Preface

This is the seventeenth edition of the *Directory of Energy Data Collection Forms*, an authoritative listing of selected public use forms currently used as basic energy information gathering tools by the Department of Energy (DOE). Originally entitled *EIA Data Collection Forms*, this directory provides an overview of DOE's energy information collection programs for decisionmakers in Government and industry.

All DOE forms designed to collect energy information and used by the Energy Information Administration (EIA) that had Office of Management and Budget (OMB) approval on October 1, 1993, are in this directory. Form EIA-868 is also included, but does not require OMB approval since there are less than 10 respondents.

For each form listed in this directory, an abstract is included that describes the form's uses, its respondents, and the data collected. Also shown are certain frequently requested items of information. These items include

the general energy source(s) and function(s) covered by the form; the general categories of respondents; the frequency of collection; the public laws and, if applicable, regulations associated with the collection; the requirement for reporting; the name and phone number of the data collection manager; and the publications resulting from the data collection.

For the reader's convenience in finding specific types of collections, several indices have been provided in this directory. A listing of the forms grouped by energy source and function begins on page 27. Beginning on page 37 are the publications derived from the collections, and on page 49, are the forms linked to general respondent categories. Former form number designations appear on page 57. Titles of legal citations referred to in this directory can be found on page 65.

Additional information about these and other DOE forms is maintained by EIA's Standards and Services Division.
