FOREWORD

This supplement replaces the list of Publications and Presentations in the Pacific Northwest Laboratory Annual Report for 1980 to the Assistant Secretary for Environment, PNL-3700 PT2, Ecological Sciences. The listings in the report as previously distributed to you were incomplete owing to changeovers in our bibliographic-tracking system. Subsequently, we brought our new, computerized bibliography system on-line and have since identified numerous inconsistencies and omissions from the publications and presentations listed in the Annual Report, which we were unable to correct before the earlier printing deadline.

Please note that a substantial number of publications and presentations arising from the previous DOE projects that are now transferred to EPA and other agencies are not listed here. They will be found listed in the Interagency/Contract Research Annual Report for 1980.

We regret these inconveniences.
