## **Monthly Environmental Regulatory Update**

This report contains a monthly update of environmental regulatory activity that is of interest to the Department of Energy. It is provided to DOE operations and contractor staff to assist and support environmental management programs by tracking regulatory developments. Any proposed regulation that raises significant issues for any DOE operation should be reported to the Office of Environmental Guidance (EH-23) as soon as possible so that the Department can make its concerns known to the appropriate regulatory agency. Items of particular interest to EH-23 are indicated by a shading of the RU#.

Any questions or comments about any aspects of the Update Table should be directed to Lois Thompson, Air, Water, and Radiation Protection Division, Office of Environmental Guidance, U.S. Department of Energy (EH-23), (FTS) 896-9581, (Commercial) 202-586-9581.

## **ABSTRACT**

The Environmental Regulatory Update Table provides information on regulatory initiatives of interest to DOE operations and contractor staff with environmental management responsibilities. The table is updated each month with information from the Federal Register and other sources, including direct contact with regulatory agencies. Each table entry provides a chronological record of the rulemaking process for that initiative with an abstract and a projection of further action.

\*RU numbers are identifiers that are assigned to each regulatory initiative for tracking purposes. The first three digits are coded to the statute, and the last three digits are specific to individual initiatives. The update table is first organized by statutes as shown above and then by RU numbers arranged sequentially. An index is provided at the end of the table to relate CFR citations to RU numbers.

## **Regulatory Highlights - October, 1990**

### **1. Custody and Long-Term Care of Uranium and Thorium Mill Tailings Disposal Sites - Final Rule**

NRC finalizes a rule amending 10 CFR Part 40 to comply with Titles I and II of the Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978. The rule provides for two general licenses for the custody and long-term care of reclaimed or closed uranium or thorium mill tailings sites after remedial action or closure. Provisions in Title I pertain to "inactive" uranium mill tailings sites managed by DOE while those in Title II cover "active sites" licensed as of January 1, 1978 and new uranium and thorium mill tailings sites to be owned by the federal government or the state. The rule specifies requirements for long-term care licenses authorized by NRC [e.g., a detailed Long-Term Surveillance Plan (LTSP) prepared by the appointed custodial agency and submitted to NRC] that apply to sites after remedial actions (for Title I) or closure activities (for Title II) are adequate to meet closure requirements. The rule provides for a continuing surveillance procedure to be conducted by a state or federal government after remedial actions or closure activities to ensure that disposal sites remain in a good state. Allowances are made in both Titles for potential future uses of the disposal sites; a Title I site may dispose of any subsurface mineral rights, while at a Title II site surface as well as subsurface rights may be available for use. Due to the Amendments Act of 1988, licensing of Title I sites is allowed in two phases: (1) remedial actions including compliance with groundwater protection standards before September, 1994 and (2) indefinite time extension allowing groundwater restoration. The two-step licensing approach will be used in cases where the residual radioactive material has been stabilized in place. The stabilization and long-term care program for Title I sites occurs in four distinct phases: (1) selection and design of a disposal site, (2) performance phase when remedial actions are performed, (3) licensing phase, and (4) surveillance and monitoring beginning after NRC accepts the LTSP. Specific requirements for Title II sites are addressed in Appendix A, and Appendix A, Criterion 12 listing frequency of inspections is revised in the final rule. The effective date for this rule is November 29, 1990. (10-30-90, 55 FR 45591, RU# 930-035)

### **2. Waste Minimization Incentives - Notice and Request for Comments**

Sect. 1003(b) of RCRA establishes at 40 CFR Parts 260-266, 268, 270, and 271 a National Policy aimed at reducing or eliminating the generation of hazardous waste. In support of such a policy, EPA has implemented several measures toward waste minimization. The 1984 HSWA Amendments introduced two major changes in managing hazardous wastes to promote waste minimization: (1) land disposal restrictions (LDR) requiring BDAT before disposal, and (2) a policy placing more emphasis on waste minimization than on treatment and disposal. During the period that EPA is waiting to fully evaluate the effectiveness of LDR, EPA has been (1) developing a core technical

assistance program that encourages industry to initiate source reduction and recycling activities, (2) measuring and reporting progress to Congress and the public, and (3) assessing longer term options, including regulatory and other incentives for waste minimization. EPA has identified both potential impediments in the RCRA regulatory structure that may need correction and ways to promote waste minimization incentives within the RCRA regulatory process. At this time EPA is considering the advantages of additional incentives to reduce hazardous waste generation. In this notice, EPA inquires if current waste minimization measures are effective and whether additional approaches would successfully promote nationwide progress in minimization efforts. The main issue on which EPA seeks comments is whether current RCRA regulations impede waste minimization. The agency asks if it should change the definition of solid waste. EPA also requests comments on the effectiveness of non-regulatory incentive programs and which long-term options will enhance waste minimization in industry. In order to receive consideration, comments must be submitted by December 4, 1990.

