DIRECTORY OF SMALL BUSINESS PROGRAM MANAGERS 57

FORECAST OF CONTRACTING AND SUBCONTRACTING OPPORTUNITIES

INTRO

Welcome to the U.S. Department of Energy's Forecast of Contracting and Subcontracting Opportunities. This forecast, which is published pursuant to Public Law 100-656, "Business Opportunity Development Reform Act of 1988," is intended to inform small business concerns, including those owned and controlled by socially and economically disadvantaged individuals, and women-owned small business concerns, of the anticipated fiscal year 1995 contracting and subcontracting opportunities with the Department of Energy and its management and operating contractors and environmental restoration and waste management contractors. This document will provide the small business contractor with advance notice of the Department's procurement plans as they pertain to small, small disadvantaged and women-owned small business concerns.

Opportunities contained in the forecast support the mission of the Department, to serve as advocate for the nation's energy production, regulation, demonstration, conservation, reserve maintenance, nuclear weapons and defense research, development and testing, when it is a national priority. The Department's responsibilities include long-term, high-risk research and development of energy technology, the marketing of Federal power, and maintenance of a central energy data collection and analysis program. A key mission for the Department is to identify and reduce risks, as well as manage waste at more than 100 sites in 34 states and territories, where nuclear energy or weapons research and production resulted in radioactive, hazardous, and mixed waste contamination. Each fiscal year, the Department establishes contracting goals to increase contracts to small business concerns and meet our mission objectives.

HOW TO USE THE PRELIMINARY FORECAST

The Forecast has four sections: 1) Procurement Opportunities by Standard Industrial Classification (SIC) Code; 2) Prime Contracting Opportunities with Headquarters and Field Offices; 3) Subcontracting Opportunities with Management and Operating Contractors and Environmental Restoration and Waste Management Contractors; and the 4) Directory of Small Business Program Managers. In the first section, procurement opportunities are arranged numerically by SIC code for the convenience of the small business concern. Prime contracting opportunities are those anticipated contracts which will be awarded by a departmental (Federal Government) office. Subcontracting opportunities represent anticipated contracts which will be awarded by a major departmental contractor—a management and operating contractor, referred to as M&O, or an environmental restoration management contractor (ERMC). A substantial amount of DOE's funds is awarded by its M&Os. As such, inclusion of M&O and ERMC subcontracting opportunities in this forecast presents a more comprehensive display of business opportunities with the Department.

Opportunities contained in the forecast are organized by office or facility. Each entry contains the following information about the opportunity:

Office: name of the departmental office initiating the procurement.

Procurement Method: one of several procurement methods available to small, small disadvantaged and women-owned small business contractors. A listing of procurement methods can be found in the section entitled "New Features."

SIC Description: Industry description listed in the Standard Industrial Classification Manual. Some descriptions may contain the abbreviation "N.E.C." which means "Not Elsewhere Classified."

Description of Work: a brief description of the service or product being procured.

Dollar Range Minimum/Maximum: estimated dollar range of the procurement, which generally is based on past procurement records and/or current cost data. Since it is a projection, it is subject to revision.

M&O/ERMC: name of the M&O or ERMC contractor initiating the subcontracting opportunity.

Contact: name of a point of contact is provided for discussion about a particular contracting or subcontracting opportunity.

Address and telephone number: address and telephone number for the point of contact.

Quarter Firm Identified: This number refers to the Federal Government's fiscal year quarters. (The Federal Government fiscal year begins October 1.) Quarter Firm Identified pertains only to noncompetitive procurement methods. This category informs the prospective contractor of the quarter the Department will begin identifying firms technically capable of performing the work.

Quarter PR Issued: This category also refers to the Federal Government's fiscal year quarter in which the Department will issue the procurement request (PR). Such information should be helpful to small firms seeking competitive procurements which are set aside for small businesses, as it provides a time frame for requesting a copy of the solicitation or for perusing the *Commerce Business Daily*.

SIC: The SIC code is the industry designation proposed by the program or contracting office, or the Small Business Administration (SBA). It is a statistical classification, compiled by the Office of Management and Budget, which defines industries in accordance with the composition and structure of the economy. Each SIC code has a corresponding small business size standard.

Agencies also use SIC codes to determine the eligibility of firms to be considered for procurements set-aside exclusively for small businesses. Inclusion of SICs in this publication is intended to be helpful to small business concerns, particularly 8(a) firms as they are restricted to performing work in specific SIC codes. However, small business concerns are advised that the SIC codes contained in this forecast are proposed and may not represent the final SIC determination. Final SIC determinations are made by the contracting officer, and in the case of an 8(a) procurement, by the contracting officer and the SBA.

Additional Information

For additional copies of the Forecast, locations of departmental offices and M&O and ERM contractors, as well as additional information on the Department's small business programs, contact the:

**Office of Small and Disadvantaged Business Utilization (ED-3)
Department of Energy
Washington, DC 20585
(202) 254-5583**

NEW FEATURES

Electronic Bulletin Board

The fiscal year 1995 Forecast is available via an on-line information data base, the Minority Energy Information Clearinghouse Bulletin System (MIBBS). Firms interested in accessing the data base can do so by dialing (800) 543-2325, or (202) 586-1561 in the Washington, DC metropolitan area. Other requirements are a PC compatible software package, e.g., PRO COMM PLUS and a modem. Contractors needing assistance in accessing and downloading the bulletin board should contact the Department at (202) 586-7898 or contact the Office of Small and Disadvantaged Business Utilization.

New Methods for Procuring from Small Disadvantaged and Women-owned Small Businesses

The fiscal year 1995 Forecast offers small disadvantaged and women-owned small business concerns several procurement methods by which contracts may be awarded. Procurement opportunities utilizing the following methods may be proposed in the forecast.

- Section 8(a) set-aside
- Small business set-aside
- Small disadvantaged business set-aside (M&Os and ERMcs only)
- Small disadvantaged/women-owned small business set-aside (competitive-M&Os and ERMcs only)
- 8(a) Pilot Program set-aside (noncompetitive-M&Os and ERMcs only)
- EPACT small disadvantaged business procurement (in accordance with the National Energy Policy Act of 1992; 10 percent to be awarded to small disadvantaged businesses, women-owned small businesses, Historically Black Colleges and Universities, and colleges and universities with 20 percent or more Hispanic or Native American student population.
