SUMMARY

The Office of Fuels Programs prepares quarterly reports summarizing the data provided by companies authorized to import or export natural gas. Companies are required, as a condition of their authorizations, to file quarterly reports with the OFP. This report is for the first quarter of 1994 (January-March).

Attachment A shows the percentage of takes to maximum firm contract levels and the weighted average per unit price for each of the long-term importers during the five most recent reporting quarters.

Attachment B shows volumes and prices of gas purchased by long-term importers and exporters during the past twelve months.

Attachment C shows volume and price information for gas imported on a short-term basis.

Attachment D shows the gas exported on a short-term basis to Canada and Mexico.

During the first three months of 1994, data indicates that gas imports grew by about 14 percent over the level of the first quarter of 1993 (668 vs. 586 Bcf), with Canadian and Algerian imports increasing by 12 and 53 percent, respectively. During the same time period, exports declined by 15 percent (41 vs. 48 Bcf). Exports to Canada increased by 10 percent from the 1993 level (22 vs. 20 Bcf) and exports to Mexico decreased by 64 percent (5 vs. 14 Bcf).

Long-term imports for the quarter totaled 354.8 Bcf, representing a 10 percent decrease from the first quarter of 1993. Long-term Canadian imports totaled about 332.2 Bcf. The average price of these supplies was \$2.24/MMBtu, which was 10 cents more than the preceding quarter. The decline in long-term imports can be directly attributed to the unbundling of gas services as a result of FERC Order No. 636. For example, Pacific Gas Transmission Company's former long-term import has been replaced by numerous short-term import arrangements. New York has replaced

California as the state with the largest volume of Canadian natural gas imported under long-term authorizations. Under other long-term import arrangements, Distrigas Corporation imported 15.2 Bcf of Algerian LNG at an average landed price of \$2.55/MMBtu and Pan National Gas Sales, Inc. imported 7.5 Bcf of Algerian LNG at an average tailgate price of \$1.75/MMBtu.

During the first quarter, 106 companies used short-term "blanket" authorizations to import 313.6 Bcf of natural gas. This volume represents a 62 percent increase over the first quarter of 1993. Approximately 4.3 Bcf was imported from Mexico at Hidalgo, Texas, at \$2.06/MMBtu.

The average price of Canadian natural gas under short-term import arrangements was \$1.98/MMBtu, compared with \$1.95/MMBtu during the preceding quarter. Approximately 38 percent of the short-term sales were made at Eastport, Idaho, at an average price of \$1.90/MMBtu; 22 percent at Sumas, Washington, at \$1.99/MMBtu; 17 percent at Port of Morgan, Montana, at \$1.75/MMBtu; 10 percent at Noyes, Minnesota, at \$2.16/MMBtu; 4 percent at Niagara Falls, New York, at \$2.45/MMBtu; 3 percent at Waddington, New York, at \$2.47/MMBtu; and 6 percent at various other entry points, at \$2.18/MMBtu.

In addition, a total of 21 short-term blanket export authorizations were used, exporting a total of 26.6 Bcf of gas. Twelve authorizations were used to export about 21.9 Bcf of gas to Canada, at an average price of \$2.63/MMBtu. Under 9 other authorizations, about 4.7 Bcf of gas was exported to Mexico at an average price of \$2.12/MMBtu.

All data are derived from reports filed by importers and exporters, and are subject to future revision. Future revisions to the report will be available on OFP's Electronic Bulletin Board at (202) 586-7853. All general queries concerning this report should be made to Yvonne Caudillo at (202) 586-4587.

NATURAL GAS IMPORTS
Volumes and Weighted Average Prices
By Point of Entry and Type of Authorization
(01/01/94 - 03/31/94)

(1) Supply is resold to Consumers Power Company.

(2) Project Orange purchased 120,000,000 MMBtu's of natural gas over a 20-year period in one lump-sum amount totaling \$88 million, or approximately \$.73 per MMBtu, for its 111 MW cogenerator in Syracuse, N.Y. The demand component includes Nova/TransCanada transportation; production, gathering, processing fees; and tax/royalty payments.
