Introduction

Students, businessmen, historians, housewives, travellers, and many other people frequently seek information on the states of the United States. Questions on economic resources, tourist attractions, living conditions, and political and historical developments are often asked. This compilation has been prepared to guide the researcher to the proper sources of information on each state.

The best starting point for most research is the local public or school library. Any of the standard encyclopedias ("World Book Encyclopedia," "Encyclopedia Americana," "Collier's Encyclopedia") provide background information on the states. Bibliographies usually appear at the end of each article. Books can be located by checking under the name of the state in the card catalog. Periodical articles of interest can be found by using indexes such as "Readers' Guide to Periodical Literature" and "Public Affairs Information Service Bulletin."

This compilation is designed to provide a guide to further sources of detailed information on the states.

Historical Information

Books and articles on the history of the United States are numerous, and should be readily available in local libraries. Four major works serve as guides to many of these writings:

Adams, James Truslow. Dictionary of American history. New York, Charles Scribner's Sons, 1942. E174.A43

More than one thousand historians, representing a cross section of American historical scholarship, contributed to the writing of the encyclopedia. Admiral Byrd wrote the account of his Polar flights; General John Pershing wrote of the American Expeditionary Forces. The items are signed by the authors. Suggested further readings are listed at the end of each entry.

Harvard guide to American history. Edited by Oscar Handlin, Arthur Schlesinger, Samuel Morison, etc. Cambridge, Harvard University Press, 1954. Z1236.H27

A selective guide to books and articles published up to December 31, 1950.

U.S. Library of Congress. General Reference and Bibliography Division. A guide to the study of the United States of America; representative books reflecting the development of American life and thought. Prepared under direction of Roy P. Basler by Donald H. Mugridge and Blanche P. McCrum, Washington, D.C., Library of Congress, 1960. Z1215.U53

A bibliography of works on various aspects of American civilization. Contains 32 chapters, with such headings as: literature, religion, military, geography, economic life, etc. Long annotations accompany most citations. Supplements are now being prepared.

Writings on American history. Washington, National Historical Publications Commission. Annual. Z1236.L331

Designed to include every book and article having any considerable value for study and research in the history of the U.S. from primitive times to date. Divided into three main sections: historical profession, national history, regional, state, and local history.

Historical information on individual states and local communities can often be obtained by writing state historical societies. The "Directory of Historical Societies and Agencies in the United States and Canada" (published biennially by the American Association for State and Local History, Nashville, Tennessee) lists organizations that are working actively to preserve and disseminate knowledge about the past. The societies listed in this directory are non-profit and educational, and may be able to provide appropriate information. We have extracted the addresses of the major state historical agencies from this directory. Often, the major agencies can provide detailed information about other historical organizations in the area they serve; thus, information on the state, the county, or the city may be available.

Government and Politics

Information on state governments and politics can also be found in local public or college libraries. A prime source is the state manual, issued by each state, often called the "blue book." A typical manual contains the following: brief summary of state history, biographies of elected officials, list of members of the judiciary, description of state services, statistics on population and elections, and a copy of the state constitution. These manuals are issued periodically, usually by the Secretary of State.

In addition, the following sources should be useful:

America votes; a handbook of contemporary American election statistics. Compiled and edited by Richard M. Scammon. Washington, Governmental Affairs Institute. Biennial.

JK1967.A8

Arranged by state, this book gives voting statistics on presidential, gubernatorial, and congressional elections. Began in 1945.

Book of the states. Lexington, Ky., Council of State Governments. Biennial.

JK2403.B6

Provides information on the structures, working methods, financing, and functional activities of the state governments. Covers all three branches, and the services performed by them. Two supplements list state administrative officials and members of the legislature.

Fesler, James William. The 50 states and their local governments. New York, Knopf, 1967.

