BONE MARROW/SCINTISCANNING
Bone marrow scanning with ^{52}Fe . Regeneration and extension of marrow after ablative doses of radiotherapy, 1599
Normal distribution of ^{111}In chloride on scintigram, 214

BONE MARROW/TRANSPLANTS
Bone marrow transplantation immunology (^{90}Sr , lethal irradiation), 690
Delayed erythropoiesis in irradiated rats grafted with syngeneic marrow: effects of cytotoxic drugs and iron-deficiency anemia (Gamma radiation; cyclophosphamide; busulfan; dimethylmyleran), 1082
Graft-versus-leukemia, donor selection for adoptive immunotherapy in mice (Gamma radiation), 605
Mechanism of donor to host tolerance in rat bone marrow chimeras (Gamma radiation), 691

BONE MARROW CELLS/AMP
Effects of β -adrenergic stimulation on bone-marrow function in normal and sublethally irradiated mice.
I. The effect of isoproterenol on cAMP content in bone-marrow cells in vivo and in vitro, 1541

BONE MARROW CELLS/BIOLOGICAL DOSEMETERS
Biological in vivo dosimetry with an external measuring technique under application of a labelled DNA-precursor (iodine-125-desoxyuridine), 1934 (AED-Conf-76-530-003)

BONE MARROW CELLS/BIOLOGICAL RADIATION EFFECTS
Antiradiation effectiveness of phosphorus-containing derivatives of S-alkylisothiuronium (Mice, γ radiation) 3105
Bone marrow transplantation - a field in continuous development, 2506
Chromosomal aberrations in bone marrow of continuously irradiated rats, 2903
Chromosome anomalies from internal cesium 131 application in rat bone-marrow cells, 2490 (INIS-mf-3243)
Cytogenetic investigations in the case of six-year irradiation of dogs, 2899 (ERDA-tr-99)
Dynamics of myelokaryocytes during prolonged and repeated gamma irradiation, 2216 (ERDA-tr-241)
Effect of radiation in vitro on erythropoietin action, 1320
Effects of negative pi mesons on mouse bone marrow cells (Gamma radiation), 1246
Kinetics of colony formation and migration of bone marrow cells of (CBA x C57BL) F_1 hybrid mice after administration of deoxycorticosterone (X radiation), 667
Occurrence of tumours and karyological findings in persons with long-term ^{226}Ra and ^{90}Sr bone depot, 1220
Proliferation of myelomonocytes in the process of prolonged daily irradiation, 1438
Quantitative patterns of injury and recovery of blood following single and chronic external γ -irradiation, 2206 (ERDA-tr-222)
Radiosensitivity of hemopoietic stem cells of mouse bone marrow in the course of prolonged exposure to radiation (Gamma radiation), 668
Repair processes in mice continuously irradiated with daily doses of 50, 100 and 500 R up to a total dose of 1000 R (Gamma radiation), 3264 (INIS-mf-3331)
Role of direct protection of cells of the hematogenic system in the radioprotective action of certain biogenic amines on the animal organism (X radiation), 2747 (ERDA-tr-146)
Studies of erythroid inductive microenvironment in vitro (X radiation, mice, rats), 689

BONE MARROW CELLS/CELL PROLIFERATION

Proliferation of myelomonocytes in the process of prolonged daily irradiation, 1438

BONE MARROW CELLS/CFU

Radiosensitivity of hemopoietic stem cells of mouse bone marrow in the course of prolonged exposure to radiation (Gamma radiation), 668

BONE MARROW CELLS/CHROMOSOMAL ABERRATIONS

Chromosome abnormalities in atomic bomb survivors, 1073
Correlative study on the frequencies of radiation-induced chromosome aberrations in somatic and germ cells of mammals, 717 (INIS-mf-3620)

Cytogenetic examination of the dogs irradiated within six years, 2604
Preliminary states in atomic bomb survivors in Japan, 2121

BONE MARROW CELLS/DELAYED RADIATION EFFECTS

Blood and blood coagulation disturbances by nuclear weapons, 3096

Chromosome aberrations in somatic cells, 2511

BONE MARROW CELLS/EARLY RADIATION EFFECTS

Blood and blood coagulation disturbances by nuclear weapons, 3096

BONE MARROW CELLS/ERYTHROPOIESIS

Study of hemopoietic microenvironment in vitro, 1462

BONE MARROW CELLS/MITOSIS

Proliferation of myelomonocytes in the process of prolonged daily irradiation, 1438

BONE MARROW CELLS/MITOTIC INDEX

Cancer and Toxicology Section, 876 (ORNL-5195)

BONE MARROW CELLS/RADIATION DOSES

Bomb ^{137}Cs and human radiation burden, 158
CHORD operators for cell-survival models and insult assessment to active bone marrow (Critical Human Organ Radiation Dosimetry), 54

BONE MARROW CELLS/SURVIVAL CURVES

CHORD operators for cell-survival models and insult assessment to active bone marrow (Critical Human Organ Radiation Dosimetry), 54

BONE MARROW CELLS/TRANSPLANTS

Radiosensitivity of hemopoietic stem cells of mouse bone marrow in the course of prolonged exposure to radiation (Gamma radiation), 668
Total-body irradiation and marrow transplantation (Effectiveness for treatment of leukemia), 386

BONE TISSUES

See also TRABECULAR BONE

BONE TISSUES/AUTORADIOGRAPHY

Quantitative autoradiography for the study of dose rates in biological objects following administration of strontium-90, 701

BONE TISSUES/BIOLOGICAL RADIATION EFFECTS

Dosimetry of ^{239}Pu and ^{226}Ra in man and animals, 2274
Effect of ^{241}Am on bone structure according to its microdistribution, 2330
Influence of temporal distribution of alpha dose in bone tumor induction (^{239}Pu and ^{252}Es), 2311

BONE TISSUES/BIOSYNTHESIS

Heterotopic ossification in postgastrectomy scars, 901

BONE TISSUES/DELAYED RADIATION EFFECTS

Bilateral protuberant acetabuli following pelvic irradiation, 155
Late effects of inhaled $\text{Pu}(\text{NO}_3)_3$ and $^{252}\text{Es}(\text{NO}_3)_3$ in rats (^{239}Pu , ^{239}Pu), 1799 (BNWL-2000(Pt.1))

BONE TISSUES/DEPTH DOSE DISTRIBUTIONS

Influence of bone on 45 MV photon dose distributions, 5

BONE TISSUES/GROWTH

Dose to the metaphyseal growth complexes in children undergoing /sup 99m/Tc-EHDP bone scans, 2

BONE TISSUES/INTERNAL IRRADIATION

Plutonium incorporation through ingestion by young animals (Mice, rats, and cats), 2367

BONE TISSUES/LOCAL RADIATION EFFECTS

Pathology of americium 241, 1731

BONE TISSUES/METASTASES

Evaluation of radiation therapy for bone metastases: pain relief and quality of life, 8

BONE TISSUES/MICRODOSIMETRY

Influence of ^{241}Am and DTPA on morphometric parameters of the rat femur, 1662

BONE TISSUES/MORPHOLOGICAL CHANGES

Chronic radium intoxication: morphology of bone and marrow infarcts (Body burden of ^{226}Ra in dial painters), 2271

BONE TISSUES/NECROSIS

Bilateral protuberant acetabuli following pelvic irradiation, 155

BONE TISSUES/NEOPLASMS

Experimental radiation pathology and oncology, 2934 (ANL-76-99)

Influence of temporal distribution of alpha dose in bone tumor induction (^{239}Pu , ^{252}Es , rats), 1802 (BNWL-2000(Pt.1))

Late effects of inhaled $\text{Pu}(\text{NO}_3)_3$ and $^{252}\text{Es}(\text{NO}_3)_3$ in rats (^{239}Pu , ^{239}Pu), 1799 (BNWL-2000(Pt.1))

Late effects of inhaled $\text{Pu}(\text{NO}_3)_3$ in rats (^{239}Pu , ^{239}Pu), 235 (BNWL-2100(Pt.1))

Theory of the induction of bone cancer by alpha radiation (^{226}Ra , ^{226}Ra , ^{226}Ra), 146

BONE TISSUES/PATHOLOGICAL CHANGES

Influence of age and physicochemical form on the effects of ^{239}Pu on the skeleton of the rat, 2310
Model for the induction of bone cancer by ^{226}Ra (In man), 2256 (CONF-760992-17)

Radiation induced skeletal changes in beagle: dose rates, dose, and age effect analysis from ^{226}Ra , 2316

BONE TISSUES/RADIATION CHEMISTRY

Determination of Pu-239, 240 tissue concentrations in non-occupationally exposed residents of New York City, 354 (COO-2968-1)

BONE TISSUES/RADIATION DOSE DISTRIBUTIONS

Effect of ^{241}Am on bone structure according to its microdistribution, 2330
Probabilistic distribution of dose rates in the bone as a function of the rhythm of the strontium-90 administration and age of the animals, 2961 (ERDA-tr-146)

BONE TISSUES/RADIATION DOSES

Fifty year dose commitment to various organs and tissues from inhalation of ^{133}Xe , 2251 (CONF-760444-1)
Influence of temporal distribution of alpha dose in bone tumor induction (^{239}Pu , ^{252}Es , rats), 1802 (BNWL-2000(Pt.1))

BONE TISSUES/RADIATION MONITORING

Determination of Pu-239, 240 tissue concentrations in non-occupationally exposed residents of New York City, 354 (COO-2968-1)

Macrodistribution of ^{226}Ra in the skeleton of a radium dial painter, 2243 (ANL-76-88(Pt.2))
Radioactivity standards for the safe drinking water act of 1974, 2939 (DHEW/FDA-76-8026)

BONE TISSUES/RADIOACTIVITY

Evaluation of postmortem tissue samples (^{239}Pu , ^{239}Pu , ^{240}Pu , ^{241}Pu), 1811 (BNWL-2000(Pt.1))
Health and Safety Laboratory environmental quarterly, June 1, 1976-September 1, 1976 (Fallout radionuclides in environment), 911 (HASL-308)
Macrodistribution of ^{226}Ra in the skeleton of a radium dial painter, 2355

BONE TISSUES/RADIOISOTOPE SCANNING

Estimation of lung and skeletal burdens of bone-seeking radionuclides in man from in vivo scintillation measurements of the thorax and the head, 1114 (BNWL-2088)

BONE TISSUES/RADIONUCLIDE KINETICS

^{90}Sr in Slovak population in 1971 to 1972: skeleton distribution and transport from milk to bone tissues, 1380

Macro-distribution of plutonium in selected bones from an abnormal skeleton, 2352

Microscopic distribution of ^{239}Pu deposited in bone from a human injection case, 2353

Microscopic distribution of ^{226}Ra in the bones of radium cases: a comparison between diffuse and average ^{226}Ra concentrations, 2356

Nature of the processes that take place during the uptake of strontium radioisotopes by formed bone crystals. Sorption, 2358

Technetium-99m-pyrophosphate bone scans in hyperparathyroidism, 363

BONE TISSUES/RADIOSENSITIVITY

Some similarities of radium and plutonium toxicity in the beagle and man (Extrapolation of ^{226}Ra , ^{226}Ra , and ^{239}Pu from dogs to man), 2273

BONE TISSUES/SARCOMAS

Fission fragment induction of bone sarcomas (^{252}Cf), 2644 (COO-119-250)

BONE TISSUES/SCINTISCANNING

Dose to the metaphyseal growth complexes in children undergoing /sup 99m/Tc-EHDP bone scans, 2
Significant differences among the /sup 99m/Tc-polyphosphates, /sup 99m/Tc-pyrophosphates, and /sup 99m/Tc-diphosphonates for bone imaging, 513
Technetium-99m-pyrophosphate bone scans in hyperparathyroidism, 363

Two unusual causes of peripatellar nonmetastatic positive bone scans in patients with malignancies: case reports, 1161

BONE TISSUES/STRONTIUM 90

Content of ^{90}Sr in the bone tissue of the population of the Soviet Union (1959 to 1971). The basic laws of its accumulation and distribution, 1868

CADMIUM/BIOLOGICAL EFFECTS

Prevention by copper of cadmium sequestration by metallothionein in liver, 893

CADMIUM 109/CARCINOGENESIS

Mammalian biology group (Hazards of Pu, ^{210}Po , α radiation, ^{75}Se , ^{60}Co , ^{113}Sn , and ^{109}Cd), 1548 (LA-6313-PR)

CADMIUM 109/HEALTH HAZARDS

Mammalian biology group (Hazards of Pu, ^{210}Po , α radiation, ^{75}Se , ^{60}Co , ^{113}Sn , and ^{109}Cd), 1548 (LA-6313-PR)

CADMIUM 109/METABOLISM

Mammalian biology group (Hazards of Pu, ^{210}Po , α radiation, ^{75}Se , ^{60}Co , ^{113}Sn , and ^{109}Cd), 1548 (LA-6313-PR)

CADMIUM 109/RADIONUCLIDE MIGRATION

Radioactive contamination levels in the ambient medium and in the food chain. Quadriennial report, 1972-1975, 1867 (EUR-5441)

CADMIUM 109/RETENTION

Trace element metabolism, 152 (LA-6898-PR)

CADMIUM OXIDES/BIOLOGICAL ACCUMULATION

Dose: response analysis of cadmium-induced tubular proteinuria, 325

CAFFEINE/RADIOSENSITIVITY EFFECTS

Caffeine inhibition of the repair of ultraviolet-irradiated adenovirus in human cells, 2409

Potentiation by caffeine of ultraviolet-light damage in cultured human cells, 2391

Relationship between caffeine sensitive and resistant DNA repair, cell lethality and mutagenesis in mammalian cells after x irradiation and alkylating agents, 425

CALCIUM/ABUNDANCE

Content of Ca, ^{90}Sr , and ^{137}Cs in the human placenta, 2971 (ERDA-tr-146)

CALCIUM/ACTIVATION ANALYSIS

In-vivo determination of calcium after neutron irradiation with californium 252, 1847

CALCIUM/MEASURING METHODS

Absolute measurement of total-body calcium by the ^{37}Ar method. Preliminary results: concise communication (^{40}Ca , ^{42}Ca), 60

CALCIUM/OSTEODENSITOMETRY

Radioisotope studies utilizing a low level whole body counter and clinical applications of activation analysis. Progress report (Nuclear medicine research studies), 1454 (ORO-2401-94)

CALCIUM/TISSUE DISTRIBUTION

Content of Ca, ^{90}Sr , and ^{137}Cs in the human placenta, 2971 (ERDA-tr-146)

CALCIUM 45/BIOLOGICAL RADIATION EFFECTS

Changes in some biochemical indices of blood and tissues after intake of strontium-90 and calcium-45, 700

CALCIUM 45/DOSE COMMITMENTS

Methodological approach to estimation of dose loads of osteotropic isotopes with due consideration of changes in metabolic parameters in the course of growth of the organism (^{133}Ba , ^{140}Ba , ^{45}Ca , and ^{90}Sr), 886 (ERDA-tr-250)

CALCIUM 45/EXCRETION

Comparative kinetics of ^{45}Ca and ^{89}Sr in chronic uremic syndrome in the rat, 2986

CALCIUM 45/METABOLISM

Comparative kinetics of ^{45}Ca and ^{89}Sr in chronic uremic syndrome in the rat, 2986

Translations of Soviet reports on radioactivity in building materials and bone dosimetry, 885 (ERDA-tr-250)

CALCIUM 47/RETENTION

Measurement of retention of an oral dose of Ca-47 by whole-body counting, 3136

CALHOUN-1 REACTOR/RADIOACTIVE EFFLUENTS

Annual operating report for 1976 (including semiannual environmental operating summary: July-December 1976, 418 (DOCKET-50285-702))

CALHOUN-1 REACTOR/REACTOR OPERATION

Annual operating report for 1976 (including semiannual environmental operating summary: July-December 1976, 418 (DOCKET-50285-702))

CALIFORNIUM 249/RETENTION

Californium studies in beagles, 1670

CALIFORNIUM 250/MAXIMUM PERMISSIBLE INTAKE

Maximum permissible concentration (MPC) values for spontaneously fissioning radionuclides, 966 (ORNL-5171)

CALIFORNIUM 252/BIOLOGICAL RADIATION EFFECTS

Changes in chromosome aberration frequency in Chinese hamster liver related to LET and microdose distribution, 2148

CALIFORNIUM 252/DOSIMETRY

Recent progress in californium-252 dosimetry, 2258 (FMI-1000-763)

CALIFORNIUM 252/LEGAL ASPECTS

Safety analysis of doubly encapsulated ^{252}Cf medical sources (Models ALC, SALC, AT), 1725 (SRL-76002)

CALIFORNIUM 252/MAXIMUM PERMISSIBLE INTAKE

Maximum permissible concentration (MPC) values for spontaneously fissioning radionuclides, 966 (ORNL-5171)

CALIFORNIUM 252/METABOLISM

Metabolism and the biological effect of transuranics, 807 (SAAS-204)

CALIFORNIUM 252/RADIATION HAZARDS

Health physics aspects of ^{252}Cf , 3059 (BARC/I-336)

Radiation protection aspects in the use of californium-252 sources, 2085

Safety analysis of doubly encapsulated ^{252}Cf medical sources, Model TALC-PC, 1189 (SRL-76004)

CALIFORNIUM 252/RADIOTHERAPY

Study of a ^{252}Cf source projector for plesiocurietherapy, 2774 (CEA-CONF-3461)

CALIFORNIUM 252/RBE

Changes in chromosome aberration frequency in Chinese hamster liver related to LET and microdose distribution, 2148

Experimental determination of the relative biological effect of ^{252}Cf , 2886

CALIFORNIUM 252/REGULATIONS

Safety analysis of doubly encapsulated ^{252}Cf medical sources (Models ALC, SALC, AT), 1725 (SRL-76002)

CALIFORNIUM 252/RETENTION

Californium studies in beagles, 1670

CALIFORNIUM 252/SAFETY

Safety analysis of singly encapsulated ^{252}Cf medical sources, model ALC-PXC, 1726 (SRL-76003)

CALIFORNIUM 252/TISSUE DISTRIBUTION

Distribution and biological effects of intratracheal administration of californium-252, 2370 (ERDA-tr-266)

CALIFORNIUM 252/TOXICITY

Common problems in the scientific, industrial applications and in the medical applications. From study meeting on the application of ^{252}Cf , 2634

CALIFORNIUM 252/TRANSPORT

Safety analysis of doubly encapsulated ^{252}Cf medical sources, Model TALC-PC, 1189 (SRL-76004)

Safety analysis of doubly encapsulated ^{252}Cf medical sources (Models ALC, SALC, AT), 1725 (SRL-76002)

CALIFORNIUM 252/USES

Medical applications of ^{252}Cf . From study meeting on the applications of ^{252}Cf , 2635

CALIFORNIUM 254/MAXIMUM PERMISSIBLE INTAKE

Maximum permissible concentration (MPC) values for spontaneously fissioning radionuclides, 966 (ORNL-5171)

CALVERT CLIFFS-1 REACTOR/PERSONNEL

Reply to IE circular 76-03: "Radiation Exposures in Reactor Cavities", 824 (DOCKET-50317-704)

CALVERT CLIFFS-2 REACTOR/PERSONNEL

Reply to IE circular 76-03: "Radiation Exposures in Reactor Cavities", 824 (DOCKET-50317-704)

CAMP

CANCER

See NEOPLASMS

CANDU TYPE REACTORS/PERSONNEL

Control of radiation exposures at CANDU nuclear power stations, 506

Design program for occupational dose reduction, 1315

Designing to minimize radiation exposure (CANDU type reactors), 1827

CANDU TYPE REACTORS/RADIATION PROTECTION

Reducing radiation exposure in CANDU power plants, 1745 (AECL-5388)

CAPILLARIES/DELAYED RADIATION EFFECTS

Changes in blood coagulation and bone marrow due to thorotrast, 3120

CARBOHYDRATES/BIOLOGICAL RADIATION EFFECTS

Histochemical studies of the effect of radiophosphorus on testis in Swiss albino mice during postnatal development (^{32}P), 3128

CARBON/RADIOSENSITIVITY EFFECTS

Role of the spleen in carbon-induced radioprotection, 881

CARBON 14/DOSE COMMITMENTS

Nuclear energy: health impact of carbon-14, 747

CARBON 14/DOSE LIMITS

Predicted radiation exposure of the population of the European Community resulting from discharges of krypton-85, tritium, carbon-14, and iodine-129 from the nuclear power industry to the year 2000, 2950

CARBON 14/DOSE RATES

Nuclear energy: health impact of carbon-14, 747

CARBON 14/DOSIMETRY

Cumulative dose calculations for clinical and diagnostic radionuclides, 229

CARBON 14/ENVIRONMENTAL EFFECTS

Diffusion-type model of the global carbon cycle for the estimation of dose to the world population from releases of carbon-14 to the atmosphere, 213 (ORNL-5269)

Environmental impact of ^{14}C released by a nuclear fuel-reprocessing plant (Calculation of external dose and whole-body doses), 1819

CARBON 14/ENVIRONMENTAL TRANSPORT

Methodology for estimating radiation doses due to tritium and radiocarbon releases (Health hazards from thermonuclear reactors), 1087 (BNWL-2020)

CARBON 14/HEALTH HAZARDS

Nuclear energy: health impact of carbon-14, 1859 (TID-27286)

CARBON 14/RADIATION DOSES

Internal radiation exposure by low atomic number radionuclides ^3H , ^{14}C and others except ^{40}K , 3118

Predicted radiation exposure of the population of the European Community resulting from discharges of krypton-85, tritium, carbon-14, and iodine-129 from the nuclear power industry to the year 2000, 2950

Radiological significance of some long-lived nuclides discharged to the environment from the nuclear power industry, 1473

CARBON 14/RADIATION HAZARDS

Manual on radiation protection in hospitals and general practice. Volume 2. Unsealed sources, 2826

Potential generation and radiological impacts of gaseous ^{14}C released during reprocessing of advanced LMFB

fuels, 1307 (ORNL/TM-5538)

CARBON 14/RADIATION MONITORING

Manual on radiation protection in hospitals and general practice. Volume 2. Unsealed sources, 2826

CARBON 14/RADIOECOLOGICAL CONCENTRATION

Predicted radiation exposure of the population of the European Community resulting from discharges of krypton-85, tritium, carbon-14, and iodine-129 from the nuclear power industry to the year 2000, 2950

CARBON 14/RETENTION FUNCTIONS

Cumulative dose calculations for clinical and diagnostic radionuclides, 229

CARBON 14/TISSUE DISTRIBUTION

Radiopharmaceuticals for diagnosis and treatment. Progress report, August 1, 1976-July 31, 1977 (^{125}I , ^{131}I , ^{75}Se , ^{14}C , ^{32}P), 1598 (COO-2031-4)

CARBON 15/INTERNAL IRRADIATION

Metabolic and improved organ scan studies. IV. Dosimetry for metabolic isotopes in animals and man, 827 (COO-3521-6)

