Monthly Environmental Regulatory Update

This report contains a monthly update of environmental regulatory activity that is of interest to the Department of Energy. It is provided to DOE operations and contractor staff to assist and support environmental management programs by tracking regulatory developments. Any proposed regulation that raises significant issues for any DOE operation should be reported to the Office of Environmental Guidance (EH-23) as soon as possible so that the Department can make its concerns known to the appropriate regulatory agency. Items of particular interest to EH-23 are indicated by a shading of the RU#.

Any questions or comments about any aspects of the Update Table should be directed to Lois Thompson, Air, Water, and Radiation Protection Division, Office of Environmental Guidance, U.S. Department of Energy (EH-23), (FTS) 896-9581, (Commercial) 202-586-9581.

ABSTRACT

The Environmental Regulatory Update Table provides information on regulatory initiatives of interest to DOE operations and contractor staff with environmental management responsibilities. The table is updated each month with information from the Federal Register and other sources, including direct contact with regulatory agencies. Each table entry provides a chronological record of the rulemaking process for that initiative with an abstract and a projection of further action.

Archeological Resources Protection Act (RU # 090---)	87
National Historic Preservation Act (RU # 540---)	88
Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (RU # 300---)	88
Federal Mine Safety and Health Act (RU # 330---)	89
Biotechnology (RU # 110---)	90
Ports and Waterways Safety (RU # 815---)	91
Coastal Zone Management Act (RU # 160---)	91
Other (RU # 805---)	91
Index to RU Numbers by CFR Citation	95

*RU numbers are identifiers that are assigned to each regulatory initiative for tracking purposes. The first three digits are coded to the statute, and the last three digits are specific to individual initiatives. The update table is first organized by statutes as shown above and then by RU numbers arranged sequentially. An index is provided at the end of the table to relate CFR citations to RU numbers.

Regulatory Highlights - July, 1990

1. National Primary and Secondary Drinking Water Regulations for Synthetic Organic and Inorganic Chemicals - Proposed Rule

As required by Section 1412 of the 1986 Safe Drinking Water Act amendments, EPA proposes to amend 40 CFR Parts 141, 142, and 143 by adding maximum contaminant levels goals (MCLGs) and National Primary Drinking Water Regulations (NPDWRs) for 18 synthetic organic and six inorganic chemicals (e.g., dioxin, sulfate, several herbicides, and pesticides). These 24 contaminants are among 83 specific contaminants that must be regulated under the 1986 amendments. The proposed rule would set MCLGs (non-enforceable health-based goals) and MCLs (enforceable maximum contaminant levels), frequency of monitoring and reporting requirements and list best available control technologies (BACT) to be used to achieve the MCLs. The proposed rule would also establish a secondary MCL for hexachlorocyclopentadiene. EPA uses a three category system to set MCLGs: Category I (strong evidence of carcinogenicity, Groups A & B); Category II (limited evidence of carcinogenicity, Group C); and Category III (inadequate or no evidence of carcinogenicity). Approximately 80,000 drinking water systems would be required to monitor for these contaminants. Comments regarding this proposal must be received by October 23, 1990. (7-25-90, 55 FR 30370, RU# 880-013)

2. Revisions to the General Pretreatment and National Pollutant Discharge Elimination System Regulations - Final Rule

Pursuant to RCRA and CWA, EPA issues at 40 CFR Parts 122 and 403 revisions to the General Pretreatment Regulations and National Pollutant Discharge Elimination System (NPDES) regulations (proposed 11-23-88, 53 FR 47632). The new regulations would cover industrial wastes previously excluded from RCRA regulation due to a Domestic Sewage Exclusion [wastes becoming mixed with domestic sewage and entering Public Owned Treatment Works (POTWs)] and also POTWS not formerly subject to RCRA requirements which receive such wastes. The stricter regulations will place more control over industrial wastes discharged into POTWs. The rule requires: (1) POTWs meeting specified criteria to perform toxicity testing of effluent; (2) industrial users to notify POTWS, states, and EPA of the nature of hazardous wastes discharged; (3) POTWs to provide written evaluation to permit writers of any need to revise local limits; (4) banning of discharges of RCRA ignitable wastes into POTWs; and (5) several other requirements. With general improvements in the pretreatment program, the rule provides EPA with added authority regarding control of hazardous wastes discharged into POTWs. Discharges resulting in toxic gases, vapors, or fumes in quantities posing health and safety problems for workers would not be allowed. The rule would prevent discharges of trucked or hauled pollutants except at designated discharge points. The rule would also prevent discharges of certain oils into POTWs. Some proposed

provisions, e.g. prohibition of discharge of certain listed solvents, were not included in this final regulation. The rule defines significant industrial users as those discharging 25,000 gallons per day, contributing at least 5 percent to a treatment system flow, or identified by POTWs. The rule becomes effective on August 23, 1990.
(7-24-90, 55 FR 30082, RU# 140-079)

3. Reporting Continuous Releases of Hazardous Substances - Final Rule

In compliance with Sect. 103 of CERCLA and Sect. 304 of SARA, EPA issues at 40 CFR Parts 302 and 355 final regulations (proposed 4-19-88, 53 FR 12868) for reporting, emergency planning, and notification of continuous releases of hazardous substances. Under CERCLA, the person in charge of a vessel or a facility releasing hazardous substances would be required to report the release to the National Response Center if the release of a hazardous substance is of a quantity equal to or greater than its reportable quantity (RQ), generally 1 lb. except where RQs are otherwise established. Under SARA reporting requirements, the above person must report the release of hazardous substances to state and local authorities. However, Sect. 103(f)(2) of CERCLA allows relief from reporting requirements of Sect. 103(a) of CERCLA if the release is continuous and stable in quantity and rate. "Continuous release" is defined as a release that occurs without interruption or abatement or that is routine, anticipated, and intermittent during normal operations or treatment processes. This rule allows the person in charge to develop the basis for the claim that the release is continuous and stable and requires: (1) an initial telephone and written notification to National Response Center (NRC), state emergency response commission (SERC), and local emergency planning committee (LEPC), (2) a one time follow-up report on the first anniversary of the submission, (3) notification of change in sources to NRC, SERC, and LEPC, and (4) reports of statistically significant increases (SSIs) where increase exceeds upper bound. The effective date for this rule is September 24, 1990.
(7-24-90, 55 FR 30166, RU# 180-029)

4. Corrective Action for Solid Waste Management Units at Hazardous Waste Management Facilities - Proposed Rule

To comply with RCRA, EPA proposes in 40 CFR Parts 264, 265, 270, and 271 corrective action requirements for solid waste management units (SWMUs) at hazardous waste management facilities. The proposal contains the basic regulatory framework for cleanup at these facilities. It establishes procedures for identifying problems and selecting remedies at RCRA facilities and sets cleanup standards at levels that are protective of human health and the environment. The protective risk range is proposed at 1 in 10,000 to 1 in one million for carcinogens. Provisions are included in the proposed rule for assigning different cleanup levels as appropriate in different situations so long as protection levels are provided for both the present and the future. Corrective action will be incorporated into the permitting process, and action levels which will

trigger corrective action are to be in the initial permit. EPA encourages voluntary cleanups and early actions. The proposal creates a new Subpart S in 40 CFR Part 264 which regulates corrective action for all SWMUs. Subpart S will include procedures and technical requirements for conducting remedial investigations. Four basic standards are listed for selecting remedies (e.g., protection of human health and the environment). "Solid waste management unit" is defined in the proposed rule as, "Any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which solid wastes have been routinely and systematically released." Comments are due by September 25, 1990.
(7-27-90, 55 FR 30798, RU# 840-133)

