PREFACE

The primary objective of the Hanford Environmental Dose Reconstruction (HEDR) Project is to estimate the radiation doses (with descriptions of the uncertainties inherent in such estimates) that people could have received as a result of emissions since 1944 from the U.S. Department of Energy's (DOE) Hanford Site near Richland, Washington. An independent Technical Steering Panel (TSP) directs the project which is conducted by Battelle Pacific Northwest Laboratories staff.

A secondary objective is to make Hanford-originated documents of potential interest and use available to the public through the U.S. Government's National Technical Information Service and the DOE Richland Field Office (RL) Public Reading Room, Richland, Washington.

The HEDR Project work is conducted under several technical and administrative tasks, among which is the Information Resources Task. This task identifies, searches for, retrieves, declassifies (if necessary) and makes available to HEDR staff and the public those documents essential to meet project needs. Project information needs center around 1) information necessary to estimate doses people may have received and 2) information requested by the public on operational and radioactive material releases. This letter report fulfills HEDR Project Milestone 1102A with the original title of Declassified, Prioritized Document List.

SUMMARY

The purpose of this letter report is to list the actions taken on historical documents that the Technical Steering Panel (TSP) and/or the public identified as being of potential use to the HEDR Project. The documents addressed herein were generated from 1944 through 1960 at the Hanford Site and were still listed as classified documents in 1990.

Of nearly 11,000 remaining classified documents produced from 1944 through 1960, 1429 were identified by the public and/or TSP as documents which an appropriately cleared TSP member should review to determine whether they contained useful information. The selection process for declassification was based on public interest (number of requests for a particular document) and HEDR Project needs as determined by the TSP. Those documents with two or more requests from the public and/or TSP are listed in Appendix A. Those with only one request are listed in Appendix B. Of the 1429 documents, the TSP reviewed 923 to determine their relevance to the HEDR Project and prioritized them accordingly for declassification. The rest of the 1429 documents (506) had in the meantime already been declassified and so were not reviewed.

This report lists the 1429 documents and their classification status. All TSP- and/or public-requested declassifications of Hanford historical documents generated from 1944-1960 have been completed. Of the 1429 documents, 1103 were declassified (492 as a result of TSP/public requests, 506 previously declassified, 105 declassified for other programs). The remaining 326 documents were not declassified because either they were determined by the TSP to be not applicable to the HEDR Project or because of the reasons given in the appendixes. Of the 1103 declassified documents, 506 have not been reviewed by the TSP for their pertinence to the HEDR Project. Figure 1 provides an overview of the declassification process.

* Restricted to these years by DOE at the time this project began

FIGURE 1. Declassification Process for Hanford Documents Applicable to HEDR

ACKNOWLEDGMENT

The author would like to acknowledge the efforts of S. D. Cannon, a communications specialist, who worked with the author to present a clear picture of a complex declassification process. We hope, especially, that her design of Figure 1 will help the reader follow the flow of the documents.

1.0 APPROACH

Originally most Hanford documents were classified. In order to meet Hanford Environmental Dose Reconstruction (HEDR) Project goals and inform the public, those classified documents pertaining to HEDR needed to be declassified. Beginning April 1990, Battelle Pacific Northwest Laboratories staff compiled and then submitted to the Technical Steering Panel (TSP) nearly 11,000 remaining classified Hanford document titles generated from 1944 through 1960. This document listing was limited by a DOE memorandum^(a) to those produced from 1944 through 1960. Declassifying a document is a slow process. Obviously all 11,000 documents could not be declassified simultaneously. A priority system was set up whereby those documents most pertinent to the HEDR Project and of most interest to the public were designated to be declassified first. Interest to the public was based on the number of requests by the public and/or TSP members per document. This first selection step resulted in two lists. The 367 documents in Appendix A were those requested more than once by the public and/or a TSP member. The 1062 documents in Appendix B were those requested only once.

For the second selection step, the TSP members with classified-document clearances reviewed these two lists of documents to determine those of most value to the HEDR Project and thereby those which should be declassified first. They reviewed 65% (923) of the total 1429 documents on the two lists and prioritized them for declassification. An "x/xx" in the "Useful"/"Not Useful" columns in Appendixes A and B denotes the TSP declassification determination for each document. An "x" is useful. An "xx" is very useful. The other 506 documents were not reviewed because they had already been declassified under a separate declassification process. Figure 1 shows an overview of the declassification process for Hanford historical documents.

Once prioritized, the HEDR document declassification process began. The result is 1103 declassified documents as shown on the two listings in Appendixes A and B. It should be noted that 12 documents designated by the

(a) Change Notice No. 2 to CG-PR-2, dated February 21, 1990, from A. Bryan Siebert, Director, Office of Classification, DOE-HQ, Washington, D.C.

