Monthly Environmental Regulatory Update

This report contains a monthly update of environmental regulatory activity that is of interest to the Department of Energy. It is provided to DOE operations and contractor staff to assist and support environmental management programs by tracking regulatory developments. Any proposed regulation that raises significant issues for any DOE operation should be reported to the Office of Environmental Guidance (EH-23) as soon as possible so that the Department can make its concerns known to the appropriate regulatory agency. Items of particular interest to EH-23 are indicated by a shading of the RU#.

Any questions or comments about any aspects of the Update Table should be directed to Lois Thompson, Air, Water, and Radiation Protection Division, Office of Environmental Guidance, U.S. Department of Energy (EH-23), (FTS) 896-9581, (Commercial) 202-586-9581.

ABSTRACT

The Environmental Regulatory Update Table provides information on regulatory initiatives of interest to DOE operations and contractor staff with environmental management responsibilities. The table is updated each month with information from the Federal Register and other sources, including direct contact with regulatory agencies. Each table entry provides a chronological record of the rulemaking process for that initiative with an abstract and a projection of further action.

*RU numbers are identifiers that are assigned to each regulatory initiative for tracking purposes. The first three digits are coded to the statute, and the last three digits are specific to individual initiatives. The update table is first organized by statutes as shown above and then by RU numbers arranged sequentially. An index is provided at the end of the table to relate CFR citations to RU numbers.

Regulatory Highlights - September, 1991

1. Toxic Chemical Release Reporting; Pollution Prevention Information - Proposed Rule

Section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) requires certain facilities that manufacture, import, process, or otherwise use toxic chemicals listed in 40 CFR 372.65 to report annually on releases of these chemicals to the environment. The implementing regulations spelling out the data to be reported and a notice of availability of Form R, the mechanism used by EPA for collecting the information, are found in 40 CFR 372.85. In response to Section 6607 of the Pollution Prevention Act of 1990 (PPA), EPA is issuing a proposed rule to incorporate mandatory pollution prevention information into the Section 313 reporting requirements at 40 CFR 372.85. Specifically, the PPA requires Section 313 facilities to provide source reduction and recycling data and gives EPA authority to amend Form R to accomplish data collection on these activities. EPA's proposal would require reporting of several new data elements including: (1) the amount (pounds/year) of the toxic chemical entering any wastestream or otherwise released to the environment prior to recycling, treatment, or disposal in the reporting year and the prior year, and the quantity expected in this category for the two years following the reporting year; (2) the amount of the toxic chemical exiting a recycling process on-site in the reporting year and the prior year, the amount expected to be recycled on-site in the two years following the reporting year, and an indication of the recycling process used; (3) the amount of the toxic chemical sent off-site for recycling in the reporting year and the prior year, the amount expected to be sent off-site for recycling in the two years following the reporting year, and an indication of the recycling process used; (4) the amount of the toxic chemical entering treatment on-site and the amount sent off-site for treatment in the reporting year and previous year; and (5) an indication of whether source reduction activities were applied to the reported toxic chemical. These reporting elements, among others, would be required for the 1991 reporting year in accordance with the PPA. However, beginning with the 1992 reporting year, the Agency proposes to phase in more detailed reporting for on-site recycling activities including reporting of all on-site recycling processes used. In addition to the proposed regulations, EPA publishes the draft revised sections and corresponding instructions for Form R which are to implement the collection of the proposed reporting requirements. EPA is requesting comments on all aspects of the proposed rule by November 12, 1991. (9-25-91, 56 FR 48475, RU# 190-057)

Form R reports are due July 1 of the year following the reporting year (e.g., July 1, 1992 for reporting year 1991). In a separate notice (9-26-91, 56 FR 48795), EPA announces that voluntary revisions to Form R must be submitted by November 30 each year in order for the revisions to be included in the initial annual release of the Toxic Release Inventory. The Agency also indicates that revisions to prior year reports which update information on facility identification do not need to be submitted. The notice is effective November 30, 1991.