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
RESOURCE CONSERVATION AND RECOVERY ACT				
	General Pretreatment Regulations -- RU# 140-079			
	Oil Pollution Prevention -- RU# 140-092			
	Pesticide Storage -- RU# 300-003			
*840-006	Ignitable Hazardous Waste 40 CFR 261.21	Under development 50 FR 17818 4/19/85	EPA is developing tests and hazard thresholds for identifying ignitable solid wastes.	<u>NPRM 8/91.</u>
840-008	Mixtures - Acutely Hazardous 40 CFR 261	NPRM 51 FR 5472 2/13/86	EPA is expanding the scope of 40 CFR 261 to cover certain mixtures of acutely hazardous materials. De minimus concentration limits will also be established. Until now, only products with a listed chemical as the sole active ingredient were regulated.	Final rule undetermined. Postponed indefinitely.
*840-009	Management of Used Oil 40 CFR 260 40 CFR 261 40 CFR 271 40 CFR 302	NPRM 50 FR 49258 11/29/85 NOA 51 FR 8206 3/10/86 Tentative schedule 51 FR 41900 11/19/86 Decision not to regulate 53 FR 42578 10/24/88 Regulatory Agenda 55 FR 16855 4/23/90	EPA's decision not to list recycled oil as hazardous waste was remanded by the U.S. Court of Appeals on 10/7/88. Therefore, EPA is considering approaches for management of used oil that are consistent with the court's decision and is collecting additional information on the potential toxicity of used oil to be made available for public comment. The Agency also plans to issue a new proposal for management standards.	Notice of data availability and listing decision <u>8/90</u> ; reproposal of management standards 4/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
840-024	Containerized Liquids in Landfills 40 CFR 260 40 CFR 264 40 CFR 265 40 CFR 271	NPRM 51 FR 46824 12/24/86 NOA 52 FR 23695 6/24/87 Regulatory Agenda 55 FR 16865 4/23/90	EPA proposes to prohibit disposal of free liquids and containers with liquid hazardous wastes and exclude the use of absorbents that biodegrade and release liquids when compressed. Certain small-quantity containers will be exempted. A test protocol will be proposed to determine whether hazardous or free liquids solidified by accepted absorbents would release free liquids under landfill pressures, and "biodegradable absorbents" will be defined. These rules will not apply to owners or operators of landfills in which only PCB chemical waste regulated under 40 CFR 761 are disposed. PCBs mixed with a RCRA hazardous waste must comply with all requirements under both RCRA and TSCA.	Final rule 6/94.
840-051	Solid Waste Disposal Facility Criteria 40 CFR 257 40 CFR 258	NPRM 53 FR 33314 8/30/88 Regulatory Agenda 55 FR 16864 4/23/90	EPA proposes to amend 40 CFR 257 by including information requirements for certain solid waste disposal facilities, excluding municipal solid waste landfills (MSWLFs) from Part 257, and adding a new Part 258 to spell out specific requirements for MSWLFs.	Final rule 8/90.
840-056	Burning of Hazardous Waste in Boilers and Industrial Furnaces 40 CFR 260 40 CFR 261 40 CFR 264 40 CFR 265 40 CFR 266 40 CFR 270 40 CFR 271	NPRM 52 FR 16982 5/6/87 Corrections 52 FR 18043 5/13/87 Corrections 52 FR 25612 7/8/87 Supplement to NPRM 54 FR 43718 10/26/89 Technical corrections 55 FR 17862 4/27/90	EPA proposes to establish standards for boilers and industrial furnaces that burn hazardous waste fuels in order to control emissions of organic compounds, metals, and hydrogen chloride. EPA issues a supplement discussing alternate approaches to address the following issues: control of CO, metals, HCl, particulate emissions, the small quantity burner exemption, the definition of waste that is indigenous when burned for reclamation, revisions to the proposed definition of halogen acid furnaces, applicability of the metals and organic emissions controls to smelting furnaces involved in materials recovery, and the status under the Bevill amendment of residues from burning hazardous wastes. EPA makes technical corrections on three regulatory alternatives to issues presented in the 10/26/89 supplement to the NPRM.	Final rule 2/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
840-073	Definition of Solid Waste - Technical Corrections 40 CFR 261 40 CFR 266	Final rule 50 FR 6141 1/4/85 Amendments 50 FR 14216 4/11/85 Technical Corrections 50 FR 33541 8/20/85 Corrections 52 FR 21306 6/5/87 NPRM 53 FR 519 1/8/88 Correction 53 FR 6059 2/29/88 Regulatory Agenda 55 FR 16864 4/23/90	EPA proposes to exclude certain materials from its regulations (40 CFR Part 261) on recycled hazardous secondary materials. This regulation will provide: (1) EPA's interpretation of a court opinion concerning the Agency's authority to regulate certain recycled hazardous secondary materials and (2) amendments to the rules required by the court's opinion.	No projected timetable. Awaiting RCRA reauthorization.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NDA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
840-082	Identification of Hazardous Wastes by Toxicity Characteristics 40 CFR 261 40 CFR 271	NPRM 51 FR 21648 6/13/86 NOA 51 FR 24856 7/9/86 NOA 51 FR 33279 9/19/86 Supplemental NPRM 52 FR 18583 5/18/87 NOA 53 FR 18024 5/19/88 NOA; Supplemental NPRM 53 FR 28892 8/1/88 Final rule 55 FR 11798 3/29/90 Corrections 55 FR 26986 6/29/90	EPA revises the existing toxicity characteristics which are used to identify those wastes defined as hazardous and subject to regulation under RCRA. This rule: (1) replaces the Extraction Procedure (EP) leach test with the Toxicity Characteristic Leaching Procedure TCLP; (2) adds 25 organic chemicals to the list of toxic constituents of concern; and (3) establishes regulatory levels for these organic chemicals based on health-based concentration thresholds and a dilution/attenuation factor that was developed using a subsurface fate and transport model. The rule incorporates a number of modifications in the leaching procedure, the list of toxicants, the chronic toxicity reference levels and the fate and transport model.	Final rule effective 9/25/90. Compliance with rule effective 9/25/90 for large quantity generators. 3/29/91 for small quantity generators.
840-106	Mandatory Inspections 40 CFR undetermined	Planned NPRM 55 FR 16857 4/23/90	EPA will propose a regulation to establish standards for EPA to follow when conducting mandatory inspections of hazardous waste treatment, storage, and disposal facilities subject to permitting under Sect. 3007.	NPRM 10/91. Final rule 6/92.
840-107	Location Standards for TSD Facilities 40 CFR 261 40 CFR 264 40 CFR 265 40 CFR 270	Planned NPRM 55 FR 16859 4/23/90 Notice 55 FR 19981 5/14/90	EPA plans to propose additional standards for location of hazardous waste treatment, storage, and disposal facilities, in particular, in a variety of sensitive environments. Floodplain and seismic restrictions already existing at 40 CFR 264.18 and 265.18 will be amended based on new data and information.	NPRM 8/90. Final rule 10/92.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EK-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*840-109	Land Disposal Liners and Leak Detection 40 CFR 260 40 CFR 264 40 CFR 265 40 CFR 270 40 CFR 271	NPRM 52 FR 20218 5/29/87 Regulatory Agenda 55 FR 16866 4/23/90	EPA proposes to require leak detection systems for new RCRA landfills and impoundments, extend the double liner requirement to waste piles and to landfills and impoundments not already covered, and develop a quality assurance program for certain impoundments and final covers.	Final rule 9/92.
*840-116	Hazardous Waste Management System - Standards for Generators 40 CFR 262	ANPRM 51 FR 25487 7/14/86	EPA is reconsidering the 1980 regulations which allowed hazardous waste generators to accumulate hazardous waste on-site in tanks or containers for up to 90 days without obtaining a permit or meeting financial responsibility requirements.	NPRM 8/90.
840-131	Hazardous Waste TSD Facilities - Financial Assurance for Corrective Action 40 CFR 264 40 CFR 270 40 CFR 271	NPRM 51 FR 37854 10/24/86 Notice 54 FR 40728 10/3/89 Notice 55 FR 19981 5/14/90	EPA proposes to amend the financial responsibility and permitting standards for TSD owners and operators to require them to demonstrate financial assurance for completion of any required corrective action for a release to any medium from any solid waste management unit. Acceptable mechanisms include a trust fund, surety bond guaranteeing performance, letter of credit, financial test, or corporate guarantee.	Action date uncertain. May be repropoed, but will not be Subpart S.
*840-133	Solid Waste Management Units - Corrective Action 40 CFR 264 40 CFR 265 40 CFR 270 40 CFR 271	NPRM 55 FR 30798 7/27/90	EPA proposes procedures and technical requirements for implementing corrective action for solid waste management units (SWMUs) at facilities seeking a permit under Sect. 3004(u) of RCRA. The proposal would create a new Subpart S to define requirements for conducting remedial investigations, evaluating potential remedies, and selecting and implementing remedies at RCRA facilities. It also proposes to amend RCRA part 270 permit requirements, make conforming changes to facility closure information requirements, and establish standards for states to become authorized to administer correction action requirements.	Comments by 9/25/90. Public hearings scheduled for 10/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
840-156	Batch-Type Adsorption Procedures for Estimating Soil Attenuation of Chemicals	NOA draft 52 FR 22380 6/11/87	EPA issues a NOA of a draft Technical Resource Document entitled "Batch-Type Adsorption Procedures for Estimating Soil Attenuation of Chemicals."	Final document 9/90.
840-161	State Hazardous Waste Management Program - Minnesota 40 CFR 271	Immediate final rule 55 FR 24232 6/15/90	EPA grants final authorization to Minnesota for its state hazardous waste program revisions, subject to public review and comment.	Final authorization effective 8/14/90.
840-171	Amendments to Groundwater Monitoring Regulations 40 CFR 260 40 CFR 264 40 CFR 270	NPRM 53 FR 28160 7/26/88 Regulatory Agenda 55 FR 16866 4/23/90	EPA proposes to amend Subpart F groundwater monitoring regulations to foster the early detection of leaks and to better tailor the current groundwater monitoring regulations to site-specific conditions.	Final rule 9/90.
840-173	Hazardous Waste Management System; Testing and Monitoring Activities 40 CFR 260 40 CFR 261 40 CFR 262 40 CFR 264 40 CFR 265 40 CFR 268 40 CFR 270	NPRM 54 FR 3212 1/23/89 NOA 55 FR 4440 2/8/90	EPA proposes to update the Third Edition of SW-846, incorporate it into the RCRA regulations, and mandate minimum QC procedures for all RCRA testing. EPA proposes a number of technical modifications and/or clarifications to the Third Edition of SW-846 and the inclusion of specific QC procedures in SW-846 which are described in the "Report on Minimum Criteria to Assure Data Quality." The Agency is also considering deleting appendices III and X to 40 CFR 261.	Final rule 10/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
840-175	Releases to Groundwater from Regulated Units - Corrective Action 40 CFR 264 40 CFR 270	Planned NPRM 55 FR 16860 4/23/90	These regulations will amend the technical and procedural requirements for conducting corrective action to clean up significant releases to groundwater from regulated hazardous waste units at operating, closed, or closing RCRA facilities and the requirements for implementing remedial action, remedy selection, and corrective measures.	NPRM placed on hold, pending action on RU# 840-133.
840-176	Groundwater Monitoring - Hazardous Constituents 40 CFR 264 40 CFR 270	Planned NPRM 55 FR 16861 4/23/90	EPA will propose revisions to a list of hazardous constituents, Appendix IX of 40 CFR 264, for use in groundwater monitoring. This amendment would also create a new list for the first part (Detection Monitoring) of the groundwater monitoring program.	NPRM Fall 1990.
840-185	UST - Financial Responsibility 40 CFR 280	ANPRM 53 FR 3818 2/9/88 Planned NPRM 55 FR 16862 4/23/90	EPA will propose to establish financial responsibility requirements for owners and operators of underground storage tanks (UST) containing hazardous substances. An exemption is to be proposed for federally owned tanks.	NPRM 9/91. Final rule 9/92.
840-189	Wastes from the Combustion of Coal 40 CFR undetermined	NOA 53 FR 9976 3/28/88 Regulatory Agenda 55 FR 16856 4/23/90	EPA has issued "Report to Congress: Wastes from the Combustion of Coal by Electric Utility Power Plants," compiled in response to Sect. 8002(n) of RCRA. EPA will determine whether to regulate these wastes.	Regulatory determination postponed indefinitely.
840-191	Municipal Waste Combustor Ash Management 40 CFR undetermined	Planned NPRM 55 FR 16857 4/23/90	EPA has determined a need to develop a management scheme for handling and disposing of municipal waste combustor ash. The Agency is considering various options for addressing concerns over fugitive dust emissions and groundwater contamination.	NPRM 9/90. Final rule 11/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*840-193	No-Migration Variance for Restricted Hazardous Waste Land Disposal 40 CFR 268	Planned NPRM 55 FR 16857 4/23/90	A regulation will be proposed that interprets the statutory requirements for making a "no-migration" demonstration that would allow the land disposal of untreated hazardous waste that has been restricted from land disposal. The regulation will define such terms as "no-migration," "responsible degree of certainty," "hazardous constituent," and "unit."	NPRM 10/90. Final rule 7/91.
*840-195	Identification and Listing of Hazardous Wastes - Deminimus Exemption Levels 40 CFR 260 40 CFR 261 40 CFR 262 40 CFR 264 40 CFR 265 40 CFR 270 40 CFR 271 40 CFR 302	Planned NPRM 55 FR 16858 4/23/90	EPA will propose exemptions from regulation for any currently listed wastes that are not hazardous because the hazardous constituents are present at levels lower than the concentration levels established by this rule. This includes chlorinated aliphatics production wastes and wastes from explosives and inorganic chemicals.	NPRM 1/91. Final rule 1/92.
*840-201	Land Disposal Restrictions - TCLP (Method 1311) 40 CFR 268	NPRM 53 FR 18792 5/24/88	EPA proposes to revise the Toxicity Characteristic Leaching Procedure (TCLP), "Method 1311." The changes involve the use of a stainless steel cage in the bottle extractor and the addition of a more detailed method flow chart.	Final rule on hold. No action scheduled.
*840-206	State Hazardous Waste Management Program - Georgia 40 CFR 271	Immediate final rule 55 FR 30000 7/24/90	EPA approves revisions to Georgia's state hazardous waste management program, subject to public review and comment.	Comments by 8/23/90. Final authorization effective 9/24/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
840-221	Hazardous Waste Management System - Subpart C - Groundwater Data 40 CFR 260.22	NPRM 54 FR 41930 10/12/89 Regulatory Agenda 55 FR 16865 4/23/90	EPA proposes to require those who submit delisting petitions for hazardous wastes to provide groundwater monitoring data as part of their petition.	Final rule 2/91.
*840-223	Definition of Wastewater Treatment Unit 40 CFR 260 40 CFR 270	NPRM 55 FR 29230 7/18/90	EPA proposes to amend the definition of "wastewater treatment unit" in 40 CFR 260.10 and 270.2 to clarify that thermal treatment units, except for sludge dryers, are not wastewater treatment units and are not thus exempt from RCRA. The Agency also proposes a definition for "sludge dryers" that will clearly distinguish them from incinerators and other types of thermal treatment units.	Comments by 9/17/90. Final rule 7/91.
840-225	State Solid Waste Management Program - New Jersey 40 CFR 256	NPRM 53 FR 40243 10/14/88	EPA proposes to approve the State of New Jersey Solid Waste Management Plan, subject to public review and comment.	Final rule undetermined.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*840-230	Underground Storage Tanks Containing Petroleum - Financial Responsibility Requirements 40 CFR 280 40 CFR 281	Final rule 53 FR 43322 10/26/88 Notice of modification 54 FR 5451 2/3/89 Interim final rule 55 FR 18566 5/2/90 NPRM 55 FR 24692 6/18/90	EPA sets financial responsibility requirements applicable to owners and operators of underground storage tanks containing petroleum. This rule establishes requirements for demonstrating financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden and nonsudden accidental releases arising from the operation of USTs containing petroleum. EPA modifies the compliance dates under 40 CFR 280.91(c) to provide additional time for the development of financial assurance mechanisms, especially state assurance funds, for all petroleum marketing firms owning 13-99 USTs at more than one facility. EPA proposes to add to the 10/26/88 final rule four alternative mechanisms for use by local governments to demonstrate financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden and nonsudden accidental underground storage tank releases.	Effective 1/24/89. Certification of compliance date extended to 7/24/89. Interim final rule effective 5/2/90. Compliance date extended to 4/26/91. Comments by 8/17/90.
		NPRM 55 FR 27837 7/6/90	EPA proposes to amend the 10/26/88 final rule by modifying the compliance dates under 40 CFR 280.91(d) for all petroleum marketing firms owning 1-12 USTs, local government entities, and non-marketers whose net worth is less than 20 million dollars. The proposed rule would extend the deadline for compliance with Subpart H - Financial Responsibility from 10/26/90 to 10/26/91 to allow additional time for the development of state financial assurance funds.	Comments by 8/17/90. Proposed compliance date, 10/26/91.
840-231	Waste Minimization Program for Hazardous Waste Generators	Draft guidance document 54 FR 25055 6/12/89	EPA issues "Draft Guidance to Hazardous Waste Generators on the Elements of a Waste Minimization Program," intended to help generators comply with the certification requirements of Sects. 3002(b) and 3005(h) of RCRA/HSWA. The guidance is an application of the proposed source reduction and recycling policy statement (see RU# 840-232).	Final guidance document undetermined.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
840-232	Pollution Prevention Policy Statement (Source Reduction and Recycling)	Proposed Policy Statement 54 FR 3845 1/26/89	EPA makes available for comments its proposed policy statement on pollution prevention. EPA's proposed policy encourages organizations, facilities, and individuals to fully utilize source reduction and recycling techniques in order to reduce risk to public health, safety, welfare, and the environment. See RU# 840-231 for draft guidance document that is an application of this proposed policy statement.	Final policy statement 10/90.
*840-233	State Hazardous Waste Management Program - Kentucky 40 CFR 271	Notice 55 FR 28028 7/9/90	EPA publishes a compliance schedule for Kentucky to modify its state hazardous waste program to adopt the federal non-HSWA Cluster IV regulations. The schedule requires final adoption of the regulations by 1/1/91.	Final adoption of program revisions due 1/1/91.
*840-244	Standards for the Tracking and Management of Medical Waste 40 CFR 259	Interim final rule 54 FR 12326 3/24/89 Notice; final rule amendments 54 FR 24310 6/6/89 NOA 55 FR 1770 1/18/90	EPA publishes an interim final rule implementing the Medical Waste Tracking Act (MWTAA) demonstration program. The program sets forth segregation, packaging, labeling, tracking, transportation, and recordkeeping requirements of medical waste generated in the covered states, and lists the wastes to be covered by the program. States participating in the program include NY, NJ, CT, RI, and Puerto Rico.	Interim final rule effective 6/22/89. Amendments effective 6/6/89. Tracking regulations effective 6/22/89 in NY, NJ, CT, effective 7/24/89 in RI and Puerto Rico. Final rule undetermined.
		Corrections 55 FR 27228 7/2/90 NOA 55 FR 28096 7/9/90	EPA announces the availability of the "Report to Congress on Medical Waste Management in the United States - First Interim Report" which details information for Congress on 12 specific aspects of medical waste management and the demonstration program for tracking medical wastes.	

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
840-248	Revision of Subtitle C Financial Test Criteria 40 CFR 264 40 CFR 265	Planned NPRM 55 FR 16860 4/23/90	EPA proposes to revise financial test criteria that must be satisfied by owners and operators employing the test to demonstrate RCRA financial responsibility requirements. The anticipated revisions will adjust test criteria so as to increase availability of this assurance mechanism to viable firms and increase sensitivity to bankruptcy prediction.	NPRM 11/90. Final rule 6/91.
*840-249	Definition of Hazardous Waste Tank, Surface Impoundment, and Waste Pile 40 CFR 260	Planned NPRM 55 FR 16861 4/23/90	EPA will propose to clarify the difference between tanks, piles, and surface impoundments by revising the definitions for these units in 40 CFR 260.1. EPA expects to address the use of liners for primary containment as well as other issues relating to the use of "earthen" and "nonearthen" materials.	All action on this rule suspended. No plans for future action.
840-250	Land Disposal Restrictions for Third Third of Scheduled Wastes 40 CFR 148 40 CFR 261 40 CFR 264 40 CFR 265 40 CFR 268 40 CFR 271	NPRM 54 FR 48372 11/22/89 Final rule 55 FR 22520 6/1/90	EPA promulgates RCRA land disposal restrictions for the third third wastes including treatment standards and prohibition effective dates, as well as underground injection effective dates. EPA also gives interpretations of the following issues: The dilution prohibition, Bevill Amendment wastes, the applicability of California list prohibitions to wastes receiving national capacity variances and newly listed wastes, and commercial chemicals that are hazardous wastes when discarded. Mixed radioactive and hazardous wastes are also regulated.	Final rule effective 5/8/90. Compliance with treatment standards effective 8/8/90.
840-251	Hazardous Waste Sump Requirements 40 CFR 260 40 CFR 264 40 CFR 265	Planned NPRM 55 FR 16861 4/23/90	EPA will propose to amend several hazardous waste tank system requirements as applied to existing sumps that are situated inside buildings and constructed as an integral part of the building's floor or foundation. Boeing Company is petitioning EPA to regulate these sumps independently of other hazardous waste storage/treatment tank systems because of differences in design, construction, and use.	NPRM 8/90. Final rule 8/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*840-263	Environmental Restoration and Waste Management Five-Year Plan	NOA 55 FR 26744 6/29/90	The Office of Environmental Restoration and Waste Management issues the Environmental Restoration and Waste Management Five-Year Plan for Fiscal 1992-1996. The Plan encompasses five discrete areas: corrective activities, environmental restoration, waste management operations, technology development, and transportation.	Comments by 9/30/90.
		Request for Comments 55 FR 3636 2/2/90 Comment period extended 55 FR 28672 7/12/90	The DOE Chicago Operations Office issues its site specific plans for environmental restoration and waste management at each of its facilities as described in the DOE Five Year Plan.	Comments by 9/10/90.
840-264	Statistical Analysis of Groundwater Monitoring Data at RCRA Facilities	NOA 54 FR 37501 9/11/89 Correction 54 FR 50019 12/4/89	EPA announces the availability of an interim final guidance document entitled "Statistical Analysis of Ground-Water Monitoring Data at RCRA Facilities." The document provides guidance to RCRA facility permit applicants and writers concerning the statistical evaluation of ground-water monitoring data pursuant to the recently promulgated requirements of 40 CFR 264 Subpart F.	Final guidance document publication date undetermined.
*840-266	Determination on Solid Waste From Selected Metallic Ore Processing Operations 40 CFR 260 40 CFR 261 40 CFR 262	Final rule 54 FR 36592 9/1/89 NPRM 54 FR 39298 9/25/89 Final rule 55 FR 2322 1/23/90 Regulatory Agenda 55 FR 16856 4/23/90	EPA has completed development of a list of "high-volume", "low hazard" ore processing wastes for study under RCRA and, in response to a court opinion, is now conducting a study of those processing wastes excluded from Subtitle C regulation by the "Bevill Amendment". The study will culminate in a report to Congress after which EPA has six months to determine whether to regulate any of these wastes under Subtitle C.	Final rule effective 7/23/90. Report to Congress 8/90. Notice of regulatory determination 1/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*180-044	Hazard Ranking System 40 CFR 300	ANPRM 52 FR 11513 4/9/87 NPRM 53 FR 51962 12/23/88 NOA 54 FR 37949 9/14/89 Regulatory Agenda 55 FR 16886 4/23/90	EPA proposes revisions to the Hazard Ranking System, the principal mechanism for placing sites on the NPL. The NPL is a list of releases and potential releases of hazardous substances, pollutants, or contaminants that are eligible for Superfund-financed remedial actions. These revisions would change the way EPA evaluates potential threats to public health and the environment from hazardous waste sites and may affect the type and number of such sites included on the NPL.	Final rule 10/90.
180-056	Designation of Extremely Hazardous Substances as CERCLA Hazardous Substances 40 CFR 302	NPRM 54 FR 3388 1/23/89 Notice 54 FR 15802 4/19/89 Regulatory Agenda 55 FR 16885 4/23/90	EPA proposes to designate 232 extremely hazardous substances (EHSSs), as defined in Sect. 302 of SARA, as hazardous substances pursuant to Sect. 102 of CERCLA. EPA intends to reduce potential confusion concerning the different SARA Title III and CERCLA requirements by ensuring consistent procedures for reporting releases of all EHSSs.	Final rule 11/90.
*180-059	Accidental Release Information Program 40 CFR undetermined	Planned NPRM 52 FR 40909 10/26/87 Notice 54 FR 3528 1/24/89	The Accidental Release Information Program will require facilities with severe or repeated accidental releases of hazardous substances to submit information on causes and resulting prevention measures to EPA.	Rulemaking withdrawn at this time. EPA is collecting release information under CERCLA Sect. 101 surveys.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
180-065	Reimbursement to Local Governments for Emergency Response to Hazardous Substance Releases 40 CFR 310	Interim final rule 52 FR 39386 10/21/87 Regulatory Agenda 55 FR 16887 4/23/90	EPA authorizes reimbursement of local governments for costs incurred in providing temporary emergency measures in response to releases of hazardous substances. Reimbursement is limited to \$25,000 per incident and is not intended to supplant local funds normally provided for response.	Final rule 10/90.
180-072	RQ Adjustments for Substances on the Extremely Hazardous Substances List 40 CFR 302 40 CFR 355	NPRM 54 FR 35988 8/30/89 Regulatory Agenda 55 FR 16885 4/23/90	EPA proposes to adjust the reportable quantities (RQs) for 232 substances on the extremely hazardous substance list, which EPA has proposed for designation as CERCLA hazardous substances.	Final rule 11/90.
*180-073	National Contingency Plan - Off-Site Response Actions 40 CFR 300 40 CFR 300.440	NPRM 53 FR 48218 11/29/88 Regulatory Agenda 55 FR 16885 4/23/90	EPA proposes to amend the National Contingency Plan by adding a new Sect. 300.440 dealing with the off-site management of CERCLA wastes, including those resulting from CERCLA decision documents signed before the enactment of SARA. The rule prescribes procedures whereby affected facilities may ask EPA for review of the off-site acceptability determinations.	Final rule 10/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*180-077	Natural Resource Damage Assessments - Type A 43 CFR 11	ANPRM 54 FR 5093 2/1/89 ANPRM 54 FR 39013 9/22/89 Planned NPRM 55 FR 16274 4/23/90	DOI intends to revise the type A natural resource damage assessment procedure for coastal and marine environments to conform with recent court rulings, specifically, the incorporation of restoration or replacement values and the inclusion of all reliably calculated lost use values, with no required hierarchy of methodologies for conducting those valuations.	<u>NPRM 10/90.</u>
		ANPRM 53 FR 21043 6/2/88 ANPRM 54 FR 39015 9/22/89 Correction 54 FR 41363 10/6/89 Planned NPRM 55 FR 16273 4/23/90	DOI intends to make modifications to its ongoing efforts to develop a type A natural resource damage assessment procedure for Great Lakes environments to conform with recent court rulings.	<u>NPRM 10/90.</u>
180-088	Regulations Governing Citizen Suits - CERCLA 40 CFR 310 40 CFR 326 40 CFR 373 40 CFR 374	NPRM 54 FR 3918 1/26/89 Regulatory Agenda 55 FR 16888 4/23/89	EPA proposes regulations prescribing the manner in which notice of citizen suits is to be provided.	Final rule 10/90.
180-092	National Contingency Plan - Subpart K, Federal Facilities Requirements 40 CFR 300	Planned NPRM 55 FR 16884 4/23/90	EPA plans to propose Subpart K which will serve as a roadmap to the NCP for requirements pertaining to federal agencies conducting response actions at federal facilities where the release is on or where the sole source is from their facility.	NPRM Fall 1990. Final rule 9/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

