List of Currently Classified Documents Relative to Hanford Production
Facilities Operations Originated on the Hanford Site
Between 1961-1972

DE93 012621

PREFACE

The United States Department of Energy (DOE) has declared that all Hanford plutonium production- and operations-related information generated between 1944 and 1972 is declassified. Any documents found and deemed useful for meeting Hanford Environmental Dose Reconstruction (HEDR) objectives may be declassified with or without deletions in accordance with DOE guidance by Authorized Derivative Declassifiers.

The September 1992, letter report, Declassifications Requested by the Technical Steering Panel of Hanford Documents Produced 1944-1960, (PNWD-2024 HEDR UC-707), provides an important milestone toward achieving a complete listing of documents that may be useful to the HEDR Project. The 1429 entries listed in the report identify the documents as prioritized for eventual declassification (completed in FY 1992) by the Technical Steering Panel (TSP) and the public.

The attached listing of approximately 7,000 currently classified Hanford-originated documents relative to Hanford Production Facilities Operations between 1961 and 1972 fulfills TSP Directive 89-3.

It should be noted that this list does not include such titles as the Irradiation Processing Department, Chemical Processing Department, and Hanford Laboratory Operations monthly reports generated after 1960 which have been previously declassified with minor deletions and made publicly available. Also note that Kaiser Engineers Hanford (KEH) Document Control determined that no KEH documents generated between January 1, 1961 and December 31, 1972 are currently classified. Additionally, titles which address work for others have not been included because Hanford Site contractors currently having custodial responsibility for these documents do not have the authority to determine whether other than their own staff have on file an appropriate need-to-know. Furthermore, these documents do not normally contain information relative to Hanford Site operations.

Elemental Symbols

When Douglas-United Nuclear (DUN) staff entered titles into its data base, those elemental symbols which consisted of upper- and lower-case letters (e.g., Plutonium = Pu, Promethium = Pm, Polonium = Po, Neptunium = Np, Nickel = Ni, Niobium = Nb, etc.) did not retain the lower-case letter and upon printing recorded only a space.

For example, it is not immediately clear what "P_" refers to in the document listing DUN-2336 "P Formation, Uranium Credits Burnout and Burnout Costs." It potentially could refer to Pu, Pm, Po, etc. However, DUN-1852 "P -238 Production Demonstration", most likely would denote "Pu" since only Pu has an isotopic of 238.

It was determined that an effort to identify the titles in question, pull and review the documents, and correct the symbol for each entry was not cost effective and outside the scope of this directive.

It should also be noted that "PT" does not normally refer to Platinum. References to "PT" in document titles and text more often refers to "Production Test".

Numbering System

This title listing was designed to consider only classified documents beginning January 1, 1961. There are some exceptions, however. Some titles may be dated in 1960 or earlier. The collection of "HW" documents for which Pacific Northwest Laboratory has custodial responsibility was not available in machine readable form when the initial listing of documents covering the years 1944-1960 was prepared. At that time, HW-68000 was chosen as the cut-off document. Most "HW" numbers greater than 68000 are dated in 1961 and later. However some exceptions were observed when preparing this listing (e.g., HW-69074RD "Control of Radio-Iodine Emissions from the Separations Plants" is dated December 19, 1960.) Note that this document was once classified, but has been publicly available for a number of years.

HANFORD SITE ORIGINATED DOCUMENT NUMBER PREFIXES

This list includes some of the more frequently used document prefixes during the 1961 through 1972 period. The prefixes are followed by their general descriptions, dates of origination and usage.

1. ARH
Atlantic Richfield Hanford - Prime contractor for fuel reprocessing and waste management. Approximately 1968 to June, 1977.
2. BN
Battelle Northwest - 1965 to present.
3. BNWL
Battelle Northwest Laboratory - This series began in 1965 and was continuous to about document number 2260, when in late 1977 the prefix "PNL" was assigned for 1830 contract reports.
4. DUN
Douglas-United Nuclear - Prime contractor for operation of 100 Area production reactors. This prefix was changed to UNI (United Nuclear [Inc. or Industries]) when McDonnell-Douglas relinquished its portion of the contract in 1973. United Nuclear's contract was terminated June 28, 1987.
5. FTS
Formerly Top Secret - FTS documents were later downgraded to Secret in the 1960s and 1970s.
6. HAN
This accession number series was used by the Atomic Energy Commission, Richland Office (also known as HOO, Hanford Operations Office) on all documents which were incoming to them and those which they originated.
7. HW
This series began with HW-7000 in July, 1947 and continued through the General Electric regime. It ceased in 1964 with HWs in the 89000s. All correspondence, memos and formal reports issued by the General Electric Company while at Hanford were assigned an HW document number whether classified or unclassified. Some of the very early numbers had the HEW prefix (Hanford Energy Works).
8. ISO
Isochem - This series began in late 1965 and was terminated in 1967. Isochem was a marriage between U.S. Rubber and Martin Marietta and was the prime contractor for fuel reprocessing and waste management. They were succeeded by Atlantic Richfield Hanford Company. Isochem was the first operator of the 200 Areas after the General Electric departure.
9. RL
This alpha prefix followed by the initials of an operations component e.g. SAS (Safeguards and Security) has been used by DOE-RL since 1968 or 1969. It follows the HAN series and is an accession number used for both incoming and RL originated documents, primarily classified.
10. RL-GEN
The GENs were "general" to site operations and were used in 1964 to 1965.
11. RL-NRD
The NRDs were used for documents that related to the N Reactor from 1964 until General Electric turned the reactor over to Douglas-United Nuclear in 1967.
12. RL-REA
The REAs were used for documents relating to the reactors other than N Reactor that were originated in 1964 to 1965. The REAs were followed by DUNs.
13. RL-SEP
The SEPs were used for documents relating to the separations activities which were originated in 1964 to 1965. The SEPs were followed by ISOs.