2. Protection of Archaeological Resources; Uniform Regulations - Proposed Rule

Under Section 10(a) of the Archaeological Resources Protection Act of 1979 as amended, a group of federal agencies (Department of the Interior, Department of Agriculture, Tennessee Valley Authority, and Department of Defense) proposes a rule to implement changes in the uniform regulations mandated by the 1988 amendments to this Act. Section 10(a) of the Act requires the Secretaries of the Interior, Agriculture, and Defense and the Chairman of the Tennessee Valley Authority, after consultation with other federal land managers, Indian tribes, representatives of concerned state agencies, and after public notice and hearing, to promulgate uniform regulations to carry out the purposes of the Act. The five areas amended by this proposed rulemaking include: (1) a lower threshold for felony violations of the Act, (2) public awareness programs, (3) archaeological surveys and schedules, (4) the Secretary of Interior's report, and (5) improved guidance to federal land managers about treatment of human remains and directly associated material remains. The felony threshold limit was reduced by the 1988 amendments from \$5,000 to \$500. Violations above this limit carry a fine of not more than \$20,000 or imprisonment for not more than 2 years, or both. Federal land managers are encouraged to incorporate public awareness about archaeological protection into their programs. All federal land managing agencies are encouraged to prepare schedules for surveying lands under their control that are likely to contain the most scientifically valuable archaeological resources. Guidance for these activities is provided by the Secretary of the Interior's Standards and Guidelines for Archaeology and Historic Preservation. Each federal land manager will submit any available information on surveys, schedules, and suspected violations when the Secretary of the Interior requests information to use in his annual comprehensive report. In determining custody of human remains and directly associated material remains, the federal land manager will consult with official representatives of Indian tribes or other Native American groups along with other appropriate interest parties, including archaeological authorities, before making a decision. The relationship of the Indian tribe, group, or individual with the remains will be considered in making a determination. If such a determination gives custody of remains to the requestor, the manner of disposition will be specified in a written agreement between the federal land manager and the person/group receiving custody. Failure to comply with the terms of the agreement will result in its cancellation and return of the remains to the federal land manager. Written comments will be accepted on this proposed rule until December 10, 1991. (9-11-91, 56 FR 46259, RU# 090-001)

EPA will consider the new data in making its final decision whether or not to list used oils as hazardous waste as proposed in November, 1985. EPA also proposes listing as hazardous four wastes from the reprocessing and re-refining of used oil. Finally, EPA provides additional information on the proposed used oil management standards for recycled oil under Sect. 3014 of RCRA.	Comments by 11/7/91. Final rule 5/92.

Certain small-quantity containers will be exempted. A test protocol will be proposed to determine whether hazardous or free liquids solidified by accepted absorbents would release free liquids under landfill pressures, and "biodegradable absorbents" will be defined. These rules will not apply to owners or operators of landfills in which only PCB chemical waste regulated under 40 CFR 761 are disposed. PCBs mixed with a RCRA hazardous waste must comply with all requirements under both RCRA and TSCA.	Final rule 7/94.

In addition, this rule subjects owners and operators of these devices to the general facility standards applicable to hazardous waste TSD facilities and subjects hazardous waste storage units at regulated burner facilities to part 264 permit standards. Finally, EPA promulgates a definition of sludge dryer and revises the definition of incinerator to explicitly exclude sludge dryers (as proposed 7/18/90, 55 FR 29230). EPA also takes final action on two pending petitions by designating halogen acid furnaces as industrial furnaces and classifying coke and coal tar fuels produced by recycling coal tar decanter sludge as products rather than solid waste. EPA makes several technical amendments to the final rule for boilers and industrial furnaces burning hazardous waste to provide clarification and correct unintended consequences of the rule.	Final rule of 2/21/91 and technical amendment of 7/17/91 effective 8/21/91.
	Administrative stay	56 FR 43874 9/5/91	EPA announces an administrative stay of the 2/21/91 final rule as it applies to coke ovens burning hazardous waste from the coke by-products recovery process. The stay remains in effect until the rulemaking initiative to exclude such wastes from subtitle C jurisdiction when recycled is promulgated (see RU# 840-268).	Effective 8/21/91.
	Notice	56 FR 47959 9/23/91	EPA submits to OMB for review an information collection requirement entitled "Burning of Hazardous Waste in Boilers and Industrial Furnaces" associated with the technical amendment published 8/27/91.

