MASTER

FOREWARD

Since 1933, the Kansas-Oklahoma Division of the Mid-Continent Oil & Gas Association has had a standing committee on nomenclature to consider and provide names and determine the geographical extent for oil and gas producing areas in Oklahoma. Names of fields agreed upon by the committee are now used uniformly by state and federal agencies, oil companies and the press. The names and descriptions of Oklahoma fields approved at bimonthly meetings of the Nomenclature Committee are released by the Association soon after the meetings.

The Association recognized the need for a new index to Oklahoma oil and gas field names and has agreed to sponsor its publication. This "Index to Names of Oil and Gas Fields in Oklahoma, 1978" supersedes the index of 1968 and the subsequent supplements thereto.

The Association gratefully acknowledges the diligence of Mr. Joe L. Lacina, Research Chemist, Bartlesville Energy Technology Center, United States Department of Energy, Bartlesville, Oklahoma in compiling this index and appreciates the cooperation of the BETC in making this index possible.

William O. Pitts
Executive Vice President

INDEX TO NAMES OF OIL AND GAS FIELDS IN OKLAHOMA, 1978¹

Compiled from records of the
Kansas-Oklahoma Division
Mid-Continent Oil & Gas Association

by

J. L. Lacina²

ABSTRACT

This index contains the current and discontinued names of the oil and gas fields in Oklahoma. They are listed according to assignments made by the Oklahoma Nomenclature Committee of the Kansas-Oklahoma Division, Mid-Continent Oil and Gas Association. Also listed are some names which have been used locally or unofficially for certain areas. Included also are:

1. The date when the field was named.
2. The description of location by county, township, and section.
3. A statement as to the disposition of a field when it was combined with other fields.

INTRODUCTION

A complete listing of names of the oil and gas producing areas in Oklahoma is needed. The value of this has been proven many times by:

- The information it provides.
- The promptness with which an item can be found.
- Its use by the Corporation Commission of the State of Oklahoma, other agencies, and by the press.

This list of names of the oil and gas fields in the State of Oklahoma as of November 16, 1978 is a continuation, or update, to the one of December 19, 1968.

¹ Reference may be made to this report, provided its full title and the Association name are used.

² Research chemist, Bartlesville Energy Technology Center, United States Department of Energy, Bartlesville, Oklahoma.

Of the names listed, about 100 are either local or unofficial. The others have been officially assigned by the Kansas-Oklahoma Division, Mid-Continent Oil and Gas Association, through the Oklahoma Nomenclature Committee, which has compiled the locations of the fields and proposed many of the names. The information used in this index was taken from the records, or "blue sheets," issued by the Association which list the dates of the meetings at which the fields were officially named and described. These records were first published in 1944 and are still being issued soon after each meeting.

PREFACE TO INDEX

A. Dates of Names:

The date in the first column indicates, for most fields, when the respective field was officially named. For many of the older fields only the year, or the month and year, are given as obtained from available records of the discovery or "opening" of the field.

B. Field Name:

This comprises the active, as well as the discontinued names of the oil and gas fields in Oklahoma as of November 16, 1978. These are arranged alphabetically. Within each group the pages are numbered: A-1, A-2 and B-1, B-2, etc.

Names that are followed by (1941 list) or (1941 list disc.), and (OGS B 40-Q) or (OBS B.63) refer to:

- a. Alphabetical Index; Oil Pools in Oklahoma as of October 1, 1941. Adopted on January 17, 1942, by the Corporation Commission of the State of Oklahoma by Journal Entry No. 3611.
- b. Mills-Bullard, Mrs. B. Oil and Gas in Oklahoma - Digest of Oklahoma Oil and Gas Fields. Oklahoma Geological Survey Bulletin No. 40-Q, 1928.
- c. Skelton, Alan G., Skelton, Martha B. A Bibliography of Oklahoma Oil and Gas Pools. Oklahoma Geological Survey Bulletin No. 63, 1942.

Their descriptions and locations were taken from these sources, since there has been no official "blue sheet" issued on them by the Commission.

1. *Discontinued Names:

An asterisk, preceding a field name, indicates it is discontinued as an active field name. Most such field names have been active, but the areas became contiguous to older and larger fields. In place of a description, a brief statement indicates the date and the action taken by the Nomenclature Committee from the "Discontinuance blue sheets" issued by the Association. Some names are local and unofficial, and each is followed by a statement of information.

2. () Former Names of Fields:

The former field names of producing areas are given which have been combined with other field names, and are listed in parenthesis under such field names. Information concerning any such name may be found in the section of the list containing that name and noted with an asterisk.

C. County:

The county, or counties, in which the field is located.

D. Location:

Fields whose "active names" are in use are given briefly according to township-and-range and section numbers. Locations given are by township and range from the Indian meridian and its base line. Exceptions are the fields in the Panhandle of Oklahoma where the range is east from the Cimarron meridian and denoted as "ECM."

BASIC PROCEDURES FOR NAMING AND DESCRIBING THE FIELDS

A field is described by location according to the basic procedures of the Association. The first "Determinations of Uniform Procedure" were offered for study on December 6, 1945, and were unanimously adopted at a meeting on December 12, 1945, of the Oklahoma Steering Committee on Oil Field Names.