(10-5-90, 55 FR 40881, RU# 840-292)

### **3. National Primary Drinking Water Regulations: Lead and Copper - Notice and Request for Comments**

EPA announces the availability of new analyses of information and supporting documentation being considered in the development of final NPDWRs and MCLGs at 40 CFR parts 141 and 142 for lead and copper in drinking water (NPRM 8-18-88). The analyses and supporting documents include: (1) survey data of the presence and number of lead service lines reported by public water systems, (2) analyses based on data on lead levels at household taps, and (3) an update of the National Inorganics and Radionuclides Survey which EPA is using to estimate the costs of controlling lead in drinking water. The Agency also makes available: (1) three documents on the laboratory analysis of lead and copper in drinking water, (2) an analysis on the projected costs to states of implementing the proposed regulations, and (3) a manual published by the American Water Works Association on lead control strategies. Various alternatives are being considered by EPA for the final rule. The Agency is considering applying the lead and copper action levels (an average lead level  $>0.010$  mg/L, a copper level in 5% of the samples  $>1.3$  mg/L, or a pH  $<8.0$  in 5% of the samples) as a trigger for corrosion control treatment only to systems serving less than 50,000 persons. For systems serving greater than 50,000 persons, EPA may require minimization of lead and copper levels at consumer taps and insurance that the treatment does not cause the water system to violate any NPDWRs. The option of specifying time periods under which systems and states would be required to conduct each step in the process of corrosion control and source water treatment is being weighed. EPA also seeks to decide whether to include a provision in the final rule which would authorize EPA to review state determinations of what constitutes optimal corrosion control and source water treatment in limited circumstances. Finally, for the final lead and copper NPDWRs, the Agency is considering requiring public water suppliers that have to install or improve corrosion controls to measure several water quality parameters to aid in the determination of corrosion control treatment. Several methods for measuring these parameters are under

consideration by EPA. EPA seeks comments on these options and the analyses and supporting documentation by 11-19-90. The analyses and documents are available from NTIS.

*840-171	Amendments to Groundwater Monitoring Regulations	NPRM 53 FR 28160 7/26/88 Regulatory Agenda 55 FR 45183 10/29/90	EPA proposes to amend Subpart F groundwater monitoring regulations to foster the early detection of leaks and to better tailor the current groundwater monitoring regulations to site-specific conditions.	Final rule 12/90.
*840-173	Solid Waste Test Methods (Manual SW-846 Third Edition - Update 1)	NPRM 54 FR 3212 1/23/89 NOA 55 FR 4440 2/8/90 Regulatory Agenda 55 FR 45181 10/29/90	EPA proposes to update the Third Edition of SW-846, incorporate it into the RCRA regulations, and mandate minimum QC procedures for all RCRA testing. EPA proposes a number of technical modifications and/or clarifications to the Third Edition of SW-846 and the inclusion of specific QC procedures in SW-846 which are described in the "Report on Minimum Criteria to Assure Data Quality." The Agency is also considering deleting appendices III and X to 40 CFR 261.	Final rule 11/90.
*840-175	Releases to Groundwater from Regulated Units - Corrective Action	Planned NPRM 55 FR 45177 10/29/90	These regulations will amend the technical and procedural requirements for conducting corrective action to clean up significant releases to groundwater from regulated hazardous waste units at operating, closed, or closing RCRA facilities and the requirements for implementing remedial action, remedy selection, and corrective measures.	NPRM placed on hold, pending action on RU# 840-133.
*840-176	Groundwater Monitoring - Hazardous Constituents	Planned NPRM 55 FR 45178 10/29/90	EPA will propose revisions to a list of hazardous constituents, Appendix IX of 40 CFR 264, for use in groundwater monitoring. This amendment would also create a new list for the first part (Detection Monitoring) of the groundwater monitoring program.	NPRM 11/90.