180-111	National Priorities List - Eleventh Update 40 CFR 300	NPRM 56 FR 35840 7/29/91	EPA proposes to add 22 new sites to the National Priorities List (NPL) for uncontrolled hazardous wastes in the National Contingency Plan.	Final rule undetermined.
180-112	National Priorities List - Twelfth Update 40 CFR 300.66	Planned NPRM 56 FR 18058 4/22/91	EPA will propose to revise the National Priorities List (NPL) for uncontrolled hazardous waste sites in the National Contingency Plan. CERCLA requires the NPL to be updated at least annually.	NPRM 12/91.
180-113	Revisions to the NCP Required by the Oil Pollution Act 40 CFR 300	Planned NPRM 56 FR 18059 4/22/91	The Oil Pollution Act of 1990 requires that EPA prepare and publish revisions to the National Contingency Plan (NCP) for the removal of oil and hazardous substances to implement the requirements of the Oil Pollution Act. EPA will also consider new mandates, such as adding a Fish and Wildlife Plan and Area Contingency Plans.	NPRM 12/91.
180-114	National Contingency Plan - Lender Liability 40 CFR 300	NPRM 56 FR 28798 6/24/91	EPA proposes to interpret the CERCLA term, "security interest exemption," to clarify the range of activities that may be undertaken by a private or governmental lending institution or other entity that holds a security interest in a facility in the course of protecting the security interest, without being considered to be participating in the facility's management and thereby voiding the exemption.	Final rule undetermined.

*190-048	Superfund Response Action Contractor Indemnification	Proposed policy 54 FR 46012 10/31/89	EPA issues a proposed guidance document to implement Sect. 119 of CERCLA as amended by SARA. Sect. 119 provides the President with discretionary authority to indemnify response action contractors (RACs) for negligent releases arising out of response action activities at sites on the NPL and removal action sites. As delegated by the President, EPA may also extend indemnification to states (or a political subdivision) and potentially responsible parties (PRPs).	<u>Final guidance document 1/92.</u>
190-051	Toxic Chemical "Peak Release" Reporting Rule (Revision) 40 CFR 372	Planned NPRM 56 FR 17997 4/22/91	EPA will propose to add a "peak release" report element to the Toxic Chemical Release Inventory Reporting Form. The proposal addresses the issue of obtaining more specific indication of the frequency and/or duration of releases in order to better assess risks to health and the environment.	NPRM on hold pending review of Pollution Prevention Strategy.

Methods would be added to measure toxicity in effluents and receiving waters, to measure mutagenicity, to monitor viruses in wastewaters and sludges, and to update citations to microbiological methods.	Final rule 11/91.
140-092	Oil Pollution Prevention 40 CFR 112	Planned NPRM - Phase I 56 FR 18020 4/22/91	EPA is pursuing a two-phase regulatory approach to propose changes to the oil spill prevention regulation. In Phase I, widely-accepted industry practices that are currently recommended practices in the regulation will be changed to required practices. To facilitate an inventory of facilities, a provision may be added requiring facilities to notify EPA of their existence.	Phase I NPRM 10/91, final rule 6/92.
		Planned NPRM - Phase II 56 FR 18059 4/22/91	The Oil Pollution Act of 1990 was passed requiring facility-specific contingency plans. As Phase II of this rule, EPA will implement the legislative mandate for facility response plans.	Phase II NPRM 2/92, final rule 8/92.