The basic procedures were amplified by action of the Oklahoma Steering Committee on April 8, 1948, following the report of the Special Study Committee on Basic Procedures. The system was studied further, and by resolution of the Oklahoma Nomenclature Committee, it was approved and adopted on June 20, 1957. A statement of the system from (MCM 19141-B), June 21, 1957, follows:

BASIC PROCEDURAL RULES OF THE OKLAHOMA NOMENCLATURE COMMITTEE

"The functions and activities of the Oklahoma Nomenclature Committee basically encompass studies and recommendations with respect to (1) the naming of oil and gas producing areas in the State of Oklahoma, (2) the establishing of surface descriptions of oil and gas producing areas in Oklahoma, and (3) the compiling of historical statistics and information concerning oil and gas producing areas in Oklahoma.

"The Oklahoma Nomenclature Committee concerns itself only with producing areas designated as 'fields,' 'districts,' and 'gas areas' -- and does not concern itself with common sources of supply, ordinarily denoted as 'pools'."

Definitions

"An oil and/or gas 'pool' is considered to be a single and separate common source of supply located in a single producing horizon.

"An oil and/or gas 'field' is considered to be a unified surface area underlaid by one or more oil or gas pools and is comprised of reasonably contiguous surface producing units.

"An oil and/or gas 'district' is comprised of a multiple number of scattered producing areas--all more or less adjacent and sometimes consisting of separate small oil and/or gas fields--which are grouped together as one general producing area for identification purposes.

"A 'gas area' is considered to be a large general area in which natural gas is produced from the same general source of supply. Producing units may or may not be contiguous but, area considered, must have a relative adjacency. Other oil and/or gas fields, producing from different horizons, may be contained within the general surface description."

Designation of Producing Areas

"Names of persons and companies shall not be utilized to designate oil and/or gas fields or districts, or gas areas.

"Directional prefixes -- 8 compass points -- may be made a part of a field or district name and shall be utilized where advisable.

"If there is a field or district with an established name within two miles (more or less) of a new discovery, the field or district name--with a directional prefix--may be utilized if deemed advisable.

"If there are no established fields or districts in the immediate area, the name of the nearest town, if within a reasonable distance, may be utilized.

"If no field or district or town name is available, established names of schools, churches, U.S.G.S. bench marks, or other prominent geographical landmarks may be utilized. ('Landmarks' as herein used shall be defined as having been in existence for a period of two or more years prior to the date of oil or gas production.) Streams are usually not sufficiently local, but stream names may be utilized in the absence of other more acceptable landmark names."

Description of Producing Areas

"Normally -- for description purposes -- 40 acres shall constitute an oil producing unit. A gas producing unit will normally cover either 160 acres or 640 acres, depending on the producing area involved.

"Location of producing units in a section shall be denoted by quarter-quarters or quarters described as NE, SE, SW, and NW (set forth in clockwise order). The terms E 1/2 and W 1/2 are acceptable -- but the terms N 1/2 and S 1/2 are not acceptable.

"Since well locations on producing units vary (especially in older producing areas), variations in the manner of describing producing units will arise and special situations shall be given special consideration.

"Acceptable normal descriptions of producing units -- covering normal variations of well location"

Revision and Extension of Producing Area Descriptions

"Generally speaking, the rule of 'contiguous forties' shall be followed in extending producing areas, but departure may be made from the contiguity rule when other cogent considerations support such action. Established spacing patterns shall be taken into consideration, but need not necessarily be followed unless the spacing exceeds 40 acres."

Creation of Districts

"The term 'district' shall be applied to oil and/or gas producing areas -- where scattered production exists -- when it is not deemed necessary or desirable to designate the areas as separate fields.

"If producing units in a given producing area are separated by one mile or more, the oil and/or gas producing area shall be designated and described as a 'district'.

"Where a 'district' is created to include scattered producing areas in a single named area, well-defined 'fields' with established names located inside the area need not necessarily be included in the 'district'. (A 'district' may thus surround a 'field'.) "

Creation of Gas Areas

"The use of the term 'gas area' is approved in respect to a large general area in which natural gas is produced from the same general source of supply. Producing units must have a relative adjacency, although it is not necessary that they be contiguous.

"When a 'gas area' is created, well-defined 'fields' located inside (or discovered inside) the area -- which produce from different horizons -- need not necessarily be incorporated in the 'gas area' description. (Oil and/or gas 'fields' may thus be contained within the general surface description of a 'gas area'.)"

Combination and Realignment of Fields and Districts

"Generally speaking, when fields and/or districts are combined, the name of the most prominent field or district shall be selected. Departures may be made from this rule if the most prominent name does not conform to other approved nomenclature procedures.

"An old producing area, comprised of several fields and scattered individual wells, may be re-designated as a 'district' and the most prominent field name or an appropriate town name shall be utilized.

"If it is found advisable to divide an old producing area into two or more fields or districts, (a) the present producing area name shall be used for one of the fields or districts; and (b) the other fields or districts shall, where practicable, be identified by a 'directional' name embodying the old name."