*840-185	UST - Financial Responsibility 40 CFR 280	ANPRM 53 FR 3818 2/9/88 Planned NPRM 55 FR 45180 10/29/90	EPA will propose to establish financial responsibility requirements for owners and operators of underground storage tanks (UST) containing hazardous substances. An exemption is to be proposed for federally owned tanks.	NPRM 9/91. Final rule 9/92.
*840-189	Wastes from the Combustion of Coal 40 CFR undetermined	NOA 53 FR 9976 3/28/88 Regulatory Agenda 55 FR 45172 10/29/90	EPA has issued "Report to Congress: Wastes from the Combustion of Coal by Electric Utility Power Plants," compiled in response to Sect. 8002(n) of RCRA. EPA will determine whether to regulate these wastes.	Regulatory determination postponed indefinitely.
*840-191	Municipal Waste Combustor Ash Management 40 CFR undetermined	Planned NPRM 55 FR 45174 10/29/90	EPA has determined a need to develop a management scheme for handling and disposing of municipal waste combustor ash. The Agency is considering various options for addressing concerns over fugitive dust emissions and groundwater contamination.	On hold, awaiting Congressional action.
*840-193	No-Migration Variance for Restricted Hazardous Waste Land Disposal 40 CFR 268	Planned NPRM 55 FR 45173 10/29/90	A regulation will be proposed that interprets the statutory requirements for making a "no-migration" demonstration that would allow the land disposal of untreated hazardous waste that has been restricted from land disposal. The regulation will define such terms as "no-migration," "responsible degree of certainty," "hazardous constituent," and "unit."	NPRM 12/90. Final rule 12/91.

(a) Nprm = Notice of Proposed Rulemaking; NOI = Advanced Notice of Proposed Rulemaking; NOA = Notice of Availability. \* Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicates item of special interest to EH-23.

<b>*840-223</b>	Definition of Wastewater Treatment Unit 40 CFR 280 40 CFR 270	NPRM 55 FR 29230 7/18/90 Regulatory Agenda 55 FR 45184 10/29/90	EPA proposes to amend the definition of "wastewater treatment unit" in 40 CFR 260.10 and 270.2 to clarify that thermal treatment units, except for sludge dryers, are not wastewater treatment units and are not thus exempt from RERA. The Agency also proposes a definition for "sludge dryers" that will clearly distinguish them from incinerators and other types of thermal treatment units.	<u>Final rule 1/91.</u>
840-225	State Solid Waste Management Program - New Jersey 40 CFR 256	NPRM 53 FR 40243 10/14/88	EPA proposes to approve the State of New Jersey Solid Waste Management Plan, subject to public review and comment.	<u>Final rule undetermined.</u>
*840-230	Underground Storage Tanks Containing Petroleum - Financial Responsibility Requirements 40 CFR 280 40 CFR 281	Interim final rule 55 FR 18566 5/2/90	EPA modifies the compliance dates under 40 CFR 280.91(c) to provide additional time for the development of financial assurance mechanisms, especially state assurance funds, for all petroleum marketing firms owning 13-99 USTs at more than one facility.	Interim final rule effective 5/2/90. Certification of compliance date extended to 4/26/91. <u>Final rule 7/91.</u>
	Regulatory Agenda 55 FR 45184 10/29/90		EPA proposes to add to the 10/26/88 final rule four alternative mechanisms for use by local governments to demonstrate financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden and nonsudden accidental underground storage tank releases.	
	NPRM 55 FR 27837 7/6/90		EPA amends the 10/26/88 final rule by modifying the compliance dates under 40 CFR 280.91(d) for all petroleum marketing firms owning 1-12 USTs, local government entities, and non-marketers whose net worth is less than 20 million dollars. EPA also extends the deadline for compliance with Subpart H - Financial Responsibility from 10/26/90 to 10/26/91 to allow additional time for the development of state financial assurance funds.	<u>Final rule effective 10/31/90. Final compliance date 10/26/91.</u>

## REGULATORY UPDATE TABLE - OCTOBER 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
840-231	Waste Minimization Program for Hazardous Waste Generators	Draft guidance document 54 FR 25055 6/12/89	EPA issues "Draft Guidance to Hazardous Waste Generators on the Elements of a Waste Minimization Program," intended to help generators comply with the certification requirements of Sects. 3002(b) and 3005(h) of RCRA/HSWA. The guidance is an application of the proposed source reduction and recycling policy statement (see RU# 840-232).	Final guidance document undetermined.
840-232	Pollution Prevention Policy Statement (Source Reduction and Recycling)	Proposed Policy Statement 54 FR 3845 1/26/89	EPA makes available for comments its proposed policy statement on pollution prevention. EPA's proposed policy encourages organizations, facilities, and individuals to fully utilize source reduction and recycling techniques in order to reduce risk to public health, safety, welfare, and the environment. See RU# 840-231 for draft guidance document that is an application of this proposed policy statement.	Final policy statement 12/90.
*840-238	State Hazardous Waste Management Program - Michigan	Notice 55 FR 45606 10/30/90	EPA publishes a compliance schedule for Michigan to modify its state hazardous waste management program. The schedule requires final adoption of these regulations by 3/1/91.	Final adoption of program revisions 3/1/91.