140-095	NPDES, Effluent Limitations, and Pretreatment Standards - Organic Chemicals, Plastics, and Synthetic Fibers Point Source Category 40 CFR 300.440 40 CFR 414	NPRM 55 FR 42332 10/18/90 Regulatory Agenda 56 FR 18009 4/22/91	EPA proposes to allow regulatory authorities to: (1) establish cyanide limitations and standards based on best professional judgement for elevated levels of non-amenable cyanide resulting from the complexing of cyanide at the process source of cyanide-bearing waste streams and (2) establish metals limitations and standards to accommodate low background levels of metals in non-"metal-bearing waste streams." EPA also proposes amendments to Appendices A and B to correct listing errors and an amendment to specify the method for determining BOD5 and TSS effluent limitations.	Final rule 2/92.
140-103	NPDES and Sludge Management State Programs - Indian Tribes 40 CFR 122 40 CFR 123 40 CFR 124 40 CFR 501	Planned NPRM 56 FR 18007 4/22/91	EPA will propose to establish requirements and procedures by which an Indian tribe may be treated as a state and be approved to administer the NPDES and/or sludge management program.	NPRM 10/91.
140-104	Treatment of Indian Tribes as States for Purposes of Section 404 40 CFR 230 40 CFR 233	NPRM 54 FR 49180 11/29/89 Regulatory Agenda 56 FR 18011 4/22/91	EPA proposes a rule that would: (1) establish requirements for determining eligibility of Indian Tribes to be treated as states for purposes of Sect. 404 of the CWA, and (2) if found eligible, allow for assumption of the dredge and fill permit program.	Final rule 12/91.
140-108	Shore Protection Act Section 4103(B) Regulations 40 CFR undetermined	Planned ANPRM 56 FR 18009 4/22/91	The EPA Administrator, in consultation with the Secretary of DOT, is considering regulations: (1) requiring that waste sources, receiving facilities, and vessels provide the means and facilities to assure that waste will not be deposited into coastal waters during handling; (2) requiring the submission and adoption of an operation and maintenance manual of procedures to prevent, report, and clean up waste deposits; and (3) installing of tracking systems if deemed appropriate. 140-109	Effluent Guidelines and Standards for the Waste Treatment Category 40 CFR Subchapter N	Planned NPRM 56 FR 18007 4/22/91	EPA is developing regulations that will cover centralized waste treatment (CWT) facilities that generally treat aqueous and liquid hazardous and non-hazardous waste as Phase I of this regulation. Phase II will regulate hazardous waste incinerators and landfill leachate discharges. EPA plans on collecting Phase II screening information in conjunction with the Phase I technical study.	NPRM 4/94, final rule 11/96.
140-110	Secondary Treatment Requirements for Municipal Discharge into Marine Waters 40 CFR 125	NPRM 56 FR 2814 1/24/91 Regulatory Agenda 56 FR 18011 4/22/91	EPA responds to statutory changes made to Sect. 301(h) of the CWA which governs secondary treatment waivers for municipal discharges into marine waters. EPA proposes changes to appendices A and B of Subpart G to simplify and revise the application requirements for waivers and permit renewals.	Final rule 1/92.
140-111	CWA Section 404 Program Definition 40 CFR 232.2(q)	Planned NPRM 56 FR 18008 4/22/91	This action would revise the definition of "waters of the U.S." by adding four examples to those currently contained under that definition. The intent is to clarify aspects of the current definition which define waters, "the use, degradation or destruction of which would or could affect interstate or foreign commerce," as waters of the U.S.	NPRM 7/92, final rule 10/92.
140-114	Bioconcentratable Contaminants	NOA 56 FR 13150 3/29/91	EPA announces the availability of the draft guidance document entitled "Assessment and Control of Bioconcentratable Contaminants in Surface Waters" to provide guidance to state and federal regulators on assessing and, where necessary, controlling the release of pollutants which, due to their chemical properties, accumulate in tissues of aquatic organisms.	Final guidance document 4/92.
140-115	Nationwide Permit Program 33 CFR 330	NPRM 56 FR 14598 4/10/91	The Corps of Engineers proposes to amend its nationwide permit program regulations and to issue 13 new nationwide permits, reissue the existing nationwide permits, and add new conditions to all of the nationwide permits. The Clean Air Scientific Advisory Committee reviewed the revised document and an EPA staff paper in January 1986. The Criteria Document may be used as a basis for review and revision of the MAAQS. EPA is assessing health and welfare information which has become available since the last revision of the standard. In order to retain a unified regulatory review package in light of the emerging data base on health and welfare effects associated with longer-term averaging times, EPA is continuing the standard review until such information is published and reviewed in an addendum to the criteria document. Two draft documents are available.	Complete review of criteria document on hold.
120-008	Stack Height Regulation 40 CFR 51.100	Planned NPRM 56 FR 18047 4/22/91	EPA plans to revise the stack height regulation in accordance with a 1/22/88 U.S. Court of Appeals decision which remanded two grandfathering provisions which allow dispersion credit, including credit for certain stack height increases.	NPRM 10/91.

