurance, etc.)**

An index of company names by category begins on the following page.

NUCLEAR STANDARDS IN THE UNITED STATES
1974**

Section 3. STANDARDS ORGANIZATIONS AND COMMITTEES

This section is an alphabetical listing of standards-generating organizations and their nuclear-oriented committees, subcommittees, and tasks as appropriate. Titles are given for the last component of each combination of committee-subcommittee-task abbreviation or code, in descending hierarchical order. Organization acronyms are listed alphabetically, starting on the following page.

Personnel working on a given activity are listed in alphabetical order under the activity; company names and addresses can be obtained by reference to Sect. 1. Activity chairman, secretary, and alternate membership are indicated, when known, following personal name. The five-digit number following each name is the computer accession number for that name.

A listing of ANSI-NTAB committees, including their secretariats and executive directors, follows the organization acronym list. Please note that all ANSI-NTAB "N" and "Z" committees will be found under their respective secretariats.

An alphabetical listing of all organizations and committees with their respective titles is also included at the end of this section.

SOCIETY AND ORGANIZATION ACRONYMS

AAPM	American Association of Physicists in Medicine
ABS	American Bureau of Shipping
ACI	American Concrete Institute
ACI-ASME	American Concrete Institute -- American Society of Mechanical Engineers
ACS	American Chemical Society
AIA	American Insurance Association
AICHE	American Institute of Chemical Engineers
AIF	Atomic Industrial Forum
AIHA	American Industrial Hygiene Association
AISE	Association of Iron and Steel Engineers
ANS	American Nuclear Society
ANSI	American National Standards Institute
APHA	American Public Health Association
ASCE	American Society of Civil Engineers
ASME	American Society of Mechanical Engineers
ASNT	American Society for Nondestructive Testing
ASQC	American Society of Quality Control
ASTM	American Society for Testing and Materials
AWS	American Welding Society
CBEMA	Computer and Business Equipment Manufacturers Association
BRH	Bureau of Radiological Health
CRCPD	Conference of Radiation Control Program Directors
EEL	Edison Electric Institute
ENEA	European Nuclear Energy Association
HPS	Health Physics Society
IAEA	International Atomic Energy Agency
ICRA	Interagency Committee on Radiological Assistance
ICRP	International Commission on Radiation Protection
IEC	International Electrotechnical Commission
IEEE	Institute of Electrical and Electronics Engineers
IES	Institute of Environmental Sciences
INMM	Institute of Nuclear Materials Management
ISA	Instrument Society of America
ISCA	Intersociety Committee on Methods for Ambient Air Sampling and Analysis
ISO	International Standards Organization
MPC	Metals Properties Councils
NACE	National Association of Corrosion Engineers
NAS-NRC	National Academy of Sciences -- National Research Council
NBBPI	National Board of Boiler and Pressure Vessel Inspectors
NBS	National Bureau of Standards
NCRP	National Council on Radiation Protection and Measurement
NFPA	National Fire Protection Association
NCSG	National Neutron Cross Section Committee
SAMA	Scientific Apparatus Makers Association
SEAC	Structural Engineers Association of California
SEACC	Structural Engineers Association of Central California
SEACNC	Structural Engineers Association of Northern California
SEASC	Structural Engineers Association of Southern California
SEASD	Structural Engineers Association of San Diego
SNAM	Society of Naval Architects and Marine Engineers
USDO	United States Department of the Interior
WRC	Welding Research Council

ANSI-NTAB COMMITTEES

NTAB COMMITTEE	TITLE	SECRETARIAT	NTAB EXECUTIVE DIRECTOR
N11	Basic Materials and Materials Testing for Nuclear Application	ASTM	A. O. Schaefer
N12	Nuclear Terminology, Units, Symbols, Identifications, and Signals	AIF	A. D. Callihan
N13	Radiation Protection	AIE	A. D. Callihan
N14	Transportation of Fissile and Radioactive Materials	AIA	M. A. Rosen
N15	Methods of Nuclear Material Control	INMM	R. G. Chalker
N16	Nuclear Criticality Safety	ANS	J. A. Prestele
N17	Research Reactors, Reactor Physics, and Radiation Shielding	ANS	J. A. Prestele
N18	Nuclear Design Criteria	ANS	J. A. Prestele
N19	Nonradiological Environmental Effects	ANS	J. A. Prestele
N41	Controls, Instrumentation, and Electrical Systems for Nuclear Power Generating Stations	IEEE	J. C. Russ
N42	Nuclear Instruments	IEEE	J. C. Russ
N43	Equipment for Non-Medical Radiation Applications	NBS	J. Leiss
N44	Equipment and Materials for Medical Radiation Applications	BRH	R. B. Minogue
N45	Reactor Plants and Their Maintenance	ASME	B. F. Langer
N46	Nuclear Reactor Fuel Cycle	AIChE	R. H. Davidson
N48	Radioactive Waste Management	ANS	J. A. Prestele
N13/ N42	Radiation Protection Instruments	AIF-IEEE	
Z1	Quality Assurance	ASQC	

NTAB "N" and "Z" committees will be found listed under their respective secretariats.