*840-244	Standards for the Tracking and Management of Medical Waste 40 CFR 259	Interim final rule 54 FR 12326 3/24/89 Notice; final rule amendments 54 FR 24310 6/6/89 NOA 55 FR 1770 1/18/90 Corrections 55 FR 27228 7/2/90 NOA 55 FR 28096 7/9/90 NOA 55 FR 43219 10/26/90	EPA publishes an interim final rule implementing the Medical Waste Tracking Act (MWTA) demonstration program. The program sets forth segregation, packaging, labeling, tracking, transportation, and recordkeeping requirements of medical waste generated in the covered states, and lists the wastes to be covered by the program. States participating in the program include NY, NJ, CT, RI, and Puerto Rico.	Interim final rule effective 6/22/89. Amendments effective 6/6/89. Tracking regulations effective 6/22/89 in NY, NJ, CT, effective 7/24/89 in RI and Puerto Rico. Corrections effective 10/1/90. Final rule undetermined.
*840-248	Revision of Subtitle C Financial Test Criteria 40 CFR 264 40 CFR 265	Planned NPRM 55 FR 45177 10/29/90	EPA proposes to revise financial test criteria that must be satisfied by owners and operators employing the test to demonstrate RCRA financial responsibility requirements. The anticipated revisions will adjust test criteria so as to increase availability of this assurance mechanism to viable firms and increase sensitivity to bankruptcy prediction.	NPRM 11/90. Final rule 6/91.
*840-251	Hazardous Waste Sump Requirements 40 CFR 260 40 CFR 264 40 CFR 265	Planned NPRM 55 FR 45178 10/29/90	EPA will propose to amend several hazardous waste tank system requirements as applied to existing sumps that are situated inside buildings and constructed as an integral part of the building's floor or foundation. Boeing Company is petitioning EPA to regulate these sumps independently of other hazardous waste storage/treatment tank systems because of differences in design, construction, and use.	NPRM 12/90. Final rule 12/91.

These wastes will be designated hazardous substances under CERCLA.	NPRM 1/91. Final rule 1/92.
*840-269	Technical Amendment to Final UST Rules For Overfill Prevention 40 CFR 280	NPRM 55 FR 17767 4/27/90 Regulatory Agenda 55 FR 45184 10/29/90	In response to a petition for rulemaking, EPA proposes to add a standard to the UST regulations to allow the use of overfill prevention equipment that can achieve certain levels of performance.	Final rule undetermined.
840-279	WIPP Conditional Variance from Land Disposal Restrictions 4/6/90	Notice of proposed decision 55 FR 13068 NOA 55 FR 19784 5/11/90	EPA proposes to grant a conditional variance from the land disposal restrictions to DOE for the WIPP in New Mexico based on EPA's tentative conclusion of no migration during the testing period.	Final action undetermined.
840-280	State Hazardous Waste Management Program - Oklahoma 40 CFR 271	Immediate final rule 55 FR 39274 9/26/90	EPA announces the availability of "WIPP Test Phase Plan: Performance Assessment," DOE/WIPP 89-011 Revision 0, and "Waste Retrieval Plan," DOE/WIPP 90-022.	Final authorization effective 11/27/90.
*840-286	Permit Modifications to Hazardous Waste Management Facilities 40 CFR 270.41	Planned NPRM 55 FR 45174 10/29/90	This amendment will allow EPA to modify a permit to correct an inadvertent omission of an applicable RCRA requirement which is in effect prior to the date of permit issuance. The permit correction would follow the modification procedures in 40 CFR 124. Citizens would be able to request such a correction using existing procedures in 40 CFR 124.5.	NPRM 12/90. EPA invites comments on issues they would need to address in the development of a national recycling program that would encourage or require recycling of ozone depleting compounds. This potential rulemaking is in response to an industry petition from the Alliance for a Responsible CFC Policy to develop such a program.

EPA proposes new visible emission test procedures to evaluate opacity standards compliance when a SIP lacks an appropriate method or when the Administrator enacts a state plan.