EPA also grants a reconsideration of Subpart I concerning emissions from facilities licensed by NRC with respect to the issues of duplicative regulation and possible effects on medical treatment. EPA announces limited reconsideration of Subpart R regarding radon emissions from phosphogypsum stacks that requires disposal of phosphogypsum in stacks or mines. EPA proposes to modify the rule to, alternatively or in combination, (1) make no change to Subpart R, (2) establish a threshold concentration level of radium, (3) allow use of discrete quantities of phosphogypsum for R&D processes to remove radium from phosphogypsum, or (4) allow other alternative use of phosphogypsum. EPA also grants a limited compliance waiver that permits the continued agricultural use of phosphogypsum through the current growing season. EPA stays until 11/15/92, or until an earlier date on which a determination can be made, the effectiveness of Subpart I of 40 CFR 61, the WESHAPS for radionuclide emissions as applied to NRC-licensed facilities other than nuclear power reactors. Approximately 60,000 megagrams of VOCs are emitted annually from tank vessel loading operations.	NPRM 10/91. Final rule 11/92.
120-179	General Preamble - Requirements for Approval of SIP Submittals	Notice of draft document 56 FR 27257 6/13/91 Correction 56 FR 28959 6/25/91	EPA announces the availability of a staff working draft of the General Preamble for Title I of the Clean Air Act Amendments of 1990. The General Preamble is a compilation of requirements for SIP submittals and will form a universal discussion for all upcoming SIP approval actions.	Final document 12/91.
*120-180	Designation and Classification of Nonattainment Areas 40 CFR 81	Planned final rule 56 FR 18051 4/22/91	Title I requires that areas be designated attainment/unclassifiable or nonattainment and classify areas for ozone, carbon monoxide and PM-10. This action revises 40 CFR 81 by adding classifications of nonattainment areas and new nonattainment areas, and formalizes the designations, classifications, and boundaries for all pollutants. It will also cover additional nonattainment designations for lead and SO ₂ .	Final rule 10/91.
120-181	Guidance for Implementation of Sect. 112(g) - Modifications 40 CFR 63	Planned final guidance 56 FR 18053 4/22/91	Guidance is being developed in accordance with the requirements of Sect. 112(g) of the CAA Amendments of 1990 that will set de minimus levels for the 189 listed hazardous air pollutants and establish relative toxicity ranking for determinations of offsets.	Final guidance document 5/92.

120-182	Control Techniques and Guidelines CFR undetermined	Final guidance document 56 FR 18054 4/22/91	The CAA Amendments of 1990 require EPA to issue control techniques guidelines (CTGs) for these eleven source categories within three years of enactment: chemical manufacturing distillation operations and reactor processes, wood furniture and plastic parts manufacturing, web offset lithography, petroleum and industrial wastewater treatment, automobile refinishing, volatile organic liquid storage tanks, use of clean-up solvents at industrial plants, chemical manufacturing batch processes, and pesticides applications.	Final guidance document 11/93.
120-183	List of Substances and Threshold quantities 40 CFR 63	Planned NPRM 56 FR 18057 4/22/91	EPA must promulgate an initial list of 100 substances that, in the event of accidental release, are known to cause or be anticipated to cause serious adverse human health or environmental effects. EPA must establish a threshold quantity for each substance listed. EPA is as yet undecided about whether to promulgate under the CAA or CERCLA/SARA.	NPRM 11/91, final rule 11/92.
120-184	Prevention of Accidental Releases from Stationary Sources 40 CFR 63	Planned NPRM 56 FR 18057 4/22/91	EPA must promulgate regulations and guidance to provide for the prevention and detection of accidental releases from stationary sources. The regulations must require stationary sources to implement a risk management plan for detection and prevention of accidental releases where a regulated substance is present in quantities greater than a threshold amount.	NPRM 11/92, final rule 11/93.
*120-185	1991 Transportation-Air Quality Planning Guidelines	NOA 56 FR 43758 9/4/91	EPA announces the availability of the draft copy of the 1991 Transportation-Air Quality Planning Guidelines, including guidance on the development and implementation of transportation and other measures necessary to demonstrate and maintain attainment of the NAAQS.

