INTRODUCTION

This bibliography is a compilation of the references cited in the following three reports that summarize the results of the State-Coupled Low Temperature Geothermal Resource Assessment Program for New Mexico, which has been jointly-funded by the State of New Mexico and the U.S. Department of Energy:

Icerman, L. and Starkey, A., eds., 1982, State-Coupled Low Temperature Geothermal Resource Assessment Program, Fiscal Year 1981: New Mexico Energy Institute at New Mexico State University, 297 pp.

Icerman, L., Starkey, A. and Trentman, N., eds., 1981, State-Coupled Low Temperature Geothermal Resource Assessment Program, Fiscal Year 1980: New Mexico Energy Institute at New Mexico State University, 404 pp.

Icerman, L., Starkey, A. and Trentman, N., eds., 1980, State-Coupled Low Temperature Geothermal Resource Assessment Program, Fiscal Year 1979: New Mexico Energy Institute at New Mexico State University, 286 pp.

The material is divided into three sections. A listing of the original contributions to the summary reports is given in Section I (p. 2). Section II (p. 7) contains an alphabetical compilation of the references that are cited in the original contributions to the summary reports. Section III consists of three parts containing reference lists for Quaternary and late-Pliocene geology (Part 1, p. 30), for Quaternary and late-Pliocene age dates and mining prospects (Part 2, p. 33), and for geoelectric studies in seven (electrical logging, electrical resistivity, electromagnetic, geomagnetic depth sounding-magnetic variation, induced polarization, magnetotelluric and telluric, self potential) categories (Part 3, p. 36). The material in Section III was originally collected by J.F. Callender and W.R. Seager (Part 1); A. Kudo, W.E. Elston, J.F. Callender, and G.P. Landis (Part 2); and G.R. Jiracek (Part 3).

SECTION I

Original contributions to the State-Coupled Low Temperature Geothermal Resource Assessment Program

- Callender, J.F. and Seager, W.R., 1980, Quaternary and late Pliocene geology, in State-Coupled Low Temperature Geothermal Resource Assessment Program, Fiscal Year 1979: New Mexico Energy Institute at New Mexico State University, p. 6/1-6/4.
- Chaturvedi, L., 1982, Locating geothermal anomalies using bottom-hole temperatures from oil and gas wells in New Mexico, in State-Coupled Low Temperature Geothermal Resource Assessment Program, Fiscal Year 1981: New Mexico Energy Institute at New Mexico State University, p. 2/1-2/21.
- Chaturvedi, L., 1981, Evaluation of the geothermal potential of the San Juan Basin in northwestern New Mexico, in State-Coupled Low Temperature Geothermal Resource Assessment Program, Fiscal Year 1980: New Mexico Energy Institute at New Mexico State University, p. 7/1-7/9.
- Chaturvedi, L., 1980, Geothermal hydrology, in State-Coupled Low Temperature Geothermal Resource Assessment Program, Fiscal Year 1979: New Mexico Energy Institute at New Mexico State University, p. 8/1-8/22.
- Chaturvedi, L., 1980, Analysis of geological and geophysical logs of two geothermal exploration wells drilled on NMSU land, Las Cruces, New Mexico, in State-Coupled Low Temperature Geothermal Resource Assessment Program, Fiscal Year 1979: New Mexico Energy Institute at New Mexico State University, p. 10/1-10/24.