EPA will not expedite the review schedule for the primary and secondary NO<sub>2</sub> NAAQS, but will proceed on the normal review cycle to produce a revised criteria document. Completed research does not justify a separate short-term primary standard.

REGULATORY UPDATE TABLE - OCTOBER 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*100-222	Code and Standards for Nuclear Power Plants	Planned NPRM 55 FR 45486 10/29/90 10 CFR 50	NRC will incorporate by reference Subsection IWE, "Requirements for Class MC Components of Light-Water Cooled Power Plants," of Sect. XI of the ASME Code. Section IWE provides the rules and requirements for inservice inspection, repair, and replacement of Class MC pressure retaining components and their integral attachments and of metallic shell and penetration liners of Class CC pressure retaining components and their integral attachment in light-water cooled power plants.	NPRM 12/91.
*100-223	Pressurized Thermal Shock Rule	NPRM 54 FR 52946 12/26/89 Notice 55 FR 71 1/2/90 Regulatory Agenda 55 FR 45501 10/29/90	NRC proposes to revise the pressurized thermal shock rule of 1985 to make the procedure used to calculate the amount of reactor vessel embrittlement that a reactor vessel receives consistent with that given in Revision 2 of Regulatory Guide 1.99.	<u>Final rule 1/91.</u>
*100-224	Primary Reactor Containment Leakage Testing for Water-Cooled Reactors	NPRM 51 FR 39538 10/29/86 Regulatory Agenda 55 FR 45498 10/29/90	NRC propose to update and revise the 1973 criteria for preoperational and periodic pressure testing for leakage of primary containment boundaries of water-cooled power reactors in order to eliminate inconsistencies and obsolete requirements.	<u>Final rule 11/90.</u>

*100-247	Conforming Part 60 to EPA Standards	Planned NPRM 55 FR 45504 10/29/90	NRC will propose to modify and clarify the definitions of the terms "anticipated processes and events," "unanticipated processes and events," and "geologic setting" as they are used in the licensing requirements for disposal of radioactive wastes in geologic repositories.	Incorporated into RU# 700-022.
*100-248	Emergency Response Data System	NPRM 55 FR 41095 10/9/90	NRC proposes to require licensees to participate in the Emergency Response Data System (ERDS) program and to set a definite schedule for its implementation. The ERDS is a direct electronic data link between computer data systems used by licensees and the NRC Operations Center.	Comments by 12/24/90 Final rule 7/91.
*100-249	Requirements for Possession of Industrial Devices	Planned NPRM 55 FR 45489 10/29/90	NRC will propose to amend the regulations for the possession of industrial devices containing byproduct material to require device users to report to the NRC on a periodic basis. The proposed report would indicate that the device is still in use or to whom the device has been transferred, and so would assure that devices are not improperly transferred or inadvertently discarded.	NPRM 12/90. Final rule 12/91.

*100-250	Export of Heavy Water to Canada 10 CFR 110	Planned NPRM 55 FR 45503 10/29/90	NRC plans to amend the regulations concerning the import and export of nuclear equipment and material to allow NRC staff to act upon license applications for export of heavy water to Canada without prior consultation with the Commission. Current regulations require that license applications for the export of 1000 kilograms or more of heavy water to any country require review by the Commission.	Incorporated into RU# 100-275.
*100-252	Import and Export of Radioactive Waste 10 CFR 110	ANPRM 55 FR 4181 2/7/90 Planned NPRM 55 FR 45490 10/29/90	NRC will propose to regulate the import and export of radioactive wastes, in particular low-level wastes, in order to more properly control the international transfer of these wastes.	NPRM undetermined.
*100-253	DOE High Priority Defense Nuclear Facilities - Design, Construction, Operation, and Decommissioning Standards	Notice 55 FR 9487 3/14/90	The Defense Nuclear Facilities Safety Board has recommended to the Secretary of Energy that DOE identify the specific standards applicable to the design, construction, operation and decommissioning of certain DOE defense facilities at Savannah River, SC, Rocky Flats, CO, Hanford, WA, and the Waste Isolation Pilot Plant in New Mexico. The Board also asks that DOE review the adequacy of the standards and determine the extent to which they have been implemented. DOE publishes notice of the Secretary of Energy's response to Recommendation 90-2 of the Defense Nuclear Facilities Safety Board on high priority defense nuclear facilities.