700-022	HLW Disposal in Geologic Repositories - EPA and NRC Conforming Amendments 10 CFR 60	NPRM 51 FR 22288 6/19/86 Regulatory Agenda 56 FR 18345 4/22/91	NRC proposes to conform its regulations for disposal of high-level radioactive wastes in geologic repositories to EPA standards of September 19, 1985, as mandated by the NUPA.	On hold until 12/91, pending action on RU# 700-074.
700-069	Radiation Dose Criteria for Accidents at HLW Geologic Repositories (Operations Criteria) 10 CFR 60	Notice of receipt 55 FR 28771 7/13/90 Correction 55 FR 32639 8/10/90 Planned NPRM 56 FR 18352 4/22/91	NRC will propose to amend the regulations concerning radiation dose criteria. A central issue is the development of radiation dose criteria for a postulated accident that DOE would use to establish a limited access area for the high-level waste (HLW) geologic repository. In addition, a number of new definitions would be added.	NPRM undetermined; decision on action 11/91.
700-074	Definition of Term - High-Level Radioactive Waste 10 CFR 60	Petition for rulemaking 55 FR 51732 12/17/90	The states of Washington and Oregon request that NRC revise the definition of "high-level radioactive waste" so as to establish a framework and standards by which to determine whether reprocessing waste, e.g., certain waste stored at DOE's Hanford site, is high-level radioactive waste.	Rulemaking decision by 12/91.
700-076	Geologic Repository Operations Area Underground Facility Design - Thermal Loads	NOA 56 FR 33478 7/22/91	NRC announces the availability of the draft staff technical position (STP) on "Geologic Repository Operations Area Underground Facility Design - Thermal Loads." The STP was developed to provide regulatory guidance to DOE on acceptable methodologies for demonstrating compliance with 10 CFR 60.133(i).	Comments by 10/21/91.

740-003	Environmental Protection Standards for LLW Disposal 40 CFR 193 40 CFR 764	ANPRM 48 FR 39563 8/31/83 Planned NPRM 56 FR 18013 4/22/91	EPA intends to develop environmental radiation protection standards and/or guides for low-level radioactive (possibly including natural and accelerator produced) waste disposal to protect the public health and general environment from potential adverse effects from this activity. Criteria triggering regulations are being considered.	NPRM 12/91. Final rule 12/92.
740-004	LLW Below Regulatory Concern 10 CFR 2 10 CFR 20	ANPRM 51 FR 43367 12/2/86 Policy statement 55 FR 27522 7/3/90 Deferral of action 56 FR 21631 5/10/91 Deferral of action; initiation of consensus process 56 FR 36068 7/30/91	NRC may amend its regulations to address radioactive waste disposal when low radionuclide quantities do not merit regulation as radioactive material. A generic rulemaking is favored over current petitions for exemption of specific wastestreams. NRC issues its policy statement on exemptions from regulatory control for small quantities of radioactive material. The statement defines the dose criteria and other considerations that will be used by NRC in making exemption decisions. Individual dose criteria of 1 and 10 mrem per year and a collective dose criterion are established. NRC declares a moratorium on the implementation of its 7/3/90 below regulatory concern (BRC) policy statement and is initiating a consensus process to provide advice to the Commission on the full range of issues related to the BRC policy.	Policy statement effective 7/3/90. NPRM on hold indefinitely until consensus-building process is completed.
740-013	Incineration of Low-Level Radioactively Contaminated Waste Oil from Nuclear Power Plants 10 CFR 20	NPRM 53 FR 32914 8/29/88 Request for clarification 53 FR 48721 12/2/88 Regulatory Agenda 56 FR 18359 4/22/91	NRC proposes to amend its regulations to permit the onsite incineration of slightly contaminated waste oils generated at licensed nuclear power plants. EPA requests of NRC clarification of two issues: (1) the responsibility of NRC's licensees complying with the approval requirements of the Clean Air Act, and (2) the potential need for licensees obtaining state or federal hazardous waste permits.	Final rule on hold indefinitely until consensus-building process is completed.

