Dear Mr. Rhoades:

We have calculated the total CY-1971 Hanford release of radioactive Kr 85 as 950,000 Ci. You may use this number in response to your AECM 0513 requirements. We will also be happy to assist you with similar data for your future requirements.

I should appreciate it if you could provide us with the results as submitted for other U.S. facilities, when they are available.

Very truly yours.