The purpose of the amendments is to encourage private sector participation in the government's uranium enrichment program.	Final rule '92/90.
*100-258	Emergency Preparedness Regulations	Planned NPRM 55 FR 45491 10/29/90 10 CFR 50	NRC will propose to clarify the linkage between the need for "reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency" indicated in Sect. 50.47(a) and 16 planning standards outlined in Sect. 50.47(b). In addition, this rule will clarify the term "range of protective" actions and the issues of monitoring of evacuees, actions for recovery and reentry, notification of the public, evacuation time estimates, and exercise frequency.	<u>NPRM 4/91.</u> Final rule 12/91.
100-262	Zero-Release Low-Level Radioactive Waste Disposal Facility - Sierra Club Petition	Planned NPRM 55 FR 45491 10/29/90 10 CFR 61	NRC will propose a rule to amend the regulations concerning those portions of emergency plans which cannot be exercised prior to issuance of a Part 52 combined license. This rulemaking will be accomplished on a "high priority basis."	NPRM on hold.

*400-079	Packaging and Hazard	NPRM 53 FR 45525 11/10/88	RSPA proposes to amend hazardous materials transport regulations to revise the definition of "etiological agent" and remove the 50 ml exemption in 49 CFR 173.386.	<u>Final rule 12/90.</u>
	Communication of Etiologic Agents	Regulatory Agenda 55 FR 44887 10/29/90		
*430-080	Marine Transport of Bulk Solid Hazardous Materials	ANPRM 54 FR 18308 4/28/89 Notice 55 FR 11481 3/28/90 Regulatory Agenda 55 FR 44772 10/29/90	DOT will propose to incorporate into 46 CFR 148 the Coast Guard's and the International Maritime Organization's requirements for shipping certain frequently carried hazardous bulk solids, to eliminate paperwork for both the Coast Guard and the shipping industry and to harmonize domestic regulations with international standards.	<u>NPRM 12/91.</u>
*400-081	Operating Requirements for Rail Carriage	Planned NPRM 55 FR 44881 10/29/90	DOT will propose to update and rewrite the regulations contained in 49 CFR 174 which govern the transportation of hazardous material by rail.	<u>NPRM 11/90.</u>
*400-083	Bulk Hazardous Materials	NPRM 55 FR 36670 9/6/90 Regulatory Agenda 55 FR 44770 10/29/90	The Coast Guard proposes to amend its table summarizing the minimum requirements for the carriage of liquid, liquefied gas, or compressed gas hazardous materials in bulk by tankship by assigning additional carriage requirements, a higher Pollution Category, or both to certain commodities already listed in the table.	<u>Final rule 1/91.</u>

<b>*401-093</b>	Transportation Regulations - Compatibility with IAEA	NPRM 54 FR 4754 11/14/89 NOA 54 FR 48054 11/20/89 Regulatory Agenda 55 FR 44888 10/29/90	RSPA proposes to revise its regulations to make them compatible with those of the IAEA for the safe transport of radioactive materials (see comparable NRC regulation RU# 100-157).	<u>Final rule 1/91.</u>
<b>*401-094</b>	Special Cargo Requirements for Benzene	NPRM 55 FR 2978 1/29/90 Regulatory Agenda 55 FR 151 46 CFR 153 46 CFR 197 46 CFR 30	The Coast Guard proposes to revise the special carriage requirements for benzene and benzene mixtures and to add new regulations concerning occupational exposure to benzene on Coast Guard inspected vessels. The regulations are being amended to incorporate the lower benzene exposure levels adopted by OSHA to provide workers in the marine mode with the same protection as their land-based counterparts.	<u>Final rule 1/91.</u>
<b>*401-095</b>	Elevated Temperature Materials	NPRM 54 FR 38930 9/21/89 Regulatory Agenda 49 CFR 171 49 CFR 172 49 CFR 173 55 FR 44887 10/29/90	RSPA is proposing to regulate materials which pose a hazard due to their being transported at elevated temperatures. Materials would include those in a liquid phase having temperatures at or above 212 degrees F and materials in a solid phase having temperatures at or above 464 degrees F. RSPA is also proposing to regulate, as flammable liquids, materials in a liquid phase with flash points at or above 100 degrees F which are transported at or above their flash points.	<u>Final rule 1/91.</u>
<b>*401-097</b>	Transportation of Hydrogen Sulfide by Pipeline	ANPRM 54 FR 24361 6/7/89 Planned NPRM 55 FR 44882 10/29/90	Federal gas pipeline safety regulations do not specifically address all the safety risks associated with the presence of hydrogen sulfide in natural gas, such as those involving sulfide stress cracking and toxicity effects. RSPA will determine the need for regulations to control the concentration of hydrogen sulfide in natural gas pipeline systems.	NPRM 12/90.