EP NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
180-093	National Priorities List - Federal Facility Sites - Ninth Update 40 CFR 300	NPRM 54 FR 29820 7/14/89 Final rule 54 FR 41015 10/4/89 Final rule 54 FR 48184 11/21/89 Final rule 55 FR 6154 2/21/90	EPA adds fourteen federal facilities sites to the NPL from those proposed in the ninth update list. None of them are DOE sites. Seventeen federal facilities in the ninth update remain proposed.	Final rule of 10/4/89 effective 11/3/89. Final rule of 11/21/89 effective 12/21/89. Final rule of 2/21/90 effective 3/23/90. Remaining sites to be finalized by 8/90.
180-096	CERCLA Cost Recovery Program 40 CFR 308	Planned NPRM 55 FR 16884 4/23/90	EPA is granted the authority, under CERCLA, to hold potentially responsible parties (PRPs) liable for the cost of cleanup. It is Agency policy to pursue those PRPs for cost expected if a cleanup settlement is not reached. This rulemaking will be used to identify the specific recoverable costs, the documentation sufficient to prove EPA's case, and the documents that will be available to PRPs.	NPRM 9/90. Final rule 9/91.
180-097	National Priorities List - Tenth Update 40 CFR 300	NPRM 54 FR 43778 10/26/89 Final rule 55 FR 9688 3/14/90	EPA adds one site to the NPL from those proposed in the tenth update. Twenty-four sites in the tenth update remain proposed.	Final rule of 3/14/90 effective immediately. Final rule for remaining sites undetermined.
*180-103	National Toxicology Program - Chemicals Proposed for Seventh Annual Report	Notice 55 FR 28942 7/16/90	The National Toxicology Program requests comment on proposed new entries for the Seventh Annual Report. The Program proposes adding radon to the list of known carcinogens and six substances to the list of substances anticipated to be carcinogens - ceramic fibers, glass wool, glycidol, hexachloroethane, tetranitromethane, and 4-vinyl-1-cyclohexene diepoxide.	Comments by 8/30/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
SUPERFUND AMENDMENT AND REAUTHORIZATION ACT				
SARA Section 110 Chemicals Generic Test Rule - RU# 920-113				
*190-005	Section 313 Sunset Review Amendments 40 CFR 372 40 CFR 372	Final rule 53 FR 4500 2/16/88 Planned NPRM 55 FR 16834 4/23/90	The final rule of 2/16/88 implementing Section 313 allowed releases of toxic chemicals less than 1000 pounds to be reported in ranges. Also, the reporting form included an optional reporting section on waste minimization activities. Both of these sections will "sunset" after the 1989 reporting year unless the Agency takes action to retain them. These proposed amendments will address these reporting requirements.	<u>NPRM 9/90.</u>
190-012	Hazardous Substance Activity Reporting in Transfer of Federal Property 40 CFR 373	NPRM 53 FR 850 1/13/88 Final rule 55 FR 14208 4/16/90	EPA requires that federal agencies transferring real property on which any hazardous substance has been disposed of, stored, or released must include in the contract a notice of such activity. EPA defines when these requirements apply and prescribes the form and manner of the notice.	Effective 10/17/90.
190-014	Technical Assistance Grants - NPL Sites 40 CFR Ch. 1 40 CFR 300 40 CFR 35	ANPRM 52 FR 22244 6/10/87 Interim final rule 53 FR 9736 3/24/88 Interim final rule amendment 54 FR 49848 12/1/89 Regulatory Agenda 55 FR 16887 4/23/90	EPA issues an interim final rule specifying requirements citizens' groups must meet to obtain technical assistance grants. EPA amends its interim final rule regarding the technical assistance grant program in order to foster greater participation of citizens' groups in the grant program. The grants are limited to \$50,000 per site and requires matching funds. This limit may be waived.	Interim final rule effective 3/24/88. Amendment effective 12/1/89. Final rule 9/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*190-028	Emergency and Hazardous Chemical Inventory Forms and Community Right-to-Know Reporting Requirements; Implementation of Reporting Requirements for Indian Lands 40 CFR 350 40 CFR 355 40 CFR 370 40 CFR 372	NPRM 54 FR 12992 3/29/89 Interim final rule 54 FR 41904 10/12/89 Supplemental notice 54 FR 41907 10/12/89 Supplemental final rule 54 FR 43164 10/20/89 Final rule 55 FR 30632 7/26/90	EPA sets reporting thresholds that apply on or before 10/17/89, for manufacturing facilities and 9/24/90, for non-manufacturing facilities. These thresholds are as follows: 500 lbs or the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances (EHSS) and 10,000 lbs for all other hazardous chemicals for which facilities are required to have or prepare a MSDS. EPA also clarifies the definition of "facility," makes a minor change to the Tier I and Tier II forms, and corrects the listing for RQs for two extremely hazardous substances in mixtures under Sects. 311 and 312.	Final rule effective 8/27/90.
190-038	Regulations Governing Citizens Suits - SARA 40 CFR 310 40 CFR 326 40 CFR 373 40 CFR 374	NPRM 54 FR 3918 1/26/89 Regulatory Agenda 55 FR 16888 4/23/89	EPA proposes regulations prescribing the manner in which notice of citizen suits is to be provided.	Final rule 9/90.
190-041	National Institute of Environmental Health Sciences Hazardous Waste Worker Training 42 CFR 64 42 CFR 65	NPRM 54 FR 25479 6/15/89 Regulatory Agenda 55 FR 16182 4/23/90	DHHS proposes a new 42 CFR 64a entitled "National Institute of Environmental Health Sciences Hazardous Waste Worker Training" in order to administer the newly created training grants authorized by SARA.	Final rule 9/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
190-042	Administrative Hearing Procedures for Superfund Claims 40 CFR 305	Planned NPRM 55 FR 16884 4/23/90	EPA will establish procedures for conducting administrative hearings for persons who have made claims against Superfund but are dissatisfied with the award.	NPRM 9/90.
190-043	Administrative Hearing Procedures for SARA Class I Civil Penalties 40 CFR 22	Interim final rule 54 FR 21174 5/16/89 Regulatory Agenda 54 FR 45342 10/30/89	EPA establishes procedures for the administrative assessment of Class I civil penalties for violations of provisions specified in Sect. 109 of CERCLA and Sect. 325 of EPCRA.	Interim final rule effective 5/16/89. Final action uncertain. May be merged with Class II penalties rule (RU# 190-044) or covered under a civil penalties Consolidated Rule EPA is considering developing.
*190-044	Administrative Hearing Procedures for SARA Class II Civil Penalties 40 CFR 22	Interim final rule 54 FR 21174 5/16/89 Regulatory Agenda 55 FR 16888 4/23/90	EPA establishes procedures for the administrative assessment of Class II civil penalties for violations of provisions of Sect. 109 of CERCLA and Sect. 325 of EPCRA.	Interim final rule effective 5/16/89. Final rule Summer 1991.
*190-045	Public Information - Confidentiality of Business Information 40 CFR 2	NPRM 54 FR 38156 9/14/89	EPA proposes to amend 40 CFR 2 to state that certain information collected under Sect. 313 of SARA relating to discharges to the air or water will be considered emission or effluent data under the Clean Air Act or the Clean Water Act, respectively, and will not be accorded confidential treatment.	Final rule 10/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
190-048	Superfund Response Action Contractor Indemnification	Proposed policy 54 FR 46012 10/31/89	EPA issues a proposed guidance document to implement Sect. 119 of CERCLA as amended by SARA. Sect. 119 provides the President with discretionary authority to indemnify response action contractors (RACs) for negligent releases arising out of response action activities at sites on the NPL and removal action sites. As delegated by the President, EPA may also extend indemnification to states (or a political subdivision) and potentially responsible parties (PRPs).	Final guidance document undetermined.
190-049	Toxic Chemical Release Reporting - Deletion of Barium Sulfate 40 CFR 372	NPRM 55 FR 4879 2/12/90	EPA proposes to exempt barium sulfate from the reporting requirements of the "barium compounds" category of the list of toxic chemicals under EPCRA.	Final rule undetermined.
*190-051	Toxic Chemical "Peak Release" Reporting Rule (Revision) 40 CFR 372	Planned NPRM 55 FR 16834 4/23/90	EPA will propose to add a "peak release" report element to the Toxic Chemical Release Inventory Reporting Form. The proposal addresses the issue of obtaining more specific indication of the frequency and/or duration of releases in order to better assess risks to health and the environment.	NPRM 12/90.
190-053	Toxic Chemical Release Reporting - Ammonium Sulfate 40 CFR 372	NPRM 55 FR 12144 3/30/90 NOA 55 FR 12148 3/30/90	In response to a petition, EPA proposes to delete ammonium sulfate (solution) from the list of toxic chemicals under Sect. 313 of SARA because releases of ammonium sulfate (solution) can be more effectively covered by the ammonia listing. EPA is clarifying the ammonia listing so that it encompasses other sources of aqueous ammonia.	Final rule undetermined.
190-054	Risk Communication as a Regulatory Alternative for Protecting Health, Safety and Environment 1 CFR 305	Notice 55 FR 13538 4/11/90	The Administrative Conference's Committee on Regulation has under consideration a draft recommendation on risk communication as a regulatory alternative for protecting health, safety and the environment.	