CARBON DIOXIDE/ENVIRONMENTAL EFFECTS

Diffusion-type model of the global carbon cycle for the estimation of dose to the world population from releases of carbon-14 to the atmosphere, 213 (ORNL-5269)

CARBON OXIDES

See also CARBON DIOXIDE

CARBON OXIDES/EXCRETION

Effect of chronic low doses of ionizing radiation on the excretion of gaseous metabolites in white rats, 1789

CARBONYLS/RADIOSENSITIVITY EFFECTS

Method of protecting human skin from actinic radiation, 2425

CARCINOGENESIS

See also LEUKEMOGENESIS

Influence of dose rate on carcinogenesis resulting from x-ray, ^{137}Cs , and ^{198}Au irradiation, 1162

Late effects of in utero exposure to carcinogens in rats, with special reference to postnatal growth and tumorigenesis (X radiation, fast neutrons, N-butyl nitrosourea), 2204

Radiation carcinogenesis. Progress report IV, 15 March 1976-15 May 1977 (Abscopal effects of radiation on parabiotic rats), 662 (COO-3017-31)

Synergistic tumorigenic effect of procarbazine and ionizing radiation in (BALB/c x DBA/2)F₁ mice (X Radiation), 110

CARCINOGENESIS/AGE DEPENDENCE

Role of rats age and the amount of plutonium administered in the osteosarcomagenesis in rats, 1280

Tumorigenic action of beta, proton, electron and alpha radiation in rat skin. Progress report, August 1, 1975-July 31, 1976, 2140 (COO-3380-27)

CARCINOGENESIS/BIOLOGICAL MODELS

Interactions between radiation and benzo(a)pyrene in an in vitro model for malignant transformation (X radiation), 3056

CARCINOGENESIS/BIOLOGICAL RADIATION EFFECTS

Cancer and Toxicology Section, 876 (ORNL-5195)

CARCINOGENESIS/DOSE RATES

Extrapolation to low doses and low dose rates of data on radiation induced cancer, app. 2, 2497 (INIS-mf-3148)

CARCINOGENESIS/DOSE-RESPONSE RELATIONSHIPS

Critique of the use of the linear no-threshold hypothesis in the estimation of radiation risks to large populations, 1183 (INS-R-195)

Dose-response relationships for beagles injected with ^{239}Pu (IV) or ^{241}Am (III), 2985

Inferences on radiation carcinogenesis revealed by selected studies in animals, 2284

Partial-target mutagenesis and carcinogenesis, 2087

Thyroid cancer associated with radiation exposure. Dose-effect relationship, 1986

Transuranium element toxicity: dose response relationships at low exposure levels. Summary and speculative interpretation relative to exposure limits, 2974

CARCINOGENESIS/GENETICS

Genetic and environmental interactions, 46

Xeroderma pigmentosum, DNA repair and carcinogenesis (Review), 2001

CARCINOGENESIS/MATHEMATICAL MODELS

Multiple simultaneous event model for radiation carcinogenesis, 1769

CARCINOGENESIS/PATHOLOGY

Experimental radiation pathology and oncology, 2934 (ANL-76-99)

CARCINOGENESIS/RADIOINDUCTION

Carcinogenic risks associated with radiation pollution (UV radiation, sunlight), 2119

Inferences on radiation carcinogenesis revealed by selected studies in animals, 2284

Oncogenic transformation in vitro by x-rays: influence of repair processes, 1901

Shape of the dose-response curve for radiation carcinogenesis. Extrapolation to low doses, 136

Tumorigenic action of beta, proton, electron and alpha radiation in rat skin. Progress report, August 1, 1975-July 31, 1976, 2140 (COO-3380-27)

CARCINOGENESIS/RADIOSENSITIVITY

Carcinogenic effects of radiation-introduction, 1896 (BNL-21711)

CARCINOGENESIS/RESEARCH PROGRAMS

Special listing of current cancer research on

- occupational carcinogenesis and related studies, 1465 (PB-253790)
- CARCINOGENESIS/RESPONSE MODIFYING FACTORS**
Inferences on radiation carcinogenesis revealed by selected studies in animals, 2284
- CARCINOGENESIS/TESTING**
Rat skin carcinogenesis as a basis for estimating risks at low doses and dose rates of various types of radiation, 2138 (COO-3380-23)
- CARCINOGENESIS/THRESHOLD DOSE**
Carcinogenic risks associated to pollution by radiations, 2125
- CARCINOGENS**
Chemical and radiation carcinogenesis in man and experimental animals, 2844
- CARCINOGENS/BIOLOGICAL EFFECTS**
Carcinogenic effects of radiation-introduction, 1896 (BNL-21711)
Carcinogenic risks associated with radiation pollution (UV radiation, sunlight), 2119
Genetic and environmental interactions, 46
Late effects of in utero exposure to carcinogens in rats, with special reference to postnatal growth and tumorigenesis (X radiation, fast neutrons, N-butylnitrosourea), 2204
- CARCINOGENS/HAZARDS**
Comparative views on the somatic risks to the population by radiation and chemicals, 2089
- CARCINOGENS/RADIOSENSITIVITY EFFECTS**
In vitro morphologic transformation of Syrian hamster cells by U.V.-irradiation is enhanced by X-irradiation and unaffected by chemical carcinogens, 1248
Kinetics of Syrian hamster cells during x-irradiation enhancement of transformation in vitro by chemical carcinogen, 1409
- CARCINOMAS/BIOLOGICAL RADIATION EFFECTS**
Effect of low-dose pre-operative X-irradiation of implanted mouse mammary carcinomas on local recurrence and metastasis, 964
Effects of single or multifractionated irradiation with 2 MeV fast neutrons on C₃H mouse mammary carcinoma, 2418
Response of a transplantable tumor to fractionated irradiation. II. Fast neutrons, 959
- CARCINOMAS/BLOOD VESSELS**
Changes in functional vascularity and cell number following x irradiation of a murine carcinoma, 2231
- CARCINOMAS/CELL PROLIFERATION**
Changes in functional vascularity and cell number following x irradiation of a murine carcinoma, 2231
- CARCINOMAS/DIAGNOSIS**
Early indices of cancer risk among uranium miners with reference to modifying factors, 1384
Mammography with minimal radiation dose. Comparative investigations of various imaging systems, 186
Over-concern can equal hysteria: thyroid cancer, 1702
- CARCINOMAS/RADIOINDUCTION**
Angiographic diagnosis of a carcinoma of the renal pelvis due to thorotrast, 1656
Case of Hiroshima atomic bomb survivor with CLL and lung cancer, 871
Clinical studies on gastric cancer and breast cancer among A-bomb survivors, 308
Culture of cells from beagles with bronchioloalveolar carcinoma (Pu), 241 (BNWL-2100(Pt.1))
Dark reticular cells in the thymus of mice, 3103
Education campaign focuses on effects of irradiation therapy, 2598
Education campaign focuses on effects of irradiation therapy, 2600
Experimental study of action of inhaled cerium-144 and cerium-141. Life span reduction and cancer induction - Role of dose - Influence of carrier, 2324
Experimental lung cancers. Incidence of dose distribution, 2335
Histological changes of salivary glands in autopsy cases among atomic bomb survivors. I. Young aged and proximally exposed cases, 1071
Investigation of lung cancer in atomic bomb survivors, 1080
Keratinotic precancerous and cancerous changes observed in x-ray technicians, 541
Life history of plutonium dioxide in the lung: from macrophage to carcinoma (²³⁹Pu, rats), 2366 (BNWL-SA-5896(Rev.))
Malignant tumors in people exposed as children to atomic bomb in Nagasaki, 1626
Occupational exposure to radiation as a cancer hazard, 290
Pulmonary lesions induced by inhaled plutonium in beagles (²³⁹Pu or ²³⁸Pu), 2315
Radiation exposure in uranium mining, 451
Radiation-induced breast cancer, 440
Radiation-induced skin cancer of the hand. Report of 2 cases, 469
Radiation effects on cancer mortality among A-bomb survivors, 1950-72. Comparison of some statistical models and analysis based on the additive logit model, 754
Relation of radiation of gastric carcinoma observed in autopsy cases in a fixed population Hiroshima and Nagasaki, 1639
Risk of mammary oncogenesis from exposure to neutrons or gamma rays: experimental methodology and early findings, 2160
Search for the lowest irradiation dose from literatures on radiation-induced cancer in gastrointestinal tract, 1433
Search for the lowest irradiation dose from literatures on radiation-induced breast cancer, 2406
Search for the lowest irradiation dose from literatures on radiation-induced cancer in uterus, 2475
Southern Arizona: a skin cancer factory, 2076
Synergism between neutron radiation and diethylstilbestrol in the production of mammary adenocarcinomas in the rat, 1654
Thyroid neoplasia: A delayed complication of low-dose head and neck irradiation, 2018
Tricho system: hypertrichosis, radiation, and cancer, 1965

- CARTILAGE/RADIATION DOSES**
Distribution and retention of ³⁵S-sodium sulfate in man, 1554
- CATALASE/BIOSYNTHESIS**
Action of ionizing radiation on catalase synthesis in the rat liver, 2690

CATALASE/METABOLISM

Effects of x-irradiation on steroid biotransformations by testicular tissue. Final report, May 1, 1966-July 31, 1976 (Rats), 1209 (COO-1602-60)

CATARACTS/BIOLOGICAL RADIATION EFFECTS

Comparison of the cytological effects produced by ionizing radiations of different LET. Progress report, April 1975-April 1976 (X radiation, fission neutrons, rats, eyes), 1536 (COO-1024-55)

CATARACTS/CHEMOTHERAPY

Experimental patients of drug treatment for cataracts in the persons exposed to an atomic bomb near the explosion, 1646

CATARACTS/RADIOINDUCTION

Cataract-inducing threshold dosage of fast neutrons (Rabbits), 671

Cataracts in uranium miners, 2507

Cataracts, 2513

Comments on the exposure distance as a factor of severity of A-bomb cataracts, 1069

Comparison of the cytological effects produced by ionizing radiations of different LET. Progress report, April 1975-April 1976 (X radiation, fission neutrons, rats, eyes), 1536 (COO-1024-55)

Radiation carcinogenesis. Progress report IV, 15 March 1976-15 May 1977 (Abscopal effects of radiation on parabiant rats), 662 (COO-3017-31)

Significance of lenticular opacity from the view point of the exposure dose of A-bomb radiation, 2632

Types and rate of cataract development in mice irradiated at different ages (X Radiation), 113

CATAWBA-1 REACTOR/CONTAINMENT

IE bulletin 77-04: Calculational error affecting the design performance of a system for controlling pH of containment sump water following a LOCA, 25 (DOCKET-50413-162)

CATAWBA-1 REACTOR/DRINKING WATER

IE circular 77-14: separation of contaminated water systems from noncontaminated plant system, 14 (DOCKET-50413-165)

CATAWBA-1 REACTOR/PERSONNEL

IE circular 76-03 re radiation exposures in reactor cavities, 1014 (DOCKET-50413-131)

CATAWBA-2 REACTOR/CONTAINMENT

IE bulletin 77-04: Calculational error affecting the design performance of a system for controlling pH of containment sump water following a LOCA, 25 (DOCKET-50413-162)

CATAWBA-2 REACTOR/DRINKING WATER

IE circular 77-14: separation of contaminated water systems from noncontaminated plant system, 14 (DOCKET-50413-165)

CATECHOLAMINES/METABOLISM

Functional activity of the sympathicoadrenal system in the case of chronic and fractionated irradiation of rats, 2890 (ERDA-tr-110)

CAVES/RADIOACTIVITY

Air exchange and ^{222}Rn concentrations in the Carlsbad Caverns, 1160

CELL CULTURES

Radiation-induced murine leukemia ERLD in cell culture, 918

CELL CULTURES/LEUKEMOGENESIS

Enhancing effect of fractionated whole-body x-irradiation on replication of endogenous leukemia viruses in BALB/c mice, 1606

CELL CYCLE/RADIOSENSITIVITY

Differential chromosomal radiosensitivity within the first G1-phase of the cell cycle of early-dividing human leukocytes in vitro after stimulation with PHA, 441

Effect of low dose x-ray irradiation on development and differentiation of the cerebral cortex. VI. Dose effect on the change of cell cycle of matrix cells in the endbrain in the exposed mouse embryo of the 13th of viviparity, 402

CELL DIFFERENTIATION/BIOLOGICAL RADIATION EFFECTS

Differentiation capacity of hemopoietic stem cells as related to different radiation doses, 2189 (ERDA-tr-227)

Experimental reorganization of the cerebellar cortex. VII. Effects of late x-irradiation schedules that interfere with cell acquisition after stellate cells are formed, 1741

Experimental reorganization of the cerebellar cortex. VI. Effects of x-irradiation schedules that allow or prevent cell acquisition after basket cells are formed, 1742

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Experimental reorganization of the cerebellar cortex. V. Effects of early x-irradiation schedules that allow or prevent the acquisition of basket cells, 1743

Flow karyotyping: a promising new cytogenetic tool, 1406 (UCRL-52000-76-5)

CELL FLOW SYSTEMS/DESIGN

Development of flow-systems instrumentation for rapid cell analysis and sorting, 129 (LA-6898-PR)

CELL KILLING/RADIOINDUCTION

Combinations of hyperthermia (40°, 45°C) with radiation (X radiation), 888

Dose-response relationship for ultraviolet-light-induced mutations at the hypoxanthine-guanine phosphoribosyltransferase locus in Chinese hamster ovary cells, 2745

Oxygen-enhancement ratio for reproductive death induced by ^3H or ^{125}I damage in mammalian cells, 2431

CELL KILLING/TEMPERATURE DEPENDENCE

DNA damage and its repair in hyperthermic mammalian cells: relation to enhanced cell killing, 2750

CELL MEMBRANES/BIOLOGICAL RADIATION EFFECTS

Protective effect of cysteamine on gamma irradiated human erythrocytes, 2033

Ultrastructure changes produced by the action of uranyl acetate on the human erythrocyte in vitro, 2590 (AAEC/E-346)

CELL MEMBRANES/BIOLOGICAL RECOVERY

Recovery of irradiated L-cells: changes of the membrane potential, 2737 (AED-Conf-75-780-000)

CELL MEMBRANES/PERMEABILITY

Effects of ionizing radiation on ion transport processes in hepatic mitochondria, 2211 (ERDA-tr-241)

CELL NUCLEI/BIOLOGICAL RADIATION EFFECTS

Cytophotometry of the adrenal cortex in the x-irradiated rabbits, 3101

Investigations on the question of radiation-induced intracellular ion translocations in the liver of rats, 2928

CELL NUCLEI/CHEMICAL RADIATION EFFECTS

DNA capacity for binding ^3H -AMD in nuclei of non-irradiated and irradiated LS/BL cells, 3255 (INIS-mf-3331)

CELL NUCLEI/RADIATION DOSES

Uptake, excretion, and radiation hazards of tritiated thymidine in humans, 482

CELL NUCLEI/ULTRASTRUCTURAL CHANGES

Action of ionizing radiation on the intermembrane phospholipid and cholesterol exchange, 343

CELL PROLIFERATION/BIOLOGICAL RADIATION EFFECTS

Changes in the rate of proliferation in normal tissues after irradiation, 2848

Changes in functional vascularity and cell number following x irradiation of a murine carcinoma, 2231

Proliferation of myelomonocytes in the process of prolonged daily irradiation, 1438

CELL PROLIFERATION/DOSE-RESPONSE RELATIONSHIPS

Change in the number of cells of the small intestine of mice under the influence of various doses of irradiation, 2900 (ERDA-tr-99)

Banding technique used for the detection of chromosomal aberrations induced by radiation and alkylating agents TEPA and epichlorohydrin, 1710

Biological effectiveness of ^{239}Pu , ^{137}Cs and ^{90}Sr citrate in producing chromosome damage, bone-related tumours, liver tumours and life shortening in the Chinese hamster, 2325

Biomedical and Environmental Research program of the LASL Health Division. Progress report, January-December 1976, 147 (LA-6898-PR)

Changes in chromosome aberration frequency in Chinese hamster liver related to LET and microdose distribution, 2148

Chromosomal aberrations in pig lymphocytes after neutron irradiation in vitro, 279

Chromosomal aberrations in lymphocytes of normal adults long after thymus irradiation, 1252

Chromosomal aberrations in peripheral blood lymphocytes of monkeys subjected to long-term daily irradiation, 2617

Chromosomal aberrations in bone marrow of continuously irradiated rats, 2903

Chromosome aberration yields induced in human lymphocytes by 15 MeV electrons given at a

conventional dose-rate and in microsecond pulses, 383

Chromosome abnormalities in atomic bomb survivors, 1073

Chromosome aberrations induced in human lymphocytes by neutron irradiation, 1711

Chromosome aberrations in peripheral blood lymphocytes dependent on various dose levels of natural radioactivity, 1995

Chromosome aberrations in somatic cells, 2511

Chromosome aberration frequency induced by fission

- radiation in human peripheral blood lymphocytes.
Biological dosimetry for a criticality accident, 2582
Chromosome rearrangements from spermatogonial chronic neutron irradiation in mice, 1785
Chromosome aberrations induced in mouse spermatogonia by exposure to neutrons of very high energy, 2195
Chromosome anomalies in mouse oocytes after irradiation, 2907
Chromosome aberrations in the peripheral lymphocytes of thorium workers with low body burdens of ^{212}Bi (Thorotrast, thorium), 2241 (ANL-76-88(Pt.2))
Chromosome anomalies in the peripheral blood of patients receiving diagnostic doses of radioactive gold, 2260 (INIS-mf-3315)
Chromosome anomalies from internal cesium 131 application in rat bone-marrow cells, 2490 (INIS-mf-3243)
Chromosome aberrations induced in Syrian hamster lung cells by inhaled $^{238}\text{PuO}_2\text{-ZrO}_2$ particles, 406
Comparative analysis of chromosome aberrations in human lymphocytes induced 'in vitro' by various types of ionizing radiation, 2865
Comparative studies of radiation-induced chromosome aberrations in several mammalian species, 2157
Connection between relative genetic effectiveness and linear energy transfer in analysis of chromosome aberrations in human lymphocytes, 2852
Contribution to the problem of biological dose assessment in occupationally exposed personnel, 1507 (SAAS-197)
Correlative study on the frequencies of radiation-induced chromosome aberrations in somatic and germ cells of mammals, 717 (INIS-mf-3620)
Cytogenetic study of A-bomb survivors and their children in Hiroshima and Nagasaki, 1181 (CONF-751158-)
Cytogenetic studies in female X-ray assistants with menstrual disturbances, 1953 (INIS-mf-3315)
Cytogenetic studies of peripheral lymphocytes from subjects occupationally exposed to ionizing radiation, 1954 (INIS-mf-3315)
Cytogenetic study of the offspring of atomic-bomb survivors, 1065
Cytogenetic study on peripheral leukocytes of A-bomb survivors with cancer, 1078
Cytogenetic studies on bone marrow cells of the atomic bomb survivors in Nagasaki, 1632
Cytogenetic studies in women with menstrual disturbances, working in an environment of ionizing radiation (external irradiation), 2118
Cytogenetic investigation in a Brazilian population living in an area of high natural radioactivity, 2858
Cytogenetic examination of the dogs irradiated within six years, 2604
Cytogenetic investigations in the case of six-year irradiation of dogs, 2899 (ERDA-tr-99)
Cytogenetic effects of internal alpha emitters on human lymphocytes, 2279
Cytogenetic effects of protracted exposures to alpha-particles from plutonium-239 and to gamma-rays from cobalt-60 compared in male mice, 809
Cytological investigations on the effects of ^{131}I in male mice, 2422
Diagnostic radiation and chromosome aberrations, 446
Diagnostic radiation and chromosome aberrations, 495
Different radiosensitization effects of the halogenated compounds on the human chromosome in vitro., 1750 (IAEA-R-1160-F)
Differential chromosomal radiosensitivity within the first G1-phase of the cell cycle of early-dividing human leukocytes in vitro after stimulation with PHA, 441
Do one-hit chromosome exchanges exist. Dose-response relation for irradiated human lymphocytes, 2842
Down's syndrome and related abnormalities in an area of high background radiation in coastal Kerala, 1241
Effect of cysteamine on the yield of chromosomal aberrations in lymphocytes of human blood irradiated with gamma rays, 2763
Effect of radiation and contrast media on chromosomes, 62
Effect of changes in dose rate on the yield of chromosome aberrations in human lymphocytes exposed to gamma radiation, 1338
Effect of continuous intake of tritiated water (HTO) on the liver chromosomes of mice, 808
Effect of size and alpha flux of $^{239}\text{PuO}_2$ particles on production of chromosome aberrations in liver of Chinese hamster, 2326
Effects of radiation and porphyrin on mitosis and chromosomes in human hematopoietic cell lines, 1903
Effects of ionizing radiation on some cytogenetic and metabolic changes in human somatic cells, 2867
Evaluation and re-evaluation of genetic radiation hazards in man. The arm number hypothesis and the induction of reciprocal translocations in man. II., 1361
Frequency of chromosome aberrations in the germ cells of mice under the chronic influence of gamma rays at low doses, 2185 (ERDA-tr-210)
Genetic consequences of radioactive isotopes. II. Chromosomal anomalies (translocations) from iodine-131 and strontium-89 in male sex cells of rats, 2766
Genetic damage in mice following chronic gamma irradiation, 2141 (INIS-mf-3315)
Genetic damage to somatic and gametic cells of mice due to combined application of X radiation and chemical mutagen, 3262 (INIS-mf-3331)
Genetic effects, 2. Cytogenetic study, 2525
Genetic effects from radioactive isotopes. II. Chromosomal anomalies (translocations) induced by iodine 131 and strontium 89 in rats male germ cells, 2958
Hot particle program (^{210}Po , ^{238}Pu , ^{239}Pu , ^{147}Pm), 148 (LA-6898-PR)
Investigation of effects of low molecular DNA on the genome of somatic cells of healthy and irradiated animals, 2221 (ERDA-tr-266)
Is chromatid-type damage in ataxia telangiectasia after irradiation at G_0 a consequence of defective repair, 1470
Lack of synergistic effect between X-ray and UV irradiation on the frequency of chromosome aberrations in PHA-stimulated human lymphocytes in the G_1 stage, 1761
Late and latent effects of atomic bomb on chromosomes in the exposed population, 1072
Nonrandom distribution of chromosome breaks in cultured lymphocytes of normal subjects, 1673
Persistent chromosomal translocations in mice spermatogonia after incorporation of different phosphorus-32 activities, 2959
Polycythemia vera treated with ^{32}P and myleran: Development of chronic granulocytic leukemia with chromosomal abnormalities in one patient, 2819
Preleukemic states in atomic bomb survivors in Japan, 2121
Premature chromosome condensation in irradiated man, 100
Production of micronuclei from chromosome aberrations in irradiated cultures of human lymphocytes, 725
Radiation induced chromosome aberrations in somatic and germ cells of the male marmoset, 596 (CONF-770337-1)
Radiation-induced chromosomal aberrations in human lymphocytes. 1. Dependence on the dose of gamma-rays and an anomaly at low doses, 1056
Radiation exposure during cardiac catheterisation, 1389
Radiation exposure during cardiac catheterisation, 1460
Radiation-induced nondisjunction of oocytes of aged mice 499
Radiation-induced mutation frequency in marked chromosome of *Macaca mulatta*, 1441
Radiation-induced chromosome aberrations in mouse spermatocytes and oocytes, 2901
Radiochemical and radioecological studies on Brazilian areas of high natural background. Progress report, October 30, 1974-October 30, 1975 (Etiology of radioinduced chromosomal aberrations in human lymphocytes), 2441 (CDD-3489-8)
Radiological protection and chromosome aberrations, 1256
RBE values of $d(16) + \text{Be}$ and $d(50) + \text{Be}$ neutrons for chromosome rearrangements induced in mouse spermatogonia, 192
Relationship between x-ray irradiation and chromosomal damage in bone marrow tissue of mice, 2168
Relative biological efficiency of intermediate energy neutrons and ^{60}Co rays for induction of chromosomal aberrations in Chinese hamster fibroblasts, 1898 (GWI-R-2-76)
Repair of x-ray induced chromosomal damage in trisomy 2- and normal diploid lymphocytes, 514
Somatic and germ-cell chromosome aberrations in rabbits exposed to low-dose-rate gamma rays, 2142 (INIS-mf-3315)
Study of the radiation effects on nucleic acids and related compounds. Annual progress report, August 15 1974-August 14, 1975 (X radiation, hamster cells, *Haemophilus influenzae*), 2738 (CDD-3286-11)
surveys of chromosome aberrations in radiation workers, 376 (NRPB/RandD-1)
The effect of psoralen and ultraviolet light upon human chromosomes, 2803 (INIS-mf-2078)
Total-body irradiation and human chromosomes. V. Additional evidence of a transferable substance in the plasma of irradiated persons to induce chromosomal breakages, 2824
Two cases of primary acquired sideroblastic anemia and atypical leukemia with chromosomal abnormality in atomic bomb survivors, 1070
Use of chromosome aberrations for predicting genetic hazards to man, 2845
X-ray-induced chromosome aberrations in the leukocytes of mouse and man, 597 (CONF-770718-1)
X-ray induced chromosome aberrations in Ataxia telangiectasia: an indication of a defect in DNA repair, 302
X-ray induced chromosome aberrations in mouse dictyate oocytes. Time and dose relationships, pt. 1, 1538
CHROMOSOME BREAKAGE/BIOLOGICAL REPAIR
Inhibition of repair of radiation-induced chromosome breaks. Effect of phenol in cultured human leukocytes, 1904
Repair of x-ray induced chromosomal damage in trisomy 2- and normal diploid lymphocytes, 514
CHROMOSOME BREAKAGE/RADIOINDUCTION
Chromosome aberrations in the peripheral lymphocytes of thorium workers with low body burdens of ^{212}Bi (Thorotrast, thorium), 2241 (ANL-76-88(Pt.2))
Genetic effects of ^{32}P in swine, 2657