*400-099	Gas Pipelines Corrosion 49 CFR 192	NPRM 54 FR 27041 6/27/89 Regulatory Agenda 55 FR 44887 10/29/90	RSPA proposes to require gas pipeline operators who must now inspect for corrosion on buried metallic pipe that is exposed to investigate further to determine the full extent of any corrosion that is found.	Final rule 12/90.
*400-102	Training for Hazardous Materials Transportation 49 CFR 172 49 CFR 174 49 CFR 175 49 CFR 176 49 CFR 177	NPRM 54 FR 31144 7/26/89 Regulatory Agenda 55 FR 44884 10/29/90	RSPA is proposing to amend the Hazardous Materials Regulations (HMR) to require that persons who perform functions involving the transportation of hazardous materials receive training concerning regulatory requirements applicable to those functions, and persons who work in proximity to hazardous materials receive training concerning hazardous materials awareness and safety procedures.	Final rule 3/91.
*400-110	Pressure Testing Existing Hazardous Liquid Pipelines	Planned NPRM 55 FR 44878 10/29/90	Studies have shown that large spill accidents attributable to latent material or construction defects can be prevented by restricting operation to not more than 80% of a prior test or operating pressure. This rule would set this safety standard for all hazardous liquid pipelines.	NPRM 11/90. Final rule 11/91.
*400-111	Operator's Plans or Procedures 49 CFR 190 49 CFR 193 49 CFR 195	NPRM 54 FR 46684 11/6/89 Regulatory Agenda 55 FR 44888 10/29/90	OPS proposes to change the procedures and policy for addressing deficiencies in operators' procedures and plans relating to gas, LNG, and hazardous liquid pipelines. The proposed changes include making operators subject to all enforcement sanctions under the Natural Gas Pipeline Safety Act of 1968, as amended, and the Hazardous Liquid Pipeline Safety Act of 1979, as amended, for failure to maintain all plans and procedures in accordance with applicable requirements.	Final rule 1/91.

*400-112	Operation and Maintenance Procedures for Pipelines 49 CFR 192 49 CFR 195	NPRM 54 FR 46685 11/6/89 Regulatory Agenda 55 FR 44885 10/29/90	OPS proposes to clarify and delineate the items that must be addressed in procedures for operations and maintenance of gas pipelines facilities to assure that operators take timely and appropriate actions under normal conditions or in responding to abnormal conditions. In addition, operators would be required to establish procedures for personnel safety in trenches where there may be a hazardous accumulation of vapor or gas.	Final rule 4/91.
*400-113	Gas Pipeline Operating Above 72 Percent of Specified Minimum Yield Strength 49 CFR 192	ANPRM 54 FR 50780 12/11/89 Correction 54 FR 51816 12/18/89 Planned NPRM 55 FR 44881 10/29/90	A grandfather clause allows certain steel gas pipelines to operate at hoop stress levels above 72 percent of the specified minimum yield strength (SYMS) of the pipe - the highest operating hoop stress permitted on steel pipe in all other regulated gas pipelines. The Office of Pipeline Safety is concerned about this possible disparity in protection and invites public comments to determine an appropriate course of action.	NPRM undetermined.
*400-116	Requirements for Explosives 49 CFR 171 49 CFR 172 49 CFR 173	NPRM 55 FR 18438 5/2/90 Correction 55 FR 24350 6/15/90 Regulatory Agenda 55 FR 44884 10/29/90	RSPA proposes to amend the hazardous materials transportation regulations relating to hazard classification, packaging, and hazard communication for explosives to make them consistent with the United Nations Recommendations on the Transport of Dangerous Goods.	Final rule <u>12/90.</u>
*400-117	Revisions to Modal Regulations (Carrier Provisions) 49 CFR 174 49 CFR 175 49 CFR 177	NPRM 55 FR 18546 5/2/90 Regulatory Agenda 55 FR 44878 10/29/90	RSPA proposes revisions to the carrier provisions of the hazardous materials transportation regulations to align the requirements with previous proposals and with the ICAO's Technical Instructions for the Safe Transport of Dangerous Goods by Air.	Final rule <u>12/90.</u>