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
190-055	Toxic Chemical Release Reporting - Phosphoric Acid	Notice 55 FR 25876 6/25/90	EPA issues the results of its technical review and evaluation of a petition to delete phosphoric acid from the list of Sect. 313 toxic chemicals. EPA also requests public comment on the potential development of a phosphate category under Sect. 313 which would include not only phosphoric acid but other sources of phosphate as well.	Comments by 8/24/90.
SAFE DRINKING WATER ACT				
Drinking Water chemicals Proposed Test Rule -- RU# 920-123				
880-007	Primary Drinking Water Regulations - Radionuclides (Phase IV) 40 CFR 141	ANPRM for MCLGs 48 FR 45502 10/5/83 ANPRM for MCLs 51 FR 34836 9/30/86 Planned NPRM 55 FR 16851 4/23/90	EPA is considering MCLGs and MCLs for radionuclides of radium, uranium, radon, gross alpha, gross beta, and photon emitters in drinking water.	NPRM 2/91. Final rule 12/92.
880-010	NPDWRs - Synthetic Organic Chemicals and Inorganic Chemicals - Phase II 40 CFR 141	ANPRM 48 FR 45502 10/5/83 NPRM MCLGs 50 FR 46936 11/13/85 Corrections 51 FR 4618 2/6/86 NPRM 54 FR 22062 5/22/89 Regulatory Agenda 55 FR 16854 4/23/90	EPA repropose SDWA MCLGs and proposes NPDWRs for 30 synthetic organic chemicals and eight inorganic chemicals. NPDWRs include MCLs or treatment techniques, proposed monitoring, reporting, and public notification requirements. The notice also proposes the Best Available Technology (BAT) on which MCLs are based and the BAT for variances. Secondary MCLs for nine contaminants and monitoring requirements for 100 chemicals are proposed.	Final rule 1/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
880-011	NPDWRS - Disinfectants and Disinfection By-Products 40 CFR 141 40 CFR 142	Planned NPRM 55 FR 16851 4/23/90	EPA may propose MCLGs for disinfectants and disinfection by-products in drinking water, to be followed by proposed MCLs and monitoring requirements at the same time the MCLGs are finalized. EPA will propose that all public water systems use disinfection.	NPRM 9/91. Final rule 9/92.
*880-013	NPDWRS - Inorganic and Organic Compounds (Phase V/25) 40 CFR 141 40 CFR 142	ANPRM 48 FR 45502 10/5/83 NPRM 55 FR 30370 7/25/90	EPA proposes MCLGs and NPDWRS for 18 synthetic organic chemicals and six inorganic chemicals. The NPDWRS consist of MCLs and monitoring, reporting, and public notification requirements. EPA also proposes the best available technology (BAT) the MCLs are based on and BAT for the purpose of issuing variances. The Agency also proposes a SMCL for hexachlorocyclopentadiene.	Comments by 10/23/90. Final rule 3/92.
880-015	PWS Supervision Program - Administrative Enforcement 40 CFR 22 40 CFR 142	NPRM 54 FR 29516 7/12/89 Regulatory Agenda 55 FR 16854 4/23/90	EPA plans to promulgate regulations establishing procedures for administrative compliance orders under Sect. 1414(g) of the SDWA. Sect. 1414(g) orders may not take effect without notice and opportunity for public hearing and opportunity for primary states to confer with EPA. The Agency will also amend 40 CFR Part 22 to include PWS penalty assessments.	Final rule 9/90.
880-027	Amendments to the UIC Program 40 CFR 144 40 CFR 146	NPRM 55 FR 26462 6/28/90	EPA proposes amendments to the UIC noncompliance and program reporting requirements and to the mechanical integrity requirements. EPA also clarifies how existing injection wells become authorized by rule and when injection is prohibited for failure to comply with authorization-by-rule requirements. Finally, EPA codifies SDWA Sect. 1445(a)(1) as it applies to the UIC program.	Comments by 8/27/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. 880-034	NPDWRs Lead & Copper 40 CFR 141 40 CFR 142	NOA 53 FR 40270 10/14/88 NPRM 53 FR 31516 8/18/88 Corrections 53 FR 35952 9/15/88 Correction 53 FR 36696 9/21/88 Regulatory Agenda 55 FR 16854 4/23/90	EPA proposes MCLGs and NPDWRs for controlling lead and copper in drinking water. EPA is proposing a MCLG of zero for lead and 1.3 mg/l for copper and MCLs of 0.05 mg/l for lead and 1.3 mg/l for copper. EPA announces the availability of the final policy guidance for EPA Regional Administrators to use to oversee state implementation and enforcement of the lead prohibition and lead public notice provisions of the Act.	Final rule 11/90.
880-035	MCLGs - Microbiological Contaminants (Phase III) 40 CFR 141 40 CFR 142	NPRM 52 FR 42178 11/3/87 NOA 53 FR 37801 9/28/88 Final rule 54 FR 27486 6/29/89	EPA sets maximum contaminant level goals (MCLGs) for <u>Giardia lamblia</u> , viruses, and <u>Legionella</u> and promulgates NPDWRs for public water systems using surface water sources or groundwater sources under the direct influence of surface water that include: (1) criteria under which filtration are required and procedures by which the states are to determine which systems must install filtration, and (2) disinfection requirements. This rule also includes certain limits on turbidity as criteria for: (1) determining whether a public water system is required to filter, and (2) determining whether filtration, if required, is adequate.	Effective 12/31/90.
*880-045	State-Administered UIC Programs - Incorporation by Reference Update 40 CFR 147	Planned final rule 55 FR 16855 4/23/90	EPA will propose to amend the 40 CFR 147 incorporation by reference material to incorporate the most recent state statutes and regulations. EPA will not issue an NPRM first because there is no impact on the economy, costs, or prices; no public health or intermedia issues; and no adverse consequences on the public.	Final rule 10/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
880-046	NPDWRs - Arsenic 40 CFR 141	Planned NPRM 55 FR 16851 4/23/90	The current standard for arsenic in drinking water is an interim standard. This rule will set a final MCL and MCLG as required by the SDWA Amendments of 1986. EPA has been sued on the schedule for proposal and promulgation of the arsenic NPDWRs. The final schedule is dependent on settlement of the suit.	NPRM undetermined; schedule depends on settlement of suit.
880-047	Drinking Water Laboratory Certification Regulations 40 CFR 141 40 CFR 142	Planned NPRM 55 FR 16852 4/23/90	EPA will propose and promulgate national regulations for certification of laboratories which analyze compliance samples under the SDWA. These regulations will establish the "National Quality Assurance Program for Lab Certification," described in 40 CFR 142(b)(2)-(3).	NPRM undetermined.
*880-048	Revision of Analytical Methods Under SDWA 40 CFR 141	Planned NPRM 55 FR 16852 4/23/90	EPA will provide an expedited regulatory mechanism for updating analytical methods technology under the SDWA in order to allow the use of latest technology and to minimize costs.	NPRM 8/90. Final rule 12/90.
880-049	Management of Class V Injection Wells Under Part C 40 CFR 144 40 CFR 145 40 CFR 146	Planned NPRM 55 FR 16853 4/23/90	EPA will establish a regulatory framework for the management of Class V wells, such as certain septic systems and a variety of drainage wells, that will protect against contamination of groundwater while recognizing the difficulties of this diverse well class.	NPRM 9/91.
880-050	NPDWRs - Contaminants From First Drinking Water Priority List 40 CFR 141	Planned NPRM 55 FR 16852 4/23/90	EPA will set MCLGs and NPDWRs for about 25 contaminants from the first drinking water priority list, as required by the SDWA Amendments of 1986. The Act requires regulation of at least 25 contaminants every three years starting in 1991.	NPRM 6/92. Final rule 12/93.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*880-051	Volatile Organic Chemicals Health Advisories	NOA 55 FR 29893 7/23/90	EPA announces the availability of drinking water health advisories for 15 volatile organic chemicals. The advisories describe nonregulatory concentrations of drinking water contaminants that are considered protective of adverse health effects over specific durations of exposure.	
CLEAN WATER ACT				
Confidentiality of Business Information -- RU# 190-045				
*140-017	Effluent Limitations - Nonferrous Metals Phase II 40 CFR 421	NPRM 54 FR 18412 4/28/89 Corrections 54 FR 22838 5/26/89 Regulatory Agenda 55 FR 16846 4/23/90	EPA will revise BPT and BAT effluent limitations, NSPS, and pretreatment standards in response to settlements with six petitioners. The amendments will affect six subcategories: primary beryllium, primary molybdenum and rhodium, primary tungsten, secondary molybdenum and vanadium, secondary precious metals, and secondary tungsten and cobalt.	Final rule 8/90.
*140-035	Disposal of Sewage Sludge 40 CFR 257 40 CFR 503	NPRM 54 FR 5746 2/6/89 NOA 54 FR 43124 10/20/89 Regulatory Agenda 55 FR 16848 4/23/90	EPA proposes technical requirements for the final use and disposal of sewage sludge when landfarmed, sold, monofilled, surface disposed, or incinerated. Related computer programs and background documents are listed. The standards will be expanded and revised as information becomes available.	NOA of data from National Sewage Sludge Survey. 8/90. Final rule 10/91.

140-039	NPDES Permit - Compliance Extension for Innovative Technologies 40 CFR 122 40 CFR 124 40 CFR 125	NPRM 50 FR 49904 12/5/85	EPA proposes a revised rule for dischargers of toxic and nonconventional pollutants who apply for NPDES extensions to install innovative technologies under Sect. 301(k) of the Clean Water Act.	Reproposed NPRM 8/90.
140-041	Disposal Sites - Denial or Restriction 40 CFR 231	Planned NPRM 55 FR 16845 4/23/90	EPA will revise 404(c) regulations by establishing procedures to be invoked when they are considering the use of 404(c) to prevent the discharge of dredged or fill material into a defined area of U.S. waters. The revisions are based on a review of previous experience.	NPRM 1/91. Final rule 1/92.
140-066	Water Quality Standards for Toxic Pollutants 40 CFR 131	Planned NPRM 55 FR 16842 4/23/90	EPA will establish, on a national basis, numeric water quality criteria for toxic pollutants that will become part of the water quality standards of states that have failed to comply with Sect. 303(c)(2)(B) of the CWA, thus bringing those standards into compliance with the CWA as amended.	NPRM 6/91.
140-067	Revisions to the NPDES Regulations 40 CFR 122 40 CFR 123 40 CFR 124 40 CFR 125 40 CFR 403 40 CFR 434	Planned NPRM 55 FR 16845 4/23/90	EPA will propose revisions to the NPDES regulations to clarify existing requirements and policies.	NPRM Summer 1990. Final rule Summer 1991.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
140-076	Water Quality Standards - Indian Tribes 40 CFR 131	Interim final rule 54 FR 14354 4/11/89 NPRM 54 FR 39098 9/22/89 Notice 55 FR 3643 2/2/90 Regulatory Agenda 55 FR 16847 4/23/90	EPA proposes criteria and procedures by which an Indian Tribe can qualify for treatment as a state for purposes of standards and certification programs and mechanisms to resolve unreasonable consequences that may arise from an Indian Tribe and a state adopting differing water quality standards on common bodies of water.	Interim final rule effective 4/11/89. Final rule 9/90.
140-077	NPDES - Surface Water Toxics Control Program 40 CFR 122 40 CFR 123 40 CFR 130	NPRM 54 FR 1300 1/12/89 Final rule 54 FR 23868 6/2/89 NOA 55 FR 19662 5/10/90	EPA amends the NPDES surface water toxics control program by incorporating Sect. 308(a) of the WQA into it and reamulgates and supplements the interpretive final rule of 1/4/89 (54 FR 246) dealing with NPDES permit regulations. Section 308(a) of the WQA added Sect. 304(l) to the CWA. Section 304(l) requires the states to identify those waters that are adversely affected by toxic, conventional, and nonconventional pollutants, and requires the state to prepare individual control strategies that will control point source discharges of toxic pollutants. EPA will issue state listing requirements at a later date for Sect. 303(d) waters.	Final rule effective 9/26/89. Supplemental final rule 10/90.
*140-079	General Pretreatment Regulations for Existing and New Sources 40 CFR 122 40 CFR 403	ANPRM 51 FR 30166 8/22/86 NPRM 53 FR 47632 11/23/88 Final rule 55 FR 30082 7/24/90	EPA changes the NPDES and general pretreatment regulations in response to the Domestic Sewage Study and to improve the control of hazardous wastes and other toxic materials discharged through sewers to POTWs. The changes address toxicity testing by POTWs, specific industrial user discharge prohibitions, controls on spills and batch discharges, industrial user notification requirements, control mechanisms for significant industrial users, and local limits.	Effective 8/23/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
140-084	NPDES Permit Application - Form 2C, Standard Form A, Short Form A, 40 CFR 122.21(j)	Planned NPRM 55 FR 16845 4/23/90	EPA will revise the current NPDES Permit Application Form 2C (industrial), Standard Form A (municipal), and Short Form A (municipal) to reflect amendments to the Clean Water Act and changes in program requirements and emphasis.	NPRM 9/90. Final rule 8/91.
140-085	NPDES Permit Application Requirements for Storm Water Discharges 40 CFR 122 40 CFR 123 40 CFR 124 40 CFR 504	NPRM 53 FR 49416 12/7/88 Regulatory Agenda 55 FR 16847 4/23/90	EPA proposes NPDES permit application requirements for storm water discharges from industrial activities, certain municipal systems, and for case-by-case discharges. The Agency also proposes exemptions from these requirements for mining, oil, and gas operations discharges.	Final rule 8/90.
140-089	Biological Test Procedures for the Analysis of Pollutants 40 CFR 136	NPRM 54 FR 50216 12/4/89	EPA proposes to amend 40 CFR 136 by adding new biological measurements and test procedures for the analysis of pollutants under the CWA 304(h) and by updating other procedures. Methods would be added to measure toxicity in effluents and receiving waters, to measure mutagenicity, to monitor viruses in wastewaters and sludges, and to update citations to microbiological methods.	Final rule 12/90.
140-092	Oil Pollution Prevention 40 CFR 112	Planned NPRM 55 FR 16857 4/23/90	EPA is pursuing a two-phase regulatory approach to propose changes to the oil spill prevention regulation. In Phase I, widely-accepted industry practices that are currently recommended practices in the regulation will be changed to required practices. To facilitate an inventory of facilities, a provision may be added requiring facilities to notify EPA of their existence. The Phase II regulatory effort will address other recommended modifications.	Phase I NPRM 8/90. Final rule 8/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
120-006	MAAQS - Ozone and Photochemical Oxidants 40 CFR 50.9	First revisions 49 FR 29845 7/24/84 NOA 50 FR 52556 12/24/85 NOA 53 FR 48308 11/30/88 Planned review of criteria document 55 FR 16870 4/23/90	EPA announces the availability of the second external review draft of Volumes I and V of the Criteria Document. The Clean Air Scientific Advisory Committee reviewed the revised document and an EPA staff paper in January 1986. The Criteria Document may be used as a basis for review and revision of the MAAQS. EPA is assessing health and welfare information which has become available since the last revision of the standard. In order to retain a unified regulatory review package in light of the emerging data base on health and welfare effects associated with longer-term averaging times, EPA is continuing the standard review until such information is published and reviewed in an addendum to the criteria document. Two draft documents are available.	Complete review of criteria document on hold.
120-008	Stack Height Regulation 40 CFR 51.100	Planned NPRM 55 FR 16875 4/23/90	EPA plans to revise the stack height regulation in accordance with a 1/22/88 U.S. Court of Appeals decision which remanded two grandfathering provisions which allow dispersion credit, including credit for certain stack height increases.	NPRM 10/90.
120-010	Guideline On Air Quality Models 40 CFR 51.24(l) 40 CFR 52.21(m)	Planned NPRM 55 FR 16874 4/23/90	In response to Sect. 320 of the Clean Air Act, EPA held the Fourth Conference on Air Quality Modeling in October 1988. Based on input provided to the Agency at or closely following this Conference, additional revisions to this rule have been defined and an NPRM is being developed.	NPRM 11/90. Final rule 6/92.
120-055	NESHAPS - Chromium Industrial Cooling Towers 40 CFR 61	NOI to list 50 FR 24317 6/10/85 Planned NPRM 55 FR 16872 4/23/90	Preliminary assessment by EPA of the public health risks of chromium compounds has identified industrial process cooling towers as a source category for which the proposal of national emission standards may be warranted. If further investigation proves standards are warranted, chromium or hexavalent chromium will be listed under Sect. 112 of the Clean Air Act and EPA will propose standards.	NPRM 4/91. Final rule 7/92.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
120-056	NSPS - Small Boilers 40 CFR 60	NPRM 54 FR 24792 6/9/89 Notice 54 FR 47126 11/9/89 Regulatory Agenda 55 FR 16878 4/23/90	EPA proposes to add Subpart Dc to 40 CFR 60 dealing with new source performance standards. The new subpart would limit emissions of SO ₂ , PM, and NO _x from small industrial-commercial-institutional steam generating boilers with heat input capacities of 100 million Btu/hr or less.	Final rule 9/90.
120-065	Stratospheric Ozone Protection 40 CFR 62 40 CFR 82	ANPRM 54 FR 15228 4/17/89	EPA will propose to add methyl chloroform and carbon tetrachloride to the list of ozone-depleting chemicals regulated by the Montreal Protocol on Substances That Deplete the Ozone Layer and the final rule implementing the Protocol.	NPRM 11/90.
		Planned NPRM 55 FR 16870 4/23/90	The international community has begun negotiations on whether to strengthen the Montreal Protocol, and President Bush has called for a complete phase-out of CFCs provided safe substitutes become available. EPA has entered into a consent agreement to determine whether additional regulations are necessary to protect the stratospheric ozone layer.	NPRM 11/90. Final rule 8/91.
		ANPRM 55 FR 18256 5/1/90	EPA invites comments on issues they would need to address in the development of a national recycling program that would encourage or require recycling of ozone depleting compounds. This potential rulemaking is in response to an industry petition from the Alliance for a Responsible CFC Policy to develop such a program.	NPRM undetermined.
120-075	Source Surveillance of Visible Emissions 40 CFR 52	NPRM 51 FR 31076 8/29/86	EPA proposes new visible emission test procedures to evaluate opacity standards compliance when a SIP lacks an appropriate method or when the Administrator enacts a state plan.	Final rule undetermined. On hold indefinitely.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. 120-093	NESHAPS - Hazardous Organics 40 CFR 61	Planned NPRM 55 FR 16873 4/23/90	This regulation will control emissions in production categories and some use categories for butadiene, ethylene oxide, ethylene dichloride, chloroform, carbon tetrachloride, perchloroethylene, trichloroethylene, and methylene chloride. Installation of combustion devices and an inspection and monitoring program will be required.	NPRM 4/91. Final rule 3/92.
120-094	Health Assessment Document - Acetaldehyde	NOA draft 52 FR 19918 5/28/87	EPA issues the first external review draft of the health assessment document for acetaldehyde. The document will be used in the decision process for possible regulation of acetaldehyde under the CAA.	Final document 11/90.
120-095	NAAQS - Fine Particulate Matter 40 CFR 50 40 CFR 50.7	ANPRM 52 FR 24670 7/1/87 Planned NPRM 55 FR 16871 4/23/90	EPA will propose a new secondary NAAQS for fine particles (those less than 2.5 micrometers in aerodynamic diameter) in order to enhance visibility.	NPRM undetermined. Awaiting Clean Air Act amendments.
120-098	Health Assessment Documents - Trichloroethylene and Dichloromethane	NOA draft 52 FR 27257 7/20/87	EPA announces the availability of external review drafts of addenda to the health assessment documents for trichloroethylene and dichloromethane (methyl chloride), and a technical analysis of new methods and data on dichloromethane hazard assessments.	Final documents undetermined.
*120-101	Standards of Performance for New Stationary Sources - Notification and Recordkeeping 40 CFR 60	NPRM 52 FR 36440 9/29/87	EPA proposes amendments to the CAA standards of performance for new stationary sources, revising the reporting requirements.	Final rule 9/90.
120-103	NESHAPS - Organic Solvent Cleaning 40 CFR 61	Planned NPRM 55 FR 16873 4/23/90	This regulation will apply to organic solvent cleaners (degreasers) and will control emissions of perchloroethylene, methylene chloride, and trichloroethylene from new and existing sources.	NPRM 5/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
120-106	PSD Set II for PM ₁₀ 40 CFR 51 40 CFR 52 40 CFR 81	NPRM 54 FR 41218 10/5/89	EPA proposes to revise the maximum allowable increases (increments) for particulate matter under the requirements for prevention of significant deterioration (PSD). The proposed increments would define maximum allowable increases in concentrations of PM ₁₀ as follows: 4 µg/m ³ (annual arithmetic mean) and 8 µg/m ³ (24-hour maximum) for Class I areas; 17 µg/m ³ (annual arithmetic mean) and 30 µg/m ³ (24-hour maximum) for Class II areas; and 34 µg/m ³ (annual arithmetic mean) and 60 µg/m ³ (24-hour maximum) for Class III areas.	Final rule 11/90.
*120-107	SIPs - Ozone and Carbon Monoxide 40 CFR 52 40 CFR 81	Proposed policy 52 FR 45044 11/24/87 NPRM 53 FR 20722 6/6/88 Notice 53 FR 34500 9/7/88 Notice 55 FR 30973 7/30/90	EPA is developing a program to address the fact that many areas in the country have not attained the national ambient air quality standards for ozone and carbon monoxide by the 12/31/87 deadline identified in the CAA. The program will describe how EPA will interpret the CAA so as to bring those areas into attainment, and the steps EPA will take to implement that interpretation. EPA gives notice that it has: (1) formally notified the governors of 38 states that their SIPs for certain areas are substantially inadequate to assure attainment and maintenance of the primary NAAQS for ozone and/or carbon monoxide and (2) called upon those states to submit SIP revisions for approval under the Clean Air Act.	Final rule on hold, pending amendment of Clean Air Act.
120-115	NSPS - Municipal Waste Combustors 40 CFR 51 40 CFR 52 40 CFR 60	NPRM 54 FR 52251 12/20/89 Regulatory Agenda 55 FR 16879 4/23/90	EPA proposes to add Subpart Ea to 40 CFR 60. Subpart Ea would limit emissions from new, modified, and reconstructed municipal waste combustors (MWCs).	Final rule 12/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
120-116	NSPS - Municipal Landfills 40 CFR 60	Planned NPRM 55 FR 16871 4/23/90	This rule will regulate emissions from new and modified municipal landfills under Sect. 111(b). Pollutants to be regulated will include one or more designated pollutants (pollutants not regulated under Sects. 108-110 or 112 of the Act.)	NPRM 10/90. Final rule 1/92.
*120-118	NESHAPS - Radionuclides 40 CFR 61	NPRM 54 FR 9612 3/7/89 Final rule; notice of reconsideration 54 FR 51654 12/15/89 Corrections 55 FR 78 1/2/90 Notice of stay 55 FR 10455 3/21/90 Stay extended 55 FR 29205 7/18/90	EPA sets NESHAPS for radionuclide emissions from several source categories including DOE facilities, NRC licensees, uranium fuel cycle facilities, elemental phosphorus plants, coal-fired boilers, high-level nuclear waste disposal facilities, phosphogypsum stacks, underground and surface uranium mines, and uranium mill tailings operations. EPA also grants a reconsideration of Subpart I concerning emissions from facilities licensed by NRC with respect to the issues of duplicative regulation and possible effects on medical treatment.	Final rule of 12/15/89 effective immediately. Subpart I stayed until 9/11/90.
		Notice of reconsideration; compliance waiver 55 FR 13480 4/10/90 NPRM 55 FR 13482 4/10/90	EPA announces a limited reconsideration of Subpart R concerning radon emissions from phosphogypsum stacks that requires disposal of phosphogypsum in stacks or mines. EPA proposes to maintain or modify the rule to, alternatively or in combination, (1) make no change to Subpart R, (2) establish a threshold concentration level of radium, (3) allow the use of discrete quantities of phosphogypsum for researching and developing processes to remove radium from phosphogypsum, or (4) allow other alternative use of phosphogypsum. EPA also grants a limited compliance waiver that permits the continued agricultural use of phosphogypsum through the current growing season.	Compliance waiver effective 3/15/90. Final rule undetermined.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
120-142	NSPS - Fuel Gas Combustion Devices 40 CFR 60	NPRM 54 FR 8570 3/1/89 Technical amendments 54 FR 18308 4/28/89	EPA proposes to amend the emission monitoring requirements to require affected facilities to monitor SO2 after fuel gas combustion or, as an alternative, H2S in fuel gas combustion devices. EPA amends this proposed rule by adding the section detailing Performance Specification 7 (PS-7) which was inadvertently left out of the proposed rule.	Final rule 8/90.
*120-145	Interim Cold Ambient Air Temperature Carbon Monoxide Emission Standards 40 CFR 86	Planned NPRM 55 FR 16875 4/23/90	EPA is considering the adoption of carbon monoxide emission standards applicable to a temperature of 20 degrees F. which is lower than the current Federal Test Procedure range of 68 to 86 degrees F.	<u>NPRM 8/90.</u>
120-148	NAAQS - Lead 40 CFR 50.12	Planned NPRM 55 FR 16870 4/23/90	EPA is assessing new health effects information that has become available regarding lead and will make a decision for or against a change in the NAAQS.	NPRM 10/90.
120-149	NESHAPS - Asbestos (Risk Reduction) 40 CFR 61	Planned NPRM 55 FR 16872 4/23/90	EPA is considering revising the asbestos NESHAP to reduce further the risks to health.	Awaiting decision by EPA administrator.
*120-155	VOC Equipment Leak Fugitive Emissions	Notice 54 FR 37725 9/12/89 Notice 55 FR 14349 4/17/90	EPA gives notice of the establishment of an advisory committee to negotiate a rule to control fugitive emissions of toxic volatile organic compounds (VOCs) from chemical equipment leaks.	
		Notice 55 FR 27680 7/5/90	The Negotiated Rulemaking Advisory Committee for Fugitive Emissions from Equipment Leaks met again in July. The Committee has agreed on the conceptual framework for the CAA rule and will now review the regulatory language for implementation.	

