Directory of Awardee Names

ABOUT THIS PUBLICATION

Standardization of grant and contract awardee names has been an area of concern since the development of the Department's Procurement and Assistance Data System (PADS). A joint effort was begun in 1983 by the Office of Scientific and Technical Information (OSTI) and the Office of Procurement and Assistance Management/Information Systems and Analysis Division to develop a means for providing uniformity of awardee names.

As a result of this effort, a method of assigning vendor identification codes to each unique awardee name, division, city, and state combination was developed and is maintained by OSTI. Changes to vendor identification codes or awardee names contained in PADS can be made only by OSTI.

Awardee names in the Directory indicate that the awardee has had a prime contract (excluding purchase orders of \$10,000 or less) with, or a financial assistance award from, the Department. Award status—active, inactive, or retired—is not shown. The Directory is in alphabetic sequence based on awardee name and reflects the OSTI-assigned vendor identification code to the right of the name. A vendor identification code is assigned to each unique awardee name, division, city, and state (for place of performance). The same vendor identification code is used for awards throughout the Department.

The vendor identification codes are an effective method of assuring consistency of names in the PADS system. The numbers are assigned as follows: the first six characters are

known as the stem code and identify the awardee; the seventh character is a dash; the eighth and ninth characters identify the division of the awardee. If there is no division, these characters will be 00. The first division that receives a vendor identification code will be 01, and numbers will be assigned in sequence to each different division. The tenth and eleventh characters, which represent the city and state, are assigned in the same way, with the first city and state being assigned 01, etc. The final two characters are a dash and a computer-generated check digit.

Information on new awardees (those which do not yet have vendor identification codes in PADS) is sent daily from PADS to OSTI for assignment of codes. OSTI compares the new awardee names to those already in the Directory and uses the "Instructions for Completing Awardee Names in PADS" (Appendix D to the *Handbook for Preparation of the Individual Procurement Action Report* of July 1991) to standardize names and assign either an existing or a new vendor identification code.

The Directory is intended as a resource to be consulted whenever an initial award is to be entered into PADS.

The Directory will be revised every three (3) years, and supplements will be issued quarterly. Each supplement will contain all new awardee names and codes since the last Directory was issued so that there are only two books to be consulted at any one time. When a new supplement is issued, the previous one should be discarded.