JK2408.F4

This book is a compilation of essays on the problems of the nation's state governments. Chapters cover such things as "personnel and money," "policy making," "legislators and governors," "judicial reform," and "elections and political parties." The book includes many tables, a bibliography arranged by state, and a comprehensive index.

Lockard, Duane. The politics of state and local governments.  
New York, Macmillan, 1969. JK2408.L6

This book focuses on the "political dynamics" of state and local governments. The author states that "my simple thesis is that there is an integral, necessary, and invariable relationship between the political process and the governmental process." He analyzes state and local governments in an age of change, and shows how modern developments have affected the political process.

-----The Pacific states of America. New York, W.W. Norton,

Peirce attempts to follow the lead of John Gunther's Inside U.S.A. by providing a "good and true account of the American condition." Subtitled "People, Politics and Power," each volume explores the economic, political and social conditions of the states covered. Peirce supplemented his research by personal visits and interviews with 1500 men and women representing all levels of society. Each volume contains maps and an extensive bibliography of books and articles for further study, along with a detailed index and list of interviewees. Projected volumes to complete the series will cover the Mid-Atlantic, New England, and Great Lake states.

Snider, Clyde F. American state and local government. New  
York, Appleton-Century-Crofts, 1965. JK2408.S6

Discusses what the states do for the people.  
Bibliographies follow each chapter.

Zimmerman, Joseph F. Subnational politics: readings in state  
and local government. New York, Holt, Rinehart and Winston,  
1970. JK2408.Z48 1970

Contemporary problems of state governments are explored in this collection of essays. Harry Scheiber writes about "creative federalism," Floyd McKissick describes educational problems, and David Peck inquires into the question "do juries delay justice?" The readings are meant to supplement standard textbooks on state and local governments.

Tourist Attractions

There are many publications available which will enable a person to plan a successful tour of the United States. Road maps, atlases, and tour guidebooks can be found in most libraries. #### Economic and Statistical Sources

Finding information on the economic resources of the states can be done in many ways. First, the state Department of Commerce can often provide the necessary information. Secondly, this information frequently appears in articles in such magazines as Fortune and Business Week; the Wall Street Journal and the New York Times feature articles on various aspects of state economies. In addition, the state itself publishes material which would be useful. Items such as

the budget, annual report of the governor, and reports on industries in the state often appear as "state documents." The Monthly Checklist of State Publications (published by the Library of Congress, Washington, D.C.) indexes these items and the researcher should try to obtain this checklist at a local library.

Other prime sources of information are the city directories, published by R.L. Polk, Detroit, Michigan. These publications usually contain a directory of business concerns and private citizens, a buyer's guide, and an introduction to the city (climate, churches, recreational facilities, population, airports, industry, etc.).

The following works may also be useful:

Statistics sources. Rev. 3d ed. Detroit, Gale Research, 1971.  
Z7551.S84 1971

This book is a "subject guide to data on industrial, business, social, educational, financial, and other topics for the United States and selected foreign countries." The 1971 edition was edited by Paul Wasserman, Eleanor Allen, and Charlotte Georgi. The book is designed basically to identify primary sources of statistical data but the compilation also offers secondary sources. Emphasis is on U.S. publications, and on national rather than local sources.

U.S. Bureau of the Census. Statistical abstract of the United States. Washington, Government Printing Office. Annual.  
HA202

Published annually since 1878, this is the standard summary of statistics on the social, political, and economic organization of the U.S. Appendix III contains an excellent guide to other statistical sources. The supplements to this book are also useful: "County and City Data Book," "Pocket Data Book USA," "Historical Statistics of the U.S. from Colonial Times to 1957," "Directory of Federal Statistics for States," "Directory of Federal Statistics for Local Areas."

World almanac. New York, Newspaper Enterprise Association,  
Annual editions. AY67.N5W7

A special section on the states covers their "resources,  
history, industries, agricultural and mineral products,  
tourist attractions, nicknames, and state symbols."  
Another section gives population figures.