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*120-156	NESHAPS - Vinyl Chloride 40 CFR 61	NPRM 50 FR 1182 1/9/85 Final rule 51 FR 34904 9/30/86 NPRM 54 FR 38938 9/21/89 Final rule 55 FR 28346 7/10/90	In response to petitioners' requests, EPA makes minor revisions to correct ambiguities in several definitions and in the applicability of certain regulatory requirements in the vinyl chloride standards.	Final rule effective <u>7/10/90</u> .
120-158	NSPS - Medical Waste Incineration 40 CFR 60	Planned NPRM 55 FR 16872 4/23/90	The incineration of medical waste is being investigated for control under Sect. 111. Add-on controls and operator training requirements are being investigated.	NPRM 3/92. Final rule 9/93.
120-160	Standards of Performance for New Stationary Sources - Appendix A 40 CFR 60	NPRM 54 FR 52190 12/20/89	EPA proposes to add Method 23, "Determination of Polychlorinated Dibenzo-p-Dioxins (PCDDs) and Dibenzofurans (PCDFs) from Stationary Sources," and Method 26, "Determination of Hydrogen Chloride Emissions from Stationary Sources," to Appendix A of 40 CFR 60.	Final rule undetermined.
120-161	Emission Guidelines for Existing Municipal Waste Combustors 40 CFR 60	Proposed guidelines 54 FR 52209 12/20/89	EPA proposes emission guidelines and compliance schedules for use by states in developing state regulations to control emissions from existing municipal waste combustors (MWCs).	Final guidelines undetermined.
120-162	NSPS - Revision of Appendix F, Addition to Appendix B 40 CFR 60	NPRM 54 FR 52207 12/20/89	EPA proposes (1) to revise Procedure 1 of Appendix F to make it applicable without further revision for all regulated pollutants, and (2) to add Performance Specification 4A to Appendix B.	Final rule undetermined.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
NUCLEAR WASTE POLICY ACT				
700-022	HLW Disposal in Geologic Repositories - EPA and NRC Conforming Amendments 10 CFR 60	NPRM 51 FR 22288 6/19/86 Regulatory Agenda 55 FR 17176 4/23/90	NRC proposes to conform its regulations for disposal of high-level radioactive wastes in geologic repositories to EPA standards of September 19, 1985, as mandated by the NHPA.	On hold indefinitely. Awaiting EPA comments and action.
*700-058	Storage of Spent Nuclear Fuel - Approved Casks 10 CFR 50 10 CFR 72	NPRM 54 FR 19379 5/5/89 Final rule 55 FR 29181 7/18/90	NRC amends its regulations to provide for the storage of spent nuclear fuel under a general license onsite provided the reactor licensee notifies the NRC, only NRC-certified casks are used for storage, and the spent fuel is stored under conditions specified in the cask's certificate of compliance. The rule also contains procedures for obtaining NRC approval of spent fuel storage cask designs.	Effective 8/17/90.
700-066	Rules of Practice for HLW License Proceedings 10 CFR 2	NPRM 54 FR 39387 9/26/89 Corrections 54 FR 40780 10/3/89 Regulatory Agenda 55 FR 17170 4/23/90	NRC proposes to amend its Rules of Practice for the licensing proceeding on the disposal of high-level radioactive waste at a geologic repository. The proposed rule would establish a new standard for the admissions of initial contentions, would define "late contentions" as any contention proposed after the initial contentions were submitted, would require parties to present direct testimony on contentions, would establish a compulsory hearing schedule, and would eliminate sua sponte review by the Commission's adjudicatory boards.	Final rule undetermined.
700-067	Temporary Storage of Spent Fuel After Cessation of Reactor Operation 10 CFR 51	NPRM 54 FR 39765 9/28/89 Regulatory Agenda 55 FR 17170 4/23/90	NRC is proposing to revise its generic determinations on the timing of availability of a geologic repository for commercial high-level radioactive waste and spent fuel and the environmental impacts of storage of spent fuel at reactor sites after the expiration of reactor operating licenses.	Final rule Summer 1990.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
700-068	NUPA Payment-Equal-To-Taxes (PETT) Provisions	Proposed notice of interpretation and procedures 55 FR 8180 3/7/90	The DOE Office of Civilian Radioactive Waste Management proposes its interpretation and procedures for certain payments-equal-to-taxes (PETT) provisions of the Nuclear Waste Policy Act. DOE will make these payments to eligible states, units of local government, and Indian tribes for activities related to siting, development, and operation of a high-level radioactive waste and spent-fuel repository and any MRS facility.	Final action undetermined.
700-069	Radiation Dose Criteria for HLW Geologic Repositories 10 CFR 60	Planned NPRM 55 FR 17174 4/23/90	NRC will propose to amend the regulations concerning radiation dose criteria. A central issue is the development of radiation dose criteria for a postulated accident that DOE would use to establish a limited access area for the high-level waste (HLW) geologic repository. In addition, a number of new definitions would be added.	NPRM 9/90. Final rule 8/91.
LOW-LEVEL RADIOACTIVE WASTE (LLW) POLICY AMENDMENTS ACT				
740-003	Environmental Protection Standards for LLW Disposal 40 CFR 193 40 CFR 764	ANPRM 48 FR 39563 8/31/83 Planned NPRM 55 FR 16850 4/23/90	EPA intends to develop environmental radiation protection standards and/or guides for low-level radioactive (possibly including natural and accelerator produced) waste disposal to protect the public health and general environment from potential adverse effects from this activity. Criteria triggering regulations are being considered.	NPRM 9/90. Final rule 12/91.
*740-004	LLW Below Regulatory Concern 10 CFR 2 10 CFR 20	ANPRM 51 FR 43367 12/2/86	NRC may amend its regulations to address radioactive waste disposal when low radionuclide quantities do not merit regulation as radioactive material. A generic rulemaking is favored over current petitions for exemption of specific wastestreams.	NPRM on hold indefinitely.
		Policy statement 55 FR 27522 7/3/90	NRC issues its policy statement on exemptions from regulatory control for small quantities of radioactive material. The statement defines the dose criteria and other considerations that will be used by NRC in making exemption decisions. Individual dose criteria of 1 and 10 mrem/yr and a collective dose criterion are established.	Effective 7/3/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*740-013	Incineration of Low-Level Radioactively Contaminated Waste Oil from Nuclear Power Plants 10 CFR 20	NPRM 53 FR 32914 8/29/88 Request for clarification 53 FR 48721 12/2/88 Regulatory Agenda 55 FR 17177 4/23/90	NRC proposes to amend its regulations to permit the onsite incineration of slightly contaminated waste oils generated at licensed nuclear power plants. EPA requests of NRC clarification of two issues: (1) the responsibility of NRC's licensees complying with the approval requirements of the Clean Air Act, and (2) the potential need for licensees obtaining state or federal hazardous waste permits.	Final rule 12/90.
740-014	Reasserting NRC's Sole Authority for Approving Onsite LLW Disposal in Agreement States 10 CFR 150	NPRM 53 FR 31880 8/22/88 Regulatory Agenda 55 FR 17177 4/23/90	NRC proposes to amend its regulations to reassert its jurisdiction for onsite low-level waste disposal for waste generated onsite at all reactors licensed by NRC in agreement states.	On hold.
740-019	Unregulated Disposal of Small Amounts of Radioactive Isotopes 10 CFR 20	Petition for rulemaking 53 FR 41342 10/21/88 Correction 53 FR 44014 11/1/88	Rockefeller University requests that NRC amend its regulations under which a licensee may dispose of animal tissue containing small amounts of radioactivity without regard to its radioactivity. The petition requests that the list of radioactive isotopes for which unregulated disposal is permitted be expanded to include sulfur-35, calcium-45, chromium-51, iodine-125, and iodine-131 in concentrations less than 0.001 microcurie/gm.	NPRM 9/90.
740-021	Low-Level Waste Manifest Information and Reporting 10 CFR 20 10 CFR 61	Planned NPRM 55 FR 17171 4/23/90	NRC will propose to: (1) augment and improve information contained in manifests accompanying shipments of waste to LLW disposal facilities; (2) require that operators of these disposal facilities store portions of this manifest information in onsite computer recordkeeping systems; and (3) require that operators periodically submit, in an electronic format, reports of shipment manifest information.	NPRM 8/90. Interim final rule 5/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
ATOMIC ENERGY ACT				
Transportation Regulations - Compatibility with IAEA -- RU# 400-093				
100-016	Protection Requirements for Spent Fuel Shipments 10 CFR 73	NPRM 49 FR 23867 6/8/84	The rule modifies the present interim requirements for protection of shipments of irradiated reactor fuel cooled for 150 days or more. Present interim requirements will remain for fuel cooled less than 150 days.	Final rule postponed indefinitely.
100-018	Residual Radioactive Materials Cleanup - Radiation Protection Criteria 40 CFR 194	ANPRM 51 FR 22264 6/18/86 Planned NPRM 55 FR 16850 4/23/90	EPA is developing public health and environmental radiation protection criteria for cleanup of residual radioactivity at decommissioned sites. Licensees of the NRC or Agreement States; sites owned or used by DOE, DOD, the former AEC, and the former Manhattan Engineering District; and sites where natural and accelerator-produced radioactive materials have been used would be affected.	NPRM 10/90. Final rule 10/92.
100-020	Definition of Safety Related and Important to Safety 10 CFR 50	Planned NPRM 55 FR 17165 4/23/90	NRC proposes to clarify its regulations on the use of the terms "important to safety" and "safety related" by adding definitions of these two terms and of "facility licensing documents" to 10 CFR 50 and by discussing how these definitions will be applied in licensing reviews.	On hold indefinitely.
100-021	Exposure Limits for Transuranics	NPRM 42 FR 60956 11/30/77 Regulatory Agenda 55 FR 16850 4/23/90	EPA proposes interim guidance to federal agencies to limit radiation doses to the general population from transuranic elements present in the environment.	Federal agencies have provided comments to EPA. Still awaiting EPA action.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
100-033	Explanation to Table S-3, Uranium Fuel Cycle Environmental Data 10 CFR 51	Revision of deferred proposed rule: NPRM 46 FR 15154 3/4/81 Regulatory Agenda 55 FR 17164 4/23/90	NRC proposes a narrative explanation of the numerical values of Table S-3, "Table of Uranium Fuel Cycle Environmental Data," which appears in the NRC environmental protection regulations. Values for radon-222 and technetium-99 will be added.	Final rule 8/90.
100-039	Residual Radioactive Contamination Limits for Decommissioning NRC Licensed Facilities 10 CFR 20	Planned NPRM 53 FR 14698 4/25/88 NOA 55 FR 6137 2/21/90	NRC will establish residual radioactive contamination limits that must be met before buildings, structures, equipment, materials, and land may be released and the license terminated.	Withdrawn 4/6/88. Issue addressed will be incorporated into a policy statement to be issued in 8/90.
100-041	Revisions to the Standards for Protection Against Radiation 10 CFR 20	ANPRM 45 FR 18023 3/20/80 NPRM 51 FR 1092 1/9/86 Notice 55 FR 18689 5/3/90	NRC proposes revision of requirements for protection of individuals exposed within and outside the workplace to ionizing radiation from normal operations licensed by the NRC. The revision will reflect current data on health risks, dosimetry, and radiation protection practices.	Final rule Summer 1990.
100-053	Criteria for Extraordinary Nuclear Occurrence 10 CFR 140	NPRM 50 FR 13978 4/9/85 Regulatory Agenda 55 FR 17164 4/23/90	NRC is considering revising the criteria for an "extraordinary nuclear occurrence." The changes are designed to avoid the problems encountered by the NRC in applying existing criteria to Three Mile Island.	On hold.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
100-111	Agreement State Radiation Control Programs	Policy statement 52 FR 21132 6/4/87 Proposed policy revision 55 FR 10851 3/23/90	NRC proposes to revise its general statement of policy, "Guidelines for NRC Review of Agreement State Radiation Control Programs," to incorporate changes to the regulation of LLW disposal in permanent facilities.	Final revision undetermined.
100-115	Industrial Radiographic Exposure Devices - Safety Requirements 10 CFR 2 10 CFR 34	NPRM 53 FR 8460 3/15/88 Final rule 55 FR 843 1/10/90 Corrections 55 FR 2281 1/23/90	NRC issues a final rule that requires licensees doing industrial radiography to use certain types of exposure devices and to wear alarm rateometers. The rule does not apply to devices containing naturally occurring and accelerator-produced radioactive materials. NRC also modifies its enforcement policy and procedures.	Effective 1/10/91.
100-129	Environmental Standards for the Management and Disposal of Spent Nuclear Fuel, HLW, and TRU Radioactive Wastes 40 CFR 191	Planned NPRM 55 FR 16849 4/23/90	EPA will promulgate generally applicable environmental standards for the management and disposal of spent nuclear fuel, high-level and transuranic radioactive wastes to establish limits for the release of radioactive materials to the environment.	NPRM 12/90. Final rule 6/92.
*100-131	Integrated Schedules for Implementation of Plant Modifications 10 CFR 50	Proposed policy statement 52 FR 45344 11/27/87	NRC issues a proposed policy statement that describes the policy the Commission intends to use to promote voluntary licensee integrated schedules for implementing regulatory requirements and other improvements in nuclear power plants.	Final policy statement placed on hold indefinitely.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
100-157	Transportation Regulations - Compatibility with IAEA 10 CFR 71	NPRM 53 FR 21550 6/8/88 Corrections 53 FR 23484 6/22/88 Regulatory Agenda 55 FR 17177 4/23/90	NRC proposes to revise its regulations for transportation of radioactive material to make them compatible with those of the IAEA. The basic standards for packaging will remain unchanged, and the transport of low-specific-activity radioactive material is considered. NRC also proposes to include the criteria for approval of packages for air transport of plutonium in 10 CFR 71 (see comparable DOT regulation RU# 400-093).	Final rule 10/90.
*100-174	Nuclear Plant License Renewal 10 CFR 2 10 CFR 50 10 CFR 54 10 CFR 50	ANPRM 53 FR 32919 8/29/88 ANPRM 54 FR 41980 10/13/89 NPRM 55 FR 29043 7/17/90	NRC proposes to establish the requirements that an applicant for renewal of a nuclear power plant operating license must meet, the information that must be submitted to the NRC for review so NRC can determine whether those requirements have in fact been met, and the application procedures.	Comments by 10/15/90. Final rule 4/92.
		NOA 55 FR 29122 7/17/90	NRC publishes four reports that provide supplementary information to its 7/17/90 proposed rule: (1) NUREG-1412, "Foundation for the Adequacy of the Licensing Bases," (2) NUREG-1411, "Response to Public Comments Resulting from the Public Workshop on Nuclear Power Plant License Renewal," (3) NUREG-1398, "Environmental Assessment for Proposed Rule on Nuclear Power Plant License Renewal," and (4) NUREG-1362, "Regulatory Analysis for Proposed Rule on Nuclear Power Plant License Renewal."	Comments at any time.
100-186	Notification of Incidents 10 CFR 20 10 CFR 30 10 CFR 40 10 CFR 70	NPRM 55 FR 19890 5/14/90	NRC proposes to revise licensee reporting requirements for notifications of incidents related to radiation safety to ensure that significant occurrences at material licensee facilities are promptly reported to NRC.	Final rule 11/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
100-187	Licenses and Radiation Safety Requirements for Large Irradiators 10 CFR 36	Planned NPRM 55 FR 17168 4/23/90	NRC proposes to develop regulations to specify radiation safety requirements and license requirements for the use of licensed radioactive materials in large irradiators. The requirements would apply to large panoramic irradiators and certain large self-contained irradiators in which the source always remains under water.	NPRM 9/90. Final rule 4/91.
100-188	Criteria and Procedures for Reporting of Defects 10 CFR 21 10 CFR 50	NPRM 53 FR 44594 11/4/88 Regulatory Agenda 55 FR 17164 4/23/90	NRC proposes to amend its regulations on the reporting of safety defects. The amendments would apply to licensees and non-licensees who construct facilities for or supply components to licensed activities. The amendments would eliminate duplicative reporting of defects, clarify the criteria for reporting defects, and establish uniform time periods for reporting and uniform requirements for the content of the reports.	Draft of final rule under evaluation by Commission. Issuance date undetermined.
*100-189	Criteria and Procedures for Determining Eligibility for Access to Classified Matter or Significant Quantities of Special Nuclear Material 10 CFR 710	NPRM 54 FR 5376 2/2/89 Regulatory Agenda 55 FR 16108 4/23/90	DOE proposes a rule dealing with criteria and procedures determining eligibility for access to classified matter or significant quantities of special nuclear material. This action would establish a Q(R) access authorization for individuals applying for or currently holding a position identified as a Personnel Security Assurance Program (PSAP) position.	Final rule 8/90. Additional NPRM 8/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*100-222	Code and Standards for Nuclear Power Plants 10 CFR 50	Planned NPRM 55 FR 17168 4/23/90	NRC will incorporate by reference Subsection IWE, "Requirements for Class MC Components of Light-Water Cooled Power Plants," of Sect. XI of the ASME Code. Section IWE provides the rules and requirements for inservice inspection, repair, and replacement of Class MC pressure retaining components and their integral attachments and of metallic shell and penetration liners of Class CC pressure retaining components and their integral attachment in light-water cooled power plants.	<u>NPRM 12/91.</u>
100-223	Pressurized Thermal Shock Rule 10 CFR 50	NPRM 54 FR 52946 12/26/89 Notice 55 FR 71 1/2/90 Regulatory Agenda 55 FR 17179 4/23/90	NRC proposes to revise the pressurized thermal shock rule of 1985 to make the procedure used to calculate the amount of radiation embrittlement that a reactor vessel receives consistent with that given in Revision 2 of Regulatory Guide 1.99.	Final rule 10/90.
100-224	Primary Reactor Containment Leakage Testing for Water-Cooled Reactors 10 CFR 50	NPRM 51 FR 39538 10/29/86 Regulatory Agenda 55 FR 17175 4/23/90	NRC propose to update and revise the 1973 criteria for preoperational and periodic pressure testing for leakage of primary containment boundaries of water-cooled power reactors in order to eliminate inconsistencies and obsolete requirements.	Final rule undetermined.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to E4-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
100-234	Physical Protection Requirements 10 CFR 70 10 CFR 72 10 CFR 73 10 CFR 75	NPRM 54 FR 33570 8/15/89 Notice 55 FR 7960 3/6/90 Regulatory Agenda 55 FR 17179 4/23/90	NRC proposes to amend its regulations that cover the physical protection of special nuclear materials.	Final rule on hold.
100-247	Clarification of Anticipated/Unanticipated Processes and Events 10 CFR 60	Planned NPRM 55 FR 17163 4/23/90	NRC will propose to modify and clarify the definitions of the terms "anticipated processes and events," "unanticipated processes and events," and "geologic setting" as they are used in the licensing requirements for disposal of radioactive wastes in geologic repositories.	NPRM undetermined. May be combined with another rulemaking.
100-248	Emergency Response Data System 10 CFR 50	Planned NPRM 55 FR 17171 4/23/90	NRC will propose to require the implementation of the NRC-approved Emergency Response Data System (ERDS) at all licensed nuclear power plants. The ERDS is a licensee-activated computer data link between the electronic data systems at licensed nuclear power facilities and a central computer in the NRC Operations Center which allows transmission of data to the Center on four types of parameters during an emergency: (1) reactor core and coolant system conditions, (2) conditions inside the containment building, (3) radioactivity release rates, and (4) data from the plant's meteorological tower to assess the distribution of potential or actual impact on the public.	NPRM 9/90. Final rule 3/91.
100-249	Requirements for Possession of Industrial Devices 10 CFR 31	Planned NPRM 55 FR 17172 4/23/90	NRC will propose to amend the regulations for the possession of industrial devices containing byproduct material to require device users to report to the NRC on a periodic basis. The proposed report would indicate that the device is still in use or to whom the device has been transferred, and so would assure that devices are not improperly transferred or inadvertently discarded.	NPRM 9/90. Final rule 5/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*100-250	Export of Heavy Water to Canada 10 CFR 110	Planned NPRM 55 FR 17180 4/23/90	NRC plans to amend the regulations concerning the import and export of nuclear equipment and material to allow NRC staff to act upon license applications for export of heavy water to Canada without prior consultation with the Commission. Current regulations require that license applications for the export of 1000 kilograms or more of heavy water to any country require review by the Commission.	<u>NPRM 12/90.</u>
100-252	Import and Export of Radioactive Waste 10 CFR 110	ANPRM 55 FR 4181 2/7/90 Planned NPRM 55 FR 17163 4/23/90	NRC will propose to regulate the import and export of radioactive wastes, in particular low-level wastes, in order to more properly control the international transfer of these wastes.	NPRM undetermined.
*100-256	U-AVLIS Uranium Enrichment - Permits for Access to Restricted Data 10 CFR 725	NPRM 55 FR 15237 4/23/90	DOE proposes to amend the regulations concerning permits for access to uranium isotope separation restricted data by updating category C-24 to include the U-AVLIS technology for the separation of uranium isotopes and requiring private sector permit applicants to pay \$100,000 for an access permit. The purpose of the amendments is to encourage private sector participation in the government's uranium enrichment program.	<u>Final rule 12/90.</u>

