Availability of Reference Materials Cited in NRC Publications

Most documents cited in NRC publications will be available from one of the following sources:

- 1 The NRC Public Document Room, 1717 H Street, N W
Washington, DC 20555
- 2 The Superintendent of Documents, U S Government Printing Office, Post Office Box 37082,
Washington, DC 20013-7082
- 3 The National Technical Information Service, Springfield, VA 22161

Although the listing that follows represents the majority of documents cited in NRC publications it is not intended to be exhaustive.

Referenced documents available for inspection and copying for a fee from the NRC Public Document Room include NRC correspondence and internal NRC memoranda, NRC Office of Inspection and Enforcement bulletins, circulars, information notices, inspection and investigation notices, Licensee Event Reports, vendor reports and correspondence, Commission papers, and applicant and licensee documents and correspondence.

The following documents in the NUREG series are available for purchase from the GPO Sales Program: formal NRC staff and contractor reports, NRC sponsored conference proceedings, and NRC booklets and brochures. Also available are Regulatory Guides, NRC regulations in the *Code of Federal Regulations*, and *Nuclear Regulatory Commission Issuances*.

Documents available from the National Technical Information Service include NUREG series reports and technical reports prepared by other federal agencies and reports prepared by the Atomic Energy Commission, forerunner agency to the Nuclear Regulatory Commission.

Documents available from public and special technical libraries include all open literature items, such as books, journal and periodical articles, and transactions. *Federal Register* notices, federal and state legislation, and congressional reports can usually be obtained from these libraries.

Documents such as theses, dissertations, foreign reports and translations, and non NRC conference proceedings are available for purchase from the organization sponsoring the publication cited.

Single copies of NRC draft reports are available free, to the extent of supply, upon written request to the Division of Technical Information and Document Control, U S Nuclear Regulatory Commission, Washington, DC 20555.

Copies of industry codes and standards used in a substantive manner in the NRC regulatory process are maintained at the NRC Library, 7920 Norfolk Avenue, Bethesda, Maryland, and are available there for reference use by the public. Codes and standards are usually copyrighted and may be purchased from the originating organization or, if they are American National Standards, from the American National Standards Institute, 1430 Broadway, New York, NY 10018.

ABSTRACT

This document summarizes information relating to decontamination of the Three Mile Island Unit 2 (TMI-2) reactor building. The report covers activities for the period of June 1, 1979 through March 29, 1985.

The data collected from activity reports, reactor containment entry records, and other sources were entered into a computerized data system which permits extraction/ manipulation of specific information which can be used in planning for recovery from an accident similar to that experienced at TMI-2 on March 28, 1979.

This report contains summaries of man-hours, manpower, and radiation exposures incurred during decontamination of the reactor building. Support activities conducted outside of radiation areas are excluded from the scope of this report.

Computerized reports included in this document are:

- A chronological summary listing work performed relating to reactor building decontamination for the period specified.
- Summary reports for each major task during the period. Each task summary is listed in chronological order for zone entry and subtotaled for the number of personnel entries, exposures, and man-hours.

Manually-assembled table summaries are included for:

- Labor and exposures by department
- Labor and exposures by major activity

14. ABSTRACT (200 words or less)

This document summarizes information concerning decontamination of the Three Mile Island Unit 2 reactor building which was grossly contaminated as a result of the loss of coolant accident experienced on March 28, 1979.

Data collected from activity reports, reactor containment entry records, and other sources were placed in a computerized information retrieval/manipulation system which permits extraction/manipulation of specific data which could be utilized in planning for recovery activities should a similar accident occur in a nuclear generating plant. The information is presented in both computer output form and a manually assembled summarization.

This report contains only the man-hours spent and radiation exposure actually incurred during performance of tasks in radiation areas and does not include support activities outside of radiation areas. This report covers the period of activities from June 1, 1979 through March 29, 1985.

EVALUATION OF NUCLEAR FACILITY DECOMMISSIONING PROJECTS PROGRAM

THREE MILE ISLAND UNIT 2

Radioactive Waste and Laundry Shipments

1.0 INTRODUCTION

The Three Mile Island Unit 2 (TMI-2) nuclear power station is located near Middletown, Pennsylvania. TMI-2 is a pressurized water reactor rated at 959 MWe. The reactor began commercial operation on December 30, 1978.

On March 28, 1979, TMI-2 experienced a partial loss of coolant water which exposed the upper portion of the reactor. Resulting temperatures in the core region were in excess of 2500F causing considerable damage to the core and possibly to other reactor components.

Contaminated reactor coolant water was released to the reactor building basement and to the auxiliary and fuel handling buildings (Figures 1 and 2). This release resulted in gross contamination requiring extensive decontamination and waste handling operations to restore these buildings. Decontamination and repair activities have required many labor man-hours and man-rem of exposure.

