MASTER

The Radiation Laboratory of the University of Notre Dame is operated under contract with the United States Atomic Energy Commission. The Radiation Chemistry Data Center is supported by the National Bureau of Standards Office of Standard Reference Data, and by the Atomic Energy Commission.

CONTENTS

I	Gas Phase	1
II	Liquid Phase	15
III	Solid Phase	30
IV	Heterogeneous Systems	37
V	Radiation Synthesis	39
VI	Oxidation	41
VII	Books and Reviews	44
	Author Index	46
	Compound Index	59

The bibliography covers all the literature on the radiation chemistry of alkanes to the present. Abstract references are included for foreign language articles and technical reports. Investigations of aqueous solutions of alkanes are not included.

The papers are listed under the categories (see contents above) by serial number which is approximately chronological. If an article is pertinent to more than one category it is listed under each.

The compound index includes the alkanes and the additives in the system, and refers to the serial number of the paper.

I. Gas Phase

- 24-1 S.C. Lind, D.C. Bardwell. Science 60: 364(1924).
Direct synthesis of higher from lower hydrocarbons.
- 31-3 S.C. Lind, B.M. Marks, G. Glockler. Trans. Am. Electrochem. Soc. 59: 8p. (1931) (Chem. Abstr. 25:1440 (1931)).
Action of electrical discharge on gaseous hydrocarbons -
The effect of high speed cathode rays on paraffin hydrocarbons.
- 46-1 R.E. Hornig, C.W. Sheppard. J. Phys. Chem. 50: 119-44 (1946).
An experimental comparison of the chemical effects of deuterons and of alpha particles on methane and n-butane.
- 48-9000 M.B. Koffel, R.A. Lad. J. Chem. Phys. 16: 420-2 (1948) (Chem. Abstr. 42:4045 (1948)).
Ionization and dissociation of paraffin hydrocarbons by electron bombardment.
- 52-9 L.H. Gevantman, R.R. Williams. J. Phys. Chem. 56: 569-74 (1952).
Detection and identification of free radicals in the radiolysis of alkanes and alkyl iodides.
- 52-21 J.M. Valentine, S.C. Curran. Phil. Mag. 43: 964-7 (1952) (Chem. Abstr. 48:10443 (1954)).
Energy expenditure per ion pair for electrons and alpha particles.
- 53-7 G. Bertolini, M. Bettoni, A. Bissi. Phys. Rev. 92: 1586 (1953) (Chem. Abstr. 48:4995 (1954)).
Total ionization of alpha particles of polonium in mixtures of gases.
- 53-8 C. Biber, P. Huber, A. Muller. Helv. Phys. Acta 26: 602 (1953) (Chem. Abstr. 48:4321 (1954)).
Work per ion pair for polonium alpha particles in polyatomic gases.
- 53-9 W.P. Jesse, J. Sadauskis. Phys. Rev. 90: 1120-1 (1953) (Chem. Abstr. 47:9794 (1953)).
Alpha particle ionization in pure gases and the average energy to make an ion pair.
- 54-7 G. Bertolini, M. Bettoni, A. Bissi. Nuovo Cimento 11(9): 458-67 (1954) (Nucl. Sci. Abstr. 8:4618 (1957)).
Total ionization of alpha particles of polonium in mixtures of gases.
- 54-19 A.E. Grun, E. Schopper. Z. Naturforsch. Pt. A 9: 134-47 (1954) (Chem. Abstr. 48:8657 (1954)).
Investigation of energy transfer and quenching processes in gases on excitation with fast particles.
- 55-8 C. Biber, P. Huber, A. Muller. Helv. Phys. Acta 28: 503-21 (1955) (Nucl. Sci. Abstr. 10:1856 (1956)).
Work per ion pair for polonium alpha particles in polyatomic gases for Po α particles.

- 55-9 J. Weiss, W. Bernstein. Phys. Rev. 98: 1828-31 (1955) (Nucl. Sci. Abstr. 9:5702 (1955)). Energy required to produce one ion pair for several gases.
- 56-6 G.G. Meisels, W.H. Hamill, R.R. Williams. J. Chem. Phys. 25: 790 (1956). Ion-molecule reactions in radiation chemistry.
- 56-18 L.M. Dorfman. J. Phys. Chem. 60: 826-8 (1956). Radiolysis of ethane: molecular detachment of hydrogen.
- 57-4 G.G. Meisels, W.H. Hamill, R.R. Williams, Jr. J. Phys. Chem. 61: 1456-61 (1957). The radiation chemistry of methane.
- 57-16 F.W. Lampe. J. Am. Chem. Soc. 79: 1055-8 (1957). High energy electron irradiation of methane - Remarks on the reaction mechanism.
- 57-9005 B.M. Mikhailov, L.V. Tarasova, V.S. Bogdanov. ORNL-tr-224, 6p., 1958 (Nucl. Sci. Abstr. 18:41511 (1964)). (translated by A.L. Monks (Oak Ridge National Laboratory, Tenn.) from Tr. 1-go (Porvogo) Vses. Soveshch. po. Radiats. Khim., Akad. Nauk SSSR, Otd. Khim. Nauk, Moscow, 218-22, (1957). Effect of ionizing radiation on organic and inorganic systems. Part I.
- 58-35 L.M. Dorfman. J. Phys. Chem. 62: 29-33 (1958). Radiolysis of ethane: isotopic and scavenger studies.
- 58-9003 E.L. Frankevich, V.L. Talroze. Dokl. Akad. Nauk SSSR 119: 1174-6 (1958) (Russ) (Chem. Abstr. 53:9822c (1959)). Affinity of hydrogen and saturated hydrocarbons for the proton.
- 59-15 K. Yang, P.J. Manno. J. Am. Chem. Soc. 81: 3507-10 (1959). The role of free-radical processes in the γ -radiolysis of methane, ethane, and propane.
- 59-31 G.G. Meisels. J. Chem. Phys. 31: 281-5 (1959). The participation of excited ions in ion-molecule reactions.
- 59-32 B.M. Mikhailov, L.V. Tarasova, V.G. Kiselev, V.S. Bogdanov. Radiation Chemistry of Simple Organic Systems, p. 199-202, (1959) (Nucl. Sci. Abstr. 13:22120 (1959)). The reactions of gaseous saturated hydrocarbons and ethylene under the effect of fast electrons.
- 59-50 B. Aliprandi, F. Cacace. Gazz. Chim. Ital. 89: 2268-74 (1959). Radioactive carboxylic acids obtained by beta irradiation of a gaseous mixture of n-pentane and $C^{14}O_2$.
- 59-51 R.A. Back, N. Miller. Trans. Faraday Soc. 55: 911-20 (1959). Radiolysis of n-pentane and other hydrocarbons in the gas phase.