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
100-258	Emergency Preparedness Regulations 10 CFR 50	Planned NPRM 55 FR 17173 4/23/90	NRC will propose to clarify the linkage between the need for "reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency" indicated in Sect. 50.47(a) and 16 planning standards outlined in Sect. 50.47(b). In addition, this rule will clarify the term "range of protective" actions and the issues of monitoring of evacuees, actions for recovery and reentry, notification of the public, evacuation time estimates, and exercise frequency.	NPRM 12/90. Final rule 12/91.
		Planned NPRM 55 FR 17174 4/23/90	NRC will propose a rule to amend the regulations concerning those portions of emergency plans which cannot be exercised prior to issuance of a Part 52 combined license. This rulemaking will be accomplished on a "high priority basis."	NPRM on hold.
100-262	Zero-Release Low-Level Radioactive Waste Disposal Facility - Sierra Club Petition 10 CFR 61	Petition for rulemaking 55 FR 13797 4/12/90 Receipt of amendment 55 FR 23206 6/7/90	NRC has received a petition for rulemaking from the Sierra Club to amend 10 CFR 61 to permit the design and construction of a zero-release LLW facility in a saturated zone so that North Carolina may waive its requirement that the bottom of a LLW facility be at least seven feet above the seasonal high water table. The Sierra Club amends its petition by requesting NRC to consider new information on polymer concrete technology as an alternative means for realizing the objective of the original petition.	
*100-264	Financial Assurance Mechanisms for Decommissioning - Format and Content	NOA 55 FR 29122 7/17/90	NRC issues Regulatory Guide 3.66, "Standard Format and Content of Financial Assurance Mechanisms Required for Decommissioning Under 10 CFR Parts 30, 40, 70, and 72."	<u>Comments at any time.</u>

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*100-265	Nuclear Plant License Renewal - Environmental Effects 10 CFR 51	ANPRM 55 FR 29964 7/23/90	NRC is considering an amendment to its regulations that would add provisions concerning the scope of environmental effects which would be addressed by the Commission in conjunction with applications for license renewal for nuclear power plants.	<u>Comments by</u> <u>10/22/90.</u>
		NOI 55 FR 29967 7/23/90	NRC gives notice of its intent to prepare a generic environmental impact statement on the effects of renewing the operating licenses of individual nuclear power plants. The findings in the impact statement would then be codified in NRC environmental protection regulations, thereby limiting the scope of issues which need to be addressed in individual license renewal applications.	<u>Comments by</u> <u>10/22/90.</u>
*100-266	Enforcement Policy Regarding Occupational Doses from "Hot Particles"	Policy statement 55 FR 31113 7/31/90	NRC presents the criteria the Commission will follow to provide for the use of enforcement discretion in cases that involve an occupational dose to the skin resulting from exposure to radiation emitted from a hot particle on or near the skin. The provisions of this policy will be followed by NRC until a new limit applicable to such cases is established by a revision of 10 CFR 20.	<u>Effective</u> <u>7/30/90.</u>
*100-267	Individual Plant Examinations for Severe Accident Vulnerabilities	NOA 55 FR 30332 7/25/90	NRC announces a draft supplement to Generic Letter 88-20 to request licensees to perform individual plant examinations for severe accident vulnerabilities. A draft guidance document, NUREG-1407, is available.	<u>Comments by</u> <u>8/27/90.</u>
*100-268	Criticality Safety at DOE's Rocky Flats, CO Plant	Notice 55 FR 23584 6/11/90	The Defense Nuclear Facilities Safety Board publishes its recommendations to the Secretary of Energy concerning criticality safety at the Rocky Flats Plant in Colorado.	<u>Comments by</u> <u>8/27/90.</u>
		Notice 55 FR 30499 7/26/90	DOE gives notice of the response of the Secretary of Energy to Recommendation 90-6 of the Defense Nuclear Facilities Safety Board concerning criticality safety at DOE's Rocky Flats plant in Colorado.	<u>Comments by</u> <u>8/27/90.</u>