Balance of external and internal natural radiation exposure, 3086

CHORD simulation for insult assessment to the red bone marrow (Photons, neutrons), 1037 (ORNL-5191)

Studies for a comparison of the maximum possible consequences of accidents in a reprocessing plant and a nuclear power station, 1146 (IRS-290)

CRITICALITY ACCIDENTS

See RADIATION ACCIDENTS

CROPS/RADIOACTIVITY

Comparative levels of radioactive air pollutants from industry and fallout. A progress report of radioecological investigations of airborne radioactivity in the Utah environment (1971 and first two months of 1972), 3211 (UERL-1)

CRUDE OIL

See PETROLEUM

CRUSTACEANS/CONTAMINATION

Modeling of radiation doses from chronic aqueous releases (Tritium, ^{134}Cs , ^{137}Cs), 1871 (DP-MS-75-126)

CRYPT CELLS/RADIOSENSITIVITY

Scanning electron microscopy of mouse intestinal mucosa after cobalt 60 and D-T neutron irradiation, 1273

CRYSTALLINE LENS/BIOLOGICAL RADIATION EFFECTS

Biological effects of hadrons at very low doses, 2159

Cataract-inducing threshold dosage of fast neutrons (Rabbits), 671

Comparison of the cytological effects produced by ionizing radiations of different LET. Progress report, April 1975-April 1976 (X radiation, fission neutrons, rats, eyes), 1536 (CDD-1024-55)

Comparison of the cytological effects produced by ionizing radiations of different LET. Three-year summary of project activities from April 1973-April 1976 (X radiation, fission neutrons, mice, rats), 1537 (CDD-1024-56)

Effect of gamma rays on the total protein content of aldolase, glutamic acid transaminase and glutamic acid-pyruvic acid transaminase in the rabbit lens, 3017

Eye abnormalities in the mouse fetuses and postnatal mice caused by 150R of x-radiation on day 7 of gestation, 313

Remote after-effect of occupational radiation action, 1512

Types and rate of cataract development in mice irradiated at different ages (X radiation), 113

CRYSTALLINE LENS/BIOLOGICAL SHIELDING

Secondary radiation from supervoltage accelerators - its implications in patient protection, 184

Shielding of organs lying inside the treatment volume in cobalt 60 radiotherapy, 3075

CRYSTALLINE LENS/CATARACTS

Cataract-inducing threshold dosage of fast neutrons (Rabbits), 671

CRYSTALLINE LENS/DELAYED RADIATION EFFECTS

Experimental patients of drug treatment for cataracts in the persons exposed to an atomic bomb near the explosion, 1646

Significance of lenticular opacity from the view point of the exposure dose of A-bomb radiation, 2632

CRYSTALLINE LENS/RADIATION DOSES

Determination of radiation reduction to the lens during polytomography of the petrous pyramid, 2628

Eye lens - some aspects of the radiation dose and protection of the patients and the personnel in pediatric radiology, 630

Radiation dose to the head, and particularly to the lens of the eye, during axial tomography with the EMI scanner, 1349

Radiation exposure of the eye lens due to routine diagnostic X-ray examinations in dental practice, 2052

CRYSTALLINE LENS/RADIATION INJURIES

Cataracts in uranium miners, 2507

Microwave lens effects in humans, 2630

Rate of lens lesion development and the age of mice at time of irradiation, 882

CRYSTALLINE LENS/RADIATION PROTECTION

Eye lens - some aspects of the radiation dose and protection of the patients and the personnel in pediatric radiology, 630

CULTURES (CELLS)

See CELL CULTURES

CULTURES (TISSUE)

See TISSUE CULTURES

CUMBERLAND RIVER/RADIOACTIVITY

Tennessee and Cumberland River Basins radionuclide transport: a case study (Calculations of radiation

dose to human populations from cumulative operation of nuclear facilities), 1951 (HEDL-SA-1087)

CUMBERLAND RIVER/REGIONAL ANALYSIS

Year 2000 estimated population dose for the Tennessee Valley region, 2235 (HEDL-SA-1086-FP)

CUMULATIVE RADIATION EFFECTS/COMPUTER CALCULATIONS

Cumulative radiation effect. VII. Computer calculations and applications in clinical practice, 525

CUMULATIVE RADIATION EFFECTS/NOMOGRAMS

Cumulative radiation effect. VI. Simple nomographic and tabular methods for the solution of practical problems, 524

CURIUM/CHEMICAL STATE

Chemical form of americium and curium in urine, 812

CURIUM/EXCRETION

Chemical form of americium and curium in urine, 812

CURIUM/RADIATION HAZARDS

Calculated doses from inhaled transuranium radionuclides and potential risk equivalence to whole-body radiation, 2365

CURIUM 242/BIOLOGICAL RADIATION EFFECTS

Toxicity of inhaled alpha-emitting radionuclides: an experimental approach, 805 (LF-56)

CURIUM 242/RADIATION DOSE DISTRIBUTIONS

Toxicity of inhaled alpha-emitting radionuclides: an experimental approach, 805 (LF-56)

CURIUM 244/BIOLOGICAL RADIATION EFFECTS

Respiratory carcinogenesis in rats after inhalation of radioactive aerosols of actinides and lanthanides in various physicochemical forms (^{244}Cm , ^{241}Am , ^{238}Pu , ^{235}Pu , ^{239}Pu), 3123

Toxicity of inhaled alpha-emitting radionuclides: an experimental approach, 805 (LF-56)

CURIUM 244/CARCINOGENESIS

Studies of pulmonary carcinogenesis in rodents following inhalation of transuranic compounds (^{238}Pu , ^{239}Pu , ^{244}Cm), 3121

CURIUM 244/DOSE COMMITMENTS

Estimation of dose commitment from an accidental intake of ^{244}Cm , 973 (ORNL-5171)

CURIUM 244/INHALATION

Estimation of dose commitment from an accidental intake of ^{244}Cm , 973 (ORNL-5171)

Experimental study of inhaled radioactive pollutants.

I. Present data. II. Inventory of lesions. III. Validity of the animal model dose-effect relationships (Radon, ^{239}Pu , ^{241}Am , and ^{244}Cm), 3126 (LF-tr-111)Respiratory carcinogenesis in rats after inhalation of radioactive aerosols of actinides and lanthanides in various physicochemical forms (^{244}Cm , ^{241}Am , ^{238}Pu , ^{235}Pu , ^{239}Pu), 3123Studies of pulmonary carcinogenesis in rodents following inhalation of transuranic compounds (^{238}Pu , ^{239}Pu , ^{244}Cm), 3121

CURIUM 244/METABOLISM

Metabolism and the biological effect of transuranics, 807 (SAAS-204)

CURIUM 244/RADIATION DOSE DISTRIBUTIONS

Toxicity of inhaled alpha-emitting radionuclides: an experimental approach, 805 (LF-56)

CURIUM 244/RADIATION HAZARDS

Allowed health risk for plutonium and americium standards as compared with standards for penetrating radiation, 2295

CURIUM 244/SAFETY STANDARDS

Allowed health risk for plutonium and americium standards as compared with standards for penetrating radiation, 2295

CURIUM 246/MAXIMUM PERMISSIBLE INTAKE

Maximum permissible concentration (MPC) values for spontaneously fissioning radionuclides, 966 (ORNL-5171)

CURIUM 248/MAXIMUM PERMISSIBLE INTAKE

Maximum permissible concentration (MPC) values for spontaneously fissioning radionuclides, 966 (ORNL-5171)

CURIUM ISOTOPES/RADIATION DOSES

Radiation exposure due to actinides released from nuclear facilities, 697

CYCLIC ADENOSINE MONOPHOSPHATE

See AMP

CYCLOPHOSPHAMIDE

See ENDOXAN

CYCLOTRON RADIATION/RADIATION ACCIDENTS

Report on cyclotron accidents, 2650

CYCLOTRONS

See also SIN CYCLOTRON

CYCLOTRONS/ACCELERATOR FACILITIES

A preliminary area survey of neutron radiation levels associated with the NASA variable energy cyclotron horizontal neutron delivery system, 722 (N-77-17840)

CYCLOTRONS/DIAGNOSTIC TECHNIQUES

The cyclotron in radiation therapy and medical diagnosis, 3077

CYCLOTRONS/RADIATION MONITORING

A preliminary area survey of neutron radiation levels associated with the NASA variable energy cyclotron horizontal neutron delivery system, 722 (N-77-17840)

CYCLOTRONS/RADIOTHERAPY

The cyclotron in radiation therapy and medical diagnosis, 3077

CYSTAMINE/EFFICIENCY

Hemodynamic changes in rats after radioprotective combination of cystamine administered subcutaneously

- and 5-methoxytryptamine injected intramuscularly, 962
- CYSTAMINE/RADIOSENSITIVITY EFFECTS**
 Changes in the activities of blood and tissue adenosinetriphosphatase and lactate dehydrogenase after exposure to ^{60}Co gamma-rays in association with some drug treatments, 2222
 Chemical protection of mice against repeated neutron-irradiation, 2692
 Investigations about the effect of radioprotective substances after irradiation of mice with fast neutrons, 3059 (AED-Conf-74-736-000)
 Morphometric evidence of radioprotective effect of cystamine and mexamine on rat testes (Gamma radiation), 3259 (INIS-mf-3331)
- CYSTAPHOS/RADIOSENSITIVITY EFFECTS**
 Chemical protection of mice against repeated neutron-irradiation, 2692
 Peculiarities of the toxicity and radioprotective activity of aminopropyl aminoethyl thiophosphate, 2179 (ERDA-tr-210)
- CYSTAPHOS/TOXICITY**
 Peculiarities of the toxicity and radioprotective activity of aminopropyl aminoethyl thiophosphate, 2179 (ERDA-tr-210)
- CYSTEAMINE**
 See MEA
- CYTOLOGICAL TECHNIQUES**
 Application of mammalian cytogenetics to mutagenicity studies (Triethylone melamine, x radiation, gamma radiation, LET), 598 (CONF-770718-4)
- CYTOLOGY**
 Biomedical and Environmental Research Program of the LASL Health Division. Progress report, January-December 1975, 1547 (LA-6313-PR)

DISEASES/DATA ANALYSIS

Analysis of disease incidence data from survival experiments, 326 (LA-6758-C)

DNA

(Deoxyribonucleic acid.)

DNA/ADDUCTS

Induction of stable protein-deoxyribonucleic acid adducts in Chinese hamster cell chromatin by ultraviolet light, 1459

DNA/BIOCHEMICAL REACTION KINETICS

Induction of stable protein-deoxyribonucleic acid adducts in Chinese hamster cell chromatin by ultraviolet light, 1459

DNA/BIOCHEMISTRY

Energy technology and the genome, 1452 (UCRL-52000-76-5)

DNA/BIOLOGICAL RADIATION EFFECTS

Acute and late damage in the mouse small intestine following multiple fractionations of neutrons or x-rays, 679
Alterations induced by x-rays and ultraviolet light on the synthesis and maintenance of macromolecular components within cells. Progress report, March 1, 1975-February 1, 1976 (Escherichia coli, Bacillus subtilis), 1905 (ORD-4568-3)
Biological effect of ionizing radiations and the primary structure of DNA, 2736
Carcinogenic effects of radiation-introduction, 1896 (BNL-21711)
Comparison of single-strand breaks in the DNA of rat thymocytes induced by irradiated histidine and γ rays, 365

Effect of ultraviolet light and x-rays on DNA synthesis in permeabilized CHO cells, 601 (ORD-4568-9)

Enhancement of postreplication repair in Chinese hamster cells (N-acetoxy-acetylaminofluorene, UV radiation), 1247

Immunological reaction of UV-induced radiation damage in coliphage DNA, 133

Initial changes in the state of DNP and DNA of germ and in secretory cells of testis under the action of ionizing radiation, 2908

Investigation of the effects of fast neutrons on DNA by sedimentation analysis, 2746

Progress report, September 1, 1975-April 1, 1976

(Hypermethylation of DNA of uv-irradiated mammalian cells), 1897 (COO-2066-28)

Radiobiology, 693 (ERDA-tr-285/2)

Repair and cell cycle response in cells exposed to environmental biohazards. Progress report, February 1, 1976-May 31, 1977 (Escherichia coli, Bacillus subtilis, x radiation), 600 (ORD-4568-7)

S_1 nuclease from Aspergillus oryzae for the detection of DNA damage and repair in the gamma-irradiated intracerebral rat gliosarcoma 9L, 43

Special listing of current cancer research on preclinical aspects of cancer radiotherapy and related radiobiology, 984 (PB-260840)

Study of the radiation effects on nucleic acids and related compounds. Annual progress report, August 15, 1974-August 14, 1975 (X radiation, hamster cells, Haemophilus influenzae), 2738 (COO-3286-11)

Xeroderma pigmentosum, DNA repair and carcinogenesis (Review), 2001

DNA/BIOLOGICAL REPAIR

Aging and DNA repair capability (Review), 661 (BNL-22463)

Effect of cysteamine on repair of single-strand DNA breaks in an irradiated culture of Chinese hamster fibroblasts, 595

Enhancement of postreplication repair in Chinese hamster cells (N-acetoxy-acetylaminofluorene, UV radiation), 1247

In vitro transformation: interaction of chemicals, viruses, and irradiation, 2742

Investigation of the effects of fast neutrons on DNA by sedimentation analysis, 2746

Relationship between caffeine sensitive and resistant DNA repair, cell lethality and mutagenesis in mammalian cells after x irradiation and alkylating agents, 425

Repair of UV-induced DNA lesions in peripheral lymphocytes from healthy subjects of various ages, individuals with Down's syndrome and patients with actinic keratosis, 282

The action spectrum and dose response studies of unscheduled DNA synthesis in normal human fibroblasts, 1700

X-ray induced chromosome aberrations in Ataxia telangiectasia: an indication of a defect in DNA repair, 302

Xeroderma pigmentosum, DNA repair and carcinogenesis (Review), 2001

DNA/BIOSYNTHESIS

Combined effects of x-irradiation and bleomycin on the proliferation of isoproterenol-stimulated mouse parotid glands, 194

Comparison of the cytological effects produced by ionizing radiations of different LET. Progress report, April 1975-April 1976 (X radiation, fission neutrons, rats, eyes), 1536 (COO-1024-55)

Differential radiosensitivity of mouse embryonic neurons and glia in cell culture (UV and gamma radiation), 227

Effect of ultraviolet light and x-rays on DNA synthesis in permeabilized CHO cells, 601 (ORD-4568-9)

Effect of radiation in vitro on erythropoietin action, 1320

Effects of prolonged exposure to divided doses of radiation on levels and biosynthesis of nucleic acids in the rat thymus, 2180 (ERDA-tr-227)

Alterations in RNA turnover following x-irradiation (Mouse embryonic fibroblasts), 2749
Changes in DNA metabolism in radiosensitive tissues of rats with chronic radiation lesion, 1895 (ERDA-tr-227)
Incorporation of exogenous DNA in tissue of irradiated animals (Gamma radiation), 2198 (ERDA-tr-222)
Inhibitory effect of blood serum from irradiated animals on in vitro incorporation of ³H-thymidine in rat thymocyte DNA (Gamma radiation), 2199 (ERDA-tr-222)
- DNA/METHYLATION**
Progress report, September 1, 1975-April 1, 1976 (Hypermethylation of DNA of uv-irradiated mammalian cells), 1897 (COO-2066-28)
- DNA/MUTAGENESIS**
Repair and cell cycle response in cells exposed to environmental biohazards. Progress report, February 1, 1976-May 31, 1977 (Escherichia coli, Bacillus subtilis, x radiation), 600 (ORO-4568-7)
- DNA/RADIOSENSITIVITY EFFECTS**
Correlation between the relative amount of thymine clusters in the DNA of the organism and its radiosensitivity (Gamma radiation), 2207
Effect of heterologous high polymer DNA on restoration of colony-forming units in hemopoietic tissues of irradiated mice, 2213 (ERDA-tr-241)
Investigation of effects of low molecular DNA on the genome of somatic cells of healthy and irradiated animals, 2221 (ERDA-tr-266)
Restoration of the number of colony forming units in the bone marrow and spleen of DNA-treated irradiated mice, 2176 (ERDA-tr-210)
- DNA/STRAND BREAKS**
Aging and DNA repair capability (Review), 661 (BNL-22463)
Comparison of single-strand breaks in the DNA of rat thymocytes induced by irradiated histidine and γ rays, 365
Defective repair of gamma-ray-induced DNA damage in xeroderma pigmentosum cells, 1712
DNA damage and its repair in hyperthermic mammalian cells: relation to enhanced cell killing, 2750
DNA repair, change in the DNA polymerase and DNA ligase activities in the regenerating liver of gamma-irradiated rats, 2172 (ERDA-tr-210)
DNA single strand breaks induced by ionizing radiation in mammalian cells and the kinetics of repair processes, 427
Effect of cysteamine on repair of single-strand DNA breaks in an irradiated culture of Chinese hamster fibroblasts, 595
High-LET radiations induce a large proportion of non-rejoining DNA breaks, 261
Investigation of the repair of single-stranded breaks in DNA of the regenerating liver of γ-irradiated rats by the method of sedimentation, 2735 (ERDA-tr-110)
Production and repair of double strand breaks in cells from normal humans and patients with ataxia telangiectasia, 592
Radiation-induced DNA single-strand scission and its rejoining in spermatogonia and spermatozoa of mouse, 278
Radiation-biochemical mechanism in the development of radiation damage to the genetic apparatus in animal cells, 3186
Radioprotective action of cysteamine. Primary DNA lesions, cell survival and mutation frequency, 494
Repair and dose-response at low doses (Effects of low-dose irradiation in man), 287 (ORAU/IEA(O)-77-11)
Role of ATP in the repair of DN of gamma-irradiated Chinese hamster cells, 2744 (ERDA-tr-99)
Some aspects of radiation-induced strand breakage in eukaryotic cells, 424
Study of the radiation effects on nucleic acids and related compounds. Annual progress report, August 15, 1974-August 14, 1975 (X radiation, hamster cells, Haemophilus influenzae), 2738 (COO-3286-11)
- DNA REPLICATION/BIOLOGICAL RADIATION EFFECTS**
Common precursor pathways of Herpes DNA and of repair synthesis in ultraviolet irradiated cells, 490
Investigation of the process of transcription in thymus cells of rats subjected to x irradiation.
Communication 2. Influence of exogenous deoxyribonucleic acids on the hydridization of nuclear RNA with repetitive and unique DNA sequences, 2173 (ERDA-tr-210)

Changes in chromosome aberration frequency in Chinese hamster liver related to LET and microdose distribution, 2148
Effect of antibiotics administration on endogenous and exogenous stem cells of hemopoiesis and their migration activity, 3269 (INIS-mf-3331)
Excretion of products of chlorpromazine metabolism in irradiated rats, 3273 (INIS-mf-3331)
National radiobiological conference and scientific conference of the Institute of national health in uranium industry, 3233 (INIS-mf-3331)
Recovery of some subsystems of whole-body irradiated organism, 3279 (INIS-mf-3331)
Repair processes in mice continuously irradiated with daily doses of 50, 100 and 500 R up to a total dose of 1000 R, 3264 (INIS-mf-3331)
Use of adaptive linear neuron in diagnostics of acute radiation disease in rats, 3278 (INIS-mf-3331)

GAMMA RADIATION/CARCINOGENESIS
Teratogenicity of radiation, 755

GAMMA RADIATION/DEPTH DOSE DISTRIBUTIONS
Influence of bone on 45 MV photon dose distributions, 5

GAMMA RADIATION/FLUX DENSITY
Transport calculations of γ-ray flux density and dose rate about implantable californium-252 sources, 1286

GAMMA RADIATION/GENETIC RADIATION EFFECTS

Chromosome aberrations in the leukocytes of pigs after half-body or whole-body irradiation, 371
Genetic damage from chronic gamma irradiation, 2224

GAMMA RADIATION/INTEGRAL DOSES
A method for computing the gamma-dose integrals I₁ and I₂ for the finite-cloud sector-average model. Final report, 1505 (PB-254095)

GAMMA RADIATION/LET
Determination of the dose and linear energy transfer of mixed n, γ-radiation, 2810 (INIS-mf-3257)

GAMMA RADIATION/LEUKEMOGENESIS
Relative contribution of target cell disturbances and immunosuppression in radiation leukemogenesis: model studies with exogenous virus, 960

GAMMA RADIATION/RADIATION DOSES
Determination of the dose and linear energy transfer of mixed n, γ-radiation, 2810 (INIS-mf-3257)

GAMMA RADIATION/RADIATION HAZARDS
Quantitative assessment of carcinogenic risks associated with 'hot particles', 1682

GAMMA RADIATION/RBE
Assessment of the relative biological effectiveness of mixed neutron-gamma radiation by conformation shift effects in blood plasma protein fractions, 2481 (INIS-mf-3243)
Changes in chromosome aberration frequency in Chinese hamster liver related to LET and microdose distribution, 2148
Connection between relative genetic effectiveness and linear energy transfer in analysis of chromosome aberrations in human lymphocytes, 2852
Relative biological efficiency of intermediate energy neutrons and ⁶⁰Co rays for induction of chromosomal aberrations in Chinese hamster fibroblasts, 1898 (GWI-R-2-76)

GAMMA RADIATION/TERATOGENESIS
Teratogenicity of radiation, 755

GAMMA RADIATION/TOXICITY
Neutron and gamma-ray toxicity studies, 2881 (ANL-76-99)

GAMMA RADIOGRAPHY/GAMMA SOURCES
Gammagraphy in odontology, 3178 (FRNC-TH-681)

GAMMA RADIOGRAPHY/RADIATION HAZARDS
Potential radiation hazards in gamma radiography equipment, 1966

GAMMA RADIOGRAPHY/RADIATION PROTECTION
Medical x ray and gamma-ray protection for energies up to 10 MeV: equipment design and use, 3160 (NCRP-33)

GAMMA RADIOGRAPHY/SPECIFICATIONS
Radiation protection rules for the technical application of sealed radioactive sources. Pt. 5. Installation of gammagraphy plants. Draft, 1198

GAMMA SOURCES
(See also specific radioisotopes.)

