Table of Contents and Highlights

INTERNATIONAL

	Page
Iran: Crude Oil Capacity, Production and Shut-in, 1974 — Estimated production held at about 1.5 MMBD in July, according to DOE/IA estimates, but capacity has probably dropped to 3.0 MMBD. Assuming that domestic consumption was about 700 MBD, exports averaged around 800 MBD.	4
Saudi Arabia: Crude Oil Capacity, Production and Shut-in, 1974 — Saudi Arabia held its production at an estimated 9.8 MMBD in July. ARAMCO's temporary ceiling remained at 9.5 MMBD, and .3 came from the Neutral Zone. The shut-in remained at zero.	6
OPEC (Ex-Iran and Saudi Arabia): Capacity, Production and Shut-in, 1974 — The rest of OPEC was estimated to be producing 14.97 MMBD in June, with about 4.3 MMBD shut-in.	8
Non-OPEC Free World and U.S. Production of Crude Oil, 1973 — Non-OPEC crude oil production was 18.525 MMBD in May. The bulk of the increase over the past 12 months (May 1979–May 1980) was in Mexico and the North Sea. U.S. production rose by 135 MBD. Other Non-OPEC nations registered an increase of 220 MBD.	10
Oil Stocks: Free World, U.S., Japan and Europe (Landed), 1973 — U.S. stocks rose to 1.37 billion bbl and Japanese stocks dropped to 414 million bbl for 1Q80. DOE/IA estimates that world stocks for 1Q80 were 4.2 billion bbl. Data for Europe (Big Five) not yet complete.	12
Petroleum Consumption by Industrial Countries, 1973 — Figures for January and February 1980 show the industrial countries with a much lower seasonal peak than 1979 — down over 5 MMBD. The adjusted 12-month moving average for the IEA countries plus France continues the downward movement begun in November 1979.	14
USSR Crude Oil Production, 1974 — The graphic display shows the rate of change of USSR oil production. The May–June estimates indicate a continuation of sharp upward and downward movements, although the overall rate of change continues down. Annual export figures include exports to both Bloc and Western countries.	16
Free World and U.S. Nuclear Generation Capacity, 1973 — Free World capacity rose in June following the opening of a new 957-MW reactor in France. The new total is 119,371 MW. The U.S. remains essentially unchanged.	18

	Page
UNITED STATES	
U.S. Imports of Crude Oil and Products, 1973 —	20
In July, total U.S. imports dropped to 6.19 MMBD. The 12-month moving average, based on adjusted figures was down to 7.5 MMBD.	
Landed Cost of Saudi Crude in Current and 1974 Dollars	22
According to data derived from information provided to DOE, preliminary figures show that the landed cost of Saudi Light crude stood at \$29.22, another new high, in May. In 1974 dollars, there was another increase to \$17.62, representing a real increase between April 1974 and May 1980 of \$5.72.	
U.S. Trade in Coal, 1973 —	24
In June, exports rose again to 8.7 million short tons of bituminous coal, while imports dropped to 104,000 short tons. The 12-month moving average for exports was 6.3 million short tons in June, representing a steady rise since 3Q78.	
Summary of U.S. Merchandise Trade, 1976 —	26
The deficit dropped in June to \$2.28 billion, compared to almost \$4 billion in May 1980 and \$1.9 in June 1979. Manufactured goods showed a surplus of \$1.7 billion, and agriculture's surplus was \$1.96 billion. The deficit in energy dropped to \$5.95 from \$6.51 billion in May.	
Energy/GNP Ratio	28
First quarter 1980 preliminary figures follow the normal seasonal pattern. The moving average dropped to 53.36. NOTE: Annual figures from 1973 on and quarterly figures for 1978 and 1979 have been revised to conform to those shown in the Monthly Energy Review for June.

*U.S. stocks include Strategic Petroleum Reserves which held about 91.7 million bbl as of January 31, 1980.

**Japanese stocks include government-owned strategic stockpiles. The amount was 33 million bbl at the end of 1979.

***Europe's "Big Five" include Germany, France, UK, Italy and the Benelux countries.

* Consumption is that of the first 19 IEA countries plus France. Australia and Portugal joined the IEA later but not yet included in the statistics.
* Except for the U.S., consumption excludes bunkers, refinery fuel and losses.
