COMMENTS Bill provides for defining of hazardous radioactive materials, require 5 days prior notification (including proposed route), provides for approval of plans, and provides for notification of local officials along route. Directs the Office of Emergency Services to monitor the transportation of radioactive materials within the state. Approval would be supplied by the coordinator of the Office of Emergency Services.
ABSTRACT The Coordinator of the Office of Emergency Services (COES), by July 31, 1979, in conjunction with the Commissioner of the Virginia Department of Health, shall define and make public a list of those hazardous radioactive materials, the transportation of which may constitute a significant potential danger to the citizens of the Commonwealth of Virginia in the event of accidental spillage or release. No person shall transport, or cause to be transported, into, through, or within the Commonwealth of Virginia any hazardous radioactive materials as defined by the COES pursuant to 44-146.30 of this chapter unless such person has notified the COES no later than five days before the transport of such materials. Such notice shall include (1) the route proposed to be taken, (2) the proposed time of transportation, (3) the material to be transported, (4) the method of the proposed transportation, and (5) any additional information that may be required by the COES. The COES shall approve, disapprove or approve with conditions, any plans to transport hazardous radioactive materials and shall notify the person submitting such plan of its approval, disapproval or conditional approval, no later than forty-eight hours before the proposed time of transport. The COES, as soon as practical after approval of plans to transport hazardous radioactive material, and no later than twenty-four hours before the time of such transport begins, shall notify the appropriate official in such political subdivision through which such shipment shall pass of the route, time, and nature of the hazardous material to be transported. The Board of Health will promulgate rules and regulations governing the transportation of radioactive materials by January 1, 1980.
