FOREWORD

Energy is a dynamic, innovative and challenging field, which encompasses everyone--users, producers, researchers and investors. Therefore, there is a growing public interest in energy. The private sector is deeply involved in energy and has responsibilities which parallel those of the Federal Government.

The public has shown a particular interest in the Department of Energy's procurement, contracting and financial assistance programs. Procurement systems reports involve extensive information on over 6,000 active prime contracts, grants, loan guarantees and agreements of several types, plus over 30,000 small purchase transactions.

In their quest for information, the public, Congress and DOE personnel experience the frustration of wending their way through bureaucratic mazes, countless people and phone numbers as well as letter and memo exchanges. Hopefully, this Compendium will eliminate some confusion and will serve the needs of most of the people who wonder what kind of procurement systems reports are available from the Department of Energy. Since our systems are undergoing continual enhancement, this publication will be revised periodically.

INTRODUCTION

This Compendium has three major sections.

Published Reports--This section includes computer-generated reports, which will be published annually with a cumulative monthly update. The annual reports will be published as of September 30, the end of the Federal Fiscal Year. Alongside each report is a summary of the report showing the data elements included in the report.

When available, these reports can be obtained from your nearest Energy Extension Service Office. A list of the Department of Energy's ten Energy Extension Service Offices is included in this publication.

Unpublished Reports--This section is comprised of available, computer-generated reports with a summary of each report and a listing of data elements included in the report. Unpublished reports are reformats or subsets of information available in the published reports and are generated on a limited basis for repetitive Departmental needs. They are available at \$0.10 per page. (No charge is made for requests of ten pages or less.)

Requests for unpublished reports should be addressed to:

Reports and Analysis Branch
Procurement Management Systems
and Analysis Division
Procurement and Contracts
Management Directorate
U.S. Department of Energy
Washington, D.C. 20545

Special Reports--Special report formats or subsets of this information can be obtained by writing to the same above address. In addition to the per page costs, setup and computer costs are also charged the requester.

One man is available part-time to fill all requests. Therefore, responses to requests for unpublished, available reports require two to three weeks for delivery. However, if special programming is necessary, delivery may take six weeks to three months.