Section 4. KWIC INDEX

The KWIC (KeyWord-In-Context) Index lists the titles of all standards organizations, committees, subcommittees, and tasks included in this Directory. The titles are permuted around various keywords (listed alphabetically in the center of the page); # indicates the beginning of a given title; * indicates the end.

Index terms in the right-hand column are arranged in hierarchical order, with the organization (e.g., ASME) listed first, then the committee (e.g., ASME N45), next the subcommittee (e.g., ASME N45-2), and finally the task (e.g., ASME N45-2.13). Each component of the index term is listed separately, with the title given for the smallest component indexed. For example, the organization American Society of Mechanical Engineers is indexed as ASME; the ASME committee on Reactor Plants and Their Maintenance is indexed as ASME N45; the N45 subcommittee on Nuclear Quality Assurance is indexed as ASME N45-2; and the N45-2 task on Procurement is indexed as N45-2.13.

By using the KWIC Index one can identify the committee(s) or groups working on a given topic (e.g., Quality Assurance) and then find that committee and its personnel in Sect. 3. Addresses can be found in Sect. 1.

INFORMATION FORMS AND GENERAL COMMENTS

Many organizations and societies have submitted their latest committee and membership listings; however, in many cases the information is in a form which is most difficult to process in a reasonable amount of time. I'm sure you can appreciate our problems, and we would like to suggest that you review your information and submit it in a form that can be readily processed.

Please note that only ANSI-NTAB committees will be listed under ANSI. All ANSI "N" committees (and "Z") will be found listed under their respective secretariats (such as N18 under ANSI).

After attempting to compile and edit a directory of personnel involved in the development of nuclear standards and trying to simplify standards committee activity designations, we highly recommend that all societies and standards-generating organizations attempt to eventually designate their committees, subcommittees, tasks, and groups in an alphanumeric manner similar to that adopted by the American Society for Testing and Materials.

ASTM's system is simple and ideal for computer programming, which is mandatory for large compilations of this type. An A-B-C designation is assigned to basic overall areas of interest, followed by A-01, A-02, etc., designations for various broad committee subjects. A01.01, A01.02, etc., designations are then used for each subcommittee. Groups follow with A01.01.08, A09.03.10, etc., designations, and in rare cases a further breakdown can be obtained with D02.A0.01, D02.B0.03, etc., designations. Simple, concise committee titles would also be *very helpful*.

It is impossible to compile a directory of this scope without introducing some errors - misspelled names, wrong company names, new committee members not listed, etc. In most cases these errors are due to incomplete or incorrect information submitted by your society or your committee chairman. If you personally fail to submit a properly completed information form, then it is your fault.

Continual change is a way of life for all standards activity, and if we all cooperate the Personnel Directory will become a valuable document. Our search-and-list rapid retrieval service will be available to help you keep up to date in your nuclear standards activities. Once organized, we will be able to assimilate all changes as soon as they are submitted to the Personnel Directory office.

The following copy of the form transmittal letter and five copies of the information form are included for your use in submitting future personnel information.

INFORMATION FORM FOR PERSONNEL INVOLVED IN THE DEVELOPMENT OF NUCLEAR STANDARDS IN THE UNITED STATES

The enclosed (salmon color) information form is being distributed to help update the Personnel Directory. This form has provisions for changes and deletions, as well as new entries, and does not require repetition of personal name, company, or address.

All committee activities for one person can be given on one page, and all organization, committee, subcommittee, and task designations can be abbreviated as shown in the alphabetical listing of organizations and committees, along with their titles, which is included at the end of Sect. 3.¹ (Please obtain the proper acronym and numeral designations from your committee chairman, society, etc.)

A new computer program approach, coupled with the new personnel information form, will result in an up-to-date document which will better serve you and the overall nuclear standards community. The form has been designed to minimize effort on your part and can be quickly filled out (print or type), folded, taped or stapled, and mailed.

Copies of this letter and the new information form will be sent to personnel, societies, and companies active in the Nuclear Standards Program. The standards coordinator or representative of each company and organization should contact each individual so that they can complete the form. This personal contact is necessary, since an individual may be serving on several committees and subcommittees which may transcend several organizations, and/or societies, and all his activities can be reported on one form at one time.

If you are a committee chairman or secretary (or a standards activity coordinator), please see that *every* new member of your committee (or members of your organization) receives copies of this transmittal and the information form.

Once the correct personal information has been received, you need only report changes as they occur. Any new, or change of status, information should be forwarded as soon as possible in order to keep the computer data file up to date. The accuracy of all data depends on *your* cooperation.

While the Personnel Directory will be issued only once a year, it will be important for you to report all changes in information as they occur, since we are also providing for the capability of search-and-list rapid retrieval of information in several categories such as the latest up-to-date listing of persons serving on a particular committee or subcommittee.

Standards activities coordinators of large organizations (as well as individuals) can keep copies of the information form for their personnel activity files and for future reference when reporting changes in any individual's standards activities.

NOTE: It is important to make a copy of the information form for your files and future reporting. Additional copies of the form can be obtained by writing to Oak Ridge National Laboratory (see form) or phoning 615-483-8611, ext. 3-1746.

¹ A separate organization-committee listing will be provided when this form is included in special mailings.