GAMMA SOURCES/BIOLOGICAL RADIATION EFFECTS
Immunological and viral aspects of radiation-induced tumors. Twelfth annual report, March 1, 1976-February 28, 1977, 814 (TID-27333)

GAMMA SOURCES/DIFFUSION
Prediction of increased gamma fields after application of a radon barrier on concrete surfaces (Covering uranium mine tailings), 1308

GAMMA SOURCES/RADIATION PROTECTION
Gammacell safety program, 533

GAMMA SPECTROMETERS
Macrodistribution of ²²⁶Ra in the human skeleton as determined in vitro by gamma-ray spectrometry, 2245 (ANL-76-88(Pt.2))

GAMMA SPECTROMETERS/CALIBRATION
Calibration procedures for in-vivo sodium iodide spectrometry of plutonium and americium in the human lungs, 2261 (LA-UR-76-1718)

 Reply to J.C. Thompson, Jr.'s comments on the paper 'Radiation doses from iodine-129 in the environment', 1093

IODINE 131/BIOLOGICAL EFFECTS
 Gonadal radiation dose and its genetic significance in radioiodine therapy of hyperthyroidism (^{131}I), 1089

IODINE 131/BIOLOGICAL HALF-LIFE
 Behaviour of the radioactive noxious substances of nuclear industry in the organism, 249
 Thyroid fractional deposition and half life of radioiodine, 3134 (KURRI-TR-125)

IODINE 131/BIOLOGICAL RADIATION EFFECTS
 Genetic consequences of radioactive isotopes. II. Chromosomal anomalies (translocations) from iodine-131 and strontium-89 in male sex cells of rats, 2766
 Model of iodine metabolism in a T_3 -thyrotoxic patient undergoing I-131 therapy, 3287 (ORO-2401-95)
 Radioisotope studies utilizing a low level whole body counter and clinical applications of activation analysis. Progress report (Nuclear medicine research studies), 1454 (ORO-2401-94)
 Radiotoxicity of iodine-125 in mammalian cells. II. A comparative study on cell survival and cytogenetic responses to ^{125}I UDr, ^{131}I UDr, and $^3\text{HTdR}$, 1216
 Studies in iodine metabolism. Progress report, April 1975- March 1976 (Rats, mice, cattle, ^{125}I , ^{131}I), 2305 (ORO-1643-126)

IODINE 131/BODY BURDEN
 Body-burden of ^{131}I among radiation workers. Preliminary report, 1666 (PAEC(D)-76008)
 Summary of thyroid findings in Marshallese 22 years after exposure to radioactive fallout, 1935 (BNL-21924)

IODINE 131/CARCINOGENESIS
 Comparison of the carcinogenicity of ^{131}I and ^{125}I in the thyroid gland of the rat, 2302 (INIS-mf-3305)
 Comparison of carcinogenicity of ^{131}I and ^{125}I in thyroid gland of the rat, 2331
 Estimated use of ^{131}I at diagnostic and treatment in Nucl. Med. in Gb (Brazil), 3043
 Toxicology of radioactive iodine, 2336 (KFK-tr-483)

IODINE 131/CLEARANCE
 Investigations of iodine-131 release in rats, 2369

IODINE 131/DECONTAMINATION

Training of skin decontamination and its results, 1449

IODINE 131/DIFFUSION

Radioiodine prediction model for nuclear tests (Radiation dose to human thyroid), 1317 (EPA-600/4-76-027)

IODINE 131/DOSIMETRY

Cumulative dose calculations for clinical and diagnostic radionuclides, 229
 Whole body doses from iodine-131 used to treat thyroid cancer, 375 (NRPB/RandD-1)

IODINE 131/ENVIRONMENTAL EXPOSURE PATHWAY

Studies on the exposure pathway-air-grass-cow-milk for radioiodine due to release during normal operation from the Gundremmingen nuclear power station in 1975, 721 (STH-15/76)

IODINE 131/ENVIRONMENTAL TRANSPORT

Dosimetric implications of releases to the aquatic environment from the nuclear power industry, 1873
 High efficiency mixed species radioiodine air sampling, readout, and dose assessment system, 586 (BNL-22307)
 Protection of the thyroid gland in the event of releases of radioiodine (Reactor accident management), 703

IODINE 131/EVAPORATION

Estimation of the volatilization rate of radioiodine into the atmosphere, 1022

IODINE 131/EXCRETION

Animal experiments on the decorporation of iodine 131, 1382

IODINE 131/GENETIC RADIATION EFFECTS

Effect of radioiodine on swine spermatogonia, 2573

IODINE 131/INTERNAL IRRADIATION

Metabolic and improved organ scan studies. IV. Dosimetry for metabolic isotopes in animals and man, 827 (COO-3521-6)
 Radiation dose patterns for inhaled radionuclides, 2945

IODINE 131/METABOLISM

Fate of iodine-131 in man, 1128
 Iodine metabolism within the human body, 3133 (KURRI-TR-125)

Studies in iodine metabolism. Progress report, April 1975- March 1976 (Rats, mice, cattle, ^{125}I , ^{131}I), 2305 (ORO-1643-126)

IODINE 131/PERSONNEL MONITORING

Standard field methods for determining ^{137}Cs and ^{131}I in vivo, 1792

IODINE 131/RADIATION DOSE DISTRIBUTIONS

Dosimetric considerations relative to radionuclides for thyroid diagnosis and therapy (^{125}I , ^{123}I and $^{99\text{m}}\text{Tc}$ compared with ^{131}I), 1885 (BNL-21313)
 Radioisotope studies utilizing a low level whole body counter and clinical applications of activation analysis. Progress report (Nuclear medicine research studies), 1454 (ORO-2401-94)

IODINE 131/RADIATION DOSES

Radioiodine prediction model for nuclear tests. Final report, 1330 (PB-255629)

IODINE 131/RADIATION HAZARDS

Radioactivity standards for the safe drinking water act of 1974, 2939 (DHEW/FDA-76-8026)

IODINE 131/RADIATION MONITORING

HASL measurements of fallout following the September 26, 1976 Chinese nuclear test (Fallout deposition in New York and New Jersey between Sept. 26 and Oct. 18, 1976) 916 (HASL-314)
 High efficiency mixed species radioiodine air sampling, readout, and dose assessment system, 1402 (BNL-21541)
 In vivo thyroid monitoring for iodine-131 in the environment, 979

Iodine and common salt concentrations in urine from the inhabitants and employees at the Oskarshamm nuclear power plant, 644

Measurements of iodine-131 in milk supplies, 3050
 Radioactivity standards for the safe drinking water act of 1974, 2939 (DHEW/FDA-76-8026)

IODINE 131/RADIOECOLOGICAL CONCENTRATION

Data on the radiation dose to man caused by radionuclides in liquid wastes of nuclear reactors, App. 5, 2496 (INIS-mf-3148)

IODINE 131/RADIONUCLIDE ADMINISTRATION

Model of iodine metabolism in a T_3 -thyrotoxic patient undergoing I-131 therapy, 3287 (ORO-2401-95)

IODINE 131/RADIONUCLIDE KINETICS

Dosimetry in radioisotope placemography, 951
 Internal radiation dose commitments in the northern temperate zone from ^{89}Sr , ^{140}Ba , ^{131}I and ^{137}Cs produced in nuclear tests, 265 (HASL-318)
IODINE 131/RADIONUCLIDE MIGRATION
 Radioactive contamination levels in the ambient medium and in the food chain. Quadriennial report, 1972-1975, 1867 (EUR-5441)

IODINE 131/RADIOTHERAPY

Thyroid cancer. Clinical aspects of TRH/TSH/ T_3 interactions, 2290

IODINE 131/RETENTION FUNCTIONS

Cumulative dose calculations for clinical and diagnostic radionuclides, 229

IODINE 131/SCINTISCANNING

Influence of irradiation with ^{60}Co -gamma ray on rabbit's submandibular gland. Using angiogram, sialogram and RI, 474

Kinetic study of [^{131}I] iodide and [$^{99\text{m}}\text{Tc}$]

- perchnetate in thyroid carcinoma to explain a scan discrepancy: case report, 93
- IODINE 131/THERMOLUMINESCENT DOSIMETRY
Thermoluminescent materials in physiological and dosimetric investigations of the thyroid, 2064
- IODINE 131/TISSUE DISTRIBUTION
Radiopharmaceuticals for diagnosis and treatment. Progress report, August 1, 1976-July 31, 1977 (¹²⁵I, ¹³¹I, ⁷⁵Se, ¹⁴C, ³²P), 1598 (CQO-2031-4)

Survival and growth of plutonium-injected animals
(Reissue of 1947 report on Pu lethality in mice and
rats), 3229 (CH-3783)
MICE/BIOLOGICAL RECOVERY
Problems of postradial recovery, 2929 (AD-A-028273)
MICE/DELAYED RADIATION EFFECTS
Interaction of neonatal irradiation and single-genes
upon growth and behavior in mice, 312
Late effects and risks of short-lived alpha-emitting
bone seekers. Animal experiments, 2298 (AED-Conf-76-
430-012)
Life shortening, neoplasia and systematic injuries in
mice after single or fractionated doses of neutron or
gamma radiation, 2158
Observations on late effects in mice exposed to 400 MeV
neutrons, 1439
Reports on the Neuherberg long-term experiments with
short-lived α -emitters. I. The dependence of late
effects in mice on the temporal distribution of
skeletal α -doses from ^{226}Ra and ^{227}Th , 2296 (AED-Conf-
76-430-005)
MICE/DOSE EQUIVALENTS
Equivalent conditions of irradiation of mammals, 2898
(ERDA-tr-99)
MICE/GENETIC RADIATION EFFECTS
Comparison of the mutagenic effect of chemicals and
ionizing radiation in the spermatogenic cells of the
mouse, 2914
Dominant lethal mutations in mice resulting from chronic
tritiated water (HTO) ingestion, 1377
Genetic and hematopoietic effects of long-term
tritiated water ingestion in mice, 2321
Genetic effects of radiation (Extrapolation of mouse
data to man), 2135 (CONF-760744-2)
Genetic effects of acute and chronic irradiation with 14
MeV neutrons. 1. Genetic aspects. 2. Technique of
neutron irradiation, 2484
Genetic effects of ^{239}Pu salt injections in male mice,
1661
Mammalian spot test: induction of genetic alterations
in pigment cells or mouse embryos with x-rays and
chemical mutagens, 2912
Mottled Neuherberg (Mo/sup N/), a new male-lethal coat
colour mutation of the house mouse (*Mus musculus*),
2883 (GSF-B-642)
Observations on a set of radiation-induced dominant T-
like mutations in the mouse, 2544
Re-analysis of radiation-induced specific locus
mutations in the mouse, 711
Use of the mouse to fill gaps in our risk assignments,
2913
MICE/GENETIC VARIABILITY
Pathology of tumors induced in Harwell mice by ^{239}Pu and
 ^{226}Ra (Comparison with C_3H and CBA mice), 2317
MICE/IMMUNE REACTIONS
Effect of age on cell-mediated immunity in long-lived
mice, 2730
MICE/IMMUNOSUPPRESSION
Experimental investigations on the immunity development
in irradiated mice after local and parenteral
immunization with tetanus-toxoid, 70
MICE/INTERNAL IRRADIATION
Hematological effects of parenterally administered
plutonium in mammals (Reissue of 1947 report on
biological effects of Pu), 3231 (CH-3783)
MICE/LETHAL MUTATIONS
Dominant lethal tests of male mice given ^{239}Pu salt

injections, 2319
MICE/LIFE SPAN
Effect of aging and radiation in mice of different
genotypes, 2136 (CONF-760947-3)
MICE/LITTER SIZE
Can x-rays be used to increase litter size in the mouse,
1722
MICE/MORTALITY
Modification of death rate of irradiated mice by B.C.G.,
2169
MICE/PRENATAL IRRADIATION
Effect of low dose x-ray irradiation on development and
differentiation of the cerebral cortex. VIII. Early
change of the undifferentiated nervous cells in the
brain in the exposed mouse embryo of 15th day of
viviparity, 400
Effect of low dose x-ray irradiation on development and
differentiation of the cerebral cortex. VI.
Observation on cell cycle and of matrix cells of the
endbrain in the exposed mouse embryo of the 15th day
of viviparity, 401
Effect of low dose x-ray irradiation on development and
differentiation of the cerebral cortex. VI. Dose
effect on the change of cell cycle of matrix cells in
the endbrain in the exposed mouse embryo of the 13th
of viviparity, 402
Effect of radiation in utero on mouse testes lactate
dehydrogenase-X, 2234
Experimental cerebral dysplasia produced by x-ray.
Cerebrocortical dysplasia of mice due to exposure to
50 R or 100 R in the embryonic stage. III., 2660
Experimental cerebral dysplasia produced by x-ray.
Cerebrocortical dysplasia of mice due to exposure to
50 R or 100 R in the embryonic stage. II., 3042
Prenatal effects of ^{35}S in mice, 320
MICE/RADIOBIOLOGY
Animal experiments in radiotherapy. I. Small animals,
2655
MICE/RADIONUCLIDE KINETICS
Effects of ingested plutonium (Reissue of 1947 report on
tissue distribution of ingested Pu), 3230 (CH-3783)
Uptake and retention of ^{133}Ba and ^{140}Ba - ^{140}La in mouse
tissues, 1227
MICE/RADIOSENSITIVITY
Effect of interferon on the unspecific radioresistance
of white mice to x rays, 2563
Pathology of tumors induced in Harwell mice by ^{239}Pu and
 ^{226}Ra (Comparison with C_3H and CBA mice), 2317
Recovery of radioresistance and hematogenic stem cells
(γ rays; mice), 2743 (ERDA-tr-99)
Undercooling test used to predict radiosensitivity in
mice, 3258 (INIS-mf-3331)
MICE/SURVIVAL CURVES
Deductions about survival-curve parameters from iso-
effect radiation regimes. Observations on lethality
after whole-body irradiation of mice, 2919
Use of Gompertz's transformation in analysis of
mortality data on mice contaminated with ^{226}Ra and
 ^{228}Ra , 3293 (INIS-mf-3331)
MICE/SURVIVAL TIME
Effect of instantaneous dose rate on survival time of
mice, 2166
Interspecies comparison of responses of mice and dogs to
continuous ^{60}Co γ irradiation, 2165
MICRODOSIMETRY/MEETINGS
The fifth symposium on microdosimetry 22-26th September,
1975 Verbania Pallanza, Italy, 1758 (RD/B/M-3593)
MICROSOMES/ULTRASTRUCTURAL CHANGES
Action of ionizing radiation on the intermembrane
phospholipid and cholesterol exchange, 343
MICROSOPHERES/INTRAVENOUS INJECTION
Lung irradiation with static plutonium microspheres
(^{239}Pu , ^{238}Pu), 3122
Mammalian biology group (Hazards of Pu, ^{210}Po , x
radiation, ^{75}Se , ^{60}Co , ^{113}Sn , and ^{109}Cd), 1548 (LA-
6313-PR)

NUCLEAR INDUSTRY/HEALTH HAZARDS

Methodology for calculation of radiation doses in the environs from nuclear fuel cycle facilities, 1149 (BNWL-2075)

Review of reports by J.W. Gofman on inhaled plutonium, 2445 (BNWL-2067)

NUCLEAR INDUSTRY/MEETINGS

Third annual conference on radiation protection, Vigyan Bhavan, New Delhi, January 19-21, 1976. Programme and synopses, 1940 (CONF-760114-(Absts.))

NUCLEAR INDUSTRY/PERSONNEL

Radiation exposure and the woman worker: biological and legal parameters, 1879 (CONF-760912-1)

Report of expert committee on accident compensation for the workers of atomic industry, 2550

Two quarters for one (Radiation protection of personnel in nuclear industry), 894

NUCLEAR INDUSTRY/RADIATION HAZARDS

Health and safety record of the nuclear industry, 1531

Protection from modern industrial and environmental risks. lessons from nuclear industry: programme and synopses, 1960 (INIS-mf-3789)

Unacceptable uncertainty in risk analysis related to the medical consequences of nuclear fission, 2805 (INIS-mf-3141)

NUCLEAR INDUSTRY/SAFETY

Health and safety record of the nuclear industry, 1531

Risk and safety in the nuclear industry and conventional norms of society, 1325 (IA-1321)

NUCLEAR INDUSTRY/SAFETY STANDARDS

8th annual national conference on radiation control. Radiation benefits and risks: facts, issues, and options, 286 (FDA-77-8021)

NUCLEAR MEDICINE

SCINTILLATION

Biological implications of radiation, 611 (BNL-22938)

Medical radiation exposure of pregnant and potentially pregnant women, 636

Overview of Federal agency radiation protection activities. I, 2776 (DHEW/FDA-76-8026)

Programme and abstracts, 1952 (INIS-mf-3159)

Radioactive isotopes in occupational health, 1948 (EUR-5524)

NUCLEAR MEDICINE/ACTIVATION ANALYSIS

Medical uses of nuclear data, 2450

NUCLEAR MEDICINE/COST BENEFIT ANALYSIS

Benefit vs risk in the practice of nuclear medicine, 2669

NUCLEAR MEDICINE/DELAYED RADIATION EFFECTS

Detection of chronic radiolesions and their treatment,

2036

NUCLEAR MEDICINE/DOSIMETRY

Radiation dosimetry in nuclear medicine - recent developments, 1708

NUCLEAR MEDICINE/GAMMA DOSIMETRY

Modified geometric factor approach to internal gamma ray dosimetry, 1766

NUCLEAR MEDICINE/HEALTH HAZARDS

8th annual national conference on radiation control.

Radiation benefits and risks: facts, issues, and options, 286 (FDA-77-8021)

NUCLEAR MEDICINE/INDIUM 113

Shortlived radioisotopes used in hospitals, 1891

NUCLEAR MEDICINE/LEGAL ASPECTS

Workshop summary reports, 2797 (DHEW/FDA-76-8026)

NUCLEAR MEDICINE/MEETINGS

Third annual conference on radiation protection, Vigyan

Bhavan, New Delhi, January 19-21, 1976. Programme and synopses, 1940 (CONF-760114-(Absts.))