*400-118	Specifications for Tank Car Tanks 49 CFR 173	ANPRM 55 FR 20242 5/15/90	RSPA considers amendments to: (1) require thermal or head protection or both on new and existing tank car tanks constructed of aluminum or nickel; (2) disallow use of the half-head shield as an option to meet head protection requirements; (3) prohibit the use of tanks that have a manway opening located below the liquid level of the material transported; (4) disallow the use of "non-pressure" tanks to transport materials poisonous by inhalation; (5) increase the start-to-discharge pressure setting on certain tanks; (6) establish specifications for securement and accident survivability of closure fittings; and (7) phase out certain "grandfather" provisions. RSPA also solicits comments on operational changes and design modifications to consider instead of retrofitting tanks. In a supplement to its 5/15/90 ANPRM, RSPA considers four further amendments to its tank car tank specifications.	NPRM undetermined.
	Supplemental ANPRM 55 FR 35327 8/29/90	Planned NPRM 55 FR 44877 10/29/90		Comments by 1/4/91.
*400-120	Hazardous Liquid Pipelines Operating at 20 Percent or Less of Specified Minimum Yield Strength 49 CFR 195 49 CFR 195	ANPRM 55 FR 45822 10/31/90	RSPA solicits comments and information to use in determining whether and to what extent to remove the exception in the pipeline safety standards governing hazardous liquid pipelines which says that they do not apply to pipelines operated at 20 percent or less of the specified minimum yield strength of the pipe.	Comments by 12/31/90.

*780-015	Occupational Exposure to Asbestos, Tremolite, Anthophyllite, and Actinolite 29 CFR 1910 29 CFR 1926	Administrative stay and revisions 51 FR 37002 10/17/86	On 6/26/86 OSHA revised the standards governing occupational exposure to asbestos, tremolite, anthophyllite, and actinolite in general industry and in the construction industry. OSHA has since received many comments regarding the appropriateness of regulating nonasbestiform tremolite, anthophyllite, and actinolite as presenting the same health risk as asbestos. OSHA has granted administrative stays of the standards as they apply to nonasbestiform varieties to allow time for OSHA to reopen the rulemaking record on the issue of whether, and how, to regulate occupational exposure to the nonasbestiform varieties. OSHA makes minor conforming amendments and extends the partial administrative stay of the revised final standards for occupational exposure as they apply to nonasbestiform tremolite, anthophyllite, and actinolite. 52 FR 15722 4/30/87 Corrections 52 FR 17752 5/12/87 Partial stay extended and final rule amended 53 FR 27345 7/20/88 Partial stay extended and final rule amended 54 FR 30704 7/21/89 Supplemental NPMR 55 FR 4938 2/12/90 Regulatory Agenda 55 FR 44719 10/29/90	Asbestos forms made effective 7/21/86. *780-054	Personal Protective Equipment 29 CFR 1910	NPRM 54 FR 33832 8/16/89 Regulatory Agenda 55 FR 44723 10/29/90	OSHA proposes to revise portions of the general industry safety standards addressing personal protective equipment. The criteria for personal protective equipment for eye, face, head, and foot would be revised to reflect improved developments in these types of equipment.	Final rule 6/91.
*780-057	General Industry - Personal Fall Protective Equipment 29 CFR 1910	NPRM 55 FR 13423 4/10/90 Regulatory Agenda 55 FR 44720 10/29/90	OSHA proposes to amend the standards for personal protective equipment for general industry by adding criteria pertaining to personal fall protection systems, including fall arrest systems, work positioning systems, travel restricting systems, and fall protection systems for climbing.	Final rule 9/91.
*780-058	General Industry Standards - Walking and Working Surfaces 29 CFR 1910	NPRM 55 FR 13360 4/10/90 Regulatory Agenda 55 FR 44724 10/29/90	OSHA proposes to revise its general industry standards for workplace walking and working surfaces in order to focus on the hazards that can result in trips, slips, and falls causing serious and fatal injuries. This proposed standard will also eliminate ambiguities and redundancies in the existing Subpart D standards and address areas not covered in the existing standards.	Final rule 9/91.
*780-059	Recording and Reporting Occupational Injuries and Illnesses 29 CFR 1904	Planned NPRM 55 FR 44717 10/29/90	OSHA requires covered employers to record all work-related fatalities, illnesses, and certain injuries and to report summary data if selected to participate in the BLS annual survey. BLS and OSHA have tested several data collection vehicles and procedures and are revising the recordkeeping guidelines to improve the usefulness of the survey outputs.	NPRM 7/91.
*780-060	PEL (Z Table) Update 29 CFR 1910	Planned NPRM 55 FR 44713 10/29/90	OSHA plans to establish a program to revise the Z Table on a regular basis to establish permissible exposure limits (PELs) and to use substance-specific standards only in those cases where complex issues or the nature of the risk necessitate additional protection.	Completion of options paper 3/91.