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
URANIUM MILL TAILINGS RADIATION CONTROL ACT				
930-029	Groundwater Protection Standards for Inactive Uranium Tailing Sites 40 CFR 192	NPRM 52 FR 36000 9/24/87 Regulatory Agenda 55 FR 16850 4/23/90	EPA proposes standards for preventing groundwater contamination at inactive uranium processing sites. The rule will replace the groundwater provisions of the final rule of 1/5/83 for remedial action.	Final rule 9/90.
930-034	Uranium Mill Tailing Sites - Remedial Action Program and Annotation of Land Records 10 CFR 764	NPRM 54 FR 29732 7/14/89 Regulatory Agenda 55 FR 16109 4/23/90	DOE proposes to clarify the obligation of certain states to annotate local land records so as to ensure that future purchasers of remediated properties will be notified of the extent of the remedial work.	Final rule 8/90.
930-035	Custody and Long-Term Care of Uranium Mill Tailings Sites 10 CFR 40	ANPRM 53 FR 32396 8/25/88 NPRM 55 FR 3970 2/6/90 Regulatory agenda 55 FR 17167 4/23/90	NRC is proposing to issue general licenses that would permit it to license the custody and long-term care of decommissioned uranium or thorium mill tailings sites after remedial actions under the Uranium Mill Tailings Radiation Control Act have been completed.	Final rule 1/91.
TOXIC SUBSTANCES CONTROL ACT				
Containerized Liquids in Landfills -- RU# 840-024				
920-001	Update to Inventory Database 40 CFR 710	Planned technical amendment 55 FR 16840 4/23/90	The Office of Toxic Substances (OTS) is planning to make some technical amendments to the TSCA Inventory Database rule in order to facilitate compliance and to make the rule consistent with other OTS and EPA reporting activities.	Technical amendment 8/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
920-053	Test Rule - Exemption Policy Revision 40 CFR 790	Interim final rule 50 FR 20652 5/17/85 Interim final rule 54 FR 36311 9/1/89 Regulatory Agenda 55 FR 16837 4/23/90	EPA amends the test rule development and procedural rule (49 FR 39774) to allow for a single phase rulemaking covering both the effects for which testing is necessary and the testing methodology. EPA also amends it by modifying and clarifying the procedures for reviewing and approving or denying modifications to test standards and test schedules.	Interim final rules effective immediately. Another interim rule due 12/90. Final rule 6/92.
920-064	Comprehensive Assessment Information Rule 40 CFR 704	Planned NPRM 55 FR 16837 4/23/90	EPA is considering revision of the Comprehensive Assessment Information Rule (CAIR) to establish exemptions for small and "de minimis" volumes, refine trade name reporting requirements, reduce certain advance substantiation requirements for Confidential Business Information (CBI) claims, and define processing activities using processor subclasses.	NPRM 10/90.
920-070	Test Guidelines 40 CFR 796 40 CFR 797	NPRM 52 FR 36334 9/28/87	EPA proposes to add new test guidelines of general procedures for laboratory testing for an effect or characteristic deemed important for evaluating the fate and environmental hazard of a chemical substance or mixture (test substance).	Final rule late 1990.
920-076	Termination of PCBs Disposal Approvals 40 CFR 761	Planned NPRM 55 FR 16836 4/23/90	EPA is considering establishing uniform procedures for the revocation of TSCA disposal permits.	NPRM undetermined.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*920-092	Chemical Test Data	Notice 55 FR 27303 7/2/90	EPA announces the receipt of test data on commercial hexane and 1,2-dichloropropane submitted pursuant to a final test rule under TSCA.	
		Notice 55 FR 29411 7/19/90	EPA announces the receipt of chemical test data on tributyl phosphate submitted pursuant to a final test rule and methyl tert-butyl ether submitted pursuant to a testing consent order under TSCA.	
920-113	SARA Section 110 Chemicals Generic Test Rule 40 CFR 790	Planned NPRM 55 FR 16834 4/23/90	This regulation will set forth the policies and procedures for using the TSCA Sect. 4 testing authority to obtain toxicity and chemical fate testing to fill certain data needs identified in toxicity profiles of chemicals prepared pursuant to SARA.	NPRM 3/91. Final rule 9/91.
920-117	SNUR and Health and Safety Data Reporting - CFC Substitutes 40 CFR 716 40 CFR 721	NPRM 55 FR 6012 2/21/90 Correction 55 FR 13164 4/9/90	EPA proposes a significant new use rule (SNUR) for two chlorofluorocarbon (CFC) substitutes, 2-chloro-1,1,1-trifluoroethane and 1,2-dichloro-1,1-difluoroethane. EPA also proposes to add these two substances and five additional potential CFC substitutes to the health and safety data reporting rule.	Final rule undetermined.
920-119	PCBs - Wet Weight, Dry Weight 40 CFR 761	NPRM 55 FR 12866 4/6/90	EPA proposes to amend the PCB regulations final rule of 7/10/84 (49 FR 28171) by adding the phrase "on a dry weight basis" to Sect. 761.1(b).	Technical amendment 9/90. Final rule undetermined.
*920-123	Drinking Water Chemicals Proposed Test Rule 40 CFR 795 40 CFR 799	NPRM 55 FR 21393 5/24/90	EPA proposes a test rule under Sect. 4 of TSCA that would require manufacturers and processors to test the following substances for certain health effects: chloroethane, 1,1-dichloroethane, 1,1,2,2-tetrachloroethane, n-propylbenzene, and 1,3,5-trimethylbenzene. EPA also proposes a new testing guideline for a 14-day repeated dose oral toxicity study. This proposed rule supports EPA's effort to develop Health Advisories for unregulated drinking water contaminants monitored under the SDWA.	Final rule undetermined.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
HAZARDOUS MATERIALS TRANSPORTATION ACT				
Transportation Regulations - Compatibility with IAEA -- RU# 100-157				
400-014	Railroad Shipment of Hazardous Material - Use of Cargo Tanks 49 CFR 174	ANPRM 50 FR 18278 4/30/85	The Federal Railroad Administration and the RSPA are considering development of safety standards to permit the use of cargo tanks, portable tanks, IM portable tanks, and multi-unit tank car tanks in trailers on flatcar and containers-on-flatcar service.	NPRM on hold until Summer 1990.
400-019	Highway Transport - Requirements for Cargo Tanks 49 CFR 107 49 CFR 171 49 CFR 172 49 CFR 173 49 CFR 176 49 CFR 177 49 CFR 178 49 CFR 180	NPRM 50 FR 37766 9/17/85 Corrections 50 FR 49866 12/5/85 Corrections 54 FR 28750 7/7/89 Final rule 54 FR 24982 6/12/89 Partial grant of petitions; effective date extended 55 FR 21035 5/22/90	RSPA revises and clarifies the regulations pertaining to the manufacture of cargo tanks and the operation, maintenance, repair, and requalification of all specification cargo tanks, including vacuum loaded tanks. It establishes registration requirements for persons who are engaged in the manufacture, repair, or certification of cargo tanks and includes improved standards for inspection and testing of cargo tanks, improved valves and closures to prevent leakage and the risk of fire in overruns and other accidents, and new qualification criteria for cargo tank manufacturers, repairers, and inspectors.	Effective date extended to 9/1/90. Amended final rule 8/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
400-033	Performance-Oriented Packaging Standards 49 CFR 171 49 CFR 172 49 CFR 173 49 CFR 174 49 CFR 175 49 CFR 176 49 CFR 177 49 CFR 178 49 CFR 179	ANPRM 47 FR 16268 4/15/82 NPRM 52 FR 16482 5/5/87 Supplemental NPRM 52 FR 42772 11/6/87 Supplemental NPRM 54 FR 31158 7/26/89 Notice of competent authority ruling 55 FR 10750 3/22/90 Supplemental NPRM 55 FR 21342 5/23/90 Supplemental NPRM 55 FR 26574 6/28/90	RSPA proposes performance-oriented packaging standards for small packagings based on the Recommendation of the U.N. Committee of Experts on the Transport of Dangerous Goods and the ICAO Technical Instructions. Conformance of standards will improve packaging, classification, and hazard communication. RSPA proposes to retain the current classification of anhydrous ammonia as a nonflammable gas rather than to reclassify the material as a poisonous gas. RSPA announces a decision clarifying which variations from previously tested combination package designs may be used without further testing. RSPA amends the NPRM of 11/6/87 by modifying the proposals dealing with rail transportation of hazardous materials. RSPA proposes to amend 40 CFR Parts 171-180 on hazard classification, packaging, and communication requirements applicable to flammable solids, oxidizers, and organic peroxides to enhance safety and facilitate international commerce.	Final rule 12/90.
400-039	Pipeline Operator Qualifications 49 CFR 192 49 CFR 195	ANPRM 52 FR 9189 3/23/87 Planned NPRM 55 FR 16452 4/23/90	RSPA is considering the need to develop additional regulations governing training and qualification of persons that operators hire to design, construct, operate, or maintain pipeline facilities used in transport of gas or hazardous materials. An alternative program of operator certification is also being considered.	NPRM 8/90. Final rule 12/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*400-057	Railroad Shipment of Hazardous Waste - Defects of Tank Car Tanks 49 CFR 173	ANPRM 52 FR 46510 12/8/87 Planned NPRM 55 FR 16565 4/23/90	RSPA proposes to require railroad tank car owners to inspect for cracks after certain tank repairs.	NPRM 8/90. Final rule 1/91.
400-061	Highway Routing Standards for Hazardous Materials 49 CFR 173.177 49 CFR 397	ANPRM 53 FR 11618 4/7/88 Planned NPRM 55 FR 16453 4/23/90	RSPA is considering establishing routing criteria, requirements, and methodologies for analyzing alternative routes for highway transport of non-radioactive hazardous materials.	NPRM Summer 1990.
400-062	Registration of Shippers and Carriers of Hazardous Materials 49 CFR 171 49 CFR 173 49 CFR 177	Planned NPRM 55 FR 16560 4/23/90	DOT lacks comprehensive data on the number, volume, and other statistics characterizing the transportation of hazardous materials in commerce. Comments will be requested on the burdens and benefits associated with various alternatives that could be used to obtain such information. The registration of carriers and shippers is one such alternative.	Placed on hold pending administration decision.
400-063	Hazardous Liquid Pipeline Damage-Prevention Program 49 CFR 192 49 CFR 195	NPRM 53 FR 24747 6/30/88 Regulatory Agenda 55 FR 16570 4/23/90	DPS, RSPA, and DOT propose to require operators of buried onshore hazardous liquid pipelines to conduct excavation damage prevention programs in accordance with criteria adopted previously for gas pipeline damage prevention programs. A large percentage of liquid pipeline accidents are caused by excavation damage, and experience has shown that rates of excavation accidents diminish when operators participate in such a program.	Final rule 9/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*400-064	Maps and Records of Pipeline Location and Characteristics - State Notification 49 CFR 192 49 CFR 195	Planned NPRM 55 FR 16453 4/23/90	As part of a continuing policy to adopt similar safety requirements for gas and hazardous liquid pipelines, this action will propose to equalize the requirements that gas and liquid operators keep maps and records to show the location and other characteristics of pipelines and will require them to provide this information to state agencies upon request.	<u>NPRM 10/90.</u> <u>Final rule 7/91.</u>
*400-075	Transportation of Hazardous Materials; Miscellaneous Amendments 49 CFR 171 49 CFR 172 49 CFR 173 49 CFR 175 49 CFR 176	NPRM 53 FR 36410 9/19/88 Final rule 54 FR 38790 9/20/89 Corrections 54 FR 47986 11/20/89	RSPA makes a number of amendments to the Hazardous Materials Regulations (HMR) based on rulemaking petitions from industry and RSPA's own initiative. This action is necessary to update the regulations and to reduce RSPA's backlog of rulemaking petitions.	Final rule effective 11/15/89. Corrections effective 11/15/89.
		Final rule; correction; response to petitions 55 FR 27640 7/5/90	In this final rule, RSPA amends 49 CFR 173.31(a)(5) to extend the compliance date for having vertical restraint systems on certain DOT specification tank cars from 11/15/90 to 11/15/92 in response to petitions for reconsideration. The effect of this action is to minimize operational impacts on affected tank car shippers and owners by providing an extended implementation period for equipping non-conforming tanks cars with the required shelf couplers.	<u>Effective 8/6/90.</u>
400-079	Packaging and Hazard Communication of Etiologic Agents 49 CFR 172 49 CFR 173	NPRM 53 FR 45525 11/10/88 Regulatory Agenda 55 FR 16571 4/23/90	RSPA proposes to amend hazardous materials transport regulations to revise the definition of "etiologic agent" and remove the 50 ml exemption in 49 CFR 173.386.	Final rule 10/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*400-094	Special Cargo Requirements for Benzene 46 CFR 30 46 CFR 151 46 CFR 153 46 CFR 197	NPRM 55 FR 2978 1/29/90 Regulatory Agenda 55 FR 16450 4/23/90	The Coast Guard proposes to revise the special carriage requirements for benzene and benzene mixtures and to add new regulations concerning occupational exposure to benzene on Coast Guarded inspected vessels. The regulations are being amended to incorporate the lower benzene exposure levels adopted by OSHA to provide workers in the marine mode with the same protection as their land-based counterparts.	Final rule 12/90.
400-095	Elevated Temperature Materials 49 CFR 171 49 CFR 172 49 CFR 173	NPRM 54 FR 38930 9/21/89 Regulatory Agenda 55 FR 16571 4/23/90	RSPA is proposing to regulate materials which pose a hazard due to their being transported at elevated temperatures. Materials would include those in a liquid phase having temperatures at or above 212 degrees F and materials in a solid phase having temperatures at or above 464 degrees F. RSPA is also proposing to regulate, as flammable liquids, materials in a liquid phase with flash points at or above 100 degrees F which are transported at or above their flash points.	Final rule undetermined.
400-097	Transportation of Hydrogen Sulfide by Pipeline 49 CFR 192	ANPRM 54 FR 24361 6/7/89 Planned NPRM 55 FR 16566 4/23/90	Federal gas pipeline safety regulations do not specifically address all the safety risks associated with the presence of hydrogen sulfide in natural gas, such as those involving sulfide stress cracking and toxicity effects. RSPA will determine the need for regulations to control the concentration of hydrogen sulfide in natural gas pipeline systems.	NPRM 9/90.
400-099	Gas Pipelines Corrosion 49 CFR 192	NPRM 54 FR 27041 6/27/89 Regulatory Agenda 55 FR 16571 4/23/90	RSPA proposes to require gas pipeline operators who must now inspect for corrosion on buried metallic pipe that is exposed to investigate further to determine the full extent of any corrosion that is found.	Final rule 9/90.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)		ANTICIPATED CHANGES	SCHEDULED ACTION
780-015	Occupational Exposure to Asbestos, Tremolite, and Anthophyllite, and Actinolite 29 CFR 1910 29 CFR 1926	Administrative stay and revisions		On 6/20/86 OSHA revised the standards governing occupational exposure to asbestos, tremolite, anthophyllite, and actinolite in general industry and in the construction industry. OSHA has since received many comments regarding the appropriateness of regulating nonasbestiform tremolite, anthophyllite, and actinolite as presenting the same health risk as asbestos. OSHA has granted administrative stays of the standards as they apply to nonasbestiform varieties to allow time for OSHA to reopen the rulemaking record on the issue of whether, and how, to regulate occupational exposure to the nonasbestiform varieties. OSHA makes minor conforming amendments and extends the partial administrative stay of the revised final standards for occupational exposure as they apply to nonasbestiform tremolite, anthophyllite, and actinolite.	Asbestos forms made effective 7/21/86. Administrative stay for other forms extended to 11/30/90.

*780-044	Asbestos Short-Term Exposure Limit 29 CFR 1910 29 CFR 1926	NPRM 49 FR 14116 4/10/84 Final rule 51 FR 22612 6/20/86 Final rule amended 53 FR 35610 9/14/88 Corrections 53 FR 37080 9/23/88 Notice 54 FR 29546 7/13/89 Response to court remand 54 FR 52024 12/20/89	OSHA amends the occupational exposure standard for asbestos to a permissible exposure limit of 0.2 fiber/cc as an 8-hour time-weighted average airborne concentration. Separate standards for the construction and maritime industries and general industry are included. EPA's final rule under TSCA Section 6(a) was withdrawn 8/86 (51 FR 38926). OSHA then amends the final rule by adding a short-term exposure limit (STEL) of 1 f/cc average over a sampling period of 30 minutes.	Final rule effective 7/21/86. Amendment of 9/14/88 effective 10/14/88.
		Response to court remand 55 FR 3724 2/5/90	In response to a 2/88 court ruling, OSHA takes action on three Category I remand issues by: (1) removing the ban on the spraying of asbestos-containing materials, (2) changing the regulatory text to clarify when construction employers must resume periodic monitoring, and (3) explaining why OSHA is not amending the regulatory text at this time to clarify the limited exemption for small-scale short-duration operations in the construction industry standard.	Amendments of 12/20/89 effective 1/19/90.
		Response to court remand 55 FR 3724 2/5/90	In response to a 2/88 court remand, OSHA issues a notice of resolution to Category II remand issues. This final rule amendment expands the ban on workplace smoking, adds training requirements to smoking control programs, clarifies respirator requirements, and requires training on warning signs and labels.	Amendments effective 5/7/90.
		NPRM 55 FR 29712 7/20/90	In response to litigation, OSHA proposes to lower the PEL to 0.1 f/cc, set additional communication and notification requirements, require oversight of all construction operations, and more explicitly define the exemptions from the negative-pressure enclosure requirement.	Comments by 9/25/90. Public hearing 10/23/90.