The proposed amendments would lower the permissible exposure level for formaldehyde from the existing level of 1 ppm as an 8-hour time-weighted average to 0.75 ppm. OSHA also proposes to add medical removal protection provisions to supplement the existing medical surveillance requirements for those employees suffering significant eye, nose, throat, or dermal irritation. In addition, certain changes are proposed to the standard's hazard communication and employee training requirements. These amendments would establish specific hazard labeling requirements for solid materials capable of off-gassing formaldehyde between 0.1 and 0.5 ppm and those off-gassing above 0.5 ppm under reasonably foreseeable conditions of use.	Effective date for hazard communication provisions 12/20/88. Amendments effective 7/13/89. Administrative stay of hazard communication requirements effective until 11/6/91. Final rule undetermined.

OSHA has since received many comments regarding the appropriateness of regulating nonasbestiform tremolite, anthophyllite, and actinolite as presenting the same health risk as asbestos. OSHA has granted administrative stays of the standards as they apply to nonasbestiform varieties to allow time for OSHA to reopen the rulemaking record on the issue of whether, and how, to regulate occupational exposure to the nonasbestiform varieties. OSHA makes minor conforming amendments and extends the partial administrative stay of the revised final standards for occupational exposure as they apply to nonasbestiform tremolite, anthophyllite, and actinolite.	Asbestos forms made effective 7/21/86. Administrative stay for other forms extended to 2/28/92.
			OSHA proposes to lift the administrative stay, remove 29 CFR 1910.1101, and amend the revised asbestos standards to remove non-asbestiform tremolite, anthophyllite, and actinolite from their scope.	Final rule 2/92.

HISTORIC SITES ACT OF 1935				
410-004	National Natural Landmarks - Designation of Geological and Ecological Natural Areas 36 CFR 62	ANPRM 55 FR 43384 10/29/90 Planned NPRM 56 FR 17445 4/22/91	The National Park Service intends to amend its regulations governing the identification, notification, evaluation, nomination, and designation of geological and ecological natural areas as National Natural Landmarks (NWLs) to ensure that landowners are fully not tied and provided full program disclosure and an understanding of the consequences of NWL designation before agreeing to it.	MPRM 10/91.
BIOTECHNOLOGY				
*110-005	Microbial Products 40 CFR 704 40 CFR 720 40 CFR 721	Planned NPRM 56 FR 17999 4/22/91	EPA is proposing to amend its definition of "small quantities solely for research and development" and to amend reporting requirements for persons who are using microorganisms. EPA will establish a special notification mechanism for experimental releases of microorganisms. EPA also is proposing significant new use notification requirements under TSCA Sect. 5(a)(2).	MPRM 11/91, final rule 11/92.
PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION				
*810-009	Power Plan Amendments - Columbia River Basin	Notice 56 FR 23947 5/24/91	The Pacific Northwest Electric Power and Conservation Planning Council invites recommendations to amend the resident fish and wildlife provisions of the Columbia River Basin Fish and Wildlife Program.	Final action by 9/15/92.
		Notice of final amendments 56 FR 47819 9/20/91	The Pacific Northwest Electric Power and Conservation Planning Council amends the Columbia River Basin Fish and Wildlife Program provisions affecting salmon and steelhead fish (anadromous fish).