NUCLEAR MEDICINE/RADIATION ACCIDENTS

Radiation protection and measures in case of accidents in nuclear medicine, 1924 (AED-Conf-76-345-000)

Radiation protection measures in the case of incidents and radiation accidents, 1926 (AED-Conf-76-345-003)

NUCLEAR MEDICINE/RADIATION DOSES

Exposure dose in recent treatment of nuclear medicine and countermeasures, 3023

Medical radiation exposure, 96 (EPA-520/4-77-005)

Radiation exposure of the personnel in the diagnostic application of radioactive noble gases, 1919 (AED-Conf-76-134-058)

NUCLEAR MEDICINE/RADIATION HAZARDS

'Risk versus benefit' for diagnostic X-rays and radionuclides, 2453 (INIS-mf-3243)

Dosimetry and radiation protection problems of using radionuclides for diagnostic purposes, 2944

Protection problems in the use of radioactive materials in medical diagnosis, 142

Radiation-induced teratogenesis - a compilation of damages observed in man, 389

Radiation absorbed dose from medically administered radiopharmaceuticals, 2943

Risk of hazards in the application of ionizing radiation and radioactive substances reflected in international recommendations and national law, 2124

Workshop summary reports, 2797 (DHEW/FDA-76-8026)

NUCLEAR MEDICINE/RADIATION MONITORING

Experiences in the country-wide radiological protection surveys in India, 3215

NUCLEAR MEDICINE/RADIATION PROTECTION

Application of the rules of radiological security in hospitals, 1523

Radiation protection in nuclear medicine. Measurement aspects, 1910 (AED-Conf-76-134-013)

Radiation protection in nuclear medicine: fundamentals and methods, 1916 (AED-Conf-76-134-044)

Radiation protection measures for diagnostics and therapy in the field of nuclear medicine, 1925 (AED-Conf-76-345-002)

Radioactively labelled substances for in vivo and in vitro tests from the time of their production up to their use in nuclear medicine, 1169 (AED-Conf-76-280-000)

Recommendations on guidance for technic to reduce unnecessary exposure from x-ray studies in Federal health care facilities. Background report, 1383 (PB-259866)

Risk of hazards in the application of ionizing radiation and radioactive substances reflected in international recommendations and national law, 2124

NUCLEAR MEDICINE/RADIOACTIVE WASTE DISPOSAL

Nuclear medicine environmental discharge measurement. Final report, 2568 (PB-253377)

NUCLEAR MEDICINE/REGULATIONS

Nuclear standards in medical use of radioisotopes and instruments, 3051

NUCLEAR MEDICINE/RESEARCH PROGRAMS

Annual report of the Department of Atomic Energy 1975-76 (Bombay, India), 2377 (INIS-mf-3312)

Radioisotope studies utilizing a low level whole body counter and clinical applications of activation analysis. Progress report (Nuclear medicine research studies), 1454 (ORO-2401-94)

NUCLEAR MEDICINE/STANDARDS

Overview of Federal agency radiation protection activities. II (Food and Drug Administration regulations), 2778 (DHEW/FDA-76-8026)

NUCLEAR MEDICINE/STATISTICS

X-ray diagnostics, X-ray therapy, diagnostics and therapy with radioactive materials in free medical practice, 1887 (DEU-76-16)

NUCLEAR MEDICINE/TECHNETIUM 99

Shortlived radioisotopes used in hospitals, 1891

NUCLEAR PHYSICS/RESEARCH PROGRAMS

Annual report of the Department of Atomic Energy 1975-76 (Bombay, India), 2377 (INIS-mf-3312)

Annual report, 1976 (Ankara Nuclear Research and Training Center), 2378 (NP-21778)

NUCLEAR POWER/HAZARDS

Nuclear power, technology, and environmental law, 3218

Some aspects of the case for nuclear power, 1746

NUCLEAR POWER/HEALTH HAZARDS

Cost-benefit as weighed on genetic scales, 1878

Proceedings of the workshop on measurement of heavy elements in vivo, 1100 (BNWL-2088)
Role of chest counting in personnel dosimetry (^{238}Pu and ^{239}Pu lung counting of personnel), 1102 (BNWL-2088)
Summary of discussion calibration techniques and errors I, 1107 (BNWL-2088)
- PLUTONIUM 239/CARCINOGENESIS**
Bone sarcoma risks to man from ^{226}Ra , ^{228}Ra , and ^{239}Pu , 2299 (AED-Conf-76-430-014)
Dose-response relationships for beagles injected with $^{239}\text{Pu(IV)}$ or $^{241}\text{Am(III)}$, 2985
Hot particle program (^{210}Po , ^{238}Pu , ^{239}Pu , ^{147}Pm), 148 (LA-6898-PR)
Induction of cancers in the rat after inhalation of alpha-emitting radionuclides, 2323
Inhalation carcinogenesis of high-fired $^{239}\text{PuO}_2$ in rats, 889
Studies of pulmonary carcinogenesis in rodents following inhalation of transuranic compounds (^{238}Pu , ^{239}Pu , ^{244}Cm), 3121
- PLUTONIUM 239/CHEMICAL ANALYSIS**

- Determination of plutonium in man (^{239}Pu), 145 (LA-6898-PR)
- PLUTONIUM 239/CHEMICAL PROPERTIES
- Biological hazard and measurement of plutonium, 3072
- PLUTONIUM 239/DECONTAMINATION
- Training of skin decontamination and its results, 1449
- PLUTONIUM 239/DELAYED RADIATION EFFECTS
- Early and delayed effects of Pusup(239) administered to young rats, 1664
- Late effects of ^{239}Pu administered at representative stages of gestation (Rats), 239 (BNWL-2100(Pt.1))
- Osteosarcomogenic effect of plutonium-239 dependent on the age and sex of animals, 2443
- Tumours and viruses in mice injected with plutonium, 335
- PLUTONIUM 239/DEPOSITION
- Induction of osteogenic sarcoma by $^{239}\text{PuIV}$ (polymeric) in beagles, 2641 (CDO-119-250)
- PLUTONIUM 239/DEPTH DOSE DISTRIBUTIONS
- Microscopic distribution of ^{239}Pu deposited in bone from a human injection case, 2353
- PLUTONIUM 239/DIFFUSION
- Atmospheric radioactivity data and the Weibull distribution function, 1319
- PLUTONIUM 239/DOSE RATES
- Comparison of the dose to cells on trabecular bone surfaces from plutonium-239 and radium-226 based on experimental alpha absorption measurements, 1808
- PLUTONIUM 239/DOSE-RESPONSE RELATIONSHIPS
- Dose-effect studies with inhaled plutonium oxide in beagles (^{239}Pu , ^{238}Pu), 231 (BNWL-2100(Pt.1))
- Inhaled plutonium nitrate in dogs (^{239}Pu), 232 (BNWL-2100(Pt.1))
- PLUTONIUM 239/EARLY RADIATION EFFECTS
- Early and delayed effects of Pusup(239) administered to young rats, 1664
- PLUTONIUM 239/ENVIRONMENTAL TRANSPORT
- Derivation of plant-soil relationships for dose assessment on Bikini Atoll (Radiation dose to returning population), 884 (UCID-17313)
- Radioactive foodchains in the subarctic environment. Progress report, August 15, 1975-August 14, 1976 (^{137}Cs and ^{239}Pu , ^{240}Pu distribution), 1404 (CDO-3011-6)
- Radioecology of natural systems. Three year summary report, May 1, 1974-July 31, 1977 (Biological effects of Pu contamination at Rocky Flats Plant), 84 (CDO-1156-50)
- PLUTONIUM 239/EXCRETION
- Calculations of loads and doses delivered, from radiochemistry and human spectrometry experimental results in a case of internal contamination in man. (Validity of Morrow's test and retention equations), 3288 (CRSSA-1973)
- Comparison of the late excretion of ^{226}Ra and ^{239}Pu by man, 2357
- Diagnosis and treatment of incorporated radionuclides. Proceedings series. Proceedings of an international seminar, Vienna, Austria, December 8-12, 1975, 2348 (STI/PUB-411)
- Efficacy of Zn-DTPA in removing plutonium from the human body, 1733
- PLUTONIUM 239/GENETIC EFFECTS
- Genetic effects of ^{239}Pu salt injections in male mice, 1661
- PLUTONIUM 239/HEALTH HAZARDS
- Inhalation carcinogenesis of high-fired $^{239}\text{PuO}_2$ in rats, 889
- Plutonium problem in biological perspective (^{238}Pu and ^{239}Pu distribution and retention in man and laboratory animals and role of Transuranium Registry for personnel data compilation), 1101 (BNWL-2088)
- PLUTONIUM 239/INGESTION
- Plutonium incorporation through ingestion by young animals (Mice, rats, and cats), 2367
- PLUTONIUM 239/INHALATION
- Cancer hazard from inhaled plutonium, 2941 (INIS-mf-3141)
- Density gradient separation and size distribution of beagle lymphocytes (^{239}Pu), 1805 (BNWL-2000(Pt.1))
- Differentiation of peripheral lymphocyte population in Pu-exposed beagle dogs (^{238}Pu , ^{239}Pu), 242 (BNWL-2100(Pt.1))
- Dose-effect studies with inhaled plutonium oxide in beagles (^{238}Pu , ^{239}Pu), 1797 (BNWL-2000(Pt.1))
- Effects of plutonium on the immune system: immunoglobulin-M in beagle dogs exposed to plutonium and in unexposed controls (^{238}Pu , ^{239}Pu), 1806 (BNWL-2000(Pt.1))
- Estimated production of human lung cancers by plutonium from worldwide fallout, 2940 (INIS-mf-3141)
- Experimental study of inhaled radioactive pollutants. I. Present data. II. Inventory of lesions. III. Validity of the animal model dose-effect relationships (Radon, ^{239}Pu , ^{241}Am , and ^{244}Cm), 3126 (LF-tr-111)
- Hematologic effects of $^{239}\text{PuO}_2$ inhalation in rats, 1804 (BNWL-2000(Pt.1))
- Hemodynamics of dogs following inhalation of polymeric plutonium-239, 2340 (ERDA-tr-241)
- Inhalation toxicology of $^{238}\text{PuO}_2$ and $^{239}\text{PuO}_2$ in Syrian golden hamsters, 244
- Late effects of inhaled $\text{Pu}(\text{NO}_3)_3$ and $^{253}\text{Es}(\text{NO}_3)_3$ in rats (^{238}Pu , ^{239}Pu), 1799 (BNWL-2000(Pt.1))
- Late effects of inhaled plutonium in dogs, 2962
- Relation between soil contamination and lung burden, and implications to resuspension experimental design, 1854 (CONF-740921-)
- Respiratory carcinogenesis in rats after inhalation of radioactive aerosols of actinides and lanthanides in various physicochemical forms (^{244}Cm , ^{241}Am , ^{238}Pu , ^{239}Pu), 3123
- Risks of plutonium inhalation, 2942 (INIS-mf-3141)
- Studies of pulmonary carcinogenesis in rodents following inhalation of transuranic compounds (^{238}Pu , ^{239}Pu , ^{244}Cm), 3121
- PLUTONIUM 239/INTERNAL IRRADIATION
- Measurement of transuranic elements in vivo at CRNL (Personnel monitoring at nuclear fuel fabrication plant), 1110 (BNWL-2088)
- Role of chest counting in personnel dosimetry (^{238}Pu and ^{239}Pu lung counting of personnel), 1102 (BNWL-2088)
- PLUTONIUM 239/INTRAPERITONEAL INJECTION
- Role of age and dosage of administered plutonium in onset of osteosarcoma in rats, 2333 (ERDA-tr-227)
- PLUTONIUM 239/LABELLED COMPOUNDS
- Solubility of plutonium dioxide aerosols, in vitro (Health hazards to industrial workers from accidental inhalation), 764 (LF-56)
- PLUTONIUM 239/LUNG CLEARANCE
- Effect of time on the determination of the clearance rates of insoluble plutonium 239 oxide, 246
- Role of protracted exposure on the toxicology of inhaled $^{239}\text{PuO}_2$, 233 (BNWL-2100(Pt.1))
- PLUTONIUM 239/MAXIMUM PERMISSIBLE BODY BURDEN
- Exposure to plutonium: radiation protection standards, 1218
- PLUTONIUM 239/MAXIMUM PERMISSIBLE INTAKE
- Biological hazard and measurement of plutonium, 3072
- PLUTONIUM 239/MEASURING METHODS
- Use of ^{103}Pd as a calibration source for the determination of ^{239}Pu in vivo, 1104 (BNWL-2088)
- PLUTONIUM 239/METABOLISM
- Plutonium and americium in the foodchain lichen-reindeer-man, 592 (CONF-770409-11)
- PLUTONIUM 239/MICRODOSIMETRY
- Microdosimetry of internal sources (^{239}Pu), 1306 (BNWL-SA-5672)
- PLUTONIUM 239/PERSONNEL MONITORING
- In vivo plutonium measurement at the Battelle-Northwest whole body center, 1111 (BNWL-2088)
- Role of chest counting in personnel dosimetry (^{238}Pu and ^{239}Pu lung counting of personnel), 1102 (BNWL-2088)
- PLUTONIUM 239/PHYSICAL PROPERTIES
- Biological hazard and measurement of plutonium, 3072
- PLUTONIUM 239/RADIATION DOSE DISTRIBUTIONS
- Biological effects of $^{239}\text{PuO}_2$ inhalation in the Rhesus monkey, 772 (LF-56)
- Biological effects of repeated inhalation exposure of Syrian hamsters and mice to polydisperse aerosols of $^{239}\text{PuO}_2$. II, 777 (LF-56)
- Toxicity of inhaled $^{239}\text{PuO}_2$ in immature, young adult and aged Syrian hamsters. IV, 768 (LF-56)
- Toxicity of inhaled polydisperse aerosol of $^{239}\text{Pu}(\text{NO}_3)_3$ in Syrian hamsters. II, 770 (LF-56)
- Toxicity of inhaled alpha-emitting radionuclides: an experimental approach, 805 (LF-56)
- PLUTONIUM 239/RADIATION DOSES
- LLL plutonium lung counter calibration and discussion of errors, 1233 (UCRL-78409)
- PLUTONIUM 239/RADIATION HAZARDS
- Allowed health risk for plutonium and americium standards as compared with standards for penetrating radiation, 2295
- Estimated risk from ^{239}Pu to human bone, liver and lung, 2282
- Removal of plutonium from drinking water by community water treatment facilities, 1874
- Risks of plutonium inhalation, 2942 (INIS-mf-3141)
- PLUTONIUM 239/RADIATION MONITORING
- Atmospheric radioactivity data and the Weibull distribution function, 1319
- Biological hazard and measurement of plutonium, 3072
- Determination of Pu-239, 240 tissue concentrations in non-occupationally exposed residents of New York City, 354 (CDO-2968-1)
- Removal of a four-month-old ^{239}Pu deposit in a puncture wound at the tip of the left middle finger, 1123 (KFK-2354)
- Use of ^{103}Pd as a calibration source for the determination of ^{239}Pu in vivo (^{238}Pu), 2246 (ANL-76-88(Pt.2))
- PLUTONIUM 239/RADIOECOLOGICAL CONCENTRATION
- Environmental and public health consequences of the controlled disposal of transuranic elements to the marine environment, 1877
- PLUTONIUM 239/RADIOMETRIC ANALYSIS
- Determination of heavy elements in humans, 1106 (BNWL-2088)
- PLUTONIUM 239/RADIONUCLIDE KINETICS
- Cellularity of thymus after external irradiation or ^{239}Pu administration in mice, 3277 (INIS-mf-3331)
- PLUTONIUM 239/RADIONUCLIDE MIGRATION
- Plutonium transport and dose estimation model, 1869
- PLUTONIUM 239/RBE
- Changes in chromosome aberration frequency in Chinese hamster liver related to LET and microdose distribution, 2148
- PLUTONIUM 239/RETENTION

- Biological behaviour of plutonium 239, 2363
Dose-response relationships for beagles injected with $^{239}\text{Pu}(\text{IV})$ or $^{241}\text{Am}(\text{III})$, 2585
Effect of size and alpha flux of $^{239}\text{PuO}_2$ particles on production of chromosome aberrations in liver of Chinese hamster, 2326
Effect of dose level on skeletal retention of $^{239}\text{Pu}(\text{IV})$ in the beagle, 410
- PLUTONIUM 239/RETENTION FUNCTIONS**
In vivo plutonium measurement at the Battelle-Northwest whole body center, 1111 (BNWL-2088)
Methods for the assay of plutonium in vivo: what are the alternatives (^{239}Pu , ^{238}Pu , and ^{241}Am assay in vivo), 1115 (BNWL-2088)
Plutonium problem in biological perspective (^{238}Pu and ^{239}Pu distribution and retention in man and laboratory animals and role of Transuranium Registry for personnel data compilation), 1101 (BNWL-2088)
Removal of inhaled radioactive particles by lung lavage. A review, 78
- PLUTONIUM 239/SAFETY STANDARDS**
Allowed health risk for plutonium and americium standards as compared with standards for penetrating radiation, 2295
- PLUTONIUM 239/SCINTILLATION COUNTING**
Detection system for the localization and measurement in vivo of small amounts of photon emitters (Performance of Ge diode scintillation crystal-phototube system for personnel monitoring for ^{238}Pu , ^{239}Pu , and ^{241}Am), 1118 (BNWL-2088)
- PLUTONIUM 239/SIMULATORS**
Use of ^{103}Pd as a calibration source for the determination of ^{239}Pu in vivo, 1104 (BNWL-2088)
- PLUTONIUM 239/SPATIAL DISTRIBUTION**
New approach for an improved short-time procedure for locating and measuring low-activity, low-energy transuranium deposits in wounds, 1122 (KFK-2354)
- PLUTONIUM 239/TEMPORAL DOSE DISTRIBUTIONS**
Influence of temporal distribution of alpha dose in bone tumor induction (^{239}Pu , ^{252}Es , rats), 1802 (BNWL-2000(Pt.1))
- PLUTONIUM 239/TISSUE DISTRIBUTION**
Biological behaviour of plutonium 239, 2363
Calibration procedures for in-vivo sodium iodide spectrometry of plutonium and americium in the human lungs, 2261 (LA-UR-76-1718)
Correlations between the metabolic behavior of inhaled and intravenously injected plutonium in beagle dogs (^{239}Pu), 2368
Detection system for the localization and measurement in vivo of small amounts of photon emitters (Performance of Ge diode scintillation crystal-phototube system for personnel monitoring for ^{238}Pu , ^{239}Pu , and ^{241}Am), 1118 (BNWL-2088)
Diagnosis and treatment of incorporated radionuclides. Proceedings series. Proceedings of an international seminar, Vienna, Austria, December 8-12, 1975, 2348 (STI/FUB-411)
Distribution of plutonium in the mouse ovary, 253
Dose-response relationships for beagles injected with $^{239}\text{Pu}(\text{IV})$ or $^{241}\text{Am}(\text{III})$, 2585
Dosimetry of ^{239}Pu and ^{241}Am in man and animals, 2274
Estimated risk to human bone from ^{239}Pu , 2268
In vivo plutonium measurement at the Battelle-Northwest whole body center, 1111 (BNWL-2088)
Influence of age and physicochemical form on the effects of ^{239}Pu on the skeleton of the rat, 2310
LLL plutonium lung counter calibration and discussion of errors, 1112 (BNWL-2088)
Macro-distribution of plutonium in selected bones from an abnormal skeleton, 2352
Microscopic distribution of ^{239}Pu deposited in bone from a human injection case, 2353
Plutonium problem in biological perspective (^{238}Pu and ^{239}Pu distribution and retention in man and laboratory animals and role of Transuranium Registry for personnel data compilation), 1101 (BNWL-2088)
Radiation dose to mouse testes from ^{239}Pu , 2344
Summary of discussion calibration techniques and errors I, 1107 (BNWL-2088)
Survival, causes of death, and estimated tissue doses in a group of human beings injected with plutonium, 2267
- PLUTONIUM 239/TOXICITY**
Biological problems of plutonium, 2675
Current status of Utah long-term ^{239}Pu studies, 2339
Inhalation toxicology of $^{239}\text{PuO}_2$ and $^{238}\text{PuO}_2$ in Syrian golden hamsters, 244
Issue of plutonium toxicity, 1311
Plutonium toxicology and other toxicology (Comparison of Pu toxicity with chemical poisons, biological toxins, and other radionuclides), 2269
Poison emitting radiation. How dangerous is plutonium, 1550
Problems in radiological protection involving alpha emitters in bone, 2237 (AED-Conf-76-430-004)
Role of animal toxicity studies in the evaluation of human health risks from internally deposited transuranics (Problems in extrapolation of animal data to man), 480 (BNWL-SA-5881)
Role of protracted exposure on the toxicology of inhaled $^{239}\text{PuO}_2$, 233 (BNWL-2100(Pt.1))
Toxicity of inhaled hot particles, in particular plutonium. Recommendation of the 'Strahlenschutzkommission', 1685
- Toxicity of plutonium, 2609
Toxicity of ^{90}Sr , ^{226}Ra and ^{239}Pu , 905
- PLUTONIUM 239/UPTAKE**
Effect of dose level on skeletal retention of $^{239}\text{Pu}(\text{IV})$ in the beagle, 410
Investigation of the role of certain liver components in fixation of Pu^{239} , 2613
- PLUTONIUM 240/BODY BURDEN**
Measurement of transuranic elements in vivo at CRNL (Personnel monitoring at nuclear fuel fabrication plant), 1110 (BNWL-2088)
- PLUTONIUM 240/ENVIRONMENTAL TRANSPORT**
Derivation of plant-soil relationships for dose assessment on Bikini Atoll (Radiation dose to returning population), 884 (UCID-17313)
Radioactive foodchains in the subarctic environment. Progress report, August 15, 1975-August 14, 1976 (^{137}Cs and ^{239}Pu , ^{240}Pu distribution), 1404 (COO-3011-6)
- PLUTONIUM 240/INHALATION**
Relation between soil contamination and lung burden, and implications to resuspension experimental design, 1854 (CONF-740921-)
- PLUTONIUM 240/INTERNAL IRRADIATION**
Measurement of transuranic elements in vivo at CRNL (Personnel monitoring at nuclear fuel fabrication plant), 1110 (BNWL-2088)
- PLUTONIUM 240/METABOLISM**
Plutonium and americium in the foodchain lichen-reindeer-man, 592 (CONF-770409-11)
- PLUTONIUM 240/RADIATION HAZARDS**
Removal of plutonium from drinking water by community water treatment facilities, 1874
- PLUTONIUM 240/RADIATION MONITORING**
Determination of Pu-239, 240 tissue concentrations in non-occupationally exposed residents of New York City, 354 (COO-2968-1)
- PLUTONIUM 240/RADIOECOLOGICAL CONCENTRATION**
Environmental and public health consequences of the controlled disposal of transuranic elements to the marine environment, 1877
- PLUTONIUM 244/MAXIMUM PERMISSIBLE INTAKE**
Maximum permissible concentration (MPC) values for spontaneously fissioning radionuclides, 966 (DRNL-5171)
- PLUTONIUM DIOXIDE/INHALATION**
Cocarcinogenesis of inhaled plutonium dioxide and beryllium oxide (^{239}Pu), 234 (BNWL-2100(Pt.1))
Effect of inhaled plutonium dioxide on development of urethane-induced pulmonary adenomas, 323
Life history of plutonium dioxide in the lung: from macrophage to carcinoma (^{239}Pu , rats), 2366 (BNWL-SA-5896(Rev.))
- PLUTONIUM DIOXIDE/LUNG CLEARANCE**
Cocarcinogenesis of inhaled plutonium dioxide and beryllium oxide (^{239}Pu), 234 (BNWL-2100(Pt.1))
Determination of the rates of clearance of insoluble compounds of plutonium from the lung, 3038 (NRPB-R-22)
- PLUTONIUM DIOXIDE/MATERIALS HANDLING**
Radiation protection aspects in connection with the production of fuel elements containing plutonium, 1150 (AED-Conf-76-280-000)
- PLUTONIUM ISOTOPES/BIOLOGICAL RADIATION EFFECTS**
Culture of cells from beagles with bronchioloalveolar carcinoma (Pu), 241 (BNWL-2100(Pt.1))
Plutonium in human lung in the Hanford environs, 694 (BNWL-SA-5855)
- PLUTONIUM ISOTOPES/CARCINOGENESIS**
Biomedical and Environmental Research program of the LASL Health Division. Progress report, January-December 1976, 147 (LA-6898-PR)
- PLUTONIUM ISOTOPES/CHEMICAL ANALYSIS**
Determination of plutonium in man (^{239}Pu), 145 (LA-6898-PR)
- PLUTONIUM ISOTOPES/DEPOSITION**
Examples of microdosimetric problems in radiation protection: tritium and plutonium, 2292
- PLUTONIUM ISOTOPES/DOSE LIMITS**
Contamination limits for real and personal property. Progress report, July-December 1975 (Plutonium and lead isotopes), 1403 (LA-6337-PR)
- PLUTONIUM ISOTOPES/ENVIRONMENTAL EFFECTS**
Ecological studies, 125 (LA-6898-PR)
Kerr-McGee incident (Plutonium contamination of employee and her apartment), 2708 (DHEW/FDA-76-8026)
Perspectives on radioactive releases from the nuclear fuel cycle, 2706 (DHEW/FDA-76-8026)
- PLUTONIUM ISOTOPES/HEALTH HAZARDS**
Contamination limits for real and personal property. Progress report, July-December 1975 (Plutonium and lead isotopes), 1403 (LA-6337-PR)
Environmental radiation and the lung (Pu, Ra, Rn), 3005
Radioactive pollution, 1091
- PLUTONIUM ISOTOPES/INHALATION**
AERIN: a computational version of the ICRP lung model (Dosimetry of inhaled Pu), 1144 (UCID-17000)
- PLUTONIUM ISOTOPES/MAXIMUM PERMISSIBLE LEVEL**
Radioactive pollution, 1091
- PLUTONIUM ISOTOPES/RADIATION DOSES**
AERIN: a computational version of the ICRP lung model (Dosimetry of inhaled Pu), 1144 (UCID-17000)
Radiation exposure due to actinides released from nuclear facilities, 697

