FOREWORD

To meet the objectives of the program funded by the Department of Energy (DOE)-Nuclear Energy (NE) Technology Support Programs, the Performance Assurance Project Office (PAPO) administers a Performance Assurance Information Program that collects, compiles, and distributes program-related information, reports, and publications for the benefit of the DOE-NE program participants. The "KWOC Index of Nuclear Energy Standards" is prepared as an aid in searching for specific topics in the DOE-NE Program Standards.

The standards categories are:

- A Operation
- C Instrumentation and Controls
- E Equipment -- Mechanical, Fluid
- F Programs, Procedures, Methods
- M Materials
- P Electrical
- S Structures, Buildings

The following pages present the KWOC Index.

1. INTRODUCTION

One major task of the Nuclear Standards Program funded by the Department of Energy (DOE)-Nuclear Energy (NE) Technology Support Programs is to promote and support the use of standards by providing line managers and standards coordinators with data that facilitates their ability to utilize standards requirements. To meet this task, the Performance Assurance Project Office (PAPO) administers a Performance Assurance Information Program.

The task is carried out in accordance with the principle set forth in DOE Order 1300.2, "Department of Energy Standards Program," December 18, 1980, and DOE memorandum, "Implementation of DOE Orders on Quality Assurance, Standards, and Unusual Occurrence Reporting for Nuclear Energy Programs," March 3, 1982, and with guidance from the DOE-NE Technology Support Programs. The purpose of this information program is to collect, compile, and distribute program-related information, reports, and publications for the benefit of the DOE-NE program participants.

2. KWOC INDEX OF NUCLEAR ENERGY STANDARDS

The KWOC (Key-Word-Out-of-Context) Index is prepared as an aid in searching for specific topics in the DOE-NE Program Standards.

The KWOC Index is an alphabetical listing of the standard titles. This Index facilitates identification of subjects by locating major words of the titles on the left of the alphabetical index listing (* indicates the end of a title). The designations for the specific standards are shown in the right-hand column.

The Index includes active, draft, inactive, discontinued, and withdrawn standards.
