SELECTED FEDERAL EXPENDITURES, SELECTED PROCUREMENT ACTIONS,
AND FEDERAL TAX COLLECTIONS BY STATE, FISCAL YEAR 1970

This tabulation provides certain statistics on a State basis for Federal expenditures, Federal procurement actions, and Federal revenues for fiscal year 1970, except for Federal wage and salary disbursements which are reported for the calendar year 1969. Data are limited to information which is readily available on a State basis. The data are taken from reports of the Treasury Department, the Department of Commerce, the Department of Defense, the Department of Health, Education and Welfare, the Atomic Energy Commission, the National Aeronautics and Space Administration, the Veterans Administration, and the General Services Administration.

Part A of the report contains selected Federal expenditures. These are limited to the following. The first column gives the total of Federal grants-in-aid payments to State and local governments (a total of 98 grant categories). Federal aid payments to the States are more limited than in earlier years since data for Federal aid payments to individuals and private institutions within the State are no longer published by the Treasury Department.

The second and third columns list Federal wage and salary disbursements (both civilian and military) which are reported for the calendar year 1969. These are estimated in part and are prepared by the

Department of Commerce, and printed in its income statistics in the Survey of Current Business.

The Old Age, Survivors, Disability and Health Insurance Benefit Payments which are reported in the Social Security Bulletin are next.

Column 5 lists the veterans' compensation, pensions and other benefits. These do not include those veterans' programs which are included under Federal aid payments to the States.

Procurement actions by selected Federal agencies are contained in Part B of the tabulation. Included in this section are costs incurred by the Atomic Energy Commission. Allocations of these costs are made in accordance with the physical location of contractors and Atomic Energy Commission offices but do not necessarily represent funds spent in these locations.

Also included is a list of General Services Administration procurements which represent actual purchases made by the Federal Supply Service and do not include orders placed by other Federal agencies against Federal Supply Schedule contracts awarded by the Federal Supply Service.

Data for the military prime contract awards are next. These refer only to contracts of \$10,000 or more and do not reflect the distribution of a very substantial amount of materiel and component fabrication and other subcontract work that may have been done outside of the State where final assembly took place.

The National Aeronautics and Space Administration prime contract awards are listed last. These include direct Research and Development Awards of \$10,000 and over and other direct awards of \$25,000 and over. The categorization of NASA procurements by State is based on the location where the items are to be produced or supplied from stock, where the services will be performed; or with respect to construction contracts, the construction site.

The contract awards are not necessarily completely expended in the year awarded and in a few cases may not be expended at all.

Finally, the Internal Revenue Service collections and refunds by State are contained in Part C. Aggregate totals for collections, refunds, and net collections are also included. The Internal Revenue receipts in the various States do not indicate the Federal tax burden of each since, in many instances, taxes are collected in one State from residents of another State. For example, withholding taxes reported by employers located near State lines may include substantial amounts withheld from salaries of employees who reside in neighboring States. A further weakness is that tax collections for the District of Columbia are included in the total for the State of Maryland.

Because tax data do not reflect the actual tax burden borne by the residents of a particular State and because of the incomplete nature of the Federal expenditure data as well as certain imperfections in the data presented (e.g., Federal wage and salary disbursements are estimated), any comparison of tax collections from a State to Federal expenditure payments received by a State in order to determine a State's relative position is tenuous.

FOOTNOTES

- * Asterisk denotes amount less than \$500 thousand.
- a/ This tabulation does not include all Federal programs carried on in the several States but is limited to those activities for which reasonably comparable information is readily available on a State basis.
- b/ Represents Federal grants-in-aid payments to State and local units of government. These Federal aids consist of grants-in-aid and shared revenues. The value of aids in kind, e.g., transfers of commodities, as well as money distribution are included. Data are less inclusive than in prior years. Sources: U.S. Treasury Department. Federal aid to States, Fiscal Year 1970.
- c/ Data are for the calendar year 1969. Source: U.S. Department of Commerce. Survey of current business. August 1970.
- d/ Source: U.S. Department of Health, Education and Welfare. Social security bulletin. December 1970.
- e/ Excludes those veterans' programs which are included under Federal aid payments to States, e.g., automobiles, etc. for disabled veterans, readjustment benefits and vocational rehabilitation, etc. Source: U.S. Veterans' Administration. Annual Report: Administrator of Veterans' Affairs, 1970. Washington, U.S. Government Printing Office, 1970.
- f/ Columns do not necessarily add to total because of rounding.
- g/ Allocations of costs are made in accordance with the physical location of contractors and AEC offices but do not necessarily represent funds spent in these locations. Source: Atomic Energy Commission, 1970 Financial Report.
- h/ Includes Pacific testing area.
- i/ These procurements represent actual purchases made by the Federal Supply Service and do not include orders placed by other Federal agencies against Federal Supply Schedule contracts awarded by the Federal Supply Service. Source: General Services Administration, Washington, D. C. 20540.
- j/ Data refer only to prime contract awards of \$10,000 or more and in no way reflect the distribution of a very substantial amount of materiel and component fabrication and other subcontract work that may have been done outside of the State where final assembly or delivery took place. The figures represent awards made during the year; actual expenditures under these contracts often extend over several years. Source: U.S. Department of Defense. Office of the Secretary of Defense. Military prime contract awards by State. Release of March 1970.

k/ Includes NASA's direct R and D awards of \$10,000 and over and other direct awards of \$25,000 and over. The allocation of NASA procurements by State is based on the location where the items are to be produced or supplied from stock, where the services will be performed; or with respect to construction contracts, the construction site. Source: National Aeronautics and Space Administration, Annual Procurement Report, Fiscal Year 1970, NASA headquarters, Washington, D. C. 20546.

l/ Internal Revenue Service receipts in the various States do not indicate the Federal tax burden of each since, in many instances, taxes are collected in one State from residents of another State. For example, withholding taxes reported by employers located near State lines may include substantial amounts withheld from salaries of employees who reside in neighboring States.

Because tax data do not reflect the actual tax burden borne by the residents of a particular State and because of the incomplete nature of the Federal expenditure data as well as certain imperfections in the data presented (e.g., Federal wage and salary disbursements data are estimated), any comparison of tax collections from a State to Federal expenditure payments received by a State in order to determine a State's relative position is tenuous. Source: U.S. Treasury Department. Annual report of the Commissioner of the Internal Revenue; Fiscal Year 1970.

m/ Tax collections for the District of Columbia are included in the total for the State of Maryland.