PLUTONIUM ISOTOPES/RADIATION HAZARDS

Nuclear Power, 2291

PLUTONIUM ISOTOPES/RADIATION MONITORING

Assessment of plutonium in lung, 1129

Plutonium in human lung in the Hanford environs, 694 (BNWL-SA-5855)

PLUTONIUM NITRATES/INHALATION

Dynamics of the phospholipid metabolism in the rat lungs after inhalation of nitrate solution of polymeric plutonium, 2697

Inhaled plutonium nitrate in dogs (^{239}Pu), 232 (BNWL-2100(Pt.1))

Late effects of inhaled $\text{Pu}(\text{NO}_3)_4$ and $^{253}\text{Es}(\text{NO}_3)_3$ in rats (^{239}Pu , ^{238}Pu), 1799 (BNWL-2000(Pt.1))

Late effects of inhaled $\text{Pu}(\text{NO}_3)_4$ in rats (^{238}Pu , ^{239}Pu), 235 (BNWL-2100(Pt.1))

PLUTONIUM NITRATES/TOXICITY

Biological hazard and measurement of plutonium, 3072

PLUTONIUM OXIDES/AEROSOL GENERATORS

Inhalation toxicology of industrial uranium and plutonium mixed oxides. I. Generation of aerosols from dry powders and preliminary rodent studies, 789 (LF-56)

PLUTONIUM OXIDES/BIOLOGICAL LOCALIZATION

Quantitative autoradiography of inhaled $^{239}\text{PuO}_2$ in the lung (Rats, hamsters), 236 (BNWL-2100(Pt.1))

PLUTONIUM OXIDES/CARCINOGENESIS

Studies of pulmonary carcinogenesis in rodents following inhalation of transuranic compounds (^{238}Pu , ^{239}Pu , ^{240}Pu), 3121

PLUTONIUM OXIDES/INHALATION

Charge distribution on plutonium-containing aerosols produced in mixed-oxide reactor fuel fabrication and the laboratory (Effects of electrostatic charge on lung deposition and clearance), 763 (LF-56)

Chromosome aberrations induced in Syrian hamster lung cells by inhaled $^{239}\text{PuO}_2\text{-ZrO}_2$ particles, 406

Dose-effect studies with inhaled plutonium oxide in beagles (^{238}Pu , ^{239}Pu), 1797 (BNWL-2000(Pt.1))

Dose-effect studies with inhaled plutonium oxide in beagles (^{239}Pu , ^{238}Pu), 231 (BNWL-2100(Pt.1))

Field characterization of plutonium aerosols in mixed-oxide fuel fabrication (Hazards to fuel fabrication personnel from inhalation of Pu aerosols), 762 (LF-56)

Hematologic effects of $^{239}\text{PuO}_2$ inhalation in rats, 1804 (BNWL-2000(Pt.1))

Late effects of inhaled $^{238}\text{PuO}_2$ in beagles, 1798 (BNWL-2000(Pt.1))

Studies of pulmonary carcinogenesis in rodents following inhalation of transuranic compounds (^{238}Pu , ^{239}Pu , ^{240}Pu), 3121

PLUTONIUM OXIDES/LUNG CLEARANCE

Retention of inhaled plutonium oxide. Elimination procedures by pulmonary lavage and effect of the alveolar macrophage, 372 (CEA-R-4830)

PLUTONIUM OXIDES/SOLUBILITY

Solubility of plutonium dioxide aerosols, in vitro (Health hazards to industrial workers from accidental inhalation), 764 (LF-56)

PLUTONIUM OXIDES/TOXICITY

Biological hazard and measurement of plutonium, 3072

Inhalation toxicology of $^{238}\text{PuO}_2$ and $^{239}\text{PuO}_2$ in Syrian golden hamsters, 244

Role of protracted exposure on the toxicology of inhaled $^{239}\text{PuO}_2$, 233 (BNWL-2100(Pt.1))

PLUTONIUM PRODUCTION REACTORS

See also HANFORD PRODUCTION REACTORS

WINDSCALE PRODUCTION REACTORS

PLUTONIUM PRODUCTION REACTORS/ENVIRONMENTAL EFFECTS

Atmospheric concentrations of fission product noble gases (^{85}Kr), 3164 (CONF-730915-)

PNEUMONIA/RADIOINDUCTION

Fatal radiation pneumonia following subclinical busulfan injury, 520

PNEUMONITIS

Elective whole lung irradiation, 1045

PNEUMONITIS/PATHOLOGY

Biological effects of daily inhalation of radon and its short-lived daughters in experimental animals (Hamsters, rats, mice), 3201 (CONF-730915-)

PNEUMONITIS/RADIOINDUCTION

Toxicity of inhaled ^{90}Y in fused aluminosilicate particles in beagle dogs. VII, 796 (LF-56)

Toxicity of inhaled ^{144}Ce in fused aluminosilicate particles in beagle dogs. IX, 797 (LF-56)

Toxicity of inhaled ^{90}Sr in fused aluminosilicate particles in beagle dogs. VII, 800 (LF-56)

POINT BEACH-1 REACTOR/REACTOR OPERATION

Annual operating report: January-December 1976, 3238 (DOCKET-50266-599)

POINT BEACH-2 REACTOR/REACTOR OPERATION

Annual operating report: January-December 1976, 3238 (DOCKET-50266-599)

POINT MUTATIONS

See GENE MUTATIONS

POINT SOURCES/BIOLOGICAL RADIATION EFFECTS

Quantitative assessment of carcinogenic risks associated with 'hot particles', 1682

POLAND/NATURAL RADIOACTIVITY

Estimation of radiation hazard in man's habitational microenvironment in Poland, 2379

POLLUTION

(For nonradioactive pollution only; see also CONTAMINATION.)

See also AIR POLLUTION

CHEMICAL EFFLUENTS

WATER POLLUTION

POLLUTION/BIOLOGICAL EFFECTS

Genetic and environmental interactions, 46

POLLUTION/ENVIRONMENTAL EFFECTS

Designing the exposure/response matrix in environmental health studies, 2990 (EUR-5360(Vol.1))

POLLUTION/HAZARDS

Principles of standards setting: the radiation experience, 2373 (CONF-751022-)

POLLUTION/MEASURING METHODS

Designing the exposure/response matrix in environmental health studies, 2990 (EUR-5360(Vol.1))

POLLUTION/TOXICITY

Designing the exposure/response matrix in environmental health studies, 2990 (EUR-5360(Vol.1))

POLONIUM 210/BIOASSAY

Evaluation of a Po-210 bioassay as an index of the exposure of uranium mine workers in Japan to radon daughters, 2580

POLONIUM 210/BIOLOGICAL RADIATION EFFECTS

Experimental respiratory carcinogenesis: interaction between alpha radiation and benzo(a)pyrene in the hamster (^{210}Po), 3125

Histologic observations on the pathogenesis of lung cancer in hamsters following administration of polonium-210, 3055

Hot particle program (^{210}Po , ^{238}Pu , ^{239}Pu , ^{147}Pm), 148 (LA-6898-PR)

Irradiation of the lung with static plutonium microemboli, 2313

POLONIUM 210/CARCINOGENESIS

Experimental respiratory carcinogenesis: interaction between alpha radiation and benzo(a)pyrene in the hamster (^{210}Po), 3125

Hot particle program (^{210}Po , ^{238}Pu , ^{239}Pu , ^{147}Pm), 148 (LA-6898-PR)

Mammalian biology group (Hazards of Pu, ^{210}Po , x radiation, ^{75}Se , ^{60}Co , ^{113}Sn , and ^{109}Cd), 1548 (LA-6313-PR)

POLONIUM 210/DEPOSITION

Deposition and localization of polonium-210 intratracheally instilled in the hamster lung as determined by autoradiography of freeze-dried sections, 409

POLONIUM 210/HEALTH HAZARDS

Mammalian biology group (Hazards of Pu, ^{210}Po , x radiation, ^{75}Se , ^{60}Co , ^{113}Sn , and ^{109}Cd), 1548 (LA-6313-PR)

POLONIUM 210/INHALATION

Lines of experimental research in developing mathematical models for estimating internal radiation (^{210}Po inhalation), 3213 (ORNL-tr-4339)

POLONIUM 210/INTRATRACHEAL ADMINISTRATION

Occurrence and lobar distribution of lung cancer in Syrian hamsters induced by intratracheal administration of ^{210}Po (preliminary report), 771 (LF-56)

POLONIUM 210/MAXIMUM PERMISSIBLE INTAKE

Method of evaluating the content of natural radioactive isotopes of the uranium and thorium family in drinking water and food, 3204 (ORNL-tr-4499)

POLONIUM 210/RADIATION DOSE DISTRIBUTIONS

Lines of experimental research in developing mathematical models for estimating internal radiation (^{210}Po inhalation), 3213 (ORNL-tr-4339)

Occurrence and lobar distribution of lung cancer in Syrian hamsters induced by intratracheal administration of ^{210}Po (preliminary report), 771 (LF-56)

POLONIUM 210/RADIATION DOSES

Internal radiation exposure by ^{210}Pb and ^{210}Po , 3119

POLONIUM 210/RADIATION HAZARDS

Assessment of the hazard to the public from anti-static brushes containing polonium-210 in the form of ceramic microspheres, 2624 (NRPB-R-36)

POLONIUM 210/RADIATION MONITORING

Blood and urinary polonium 210 levels in personnel employed at the Narechen spa, 2969

Polonium-210 in human hair, bones and teeth, 2968

Polonium-210 content in the hair, bone, and teeth of men, 2979

Polonium-210 in the urine and blood of those working at the Narechenski mineral baths, 2980

POLONIUM 210/RADIOCHEMICAL ANALYSIS

Determination of the ^{210}Po content in the urine of

Filipino smokers and non-smokers, 2678

POLONIUM 210/RADIONUCLIDE KINETICS

Determination of polonium in urine of Filipino non-smokers and smokers, 1610 (PAEC(D)-76004)

POLONIUM 210/TISSUE DISTRIBUTION

Lines of experimental research in developing mathematical models for estimating internal radiation (^{210}Po inhalation), 3213 (ORNL-tr-4339)

POLONIUM ISOTOPES/BIOLOGICAL RADIATION EFFECTS

Biological effects of radon on the lung, 3192 (CONF-730915-)

POLYETHYLENES/NEUTRON TRANSPORT

Radiation exposure control technology semiannual progress report, June-December 1975, 1016 (HEDL-TME-76-75)

POLYMERASES/BIOLOGICAL RADIATION EFFECTS

Alterations induced by x-rays and ultraviolet light on the synthesis and maintenance of macromolecular components within cells. Progress report, March 1, 1975-February 1, 1976 (Escherichia coli, Bacillus subtilis), 1905 (ORD-4568-3)

DNA repair, change in the DNA polymerase and DNA ligase activities in the regenerating liver of gamma-irradiated rats, 2172 (ERDA-tr-210)

Influence of prolonged irradiation on the enzymes of DNA synthesis in rat bone marrow, 2888 (ERDA-tr-110)

POLYPOIDY/RADIOINDUCTION

Cytogenetic studies in rats fed irradiated wheat, 2767

PGNDS/CONTAMINATION

AEC investigation of tritium release occurrence at the Rocky Flats Plant, 3173 (TID-27811)

POPULATIONS

See also HUMAN POPULATIONS

POPULATIONS/DOSE COMMITMENTS

Keeping dose commitments ALAP, 2873

POPULATIONS/RADIATION DOSES

Estimation of population doses from diagnostic medical examinations in Japan, 1974. I. The number of radiographs, radiographic and fluoroscopic examinations, 1778

PORTSMOUTH GASEOUS DIFFUSION PLANT/ENVIRONMENTAL EFFECTS

Environmental monitoring at major U.S. Energy Research and Development Administration contractor sites: calendar year 1975. Volume 1, 1157 (ERDA-76-104(Vol. 1))

PORTUGAL/RADIATION PROTECTION

Radiation protection in Portugal: health, safety and legal aspects, 2799 (DOC-LFEN-163-b)

POSITRONS/BIOLOGICAL RADIATION EFFECTS

Biological effects of the radioactive noble gases, 3190 (CONF-730915-)

POST-IRRADIATION THERAPY

Treatment of hemorrhagic radiation cystitis with formalin, 1720

POST-IRRADIATION THERAPY/BCNE MARROW

Bone marrow transplantation - a field in continuous development, 2506

POST-IRRADIATION THERAPY/DRUGS

Study on antitussive effects of Eprezinone dihydrochloride on radiation-induced inflammation of upper respiratory tract due to postoperative irradiation of breast cancer, 307

POTASSIUM/ABUNDANCE

Content of Ca, ⁹⁰Sr, and ¹³⁷Cs in the human placenta, 2971 (ERDA-tr-146)

POTASSIUM/TISSUE DISTRIBUTION

Content of Ca, ⁹⁰Sr, and ¹³⁷Cs in the human placenta, 2971 (ERDA-tr-146)

POTASSIUM 40/RADIATION DOSES

Internal radiation exposure by ⁴⁰K, 3117

POTASSIUM 40/RADIATION MONITORING

Work of the Board's low-background laboratory, 318

POTASSIUM 40/RADIOECOLOGICAL CONCENTRATION

Concentrations of radionuclides and selected stable elements in fruits and vegetables, 590 (CONF-770676-1)

POTASSIUM 42/BIOLOGICAL HALF-LIFE

Biological half-life of potassium in man, 2982

POTASSIUM IODIDES/BIOLOGICAL EFFECTS

Potassium iodide and other blocking agents can counteract the effects of radiation exposure (¹³¹I uptake by thyroid), 3135

POTATOES/RADIOPRESERVATION

Effect of storage and culinary treatment of irradiated potato on the cytogenetic activity of extracts obtained therefrom, 2553

Mutagenicity studies on irradiated potatoes and chlorogenic acid; micronucleus test in rats, 1164

PRAIRIE ISLAND-1 REACTOR/REACTOR OPERATION

Annual operating report for 1976, 432 (DOCKET-50282-701)

PRAIRIE ISLAND-2 REACTOR/REACTOR OPERATION

Annual operating report for 1976, 432 (DOCKET-50282-701)

PRAEODYMIUM 144/INHALATION

Assessment of a cerium--praseodymium-144 inhalation case, 2250 (BNWL-SA-5659)

PREGNANCY/BIOLOGICAL RADIATION EFFECTS

Pregnancy interruption after medical radiation exposure, 109

PREGNANCY/RADIATION HAZARDS

Radiogenetic and radiobiological indications for interruption of pregnancy, 856 (SAAS-203)

PREGNANCY/RADIOSENSITIVITY EFFECTS

Effects of ²³⁹Pu administered at 9 days of gestation on hematologic development of the rat, 238 (BNWL-2100(Pt. 1))

Late effects of ²³⁹Pu administered at representative stages of gestation (Rats), 239 (BNWL-2100(Pt.1))

PRENATAL IRRADIATION

Distinctive features in postnatal development of rabbit adrenals following intrauterine radiation, 672

PRENATAL IRRADIATION/BIOLOGICAL EFFECTS

Late effects of in utero exposure to carcinogens in rats, with special reference to postnatal growth and tumorigenesis (X radiation, fast neutrons, N-butylnitrosourea), 2204

PRENATAL IRRADIATION/CONGENITAL MALFORMATIONS

Eye abnormalities in the mouse fetuses and postnatal mice caused by 150R of x-radiation on day 7 of gestation, 313

PRENATAL IRRADIATION/MORTALITY

Prenatal effects of iodine-131 in mice, 2662

PRENATAL IRRADIATION/RADIATION HAZARDS

Frequency of prenatal x-ray examination and radiation risks in Japan, 1097

PRESSURIZED WATER REACTORS

See PWR TYPE REACTORS

PREVENTIVE MEDICINE

Efficacy of prophylactic irradiation in altering renal allograft survival, 3093

PRIMARY COOLANT CIRCUITS/DECONTAMINATION

Economics of decontamination of nuclear power plants, 572

PRIMARY COSMIC RADIATION/RADIATION DOSES

Primary cosmic radiation outside and within the atmosphere, 2376

PROFESSIONS

See OCCUPATIONS

PROGENY/BIOLOGICAL RADIATION EFFECTS

Cysteamine protection against lethal and growth-inhibiting effects of prenatal x and gamma irradiation, 3220

Cytogenetic study of the offspring of atomic-bomb survivors, 1065

Late effects of in utero exposure to carcinogens in rats, with special reference to postnatal growth and tumorigenesis (X radiation, fast neutrons, N-butylnitrosourea), 2204

PROGENY/CHRONIC IRRADIATION

Chronic irradiation and brain development. Progress report, February 15, 1976-February 15, 1977 (3H0H ingestion by pregnant rats), 439 (UCLA-34P230X1)

PROGENY/DELAYED RADIATION EFFECTS

Effectiveness of ancestral irradiation on the direct and correlated responses to selection for body weight in rats (X radiation), 2930

PROGENY/GROWTH

Genetic effects of atomic bomb radiation on growth of stature of F₁ generation, 1066

Late effects of in utero exposure to carcinogens in rats, with special reference to postnatal growth and tumorigenesis (X radiation, fast neutrons, N-butylnitrosourea), 2204

PROJECT APOLLO

PROMETHAZINE

See AMINES

PROMETHIUM 147/BIOLOGICAL LOCALIZATION

Dosimetry in single lung cells by means of microautoradiographic activity measurements, 1095

PROMETHIUM 147/BIOLOGICAL RADIATION EFFECTS

Hot particle program (²¹⁰Po, ²³⁸Pu, ²³⁹Pu, ¹⁴⁷Pm), 148 (LA-6898-PR)

PROMETHIUM 147/CARCINOGENESIS

Hot particle program (²¹⁰Po, ²³⁸Pu, ²³⁹Pu, ¹⁴⁷Pm), 148 (LA-6898-PR)

PROMETHIUM 147/INGESTION

Acute toxicity in rats and dogs of ingested promethium-147 and ruthenium-106, 1803 (BNWL-2000(Pt.1))

PROMETHIUM 147/INTERNAL IRRADIATION

Radiation dose patterns for inhaled radionuclides, 2945

PROMETHIUM 147/LETHAL RADIATION DOSE

Acute toxicity in rats and dogs of ingested promethium-147 and ruthenium-106, 1803 (BNWL-2000(Pt.1))

PROMETHIUM 147/RADIATION HAZARDS

Public health implications of radioluminous materials, 2554 (PB-246642)

PROMETHIUM 147/TOXICITY

Acute toxicity in rats and dogs of ingested promethium-147 and ruthenium-106, 1803 (BNWL-2000(Pt.1))

Comparative evaluation of toxicity of cerium-144 and promethium-147 in rats, according to biochemical indices, 705

PROMPT GAMMA RADIATION/ABSORPTION

Radiation measurements utilizing the USAF chemical dosimeters. Final report, 3222 (AD-A-036044)

PROMPT GAMMA RADIATION/ANGULAR DISTRIBUTION

Radiation measurements utilizing the USAF chemical dosimeters. Final report, 3222 (AD-A-036044)

PROMPT NEUTRONS/ABSORPTION

Radiation measurements utilizing the USAF chemical dosimeters. Final report, 3222 (AD-A-036044)

PROMPT NEUTRONS/ANGULAR DISTRIBUTION

Radiation measurements utilizing the USAF chemical dosimeters. Final report, 3222 (AD-A-036044)

PROMPT NEUTRONS/NEUTRON SPECTRA

Radiation measurements utilizing the USAF chemical dosimeters. Final report, 3222 (AD-A-036044)

PROSTAGLANDINS/BIOLOGICAL RADIATION EFFECTS

Effect of topical indomethacin on uvr-induced redness and prostaglandin E levels in sunburned guinea pig skin, 1544

PROSTAGLANDINS/METABOLISM

Effects of x-irradiation on steroid biotransformations by testicular tissue. Final report, May 1, 1966-July 31, 1976 (Rats), 1209 (COO-1602-60)

PROSTATE/DELAYED RADIATION EFFECTS

Clinical statistics in a four-year period (1971-1974)
and incidence of malignant tumor in general patients
and A-bomb exposed patients in the Japan Red Cross
Nagasaki Atomic Bomb Hospital, 2509

PROSTHESES/DESIGN

Modified intracanal prosthesis for directing a radiation
beam, 2583

PROTACTINIUM 231/MAXIMUM PERMISSIBLE INTAKE

Method of evaluating the content of natural radioactive
isotopes of the uranium and thorium family in drinking
water and food, 3204 (ORNL-tr-4499)