DOC. NO.	TITLE	AUTHOR	LEVEL	PGS	DATE
HW-79706	DEVELOPMENT STATUS AND INCENTIVES FOR THE HOT DIE SIZING PROCESS	BLANTON WA	SRD	43	11/20/63
HW-79710	E-N PRODUCTION COSTS INTERIM REPORT	LANG LW	SRD	10	11/20/63
HW-79715	COST BUDGET REPORT OCTOBER 1963	RA CONNELL	CONF		11/21/63
HW-79718	ANALYSIS OF E-N TARGET CONVERSION DATA	CARTER RD	SRD	3	11/21/63
HW-79734	LONG-TERM NEUTRON ACTIVATION PRODUCTS OF NICKEL-58	MORGAN WC	SRD	9	12/11/63
HW-79745	A-LINE PRODUCT CHARACTERISTICS OCTOBER 1963	AE SMITH	SRD		11/26/63
HW-79752	COMPARATIVE REACTOR FLUX SPECTRA	GUMPRECHT RO	SRD	10	11/27/63
HW-79756	REDUCTIONS IN BUMPER FUEL USAGE	SPENCER HG	SRD	13	11/27/63
HW-79758	FABRICATION PROCESS TEST EVALUATION	WALKER CM	SRD	8	11/27/63
	REMOVAL INTERMETALLIC COMPOUNDS DURING INGOTING				
HW-79759	U233 FABRICATION	GILL SM	SRD	3	12/06/63
HW-79775	PRODUCTION TEST IP-584-D, SUPPLEMENT A, IRRADIATION OF TARGET ASSEMBLIES IN THE KER LOOPS	KNIGHT JT	SRD	9	12/05/63
HW-79797	PITA IP-22, SUP III DEMONSTRATION LOAD	CONNER EL, JR.	SRD	7	12/03/63
HW-79801	PROGRESS REPORT - WEAPONS PROCESS ENG - NOVEMBER 1963	AE SMITH	SRD		12/04/63
HW-79808	PRODUCTION TEST IP-638-D, OPERATION OF KER-1, -2, -3, AND -4 SIMULATING N REACTOR CONDITIONS	NEIDNER R	CRD	6	12/05/63
HW-79813	DIPPER MATERIALS PROGRAM AT HANFORD LABORATORIES	WICK OJ	SRD	6	12/04/63
HW-79826	PROGRESS REPORT ON NASA CERMET STUDIES IDENTIFICATION SNC-12, NOVEMBER 1963	WOODFIELD FW	CRD	5	12/05/63
HW-79858	EMPIRICAL PLUTONIUM CONSTANTS 7090 PROGRAM	JENSEN RD	SRD	42	12/09/63
HW-79915	INVENTION RPT: REACTOR DESIGNS FOR PRODUCING & USING CLEAN U-233	LW LANG	SECR		12/10/63
HW-79916	INVENTION RPT: PRODUCTION OF CLEAN U-233	LW LANG	SECR		12/10/63
HW-79917	INVENTION RPT: FUEL CYCLE THAT PERMITS REPROCESSING CLEAN U-233 BUT MINIMIZES RADIATION FROM CONTAMINATING U-232	LW LANG	SECR		12/10/63
HW-79931	QUALITY CONTROL PROGRAM FOR THE PLUTONIUM REDUCTION PROCESS	KNIGHTS LM	SRD	15	11/12/63
HW-79932	FABRICATION PROCESS TEST FPT-63-31-ROOM TEMPERATURE ISOSTATIC PRESS	WALKER CM	CRD	4	12/10/63
HW-79944	RADIOLOGICAL ASPECTS OF DISSOLVING IRRADIATED LI-A1	OWEN FE	SRD	3	12/11/63
HW-79953	ESTIMATED HELIUM SAVINGS CO2 PRODUCTION TEST	GRAVES SM	SRD	7	12/11/63
HW-79957	COST OF HIGH-240 PLUTONIUM	WE JOHNSON	SRD		12/16/63
HW-79974	CAPABILITY TESTS OF 181-H RIVER PUMP HOUSE	FRYMIER JW	SRD	9	12/12/63
HW-79978	URANIUM COST AND PRICE SCHEDULES	DOWIS WJ, GARCIA IMA	SRD	8	12/13/63
HW-79980	MONTHLY TECHNICAL REPORT NOVEMBER, 1963	NICHOLS PF	CRD	6	12/02/63
HW-80005	REPORT OF INVENTION TERTIARY AMINE SOLVENT EXTRACTION-RECOVERY OF P & N FROM PUREX PROCESS IWW SOLUTION	WW SCHULZ	CONF		12/13/63

UNCLASSIFIED

LIST OF HANFORD-GENERATED CLASSIFIED
DOCUMENTS DATED BETWEEN 1/1/61 AND 12/31/72

DOC. NO.	TITLE	AUTHOR	LEVEL	PGS	DATE
HW-80014	PRODUCTION TEST IP-644-D FUEL SURFACE CRUD MONITOR IRRADIATION	NEIDNER R	CRD	11	12/16/63