TSP to be declassified were not declassified. These particular documents are identified in Appendixes A and B by a double asterisk (**) following the document number. The reasons for not declassifying are given in the column, "Classification Action." Also, some documents designated as not useful by the TSP were declassified anyway because they were extremely short and therefore could be quickly declassified. The 506 documents not reviewed by the TSP are denoted with a "T" in the "Decl" column and without an "x" or "xx" in either the "Useful" or "Not Useful" columns.

Tables 1 and 2 present a numerical breakdown of the actions taken on the 1429 documents. Those actions which could be performed by Battelle staff have been completed.

The declassified documents identified as useful to the HEDR Project are publicly available in the RL Public Reading Room in Richland, Washington. In addition, the documents have been sent to the DOE Office of Scientific and Technical Information (OSTI) in Oak Ridge, Tennessee, which in turn abstracts, indexes, and converts the documents' bibliographic information into databases that can be electronically searched on several commercial systems. The documents may also be purchased in microfiche or hard copy form from:

National Technical Information Service
U.S. Department of Commerce
5285 Port Royal Road
Springfield, VA 22161

TABLE 1. Number of Documents Requested More than Once by the Public and/or a TSP Member

Number of documents not declassified	94	
Number of documents deemed useful by TSP	224	} 367
Number of documents deemed NOT useful by TSP	131	
Number of documents not reviewed by TSP because they were previously declassified	12	

TABLE 2. Number of Documents Requested Only Once by the Public or a TSP Member

Total number of documents on list	1062
Number of documents declassified	830
Number of documents not declassified	232
Number of documents deemed useful by TSP	280
Number of documents deemed NOT useful by TSP	288
Number of documents not reviewed by TSP because they were previously declassified	494

2.0 CONCLUSIONS

All TSP- and/or public-requested declassifications of Hanford historical documents generated from 1944-1960 have been completed. The declassification action listings in this report may be used by the TSP as a basis for deciding whether additional documents need to be examined by cleared TSP staff or whether these completed actions are sufficient.

The listings in this report identify only the 1103 declassifications that resulted because of their relevance to the HEDR Project. Other documents not pertaining to HEDR have been declassified as well. The HEDR 1103 declassifications are over one fifth of the total of 4913 declassifications of Hanford historical documents made by Battelle staff between March 1987 and September 1992.

APPENDIX A

DOCUMENTS REQUESTED MORE THAN ONCE
BY THE PUBLIC AND/OR A TECHNICAL STEERING PANEL MEMBER
(Note: Total Appendix A pages are 46)

ANON	Anonymous, author not identified in database from which bibliographic information was taken
Box #	Document location, generally in the Records Holding Area, Building 712, Richland
CLASS LEVEL	Classification level, either Secret or Confidential
CONF	Confidential, a classification level
CRD	Confidential-Restricted Data
CUST	Custodian, corporate entity having custodial responsibility for the document
DECL	Declassified document either with or without deletions
DEL	Deletions, when following a document number indicates some deletions have been made by authorized staff
F	False or No
HC	Hard copy, full-size paper copy
MA	Microfilm copy, either 4-in. x 6-in. microfiche or 16-mm strip film
MULT REQ	Multiple request, requested by two or more members of the TSP and/or public
SRD	Secret-Restricted Data
T	True or Yes
WHC	Westinghouse Hanford Company
x	Document usefulness designation by TSP to determine need for declassification -- useful
xx	Document usefulness designation by TSP to determine need for declassification -- very useful
3760/300	Building number and area for the Hanford Technical Library
**	Documents for which Battelle staff do not have declassification authority or those which contain currently classified information

APPENDIX B

DOCUMENTS REQUESTED ONLY ONCE
BY THE PUBLIC OR A TECHNICAL STEERING PANEL MEMBER
(Note: Total Appendix B pages are 155)

ANON	Anonymous, author not identified in database from which bibliographic information was taken
Box #	Document location, generally in the Records Holding Area, Building 712, Richland
CLASS LEVEL	Classification level, either Secret or Confidential
CONF	Confidential, a classification level
CRD	Confidential-Restricted Data
CUST	Custodian, corporate entity having custodial responsibility for the document
DECL	Declassified document either with or without deletions
DEL	Deletions, when following a document number indicates some deletions have been made by authorized staff
F	False or No
HC	Hard copy, full-size paper copy
MA	Microfilm copy, either 4-in x 6-in microfiche or 16-mm strip film
MULT REQ	Multiple request, requested by two or more members of the TSP and/or public
SRD	Secret-Restricted Data
T	True or Yes
WHC	Westinghouse Hanford Company
x	Document usefulness designation by TSP to determine need for declassification -- useful
xx	Document usefulness designation by TSP to determine need for declassification -- very useful
3760/300	Building number and area for the Hanford Technical Library
**	Documents for which Battelle staff do not have declassification authority or those which contain currently classified information
