Table 3	Distribution by Land Category	3
Figure 1	Land Held by Uranium Industry	4
Index	Land Control by County and State	5

FOREWORD

The statistics set forth for the period covered in this report are based on data gathered from records available to the public. The county records of mining claim locations, reports of state and federal land offices, and commercial reporting services furnish the data for this report. Accordingly, if any fee land has been acquired in a private transaction not entered into a public record or report, that land transaction will not be accounted for in this report. Manpower is not available to survey, acquire, and evaluate data from each available source in each reporting period. Therefore, in any given report, the figures quoted for one or more land categories in a given state may be identical to the figures shown in earlier reports even though some changes probably have occurred. Such changes will be shown on subsequent reports. The figures used for acreage controlled at the beginning of the calendar year are those published for that date in "Statistical Data of the Uranium Industry" GJO-100 published and distributed by the Grand Junction Office of the Department of Energy.