PROTECTION

- Theory of the induction of bone cancer by alpha radiation: a summary, 2277
- RADIUM 226/BODY BURDEN**
- Macrodistribution of ^{226}Ra in the skeleton of a radium dial painter, 2243 (ANL-76-88(Pt.2))
- Macrodistribution of ^{226}Ra in the human skeleton as determined in vitro by gamma-ray spectrometry, 2245 (ANL-76-88(Pt.2))
- RADIUM 226/CARCINOGENESIS**
- Bone sarcoma risks to man from ^{224}Ra , ^{226}Ra , and ^{232}Pu , 2299 (AED-Conf-76-430-014)
- Late effects and risks of short-lived alpha-emitting bone seekers. Animal experiments, 2298 (AED-Conf-76-430-012)
- RADIUM 226/CHRONIC INTAKE**
- Radiation exposure study of the Ottawa County, Oklahoma population from dietary intake of radium-226, 2360
- RADIUM 226/DISTRIBUTION**
- Gross distribution of ^{226}Ra in man from external counting, 2242 (ANL-76-88(Pt.2))
- RADIUM 226/DOSE RATES**
- Comparison of the dose to cells on trabecular bone surfaces from plutonium-239 and radium-226 based on experimental alpha absorption measurements, 1808
- RADIUM 226/ENVIRONMENTAL EFFECTS**
- Natural radioactivity in the environment: the Florida phosphate study (Uranium, ^{226}Ra), 2938 (DHEW/FDA-76-8026)
- RADIUM 226/ENVIRONMENTAL TRANSPORT**
- Assessment of radiological impact of the inactive uranium-mill tailings pile at Salt Lake City, Utah, 1858 (ORNL/TM-5251)
- Dosimetric implications of releases to the aquatic environment from the nuclear power industry, 1873
- RADIUM 226/EXCRETION**
- Comparison of the late excretion of ^{226}Ra and ^{232}Pu by man, 2357
- Retention and excretion of radium-226 and strontium-90 in two doubly contaminated persons, 1127
- RADIUM 226/HEALTH HAZARDS**
- Proceedings of the 6th conference on radiation hygiene, 1973, 3171
- RADIUM 226/INGESTION**
- Ingestion of radium 226 and its evaluation in a selected population group, 980
- RADIUM 226/MAXIMUM PERMISSIBLE INTAKE**
- Method of evaluating the content of natural radioactive isotopes of the uranium and thorium family in drinking water and food, 3204 (ORNL-tr-4499)
- RADIUM 226/RADIATION DOSES**
- Internal radiation exposure by ^{226}Ra , 3115
- RADIUM 226/RADIATION HAZARDS**
- Allowed health risk for plutonium and americium standards as compared with standards for penetrating radiation, 2295
- Nuclear Power, 2291
- Radioactivity standards for the safe drinking water act of 1974, 2939 (DHEW/FDA-76-8026)
- RADIUM 226/RADIATION MONITORING**
- Macrodistribution of ^{226}Ra in the skeleton of a radium dial painter, 2243 (ANL-76-88(Pt.2))
- Macrodistribution of ^{226}Ra in the human skeleton as determined in vitro by gamma-ray spectrometry, 2245

- (ANL-76-88(Pt.2))
Radioactivity standards for the safe drinking water act of 1974, 2535 (DHEW/FDA-76-8026)
- RADIUM 226/RADIOECOLOGICAL CONCENTRATION**
Concentrations of radionuclides and selected stable elements in fruits and vegetables, 590 (CONF-770676-1)
- RADIUM 226/RADIONUCLIDE KINETICS**
Use of Gompertz's transformation in analysis of mortality data on mice contaminated with ^{226}Ra and ^{224}Ra , 3293 (INIS-mf-3231)
- RADIUM 226/RETENTION**
Retention and excretion of radium-226 and strontium-90 in two doubly contaminated persons, 1127
Retention and skeletal dosimetry of injected ^{226}Ra , ^{224}Ra , and ^{90}Sr in beagles, 1451
- RADIUM 226/RETENTION FUNCTIONS**
Long-term radium retention in contaminated dial painters, 75
- RADIUM 226/SAFETY STANDARDS**
Allowed health risk for plutonium and americium standards as compared with standards for penetrating radiation, 2295
Regulation of naturally occurring and accelerator-produced radioactive materials. A Task Force review, 172 (NUREG-0301)
- RADIUM 226/TISSUE DISTRIBUTION**
Current status of, and occurrence by site of osteosarcoma in beagles injected with radium-226, 2642 (COC-119-250)
Distribution of injected ^{226}Ra and ^{90}Sr in the beagle skeleton, 1737
Dosimetry of ^{239}Pu and ^{226}Ra in man and animals, 2274
Gross distribution of ^{226}Ra in man from external counting, 2354
Macrodistribution of ^{226}Ra in the skeleton of a radium dial painter, 2355
Malignancies in patients contaminated with radium (^{226}Ra), 2270
Microscopic distribution of ^{226}Ra in the bones of radium cases: a comparison between diffuse and average ^{226}Ra concentrations, 2356
- RADIUM 226/TOXICITY**
Chronic radium intoxication: clinical and autopsy findings in long-term New Jersey survivors, 3004
Toxicity of ^{90}Sr , ^{226}Ra and ^{239}Pu , 905
- RADIUM 228/BIOLOGICAL RADIATION EFFECTS**
Current census of the beagle colony (Clinical status of beagles following injection of ^{226}Ra , ^{239}Pu , ^{228}Ra , ^{228}Th , ^{90}Sr , or ^{241}Am), 1563 (COC-119-251)
Hazard plotting and estimates for the tumor rate and the tumor growth time for radiogenic osteosarcomas in man (^{226}Ra , ^{228}Ra), 2247 (ANL-76-88(Pt.2))
Mammary neoplasia in a closed beagle colony (^{90}Sr , ^{226}Ra , ^{228}Ra , ^{239}Pu , ^{228}Th), 2643 (COC-119-250)
Some similarities of radium and plutonium toxicity in the beagle and man (Extrapolation of ^{226}Ra , ^{228}Ra , and ^{239}Pu from dogs to man), 2273
Theory of the induction of bone cancer by alpha radiation: a summary, 2277
- RADIUM 228/MAXIMUM PERMISSIBLE INTAKE**
Method of evaluating the content of natural radioactive isotopes of the uranium and thorium family in drinking water and food, 3204 (ORNL-tr-4459)
- RADIUM 228/RADIATION HAZARDS**
Radioactivity standards for the safe drinking water act of 1974, 2939 (DHEW/FDA-76-8026)
- RADIUM 228/RADIATION MONITORING**
Radioactivity standards for the safe drinking water act of 1974, 2535 (DHEW/FDA-76-8026)
- RADIUM 228/RETENTION**
Retention and skeletal dosimetry of injected ^{226}Ra , ^{224}Ra , and ^{90}Sr in beagles, 1451
- RADIUM 228/TOXICITY**
Chronic radium intoxication: clinical and autopsy findings in long-term New Jersey survivors, 3004
- RADIUM ISOTOPES/DELAYED RADIATION EFFECTS**
Long-term effects of radium exposure in female dial workers: hematocrit and blood pressure, 2240 (ANL-76-88(Pt.2))
- RADON/ADSORPTION**
Advanced techniques for radon gas removal. Research report, 22 May 1973-15 Apr 1975, 2593 (PB-243898)
- RADON/AIR POLLUTION**
Assessment of radiological impact of the inactive uranium-mill tailings pile at Salt Lake City, Utah, 1858 (ORNL/TM-5251)
- RADON/BIOLOGICAL RADIATION EFFECTS**
Biological effects of radon on the lung, 3192 (CONF-730915-)
Biological effects of daily inhalation of radon and its short-lived daughters in experimental animals (Hamsters, rats, mice), 3201 (CONF-730915-)
Non-neoplastic pulmonary disease from inhaled radon daughters with uranium ore dust in beagle dogs, 237 (BNWL-2100(Pt.1))
- RADON/CARCINOGENESIS**
Lung cancer induced in rats by radon and its daughter nuclides at different concentrations, 2322
- RADON/CENTRIFUGATION**
Advanced techniques for radon gas removal. Research report, 22 May 1973-15 Apr 1975, 2593 (PB-243898)
- RADON/CHEMICAL REACTIONS**
Advanced techniques for radon gas removal. Research report, 22 May 1973-15 Apr 1975, 2593 (PB-243898)
- RADON/DAUGHTER PRODUCTS**
Concentrations of daughter-products of radon in premises of private or public establishments in the town of Ruse and the determination of the absorbed pulmonary doses, 1865
Non-neoplastic pulmonary disease from inhaled radon daughters with uranium ore dust in beagle dogs, 237 (BNWL-2100(Pt.1))
- RADON/DEPOSITION**
Deposition of radon daughters in the tracheobronchial tree, 1812 (BNWL-2000(Pt.1))
- RADON/DIFFUSION**
Prediction of increased gamma fields after application of a radon barrier on concrete surfaces (Covering uranium mine tailings), 1308
- RADON/ENVIRONMENTAL EFFECTS**
Overview of Federal agency radiation protection activities. I, 2776 (DHEW/FDA-76-8026)
- RADON/EXHALATION**
Variability in the exhalation rate of radon (^{226}Ra), 2244 (ANL-76-88(Pt.2))
- RADON/FILTRATION**
Advanced techniques for radon gas removal. Research report, 22 May 1973-15 Apr 1975, 2593 (PB-243898)
- RADON/HEALTH HAZARDS**
Environmental radiation and the lung (Pu, Ra, Rn), 3005
Proceedings of the 6th conference on radiation hygiene, 1973, 3171
Radiation protection in uranium mines: a review, 3155 (CONF-730915-)
Relation between cumulative exposure to radon-daughters, lung dose, and lung cancer risk, 3191 (CONF-730915-)
- RADON/INHALATION**
Biological effects of daily inhalation of radon and its short-lived daughters in experimental animals (Hamsters, rats, mice), 3201 (CONF-730915-)
Dose-rate studies of response to inhaled uranium mine air contaminants in rodents, 1801 (BNWL-2000(Pt.1))
Dosimetric studies of inhaled radon daughters in dogs, 1800 (BNWL-2000(Pt.1))
Experimental study of inhaled radioactive pollutants. I. Present data. II. Inventory of lesions. III. Validity of the animal model dose-effect relationships (Radon, ^{239}Pu , ^{241}Am , and ^{241}Cm), 3126 (LF-tr-111)
Isotopes of radon and its decay products in nature, 2723
- RADON/MAXIMUM PERMISSIBLE CONCENTRATION**
Isotopes of radon and its decay products in nature, 2723
- RADON/MAXIMUM PERMISSIBLE LEVEL**
Radon protection in uranium mines, 3196 (CONF-730915-)
- RADON/RADIATION HAZARDS**
Evaluation and control of radon daughter hazards in uranium mines, 3051
- RADON/RADIATION MONITORING**
Contribution of radon in natural gas to the dose from airborne radon-daughters in homes, 3166 (CONF-730915-)
Environmental radon, 3165 (CONF-730915-)
Personnel dosimetry of radon and radon-daughters, 3198 (CONF-730915-)
Radon protection in uranium mines, 3196 (CONF-730915-)
Review of the uranium miner experience in the United States, 3193 (CONF-730915-)
- RADON/RADIATION SOURCE IMPLANTS**
Radon in treatment of infiltrating carcinoma of urinary bladder, 2637
- RADON 220/DOSE EQUIVALENTS**
Internal radiation exposure by ^{222}Rn , ^{220}Rn and their short-lived daughter products, 3116
- RADON 220/EXHALATION**
Exhalation pattern of thoron following incorporation of ^{224}Ra , 810 (SAAS-204)
- RADON 220/INHALATION**
Dose calculations due to the inhalation of ^{222}Rn , ^{220}Rn and their daughters, 196
- RADON 222/BIOLOGICAL RADIATION EFFECTS**
Biological effects of the radioactive noble gases, 3190 (CONF-730915-)
Cytogenetic effects of internal alpha emitters on human lymphocytes, 2279
Evaluation and control of radon daughter hazards in uranium mines, 3007 (NIOSH-75-117)
Lesions and lung cancers induced in rats by inhaled radon 222 at various equilibria with radon daughters, 3054
- RADON 222/DAUGHTER PRODUCTS**
Evaluation and control of radon daughter hazards in uranium mines, 3007 (NIOSH-75-117)
- RADON 222/DECAY**
Further appraisal of dosimetry related to uranium mining health hazards, 3113
- RADON 222/DOSE EQUIVALENTS**
Internal radiation exposure by ^{222}Rn , ^{220}Rn and their short-lived daughter products, 3116
- RADON 222/HEALTH HAZARDS**
Radioactive pollution, 1091
Radiological health significance of radon in natural gas, 3194 (CONF-730915-)
Some radiological health aspects of radon-222 in liquefied petroleum gas, 3197 (CONF-730915-)

SEABROOK-1 REACTOR/CONTAINMENT BUILDINGS

Radiation exposures in reactor cavities, 1004 (DOCKET-50443-234)

SEABROOK-2 REACTOR/CONTAINMENT BUILDINGS

Radiation exposures in reactor cavities, 1004 (DOCKET-50443-234)

SEAFODD/CONTAMINATION

A comparative study of two methods of estimating human internal exposure hazards resulting from the ingestion of sea foodstuffs, 3200

SEALED SOURCES/LEAK TESTING

Experience with leak testing of sealed radiation sources, 267

SEALED SOURCES/REGULATIONS

Safety analysis of singly encapsulated ^{252}Cf medical sources, model ALC-PXC, 1726 (SRL-76003)

SEALED SOURCES/SAFETY

Safety analysis of singly encapsulated ^{252}Cf medical sources, model ALC-PXC, 1726 (SRL-76003)

SEBACEOUS GLANDS

See GLANDS
 SKIN

SEDIMENTS/CONTAMINATION

Environmental surveillance at Los Alamos during 1976, 272 (LA-6801-MS)

SEDIMENTS/RADIATION MONITORING

Environmental surveillance at Los Alamos during 1975, 1478 (LA-6321-MS)

Environmental surveillance at Los Alamos during 1976, 272 (LA-6801-MS)

SEDIMENTS/RADIOACTIVITY

Health and Safety Laboratory environmental quarterly,

June 1, 1976-September 1, 1976 (Fallout radionuclides in environment), 911 (HASL-308)

SEDIMENTS/RADIONUCLIDE MIGRATION
Effect of sediment displacement on the dispersal of radionuclides, 2726
Systems analysis model for calculating radionuclide transport between receiving waters and bottom sediments, 1872

SELENIUM 73/INTERNAL IRRADIATION
Metabolic and improved organ scan studies. IV. Dosimetry for metabolic isotopes in animals and man, 827 (COO-3521-6)

SELENIUM 75/CARCINOGENESIS
Mammalian biology group (Hazards of Pu, ^{210}Po , x radiation, ^{75}Se , ^{60}Co , ^{113}Sn , and ^{109}Cd), 1548 (LA-6313-FR)

SELENIUM 75/HEALTH HAZARDS
Mammalian biology group (Hazards of Pu, ^{210}Po , x radiation, ^{75}Se , ^{60}Co , ^{113}Sn , and ^{109}Cd), 1548 (LA-6313-FR)

SELENIUM 75/METABOLISM
Mammalian biology group (Hazards of Pu, ^{210}Po , x radiation, ^{75}Se , ^{60}Co , ^{113}Sn , and ^{109}Cd), 1548 (LA-6313-FR)

SELENIUM 75/RETENTION
Whole body retention following an intravenous injection of ^{75}Se as selenomethionine, 76

SELENIUM 75/UPTAKE
A study of quantitative scale display of the organ uptake with gamma-camera, 2611

SELENIUM COMPOUNDS/TISSUE DISTRIBUTION
Whole body retention following an intravenous injection of ^{75}Se as selenomethionine, 76

SEMICONDUCTOR DEVICES/PERFORMANCE TESTING
Preliminary evaluations of a high-purity germanium detector system for in vivo measurement of inhaled transuranium elements, 1120 (BNWL-2088)

SEQUOYAH-1 REACTOR/PERSONNEL
Radiation exposures in reactor cavities, 999 (DOCKET-50327-271)

SEQUOYAH-2 REACTOR/PERSONNEL
Radiation exposures in reactor cavities, 999 (DOCKET-50327-271)

SEROTONIN
See also MEXAMINE

SEROTONIN/METABOLISM
Effects of x-irradiation on steroid biotransformations by testicular tissue. Final report, May 1, 1966-July 31, 1976 (Rats), 1209 (COO-1602-60)

SEROTONIN/RADIOSENSITIVITY EFFECTS
Investigations about the effect of radioprotective substances after irradiation of mice with fast neutrons, 3099 (AED-Conf-74-736-000)
Role of direct protection of cells of the hematogenic system in the radioprotective action of certain biogenic amines on the animal organism (X radiation), 2747 (ERDA-tr-146)

SERUM (BLOOD)
See BLOOD SERUM

SEWAGE
See LIQUID WASTES

SEX/BIOLOGICAL EFFECTS
Osteosarcomagenic effect of plutonium-239 as a function of the age and sex of the animal, 2983 (ERDA-tr-151)

SEX/RADIOSENSITIVITY EFFECTS
Relationship of strain, sex, and body weight to survival following sublethal whole-body x-irradiation (Mice), 1436

SKELETON/BIOLOGICAL RADIATION EFFECTS

Action of local irradiation of bones on the alkaline phosphatase activity, 3184

Bone tumors induced by inhalation of $^{238}\text{PuO}_2$ in dogs, 2342

Dose rates, dose and time effects of ^{90}Sr + ^{90}Y and ^{226}Ra on beagle skeleton, 1446

Estimation of tumour risk at low dose from experimental results after incorporation of short-lived bone-seeking alpha emitters ^{22}Ra and ^{227}Th in mice, 2337

Experimental induction of bone tumors by short-lived bone-seeking radionuclides, 2343

Role of age and dosage of administered plutonium in onset of osteosarcoma in rats, 2333 (ERDA-tr-227)

Weakening of bone by osteolytic lesions in a radium case, 1729

SKELETON/BIOLOGICAL RADIOGRAPHY

Radiographic features of bone in several strains of laboratory mice and of their tumours induced by bone-

- seeking radionuclides, 890
- SKELETON/CARCINOGENESIS**
Estimated risk from ^{239}Pu to human bone, liver and lung, 2282
- SKELETON/CONGENITAL MALFORMATIONS**
Usefulness of anatomical variations on mouse fetus as a biological indicator of radiation effect, 547
- SKELETON/DELAYED RADIATION EFFECTS**
Bone sarcoma risks to man from ^{226}Ra , ^{228}Ra , and ^{239}Pu , 2299 (AED-Conf-76-430-114)
Case report of radiation necrosis of the hip, 2579
Case report of necrosis of the femoral head due to radiation therapy in infancy, 2674
Costal osteoradionecrosis as rare complication in conventional deep therapy of mamma carcinoma. Follow-up study of 1,000 patients, 306
Late effects of inhaled plutonium in dogs, 2962
Occurrence of hemangiosarcomas in beagles with internally deposited radionuclides, 2564
- SKELETON/NEOPLASMS**
Late effects of inhaled $^{239}\text{PuO}_2$ in beagles, 1798 (BNWL-2000(Pt.1))
- SKELETON/OSTEOSARCOMAS**
Current status of, and occurrence by site of osteosarcoma in beagles injected with radium-226, 2642 (CGC-119-250)
Radiotherapy-induced rib osteosarcoma after successful treatment of lung cancer, 31
- SKELETON/RADIATION DOSES**
Adult height and weight of female radium dial painters, with analysis of radiation effect on growth, 477
Estimated risk to human bone from ^{239}Pu , 2268
Local dosimetry and qualitative changes in ^{226}Ra - and ^{90}Sr - ^{90}Y -labeled beagle humeri, 1810
Long-term effects of inhaled uranyl nitrate in rats (^{232}U , ^{233}U), 251 (BNWL-2100(Pt.1))
Methodological approach to estimation of dose loads of osteotropic isotopes with due consideration of changes in metabolic parameters in the course of growth of the organism (^{133}Ba , ^{140}Ba , ^{45}Ca , and ^{90}Sr), 886 (ERDA-tr-250)
Problems in radiological protection involving alpha emitters in bone, 2237 (AED-Conf-76-430-004)
- SKELETON/RADIATION HAZARDS**
Hazards of plutonium with special reference to the skeleton, 1683

TECHNETIUM 99/BIOLOGICAL LOCALIZATION
Two unusual causes of peripatellar nonmetastatic
positive bone scans in patients with malignancies:
case reports, 1161

TECHNETIUM 99/DOSIMETRY
Evaluation and dosimetry of a sup(99m)Tc-Sn-MAA lung
imaging agent in humans, 1728
In vivo evaluation of standard man model dose
calculations using /sup 99m/Tc-sulfur colloid, 2019

TECHNETIUM 99/EXCRETION
Excretion of radioactivity in breast milk following
 ^{99}Tc /sup m/-Sn polyphosphate, 1558

TECHNETIUM 99/IMPURITIES
Long-lived radionuclide-impurities in eluates from
molybdenum-technetium generators and the associated
absorbed dose to the patient, 2619 (LURI-1975-03)

TECHNETIUM 99/INJECTION
Dose to the stomach wall from injected /sup 99m/Tc
pertechnetate (Radionuclide dose distribution in
patients), 968 (ORNL-5171)

TECHNETIUM 99/RADIATION DOSE DISTRIBUTIONS
Dosimetric considerations relative to radionuclides for
thyroid diagnosis and therapy (^{125}I , ^{123}I and /sup
99m/Tc compared with ^{131}I), 1885 (BNL-21313)

In-vivo evaluation of standard man model absorbed
fractions using /sup 99m/Tc-sulfur colloid (Radiation
dose distribution in patients following radionuclide
administration), 2265 (ORO-2401-87)

Mathematical descriptions of a one- and five-year old
child for use in dosimetry calculations, 1655 (ORNL/TM-
5293)

Radioisotope studies utilizing a low level whole body
counter and clinical applications of activation
analysis. Progress report (Nuclear medicine research
studies), 1454 (ORO-2401-94)

TECHNETIUM 99/RADIATION DOSES
Dose to the stomach wall from injected /sup 99m/Tc
pertechnetate, 2252 (CONF-76044-2)

Radiation exposure rates on syringe surfaces from
/sup 99m/Tc, 1341

TECHNETIUM 99/RADIATION MONITORING
Exposure of the hands to radiation in handling ^{99}Mo /sup
99m/Tc generators and /sup 99m/Tc solutions, 2281

TECHNETIUM 99/RADIONUCLIDE KINETICS
Dosimetry in radioisotope placemography, 951

Gamma camera imaging studies of regional radiation-
induced injury, 782 (LF-56)

Response of mouse foetus to radiation from Na sup(99m)
TcO₄, 2338

TECHNETIUM 99/REMOTE HANDLING
Shortlived radioisotopes used in hospitals, 1891

TECHNETIUM 99/SCINTISCANNING
Colour scintiscans in the diagnosis of hepatic tumors in
children, 3209

Dose to the metaphyseal growth complexes in children
undergoing /sup 99m/Tc-EHDP bone scans, 2

Influence of irradiation with ^{60}Co -gamma ray on rabbit's
submandibular gland. Using angiogram, sialogram and
RI, 474

Kinetic study of [^{131}I] iodide and [/sup 99m/Tc]
pertechnetate in thyroid carcinoma to explain a scan
discrepancy: case report, 93

Pharmacological and biokinetic values of sup(99m)Tc-
phosphorus complexes, 1884 (AED-Conf-76-168-001)

Radiation dose to humans from /sup 99m/Tc labeled
dihydrothioctic acid (DHTA), 1890

Radionuclide cystography in the investigation of
vesicoureteric reflux in children, 199

Renal scintiscanning with /sup 99m/Tc-iron ascorbate in
children, 3208

Scintigraphic abscess localization with sup(99m)Tc-
labelled leukocytes in comparison with ^{67}Ga -citrate,
277

Significant differences among the /sup 99m/Tc-
polyphosphates, /sup 99m/Tc-pyrophosphates, and /sup
99m/Tc-diphosphonates for bone imaging, 513