Because of the vast quantity of data generated during decontamination, equipment recovery and waste handling activities, the U. S. Nuclear Regulatory Commission (NRC) requested that the data be assembled, analyzed, and entered into a computer data base for historical purposes. The information also serves as a comprehensive base line for future planning, estimates, and actions required should a nuclear facility be confronted with problems similar to those experienced at TMI-2.

Work within the scope of this report is being conducted under the Evaluation of Nuclear Facility Decommissioning Projects (ENFDP) program. The ENFDP program was originated in 1981 under the auspices of the NRC Office of Nuclear Regulatory Research and is currently administered through the Division of Engineering Technology.

UNC Nuclear Industries (UNC) is responsible for technical direction of the program and for preparation of documentation and summary comparisons of evaluated projects. See NUREG/CR-2522, "Evaluation of Nuclear Facility Decommissioning Projects," for a complete description of the Program Plan.

Under the ENFDP program, data is assembled in a form that permits input into a computerized decommissioning data system (DDS). A proprietary computer software package, MAPPER, provides a method for accumulation and manipulation of decommissioning performance information. MAPPER stands for Maintain, Prepare, and Produce Executive Reports.

- . Because of the volume and variety of information being collected at TMI-2, nine categories of ENFDP reports have been established and are as follows:

Volume 1 - Reactor Coolant System and Systems Decontamination

Volume 2 - Reactor Building Decontamination

Volume 3 - Reactor Defueling and Disassembly

Volume 4 - Auxiliary and Fuel Handling Building Decontamination

Volume 5 - Common Support Facilities and Systems Operations

Volume 6 - Plant Stability and Safety Activities

Volume 7 - Liquid Waste Handling

Volume 8 - Solid Waste Handling

Volume 9 - Radioactive Waste and Laundry Shipments

Periodic activity status and summary reports for these nine categories will be published as NUREG/CR-4315 Three Mile Island Unit 2 documents.

This report covers activities relating to reactor building decontamination for the period of June 1, 1979 through March 29, 1985.

Data have been collected from activity reports, reactor containment entry records and other sources and entered into the DDS.

This report contains summaries of personnel entries, exposures and manpower hours spent in radiation areas for the time period specified. Support activities outside of radiation areas are not covered by this report.

Additionally, summaries of labor and exposure by department and by activity have been manually-assembled and cross-checked with the computer output.

TOTALS:	21,526	666.186	60,822.06

The greatest number of personnel entries (9,671) and the greatest number of man-hours of labor (29,707.19) were associated with reactor building support outside of the containment. These activities primarily involved setup, maintenance and on-going support of the anteroom and air locks established for reactor building entries.

The greatest exposure by an individual activity is shown, by computer sort, as 77.642 man-rem for Reactor Building Support Activity. However, the next largest exposure listing is more significant. A total of 76.317 man-rem was expended over 502 personnel entries for data acquisition which included sampling, testing, television and photographic surveys of the reactor building.

3.0 DESCRIPTION OF COMPUTER REPORTS

The computer reports included in this document are:

3.1 TMI-2 Acronyms and Abbreviations

This report is a general report listing acronyms and abbreviations used in TMI-2 reports. All acronyms and abbreviations listed in this report are not necessarily used in this document but may be used in other volumes of NUREG/CR-4315.

3.2 TMI-2 Notes and Descriptions

This report describes the data by column found in the computer-generated activity reports. It also includes a listing of department code abbreviations.

3.3 Activity Report - Reactor Building Decontamination (chronological listing)

This report summarizes data on personnel entries, radiation exposure, and labor man-hours spent in radiation areas during reactor building decontamination. Each line of this computer report is in chronological sequence and represents a task performed by various department personnel.

3.4 Activity Report - Reactor Building Decontamination (individual work activities)

This report summarizes data on personnel entries, radiation exposure, and labor man-hours spent in radiation areas by each major work activity. Each major activity is sorted for compilation and subtotaled.

4.2 TMI-2 Notes and Descriptions

PNO 1
 TMI-2 UNC DDS - ACTIVITY REPORT - TMI-2 NOTES AND DESCRIPTIONS M 286 D
 * RWP RWP EXP TRCK PERS DEPT EXPOS RWP
 * DATE NUMBER NUMBER ACTIVITY ENTRNG CODE REM HOURS TASK DESCRIPTION
 *-----