COASTAL ZONE MANAGEMENT ACT				
160-002	National Estuarine Reserve Research System 15 CFR 921	NPRM 53 FR 43816 10/28/88 Interim final rule 55 FR 29940 7/23/90 Regulatory Agenda 56 FR 17147 4/22/91	NOAA revises the process for designation of research reserves to place greater emphasis using the reserves to address research and management issues and to provide financial assistance to states to enhance public awareness and education about estuarine areas. The regulations provide new guidance for delineating reserve boundaries, new procedures for the acquisition of land, and criteria for withdrawing the designation of a reserve.	Interim final rule effective 7/23/90. Reproposed NPRM 9/91, final 12/91.
160-003	Implementation of 1990 Reauthorization of Coastal Zone Management Act	Planned NPRM 56 FR 17149 4/22/91	NOAA is pursuing a phased rulemaking to implement the Coastal Zone Management Act Reauthorization Amendments of 1990. Phase I will include the Coastal Zone Enhancement Grants and the new provisions on program evaluation. Phase II will include program approval requirements for the new coastal nonpoint pollution control programs.	Phase I NPRM 10/91.
OTHER		NOA 55 FR 27618 6/14/91 Correction 56 FR 28959 6/25/91	EPA issues proposed guidance specifying management measures for the control of non-point sources causing coastal water pollution.	Final guidance 5/92.
	805-023 Assessing Female Reproductive Risk	Proposed guidelines 53 FR 24834 6/30/88	EPA proposes guidelines for assessing the female reproductive risk of environmental pollutants. The guidelines are intended to guide Agency analysis of data on female reproductive toxicants according to appropriate scientific standards.	Final guidelines 1/92.

805-024	Assessing Male Reproductive Risk	Proposed guidelines 53 FR 24850 6/30/88	EPA proposes guidelines for assessing the male reproductive risk of environmental pollutants. The guidelines are intended to guide Agency analysis of data on male reproductive toxicants according to appropriate scientific standards.	Final guidelines 1/92.
*805-028	Risk Assessment Guidelines for Exposure-Related Measurements	Proposed guidelines 53 FR 48830 12/2/88 Corrections 54 FR 4942 1/31/89	EPA proposes risk assessment guidelines for exposure-related measurements to assist those who must recommend, conduct, or evaluate an exposure assessment.	Final guidelines 1/92.
805-037	Protection of Essential Resources and Facilities 44 CFR 335	NPRM 54 FR 32359 8/7/89 Regulatory Agenda 56 FR 18082 4/22/91	FEMA proposes to add a new Part 335 to 44 CFR which would cover federal agencies' responsibilities in assessing vulnerability and protecting essential resources and facilities, including those needed for defense.	Final rule undetermined; no schedule for action.
*805-041	Task Force on Wetlands - No Net Loss Strategy	Notice 55 FR 30279 7/25/90 NOA 56 FR 8560 2/28/91	The Domestic Policy Council's Task Force on Wetlands requests comments on strategies for attaining "no net loss" of wetlands. DOE is represented on the Council.	Series of policy recommendations (regulations or executive orders) planned. First initiative 10/91.
805-047	WAPA's Energy Planning and Management Program	Proposed Program 56 FR 16093 4/19/91	WAPA proposes to establish an Energy Planning and Management Program to replace its Guidelines and Acceptance Criteria for the Conservation Renewable Energy Program.	Final action undetermined.

IRIS DATABASE UPDATE

A DOE EH-231 Memorandum entitled *Integrated Risk Information System (IRIS) and Availability of Chemical Risk Assessment Guidance* was distributed in June 1991 to DOE Program Offices and Field Organizations. Attachment 1 to the memorandum, an ORNL-ESD report discussing access to and utilization of the *IRIS* online database, included "Table 1. *IRIS* Chemicals With Reference Doses and Carcinogen Assessments." The *IRIS* database has been updated extensively since the table was generated. The following updated version of Table 1 includes all the chemicals listed in Table 1 along with additions/changes to the database as of August 31, 1991. All additions/changes have been shaded for ease of identification. Future issues of the *Environmental Regulatory Update Table* will include updates to the *IRIS* database during the previous month.

IRIS CHEMICALS WITH REFERENCE DOSES AND/OR CARCINOGEN ASSESSMENTS

(IRIS values current through August 31, 1991. There have been no changes to the IRIS values since the August issue of the *Environmental Regulatory Update Table*).

EPA CARCINOGENICITY GROUPS

A = HUMAN CARCINOGEN

B1 = PROBABLE HUMAN CARCINOGEN
Limited evidence in human studies

B2 = PROBABLE HUMAN CARCINOGEN

Sufficient evidence from animal studies, inadequate evidence or no data from human studies

C = POSSIBLE HUMAN CARCINOGEN

D = NOT CLASSIFIABLE AS TO HUMAN CARCINOGENICITY
