REVISED CODE WORDS

Our request to The Hanford Operations Office, Atomic Energy Commission, for replacing the code word "Birch" with a new code word "Brandy", and the word "Wine" to replace the code word "Bark" has been officially approved by the AEC Headquarters, Washington, D.C.

The new code words and their definitions are as follows:

BRANDY used only when referring to Np-237 for use in the weapons program or any other program classified Secret - Restricted Data. (Activities related to the recovery of Neptunium for programs sponsored by the Divisions of Research and Biology and Medicine are unclassified and the use of "Palm" or "Birch", the former code words, or the new code word "Brandy" is not permitted.)

WINE used only when referring to Pu-238 for use in the weapons program or any other program classified Secret - Restricted Data.

Each of the code words, with definition or sufficient information to indicate their meaning, is classified Secret-RD.

The code words, both old and new, when used separately are required to be handled as "Official Use Only".

When used together in any document or writing, the relationship of the old and new code names is Confidential-DI.

Revelation of the relationship between the old and new code names must be avoided in unclassified documents, and all reasonable precautions shall be taken to avoid disclosing their connection by association of old and new documents or other issuances. To this end, the new code words should be used only when the context or use of the message or document does not indicate its relationship to previous material using the old code terminology.

Roy E. Jaynes/jt

SPECIALIST, SECURITY PRACTICES AND PROCEDURES

In certain cases such as project proposals or budget accounts, for example, where the old code name has been clearly associated with a specific activity, the continuation is required until it is possible to introduce the new code name in such a way that the association is not evident.