This rule does not propose to accredit training programs for employees engaged in emergency response activities.	Comments on NPRM by 9/21/90. Public hearings scheduled 10/2 through 10/11/90. Final rule 1/91.
780-047	Electrical Protective Equipment; Generation, Transmission, Distribution 29 CFR 1910	NPRM 54 FR 4974 4/23/90 Regulatory Agenda 55 FR 16408 4/23/90	OSHA proposes a standard for work practices used in operation and maintenance of electric power generation, transmission, and distribution facilities. Revisions to protective equipment requirements are included.	Final rule 4/91.
780-049	Occupational Exposure to Bloodborne Pathogens 29 CFR 1910	NPRM 54 FR 23042 5/30/89 Notice 54 FR 30330 7/19/89 Notice 54 FR 42378 10/16/89 NOA; comment period extended 55 FR 10250 3/20/90 Regulatory Agenda 55 FR 16410 4/23/90	OSHA proposes to reduce occupational exposure to Hepatitis B Virus (HBV), Human Immunodeficiency Virus (HIV) and other bloodborne pathogens by proposing a combination of engineering and work practice controls, personal protective clothing and equipment, training, medical follow-up of exposure incidents, and vaccination (where applicable). OSHA makes available a survey relating to the technological and economic feasibility of implementing the NPRM in non-hospital facilities, and notifies the public that the results of a similar survey on hospital facilities will be completed soon.	Final rule 1/91.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RJ NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
780-051	Confined Spaces - Permits and Safety Requirements 29 CFR 1910 29 CFR 1910.146	NPRM 54 FR 24080 6/5/89 Regulatory Agenda 55 FR 16407 4/23/90	OSHA proposes to establish safety requirements, including a permit system, for entry into those confined spaces which OSHA has identified as posing special dangers for entrants due to their configuration or other features.	Final rule 2/91.
780-052	Methods of Compliance 29 CFR 1910	NPRM 54 FR 23991 6/5/89 Regulatory Agenda 55 FR 16406 4/23/90	OSHA proposes to modify the existing provisions for controlling employee exposures to toxic substances found in 29 CFR 1910.1000(e) and 1910.134(a)(1). The agency proposes to incorporate additional flexibility in its requirements by setting forth the circumstances under which respiratory protection may be used in lieu of engineering controls.	Final rule 5/91.
780-054	Personal Protective Equipment 29 CFR 1910	NPRM 54 FR 33832 8/16/89 Regulatory Agenda 55 FR 16409 4/23/90	OSHA proposes to revise portions of the general industry safety standards addressing personal protective equipment. The criteria for personal protective equipment for eye, face, head, and foot would be revised to reflect improved developments in these types of equipment.	Final rule 3/91.
780-057	General Industry - Personal Fall Protective Equipment 29 CFR 1910	NPRM 55 FR 13423 4/10/90	OSHA proposes to amend the standards for personal protective equipment for general industry by adding criteria pertaining to personal fall protection systems, including fall arrest systems, work positioning systems, travel restricting systems, and fall protection systems for climbing.	Final rule undetermined.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*780-058	General Industry Standards - Walking and Working Surfaces 29 CFR 1910	NPRM 55 FR 13360 4/10/90 Comment period extended; hearing scheduled 55 FR 29224 7/18/90	OSHA proposes to revise its general industry standards for workplace walking and working surfaces in order to focus on the hazards that can result in trips, slips, and falls causing serious and fatal injuries. This proposed standard will also eliminate ambiguities and redundancies in the existing Subpart D standards and address areas not covered in the existing standards.	Comments by 8/22/90. Public hearing 9/11/90. Final rule undetermined.
780-059	Recording and Reporting Occupational Injuries and Illnesses 29 CFR 1904, 29 CFR 1904.	Planned NPRM 55 FR 16403 4/23/90	OSHA requires covered employers to record all work-related fatalities, illnesses, and certain injuries and to report summary data if selected to participate in the BLS annual survey. BLS and OSHA have tested several data collection vehicles and procedures and are revising the recordkeeping guidelines to improve the usefulness of the survey outputs.	NPRM 8/90.
ENDANGERED SPECIES ACT				
200-038	Endangered and Threatened Plants - Barneby Ridge-cross 50 CFR 17	NPRM 54 FR 48781 11/27/89 Regulatory Agenda 55 FR 16287 4/23/90	The FWS proposes to determine a Utah plant species, <u>Lepidium barnebyanum</u> (Barneby ridge-cross), to be an endangered species. The plant is known from one small limited population in Duchesne County, Utah. Future development of oil and gas resources in its habitat area threaten the plant.	Final rule 11/90.
200-039	Endangered and Threatened Wildlife - Bald Eagle 50 CFR 17	ANPRM 55 FR 4209 2/7/90	The FWS will propose a regulation dealing with the possible delisting, downlisting, or reclassification of the bald eagle (<u>Haliaeetus leucocephalus</u>) from endangered to threatened.	NPRM undetermined.
200-042	Endangered and Threatened Plants - Leafy Prairie-clover 50 CFR 17	NPRM 55 FR 11230 3/27/90	FWS proposes to list <u>Dalea foliosa</u> (leafy prairie-clover) as an endangered species. This rare plant is found in one site in Morgan County, AL, seven sites in central Tennessee, and four sites in northeast Illinois. It is typically found growing in close association with cedar glades.	Final rule undetermined.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
MARINE PROTECTION, RESEARCH, AND SANCTUARIES ACT				
460-001	Ocean Dumping Regulations for Dredged Material 40 CFR 225 40 CFR 227 40 CFR 228	Planned NPRM 55 FR 16845 4/23/90	EPA will propose revisions to regulations applicable to the ocean dumping of dredged material in response to a recent court decision and to incorporate program experience. The revisions will make necessary technical changes and will improve the clarity of the regulations.	NPRM 9/90. Final rule 9/91.
NATIONAL ENVIRONMENTAL POLICY ACT				
480-012	NEPA - Revised Implementing Procedures	Notice of proposed revised procedures 54 FR 47832 11/17/89	The BLM proposes revisions to its procedures for implementing NEPA which will delete a number of obsolete and potentially misleading references and will refine the agency's list of actions that are categorically excluded from preparation of an environmental document.	Final revisions 10/90.
480-013	DOE NEPA Guidelines - Categorical Exclusions	Proposed amendments 55 FR 13064 4/6/90	DOE proposes to amend Sect. D of its NEPA guidelines by adding the following to its list of categorical exclusions: (1) CERCLA and RCRA removal actions, (2) improvements to environmental control systems to comply with environmental permit conditions, and (3) CERCLA and RCRA site characterization and environmental monitoring activities.	DOE will use exclusions on an interim basis, pending final action on amendments. Final action date undetermined.
480-014	NEPA Review Procedures for ORD, Public and Other Federal Agency Involvement 40 CFR 6	NPRM 55 FR 18838 5/4/90	EPA proposes the following changes to its NEPA review procedures for projects conducted by the Office of Research and Development (ORD): (1) development of procedures to categorically exclude from a full NEPA review those ORD projects normally having no significant impact on the environment; (2) revision of criteria which address when an EIS is required on ORD projects; (3) provision to coordinate ORD's NEPA reviews with other EPA program reviews; and (4) general clarification of the NEPA review process for ORD actions. EPA also proposes to amend Subpart D, concerned with public and other federal agency involvement, to eliminate the requirement for public notice of categorical exclusion determinations.	Final rule undetermined.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
480-015	DOE Compliance with NEPA 40 CFR 1500 40 CFR 1501 40 CFR 1502 40 CFR 1503 40 CFR 1504 40 CFR 1505 40 CFR 1506 40 CFR 1507 40 CFR 1508 10 CFR 1021	Planned NPRM 55 FR 16109 4/23/90	DOE will propose procedures for agency compliance with NEPA which will supplement the Council on Environmental Quality (CEQ) regulations which apply to all federal facilities. The proposed regulations will be applicable to all organizational units of DOE except the Federal Energy Regulatory Commission.	NPRM 12/90.
ARCHEOLOGICAL AND HISTORIC PRESERVATION ACT				
060-002	Procedures for Notification, Reporting and Data Recovery of Scientific, Prehistoric, Historic and Archaeological Data 36 CFR 66	Proposed revision 42 FR 5374 1/28/77 ANPRM 50 FR 43587 10/28/85 Planned NPRM 55 FR 16291 4/23/90	The NPS is considering a rule to implement its responsibilities to preserve data endangered by federally permitted activities. The rule will clarify the Secretary's role and distinguish Interior's role from other agencies.	NPRM 12/90.
ARCHEOLOGICAL RESOURCES PROTECTION ACT				
090-002	Curation of Federally Owned Archaeological Collections 36 CFR 79	ANPRM 50 FR 41527 10/11/85 NPRM 52 FR 32740 8/28/87 Regulatory Agenda 55 FR 16295 4/23/90	The NPS proposes standards and guidelines to be followed by federal agencies to preserve significant archeological artifacts and associated records recovered in conjunction with federal projects. These regulations will establish: (1) minimum standards for repositories that provide long-term curatorial services; (2) guidelines for entering into contracts and agreements for the care and management of collections; (3) guidelines for access to, loan of, and use of collections; and (4) guidelines for the exchange and ultimate disposition of collections.	Final rule 9/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*300-007	Restricted Use Classification for Groundwater Contaminating Pesticides 40 CFR 152.170	Notice 55 FR 5861 2/20/90 Planned NPRM 55 FR 16829 4/23/90	This rule will provide a scheme for identifying pesticides which may pose an unacceptable hazard because of the potential to leach into groundwater. The Agency will propose criteria for classifying such pesticides for restricted use. Restricted use pesticides generally may be applied only be state certified applicators.	<u>NPRM 8/90.</u>
300-014	Microbial Pesticides 40 CFR 172	Planned NPRM 55 FR 16830 4/23/90	EPA will propose to amend its experimental use permit regulations for pesticides to clarify the circumstances under which a permit is presumed not to be required and to specify that the presumption is based on risk. EPA will also propose to require notification before initiation of small-scale testing of certain genetically modified microbial pesticides.	NPRM on hold until 9/90.
*300-020	FIFRA Enforcement Response Policy	NOA 55 FR 30032 7/24/90	EPA announces the availability of the revised Enforcement Response Policy (ERP) for FIFRA which was issued on 7/2/90. The policy will be used by the Agency to determine the appropriate civil penalty or enforcement action to be taken in response to violations of FIFRA and is for use by EPA personnel only for federal actions.	
FEDERAL MINE SAFETY AND HEALTH ACT				
330-002	Metal and Nonmetal Mines - Radiation Standards 30 CFR 56 30 CFR 57	ANPRM 50 FR 47700 11/19/85 NPRM 51 FR 45678 12/19/86 Regulatory Agenda 55 FR 16393 4/23/90	The Mine Safety and Health Administration proposes to revise existing standards for ionizing radiation at underground metal and nonmetal mines. The rule will improve worker protection based on current developments in radiation protection principles.	Final rule undergoing further revisions.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. Shaded RU# indicate items of special interest to EH-231.

REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
330-004	Safety Standards for Explosions at Metal and Nonmetal Mines 30 CFR 56 30 CFR 57 30 CFR 56.6000 30 CFR 57.6000	NPRM 53 FR 45487 11/10/88 Regulatory Agenda 55 FR 16392 4/23/90	DOL proposes a rule to update and clarify the Mine Safety and Health Administration's safety standards for explosives at metal and nonmetal mines to make them consistent with technological advances such as gaseous initiation systems, miniaturized detonating cord systems, and the use of bulk mixing of explosives materials.	Final rule 10/90.
330-005	Air Quality, Chemical Substances, and Respiratory Protection Standards 30 CFR 56 30 CFR 57 30 CFR 58 30 CFR 70 30 CFR 71 30 CFR 72 30 CFR 75 30 CFR 90	NPRM 54 FR 35760 8/29/89 Comment periods extended 55 FR 2535 1/25/90 Correction 55 FR 5118 2/13/90 Comment period extended 55 FR 19748 5/11/90	The Mine Safety and Health Administration proposes to revise existing standards for air quality and chemical substances at coal and metal/nonmetal mines. Permissible exposure limits for substances that may pose health hazards at these mines and revised requirements for exposure monitoring, carcinogens, and respiratory protection programs are proposed. The MSHA schedules three separate comment periods for different provisions in its proposal: (1) Comments by 3/2/90 for NO ₂ , NO, CO, and SO ₂ permissible limits, exposure monitoring, abrasive blasting, drill dust control, dangerous atmospheres and prohibited areas for food and beverages; (2) Comments by 6/29/90 for carcinogens, asbestos construction work, means of control, respiratory protection, and medical surveillance; and (3) Comments by 8/24/90 for exposure limits other than NO ₂ , NO, CO, and SO ₂ .	Final rule 12/90. Comments by 3/2/90, 6/29/90, and 8/24/90 (see narrative).
BIOTECHNOLOGY				
110-005	Microbial Products 40 CFR 704 40 CFR 720 40 CFR 721	Planned NPRM 55 FR 16835 4/23/90	EPA is proposing to amend its definition of "small quantities solely for research and development" and to amend reporting requirements for persons who are using microorganisms. EPA will establish a special notification mechanism for experimental releases of microorganisms. EPA also is proposing significant new use notification requirements under TSCA Sect. 5(a)(2).	NPRM 12/90.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. REGULATORY UPDATE TABLE - JULY 1990

RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
*110-008	Planned Introduction into the Environment of Organisms with Modified Hereditary Traits	Announcement of policy 55 FR 31116 7/31/90	The Office of Science and Technology Policy announces new proposed principles for the planned introduction into the environment of organisms with deliberately modified hereditary traits. The principles will define the range of organisms subject to federal oversight.	Comments by 10/1/90.
PORTS AND WATERWAYS SAFETY				
*815-002	Hazardous Materials Pollution Prevention 33 CFR 126 33 CFR 154 33 CFR 155 33 CFR 156	NPRM 53 FR 22118 6/13/88 Supplemental NPRM 54 FR 24718 6/9/89 Regulatory Agenda 55 FR 16459 4/23/90	The Coast Guard proposes to change the oil pollution prevention standards to also apply to vessels and facilities transferring bulk liquid hazardous materials, including materials intended for incineration at sea. To simplify administration and enforcement of the bulk liquid transfer operations regulations, they also propose to duplicate and clarify in a new Sect. 154 the safety requirements of 33 CFR 126.	Final rule 10/90.
COASTAL ZONE MANAGEMENT ACT				
*160-002	National Estuarine Reserve Research System 15 CFR 921	NPRM 53 FR 43816 10/28/88 Interim final rule 55 FR 29940 7/23/90	NOAA revises the process for designation of research reserves to place greater emphasis on using the reserves to address research and management issues and to provide financial assistance to states to enhance public awareness and education about estuarine areas. The regulations provide new guidance for delineating reserve boundaries, new procedures for the acquisition of land, and criteria for withdrawing the designation of a reserve.	Interim final rule effective 7/23/90. Comments by 9/21/90.
OTHER				
805-023	Assessing Female Reproductive Risk	Proposed guidelines 53 FR 24834 6/30/88	EPA proposes guidelines for assessing the female reproductive risk of environmental pollutants. The guidelines are intended to guide Agency analysis of data on female reproductive toxicants according to appropriate scientific standards.	Final rule Fall 1990.

(a) NPRM = Notice of Proposed Rulemaking; ANPRM = Advanced Notice of Proposed Rulemaking; NOI = Notice of Intent; NOA = Notice of Availability. * Indicates a change in date of scheduled action or a new rulemaking development during the past month. RU NO.	REQUIREMENT	STATUS (a)	ANTICIPATED CHANGES	SCHEDULED ACTION
805-024	Assessing Male Reproductive Risk	Proposed guidelines 53 FR 24850 6/30/88	EPA proposes guidelines for assessing the male reproductive risk of environmental pollutants. The guidelines are intended to guide Agency analysts of data on male reproductive toxicants according to appropriate scientific standards.	Final rule Fall 1990.
805-028	Risk Assessment Guidelines for Exposure-Related Measurements	Proposed guidelines 53 FR 48830 12/2/88 Corrections 54 FR 4942 1/31/89	EPA proposes risk assessment guidelines for exposure-related measurements to assist those who must recommend, conduct, or evaluate an exposure assessment.	Final guidelines 10/90.
805-032	Onshore Federal and Indian Oil and Gas Operations - Hydrogen Sulfide Release Hazards 43 CFR 3160 43 CFR 3162 43 CFR 3164	NPRM 54 FR 21075 5/16/89 Regulatory Agenda 55 FR 16332 4/23/90	DOI proposes Onshore Oil and Gas Order No. 6 which addresses the requirements to conduct drilling, completing, testing, reworking, producing, injecting, gathering, storing or treating operations of oil or gas that is known or could reasonably be expected to contain hydrogen sulfide or sulfur dioxide that, if accidentally released, could constitute a hazard to human life or property. The Order would be applicable to all federal and Indian oil and gas leases.	Final rule 8/90.
*805-033	Predesignation of Nonindustrial Facilities for National Security Emergency Use 44 CFR 336	NPRM 54 FR 26213 6/22/89 Final rule 55 FR 30457 7/26/90	FEMA adds a new Part 336 which establishes guidance for federal departments and agencies to determine which nonindustrial facilities would meet essential federal government requirements during a national security emergency. The director of FEMA is to provide policy guidance for use by federal departments and agencies in their mobilization plans and programs.	Effective <u>8/27/90.</u>