Technetium-99m-pyrophosphate bone scans in
hyperparathyroidism, 363

Thyroid cancer: delayed effects of head and neck
irradiation in children, 2476

TECHNETIUM 99/TISSUE DISTRIBUTION
Development and use of a fifteen year-old equivalent
mathematical phantom for internal dose calculations
(Radiation dose distributions from /sup 99m/Tc-labeled
compounds), 1371 (ORNL/TM-5278)

Dose to the stomach wall from injected /sup 99m/Tc
pertechnetate (Radionuclide dose distribution in
patients), 968 (ORNL-5171)

Dose to the metaphyseal growth complexes in children
undergoing /sup 99m/Tc-EHDP bone scans, 2

TECHNETIUM 99/UPTAKE
Factors affecting the uptake of /sup 99m/Tc-sulfur
colloid by the lung and kidney, 1223

Hepatic uptake of Tc-99m-labeled diphosphonate in
amyloidosis: case report, 34

Liver uptake of /sup 99m/Tc-diphosphonate, 1407

TEETH/RADIATION INJURIES
Tooth-germ damage by ionizing radiation, 673

TEETH/RADIOACTIVITY
Assay of strontium-90 in human permanent teeth in the
United Kingdom 1966 to 1971, 3047

Polonium-210 in human hair, bones and teeth, 2568
 Polonium-210 content in the hair, bone, and teeth of man, 2975
 Strontium-90 and cesium-137 content in man's teeth and hair, 2981
TEETH/STRONTIUM 90
⁹⁰Sr level in teeth of Slovak population and correlation with radioactive environmental contamination, 555

 Protection of mouse intestine against gamma irradiation by 2-mercaptoethanolglycine (MPG), 228
THIOPHOSPHORIC ACID ESTERS/RADIOSENSITIVITY EFFECTS
 Peculiarities of the toxicity and radioprotective activity of aminopropyl aminoethyl thiophosphate, 2179 (ERDA-tr-210)
THIOPHOSPHORIC ACID ESTERS/TOXICITY
 Peculiarities of the toxicity and radioprotective activity of aminopropyl aminoethyl thiophosphate, 2179 (ERDA-tr-210)
THIOUREA/RADIOSENSITIVITY EFFECTS
 Radioprotective properties of hypoxia after administration of antihypoxic agents (Mice, rats, dogs, gamma radiation), 665
THORAX
 See CHEST
THORIUM/ACTIVATION ANALYSIS
 Quantitative thorium determination in 30 organs during human thorotrastosis (Neutrons), 3219 (RFP-Trans-222)
THORIUM/RADIATION MONITORING
 Work of the Board's low-background laboratory, 318
THORIUM/SPATIAL DOSE DISTRIBUTIONS
 Doses to the cauda equina due to thorotrast myelography, 1215
THORIUM/TEMPORAL DOSE DISTRIBUTIONS
 Doses to the cauda equina due to thorotrast myelography, 1215
THORIUM 227/CARCINOGENESIS
 Experimental induction of bone tumors by short-lived bone-seeking radionuclides, 2343
THORIUM 227/DOSIMETRY
 Reports on the Neuberger long-term experiments with short-lived α -emitters. I. The dependence of late effects in mice on the temporal distribution of skeletal α -doses from ^{224}Ra and ^{227}Th , 2296 (AED-Conf-76-430-005)
THORIUM 227/MAXIMUM PERMISSIBLE INTAKE
 Method of evaluating the content of natural radioactive isotopes of the uranium and thorium family in drinking water and food, 3204 (ORNL-tr-4495)
THORIUM 228/BACKGROUND RADIATION
 Internal radiation exposure by ^{232}Th and ^{228}Th , 3139
THORIUM 228/BIOLOGICAL RADIATION EFFECTS
 Current census of the beagle colony (Clinical status of beagles following injection of ^{224}Ra , ^{239}Pu , ^{226}Ra , ^{228}Th , ^{90}Sr , or ^{241}Am), 1563 (COO-119-251)
 Findings in mice after repeated ^{228}Th administration, 3285 (INIS-mf-3331)
 Mammary neoplasia in a closed beagle colony (^{90}Sr , ^{226}Ra , ^{239}Pu , ^{228}Th), 2643 (COO-119-250)
THORIUM 228/MAXIMUM PERMISSIBLE INTAKE
 Method of evaluating the content of natural radioactive isotopes of the uranium and thorium family in drinking water and food, 3204 (ORNL-tr-4495)
THORIUM 228/RADIONUCLIDE KINETICS
 Findings in mice after repeated ^{228}Th administration, 3285 (INIS-mf-3331)
THORIUM 228/RETENTION
 Internal thorium contamination in thorotrast patients, 3203 (CS-INIS-13)
THORIUM 230/ENVIRONMENTAL TRANSPORT
 Assessment of radiological impact of the inactive uranium-mill tailings pile at Salt Lake City, Utah, 1858 (ORNL/TM-5251)
THORIUM 230/MAXIMUM PERMISSIBLE INTAKE
 Method of evaluating the content of natural radioactive isotopes of the uranium and thorium family in drinking water and food, 3204 (ORNL-tr-4499)
THORIUM 232/BACKGROUND RADIATION
 Internal radiation exposure by ^{232}Th and ^{228}Th , 3139
THORIUM 232/BIOLOGICAL RADIATION EFFECTS
 Cytogenetic effects of internal alpha emitters on human lymphocytes, 2279
THORIUM 232/MAXIMUM PERMISSIBLE INTAKE
 Method of evaluating the content of natural radioactive isotopes of the uranium and thorium family in drinking water and food, 3204 (ORNL-tr-4499)
THORIUM 232/RADIOECOLOGICAL CONCENTRATION
 Concentrations of radionuclides and selected stable elements in fruits and vegetables, 590 (CONF-770676-1)
THORIUM 232/RETENTION
 Internal thorium contamination in thorotrast patients, 3203 (CS-INIS-13)
THORIUM 234/MAXIMUM PERMISSIBLE INTAKE
 Method of evaluating the content of natural radioactive isotopes of the uranium and thorium family in drinking water and food, 3204 (ORNL-tr-4499)
THORIUM ISOTOPES/BIOLOGICAL RADIATION EFFECTS
 Chromosome aberrations in the peripheral lymphocytes of thorium workers with low body burdens of ^{212}Bi (Thorotrast, thorium), 2241 (ANL-76-88(Pt.2))
THORIUM ORES/MINING
 Permissible levels pertaining to radiation hazards in the mining and milling of uranium and thorium ores, 3235 (VZUPPR-P-2146/74)
THORIUM OXIDES
 See also THOROTRAST
THORIUM OXIDES/BIOLOGICAL EFFECTS
 Hematoma induced by thorium dioxide, 1483
THORON
 See RADON 220
THOROTRAST
 Autopsy case with malignant liver tumor caused by thorotrast, 2661
 Thorotrast injury in Japan. Statistical study on autopsy cases and follow-up study on 147 cases, 2591
THOROTRAST/BIOLOGICAL RADIATION EFFECTS
 Chromosome aberrations in the peripheral lymphocytes of thorium workers with low body burdens of ^{212}Bi (Thorotrast, thorium), 2241 (ANL-76-88(Pt.2))
THOROTRAST/CARCINOGENESIS
 Angiographic diagnosis of a carcinoma of the renal pelvis due to thorotrast, 1656
 Case of recurrent paralysis caused by extravasated thorotrast, 1098
THOROTRAST/DELAYED RADIATION EFFECTS
 Changes in blood coagulation and bone marrow due to thorotrast, 3120
 Fourteen-year remission of acute leukemia in a patient exposed to thorotrast, 1277
 History and actual state of study on thorotrast delayed injuries, 3022
 Hodgkin's disease following thorium dioxide angiography, 1012
 Injury due to thorotrast, 1794
 Thorotrastoma that caused dysphagia and dyspnea, 1376
THOROTRAST/HEALTH HAZARDS
 Internal thorium contamination in thorotrast patients, 3203 (CS-INIS-13)
THOROTRAST/SIDE EFFECTS
 Hematoma induced by thorium dioxide, 1483
THREE MILE ISLAND-1 REACTOR
 Inspection of emergency plan, radiological problems, radiation exposures, radioactive effluent releases, strikes, fires, and publicity, 903 (DOCKET-50289-734)
 Inspection of radiological protection and operations, 989 (DOCKET-50289-763)
 Inspection of radiation protection program, preparations for refueling, and corrective actions, 331 (DOCKET-50289-881)
THREE MILE ISLAND-1 REACTOR/PERSONNEL
 Radiation exposures in reactor cavities, 995 (DOCKET-50289-711)
THREE MILE ISLAND-1 REACTOR/REACTOR OPERATION
 1976 annual operating report, 419 (DOCKET-50289-856)
 Semiannual Operating Report, July-December 1975, 1591 (DOCKET-50289-591)
THREE MILE ISLAND-2 REACTOR
 Inspection of emergency plan, radiological problems, radiation exposures, radioactive effluent releases, strikes, fires, and publicity, 903 (DOCKET-50289-734)
THREE MILE ISLAND-2 REACTOR/ENVIRONMENTAL EFFECTS
 EPA's comments on draft environmental statement, 904 (DOCKET-50289-733)
THREE MILE ISLAND-2 REACTOR/RADIOACTIVE EFFLUENTS
 Evaluation to demonstrate compliance with 10 CFR 50, appendix I concerning activity levels of radioactive wastes, 1303 (DOCKET-50320-227)
THRESHOLD DOSE
 Cataract-inducing threshold dosage of fast neutrons (Rabbits), 671
THROMBOCYTES
 See BLOOD PLATELETS
THROMBOPOIESIS/BIOLOGICAL RADIATION EFFECTS
 Production, purification and assay of thrombopoietin. Progress report, August 1, 1975-July 31, 1976 (X radiation, ^{35}S), 2143 (ORO-4465-15)
THROMBOPOIESIS/MEASURING METHODS
 Production, purification and assay of thrombopoietin.

- Progress report, August 1, 1975-July 31, 1976 (X radiation, ^{131}I), 2143 (ORQ-4465-15)
- THROMBOSIS/RADIOINDUCTION
Erectile edema after treatment of mammary carcinoma. Significance of phlebography, 526
- THYMECTOMY/BIOLOGICAL EFFECTS
Late effects of selected immunosuppressants on immunocompetence, disease incidence, and mean life-span. II. Cell-mediated immune activity (Mice, X radiation), 2895
Late effects of selected immunosuppressants on immunocompetence, disease incidence, and mean life-span. III. Disease incidence and life expectancy (Mice, X radiation), 2896
- THYMINE/RADIOSENSITIVITY EFFECTS
Correlation between the relative amount of thymine clusters in the DNA of the organism and its radiosensitivity (Gamma radiation), 2207
- THYMOCYTES/BIOLOGICAL EFFECTS
Interference with antibody-feedback by irradiation, thymus cells, the allogeneic effect, and serum factors (Gamma radiation, mice), 2201
- THYMOCYTES/BIOLOGICAL RADIATION EFFECTS
Comparison of single-strand breaks in the DNA of rat thymocytes induced by irradiated histidine and γ rays, 365
Studies of erythroid inductive microenvironment in vitro (X radiation, mice, rats), 689
- THYMOCYTES/LEUKEMIA
Radiation-induced murine leukemia ERLD in cell culture, 918
- THYMOCYTES/RADIOSENSITIVITY
Analysis of the developmental stage of specific and nonspecific cytotoxicity. I. Separation of the developmental steps of specific cytotoxicity by susceptibility to irradiation (X Radiation, mice), 1163
- THYMUS/ANTIBODIES
Ontogeny of thymic independent antibody responses in vitro in normal mice and mice with an x-linked B cell defect, 4
- THYMUS/ECOLOGICAL EFFECTS
Effect of calf thymus extract on radiation-induced changes in lysosomal acid phosphatase activity in polymorphonuclears in mice (Gamma Radiation), 1902
- THYMUS/ECOLOGICAL RADIATION EFFECTS
Discussion of the combined effect of weightlessness and ionizing radiation on the mammalian body: morphological data (Gamma radiation, rats), 546
Effects of prolonged exposure to divided doses of radiation on levels and biosynthesis of nucleic acids in the rat thymus, 2180 (ERDA-tr-227)
Immunosuppression associated with radiation therapy, 660
Induction of lymphoma and associated xenotropic type C virus in C57L mice by whole-body irradiation (X radiation), 277
Systemic protection against radiation. II. Effect of protein and lipid constituents of diet (Rats, gamma radiation), 1435
- THYMUS/IRRADIATION
Thymic irradiation and chronic myelogenous leukemia, 9
- THYMUS/NEOPLASMS
Radiation leukemia in C57BL/6 mice. II. Lack of ecotropic virus expression in the majority of lymphomas, 719
- THYMUS CELLS/BIOLOGICAL RADIATION EFFECTS
Modifications of thymic blast cells during murine radioleukemogenesis, 675
- THYROGLOBULIN/DIAGNOSTIC TECHNIQUES
Plasma thyroglobulin in detecting thyroid carcinoma after childhood head and neck irradiation, 515
- THYROGLOBULIN/RADIOIMMUNOASSAY
Pathophysiologic effects of stable iodine used as a thyroidal blocking agent to reduce thyroid radiation exposure. Progress report, November 1, 1975-October 31, 1976 (^{125}I tracer technique), 1886 (COO-3173-16)
- THYROID/ECOLOGICAL RADIATION EFFECTS
Accumulation and elimination of strontium 85 in rats previously treated with iodine 131, 2987
Comparison of the carcinogenicity of ^{131}I and ^{125}I in the thyroid gland of the rat, 2302 (INIS-mf-3305)
Comparison of carcinogenicity of ^{131}I and ^{125}I in thyroid gland of the rat, 2331
Effect of pre-irradiation administered thyroidine on rat survival (X radiation), 3270 (INIS-mf-3331)
Effect of radiophosphorus on the developing endocrine glands of Swiss albino mice. I. A study on the thyroid gland, 1663
Morphological changes in the thyroid following low-dose childhood radiation, 531
Pathophysiologic effects of stable iodine used as a thyroidal blocking agent to reduce thyroid radiation exposure. Progress report, November 1, 1975-October 31, 1976 (^{125}I tracer technique), 1886 (COO-3173-16)
Radioisotope studies utilizing a low level whole body counter and clinical applications of activation analysis. Progress report (Nuclear medicine research studies), 1454 (CRQ-24C1-S4)
Reaction of endocrine glands to chronic intake of strontium-90, 2332 (ERDA-tr-227)
Studies in iodine metabolism. Progress report, April 1975- March 1976 (Rats, mice, cattle, ^{125}I , ^{131}I), 2305 (CRQ-1643-126)
Study of the physiological function and histological changes of thyroids irradiated with radioactive iodine.
- Progress report, October 1, 1975-September 30, 1976 (^{131}I , X radiation), 1289 (TID-27160)
Toxicology of radioactive iodine, 2336 (KFK-tr-483)

- Potential hazards of diagnostic radiation, 390
- Radiation risks with diagnostic x-rays, 220
- Teratogenicity of radiation, 755
- X RADIATION/DOSE LIMITS
- Safer X-rays, 1352
- X RADIATION/DOSE-RESPONSE RELATIONSHIPS
- Effect of graded doses of ionizing radiation on the human testis. Progress report, October 1, 1975-September 30, 1976, 1962 (RL0/2405-2)
- X RADIATION/DOSIMETRY
- Report of state and local radiological health programs. Annual report, 1973-1975, 1251 (PB-259947)
- X RADIATION/GENETIC RADIATION EFFECTS
- Frequency of prenatal x-ray examination and radiation risks in Japan, 1097
- Genetic damage to somatic and gametic cells of mice due to combined application of X radiation and chemical mutagen, 3262 (INIS-mf-3331)
- X RADIATION/GENETICALLY SIGNIFICANT DOSE
- Genetic effects of radiation (Extrapolation of mouse data to man), 2135 (CONF-760744-2)
- Gonad doses and genetically significant dose from diagnostic radiology, U.S., 1964 and 1970, 1506 (PB-254173)
- X RADIATION/HEALTH HAZARDS
- Benefit: risk comparisons in diagnostic radiology, 1883
- X RADIATION/LEUKEMOGENESIS
- Interaction between radiation and viruses in the induction of murine thymic lymphomas and lymphatic leukemias, 676
- Late effects of X-irradiation in patients treated for metropathia haemorrhagica, 1615
- Relative contribution of target cell disturbances and immunosuppression in radiation leukemogenesis: model

- studies with exogenous virus, 960
- X RADIATION/MAXIMUM PERMISSIBLE DOSE
- Safer X-rays, 1352
- X RADIATION/MEASURING METHODS
- Standard technique for estimating patient exposure from photofluorographic x-ray machines, 2621 (DHEW/FDA-75-8007)
- X RADIATION/MUTAGENESIS
- Potential hazards of diagnostic radiation, 390
- Relationship between caffeine sensitive and resistant DNA repair, cell lethality and mutagenesis in mammalian cells after x irradiation and alkylating agents, 426
- X RADIATION/RADIATION DOSE DISTRIBUTIONS
- Absorbed dose to mammary glands (Diagnostic radiography), 926 (ORNL-5171)
- Evaluation of the distribution of absorbed dose in pediatric phantoms exposed to diagnostic medical x rays, 928 (ORNL-5171)
- In-phantom spectrometry of medical x rays, 927 (ORNL-5171)
- X RADIATION/RADIATION DOSES
- Application of protons to computer tomography, 618 (LA-UR-77-2385)
- Organ doses in diagnostic radiology, 1412 (FDA-76-8030)
- Standard technique for estimating patient exposure from photofluorographic x-ray machines, 2621 (DHEW/FDA-75-8007)
- X RADIATION/RADIATION HAZARDS
- Influence of dose rate on carcinogenesis resulting from x-ray, /sup 113m/In, and ^{198}Au irradiation, 1162
- X RADIATION/RADIATION MONITORING
- X-ray emissions from colour television receivers in New Zealand, 2857
- X RADIATION/RADIOSENSITIVITY
- Chromosomal radiosensitivity and karyotype in mice using cultured peripheral blood lymphocytes, and comparison with this system in man, 397
- X RADIATION/RBE
- Connection between relative genetic effectiveness and linear energy transfer in analysis of chromosome aberrations in human lymphocytes, 2852
- X RADIATION/RESPONSE MODIFYING FACTORS
- Effect of pre-irradiation administered thyroedine on rat survival (X radiation), 3270 (INIS-mf-3331)
- X RADIATION/SHIELDING
- Shielding from X-radiation, 2993
- X RADIATION/SHIELDING MATERIALS
- Specific area gonad shielding. Recommendation for use on patients during medical diagnostic x-ray procedures, 1182 (FDA-76-8054)
- X RADIATION/TERATOGENESIS
- Teratogenicity of radiation, 755
- XENON 127/CLEARANCE
- Kinetics of total body retention and clearance of xenon and krypton after inhalation (^{127}Xe , ^{79}Kr , ^{85}Kr), 2346 (BNL-20909)
- XENON 127/INHALATION
- Kinetics of total body retention and clearance of xenon and krypton after inhalation (^{127}Xe , ^{79}Kr , ^{85}Kr), 2346 (BNL-20909)
- XENON 127/RETENTION
- Kinetics of total body retention and clearance of xenon and krypton after inhalation (^{127}Xe , ^{79}Kr , ^{85}Kr), 2346 (BNL-20909)
- XENON 133/BIOLOGICAL HALF-LIFE
- Kinetics and distribution of xenon-133 and krypton-85 in the human body, 3202 (CONF-730915-)
- XENON 133/BIOLOGICAL RADIATION EFFECTS
- Changes in the acid resistance of erythrocytes during general beta and gamma irradiation (Rats, ^{133}Xe), 1445
- XENON 133/DIAGNOSTIC TECHNIQUES
- Gamma camera imaging studies of regional radiation-induced injury, 782 (LF-56)
- XENON 133/DOSE COMMITMENTS
- Fifty year dose commitment to various organs and tissues from inhalation of ^{133}Xe , 2251 (CONF-760444-1)
- Fifty-year dose commitment to various organs and tissues from inhalation of ^{133}Xe , 974 (ORNL-5171)
- XENON 133/INHALATION
- Fifty year dose commitment to various organs and tissues from inhalation of ^{133}Xe , 2251 (CONF-760444-1)
- Fifty-year dose commitment to various organs and tissues from inhalation of ^{133}Xe , 974 (ORNL-5171)
- XENON 133/RADIATION MONITORING
- Environmental monitoring report for the Nevada Test Site and other test areas used for underground nuclear detonations, January-December 1975 (Gamma radiation, ^{133}Xe , ^{85}Kr , ^3H), 1477 (EMSL-LV-539-4)
- XENON 133/RADIONUCLIDE ADMINISTRATION
- Gamma camera imaging studies of regional radiation-induced injury, 782 (LF-56)
- XENON 133/TISSUE DISTRIBUTION
- Kinetics and distribution of xenon-133 and krypton-85 in the human body, 3202 (CONF-730915-)

Abbreviations Used in Availability Column

AT Liquid Metal Fast Breeder Reactor applied technology is available to domestic requesters within the United States from the Technical Information Center, P. O. Box 62, Oak Ridge, Tennessee 37830.

Information regarding subscription purchase will be sent on request.

Foreign requesters should address inquiries to the above address.

Dep. DOE reports so designated are maintained in the organizations listed on the inside front cover.

EM Inquiries regarding the availability of blue-line prints of DOE engineering drawings which were formerly available for sale by NTIS should be addressed to Technical Information Center, P. O. Box 62, Oak Ridge, Tennessee 37830.

GJO Available from DOE Grand Junction Office, P. O. Box 2567, Grand Junction, Colorado 81501.

GPO For sale by the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

LMEC Available *only to requesters within the United States* from the Liquid Metal Engineering Center, P. O. Box 1449, Canoga Park, California 91304.

NTIS For sale by the National Technical Information Service (NTIS), U. S. Department of Commerce, Springfield, Virginia 22161. Price given is the domestic price for paper copy; foreign purchasers add \$2.50 per report copy. Some recent NTIS availability statements will include pricing codes as opposed to prices. These codes are related to actual prices in the table below.

RSO Available *only to requesters within the United States* from the Reactor Standards Office, Oak Ridge National Laboratory, P. O. Box X, Oak Ridge, Tennessee 37830.

TIC Available from the Technical Information Center, P. O. Box 62, Oak Ridge, Tennessee 37830.

NTIS NORTH AMERICAN PRICE CODES

Issue 4

October 1977

Most NTIS products and services are now announced by price codes and, therefore, without specific prices in NTIS journals, newsletters and indexes.

The current dollar equivalent for each code is shown in the schedule below. Orders must list the accession number(s) and be accompanied by the total dollar amount from the current schedule.

ISSUE 4 prices will be valid through March 31, 1978. After that date, source clients who have not received the latest schedule may contact the Input Branch, 703-557-4690, for the next issue.

NORTH AMERICAN CONTINENT PRICE SCHEDULE

Customers in Canada, U.S., and Mexico please use this price schedule; other addressees write for Folder PR-360-4.