*DATA IN THIS REPORT ARE COMPLETE THROUGH MARCH 31, 1985 SUBSEQUENT DATA
 *WILL BE ANALYZED AND ADDED PERIODICALLY

*NOTES

*1 DESCRIPTION OF DATA IN EACH COLUMN,

* RWP DATE - THE DATE OF ISSUE OF THE RADIATION WORK PERMIT THE
 * PERMIT MAY COVER A SINGLE ENTRY OR MAY COVER ENTRIES
 * OVER A PERIOD OF TIME OF UP TO ONE WEEKS DURATION
 *
 * RWP NUMBER - RADIATION WORK PERMIT IDENTIFICATION NUMBER
 *
 * EXP TRCK NUMBER-EXPOSURE TRACKING NUMBER - AN IDENTIFICATION NUMBER
 * ASSIGNED TO A SPECIFIC ACTIVITY
 *
 * ACTIVITY - DESCRIPTION OF AN ACTIVITY OR THE LOCATION OF A
 * TASK WITHIN AN ACTIVITY
 *
 * PERS ENTRG - NUMBER OF PERSONNEL ENTERING A RADIATION AREA OR
 * PERFORMING WORK WHICH IS COVERED BY AN RWP
 *
 * DEPT CODE - A PERSONNEL ACCOUNTING CODE FOR FUNCTIONAL
 * DEPARTMENT IDENTIFICATION (SEE NOTE 2)
 *
 * EXPOS REM - ACTUAL RADIATION EXPOSURE, IN REM, RECORDED ON TLDS
 * WORN BY EMPLOYEES DURING PERFORMANCE OF A TASK WHICH
 * IS COVERED BY AN RWP AN EMPLOYEE MAY WORK ON AN RWP
 * COVERED TASK FOR SEVERAL HOURS AND RECEIVE NO MEASUR-
 * ABLE RADIATION EXPOSURE
 *
 * RWP HOURS - TIME SPENT ON A TASK INCLUDING JOB PREPARATION, DRESS-
 * UNDRESS, ETC RECORD WAS INITIATED IN NOVEMBER, 1979

* TASK DESCRIPTION - SELF EXPLANATORY

*2 DEPARTMENT CODE ABBREVIATIONS

* AD - UNIT-2 ADMINISTRATION
 * AM - ADMINISTRATION - UNIT 1
 * BS - UNIT-2 BUILDING SERVICES
 * CH - CHEMISTRY-UNIT 1
 * CM - UNIT-2 PLANT OPERATIONS MAINTENANCE - GENERAL
 * CN - CONTRACTOR (ALL CRAFTS)
 * CR - CORPORATE
 * DM - UNIT-2 DECON MAINTENANCE (REPLACED BY RECOVERY PROGRAM-RP)
 * EC - ELECTRICAL MAINTENANCE - UNIT 1
 * EG - ENGINEERING STAFF-UNIT 1

```

PNO      2
TMI-2    UNC   DDS - ACTIVITY REPORT - TMI-2 NOTES AND DESCRIPTIONS M 286 D

TASK DESCRIPTION
RADIATION SURVEY AND HP COVERAGE
OPERATE NLB PUMP/PERFORM MAINT
OPERATE NLB PUMP/PERFORM MAINT
OPERATE NLB PUMP/PERFORM MAINT
DECON RB DOME FROM POLAR CRANE
RADIATION SURVEY AND HP COVERAGE
REMOTE DECON - 282' LEVEL
TOOL AND TRASH REMOVAL
TOOL AND TRASH REMOVAL
TV SURVEY OF 282' ELEV
TV SURVEY OF 282' ELEV
POLAR CRANE DECON - GENERAL
POLAR CRANE DECON - GENERAL
POLAR CRANE DECON - GENERAL
POLAR CRANE DECON - GENERAL
POLAR CRANE DECON - GENERAL
RB ENTRY SUPPORT - ANTEROOM
RB ENTRY SUPPORT - ANTEROOM
RB ENTRY SUPPORT - ANTEROOM
RB ENTRY SUPPORT - AIRLOCK
POLAR CRANE PROTECTION
POLAR CRANE PROTECTION
LIFT RIG INSTALLATION
MODIFY LIFT RIG
RADIATION SURVEY AND HP COVERAGE
OPERATE NLB PUMP/PERFORM MAINT
OPERATE NLB PUMP/PERFORM MAINT
OPERATE NLB PUMP/PERFORM MAINT
OPERATE NLB PUMP/PERFORM MAINT
TRASH AND TOOL REMOVAL
TRASH AND TOOL REMOVAL
MODIFY LIFT RIG
EQUIPMENT PROTECTION - 347' LEVEL
RADIATION SURVEY/HP COVERAGE
OPERATE FS-V-639
RADIATION SURVEY/TLD PLACEMENT
RB ENTRY SUPPORT - AIRLOCK
RB ENTRY SUPPORT - AIRLOCK
RB ENTRY SUPPORT - ANTEROOM
RB ENTRY SUPPORT - ANTEROOM
OPERATE AND MAINTAIN NLB PUMP
OPERATE AND MAINTAIN NLB PUMP
OPERATE AND MAINTAIN NLB PUMP
OPERATE FS-V-639
OPERATE FS-V-639
REMOTE FLUSH - 282' LEVEL
RADIATION SURVEY/HP COVERAGE
POLAR CRANE DECON - GENERAL
POLAR CRANE DECON - GENERAL
RB ENTRY SUPPORT - AIRLOCK