- 59-52 J.H. Futrell. J. Am. Chem. Soc. 81: 5921-4 (1959).
High energy electron irradiation of n-hexane.
- 59-9002 R.R. Williams, Jr. J. Phys. Chem. 63: 776-80 (1959).
Chemical effects of low energy electrons.
- 60-12 R.W. Looney. Thesis, Univ. of Wisconsin, Madison. 144p.
Dissertation Abstr. 21:1391 (1960). Radiation chemistry
of methane.
- 60-24 G.J. Mains, A.S. Newton. J. Phys. Chem. 64: 511-12 (1960).
The mercury-sensitized radiolysis and photolysis of
methane.
- 60-36 L.M. Dorfman, M.C. Sauer, Jr. J. Chem. Phys. 32: 1886-7
(1960). Correlation of molecular yields in hydrocarbon
with mass spectral data.
- 60-37 F.W. Lampe. Nucleonics 18(4): 60-5 (1960). Irradiation
reactions in hydrocarbon gases.
- 60-38 R.L. Platzman. J. Phys. Radium 21: 853-8 (1960).
Probability of ionization by transfer of energy from excited
atoms to some molecules.
- 60-70 B.F. Birdwell, G.W. Crawford. J. Chem. Phys. 33: 928-9
(1960). Gamma radiolysis of propane.
- 60-71 R.A. Back. J. Phys. Chem. 64: 134-7 (1960). Scavenger
studies in the γ -radiolysis of hydrocarbon gases at very
low conversions.
- 60-72 J.H. Futrell. J. Phys. Chem. 64: 1634-6 (1960). Gas
phase radiolysis of n-pentane.
- 60-73 F. Cacace, A. Guarino, E. Possagno. Gazz. Chim. Ital.
59:1837-42 (1960) (Chem. Abstr. 55:3421c (1961)).
Chemical effect of ionizing radiations. Formation of
carboxylic acids following irradiation of a mixture of
pentane and $C^{14}O_2$ with X-rays.
- 60-74 J.H. Futrell. ARL-TN-60-139, 16p., 1960 (Nucl. Sci.
Abstr. 15:4026 (1961)). Radiation chemistry of n-pentane:
mechanism for the formation of lower molecular weight
products.
- 60-75 J. Kivel. Thesis, Iowa State University of Science and
Technology, 1960. Dissertation Abstr. 21: 472-3 (1960).
Gamma radiolysis of carbon-14 labeled isobutane.

- 60-76 V.I. Spitsyn, I.V. Vereshchinskii, P.Ya. Glazunov, G.G. Ryabchikova, G.K. Sibirskaya. Tr. 2-go (Vtorogo) Vses. Soveshch. po. Radiats. Khim., Akad. Nauk SSSR, Otd. Khim. Nauk, Moscow, p.308-11 (1960) (Russ) (Chem. Abstr. 58:6359d (1963)). Radiolysis of propane at high temperature.
- 60-77 K. Yang. J. Chem. Phys. 32: 1892 (1960). Possible ion-molecule reaction in the gamma radiolysis of C_3 hydrocarbons.
- 60-78 K. Yang. Can. J. Chem. 38: 1234-5 (1960). Effect of nitric oxide in the γ -radiolysis of ethane at very low conversions.
- 60-4002 P.J. Estrup, R. Wolfgang. J. Am. Chem. Soc. 82: 2665-9 (1960). Kinetic theory of hot atom reactions: application to the system $H + CH_4$.
- 60-9001 L. Reinisch. J. Chim. Phys. 57: 1064-71 (1960) (Fr). Radiolysis and mass spectroscopy.
- 60-9002 J.E. Manton, A.W. Tickner. Can. J. Chem. 38: 858-68 (1960). The decomposition of methane by low-energy electrons.
- 61-4 R.E. Rondeau, D.R. Johnson. WADD-TR-61-38. 21p. Mar., 1961 (Nucl. Sci. Abstr. 16:25421 (1962)). Radiation chemistry of pentane isomers.
- 61-12 G.J. Mains, A.S. Newton. J. Phys. Chem. 65: 212-7 (1961). The mercury-sensitized radiolysis and photolysis of methane.
- 61-33 K. Yang. J. Phys. Chem. 65: 42-5 (1961). Nitric oxide as a radical scavenger in the radiolysis of gaseous hydrocarbons.
- 61-34 R.W. Hummel. Nature 192: 1178-9 (1961). Production of high molecular weight products from the irradiation of methane with 4-Mev electrons.
