BIBLIOGRAPHY OF ARTICLES ON RADIOACTIVE WASTE
from 1973-78

By

Lois Martin Bronfman

with the assistance of

Emily Passino

Elaine G. Llewellyn

Polly Purnell

This bibliography is a supplement to a study on the content of public information on radioactive waste. The articles were collected for the period 1973-78, a time in which radioactive waste management emerged as an important policy issue confronting the nation.

The bibliography distinguishes between information sources based on the different interests which the audiences to the publications might represent in the controversy over radioactive waste management. The major categories chosen were: national press, A1; general scientific press, A2; nuclear scientific press, A3; nuclear industry/utility, A4; environmental press, A5; and local press, A6.

The search for articles on radioactive waste involved several steps. For discussions of radioactive waste in popular sources the Reader's Guide to Periodical Literature as well as the New York Times Data Bank were consulted. All articles mentioning radioactive waste and indexed for the period between January 1973 to June 1978 were included in the bibliography. To search out articles in the more specialized information sources (e.g., Nuclear News, Science, Critical Mass), the Central Research Library and the Energy and Environmental Response Center Library at Oak Ridge National Laboratory as well as the personal libraries of some of ORNL's staff were used. A spectrum of journals and newsletters from each specialized source was sought. Each journal selected was searched for radioactive waste articles appearing during the 1973 through 1978 period. In addition the former Office of Waste Isolation of the Department of Energy made available its newspaper clippings from local newspapers in the states in which OWI was taking steps to determine the suitability of selected sites for hosting a radioactive waste repository. In this bibliography articles which appeared in local newspapers in Michigan and Louisiana were included for the years 1976 and 1977, a time of considerable controversy within these states over the OWI's actions.
