**SUMMARY OF RADIOACTIVE SOLID WASTE
RECEIVED IN THE 200 AREAS DURING
CALENDAR YEAR 1992**

J.D. Anderson
D.L. Hagel

ABSTRACT

Westinghouse Hanford Company manages and operates the Hanford Site 200 Area radioactive solid waste storage and disposal facilities for the U.S. Department of Energy, Richland Field Office, under contract DE-AC06-87RL10930. These facilities include radioactive solid waste disposal sites and radioactive solid waste storage areas. This document summarizes the amount of radioactive materials that have been buried and stored in the 200 Area radioactive solid waste storage and disposal facilities since startup in 1944 through calendar year 1991. This report does not include solid radioactive wastes in storage or disposed of in other areas or facilities such as the underground tank farms, or backlog wastes. Unless packaged within the scope of WHC-EP-0063, Hanford Site Solid Waste Acceptance Criteria, (WHC 1988), liquid waste data are not included in this document.

INTRODUCTION

This document summarizes the amount of radioactive materials that have been buried and stored in the 200 Area burial ground facilities during calendar year (CY) 1992. (See Table 1.) In addition to the data for CY 1992, cumulative data is presented. This document also lists decayed activity for the plant burial sites.

Table 1. Summary of Document Data

Pages	Data
3-24	Amount of radioactive materials buried and stored within the Westinghouse Hanford Company's 200 Area plateau since startup
25-40	Listing of the decayed activities in the various burial ground facilities from startup through calendar year 1992
41-42	Estimate of the radioactive materials in the unsegregated burial sites
43-46	Decay status of unsegregated waste from startup to present
47-52	Amount of radioactive material in the nontransuranic disposal or storage facilities
53-55	Decay status of nontransuranic waste from 1970 to present
56-61	Amount of radioactive material in the transuranic segregated storage sites
62-64	Decay status of transuranic segregated waste from 1970 to present
65-70	Summary of waste received for disposal or storage for calendar year 1992
71-144	Amount of waste received for each burial ground and storage facility for calendar 1992

It should be noted that the summation of ^{90}Sr , ^{106}Ru , ^{137}Cs , and other radionuclides does not equal the total curie amount. The difference is the amount of other mixed fission products present in the burials that are not noted in this report. The reported curie values do not include the activities for the radioactive daughters. The data for plutonium for waste disposed before 1970 could be biased low by about 300 kilograms.

This document was prepared using the Solid Waste Information and Tracking System database (SWITS), which results in more accurate and updated data. Radioisotopic data is based on the book, "Table of Isotopes," seventh edition, published by Wiley-Interscience. As a result, some of the data is different from previous editions. Some numbers for total decayed curies in the 1992 report show an increase in value from the 1991 report. This resulted from previously excluding the presence of daughter products produced in the decay process. Thus, the values were low by this amount. Facility names were changed to reflect Hanford Site standard naming conventions. The computer-generated data in the tables are presented using exponential notation. An example of this form is presented below:

$$2.41 \text{ E}+06 = 2.41 \times 10^{+6} = 2,410,000$$

$$2.41 \text{ E}-06 = 2.41 \times 10^{-6} = 0.00000241$$

Footnotes for 100 Area waste are offset listed for convenience in the OTHER RADIOACTIVITY (CURIES) column for information purposes, but are not included in the totals for OTHER RADIOACTIVITY radionuclides. The ¹³⁷Cs is included in the ¹³⁷Cs column, however. An example follows:

OTHER RADIOACTIVITY (CURIES)

	5.660E+02	(OTHER TOTAL)
C-14	1.234E+01	(OTHER)
CO-60	5.537E+02	(OTHER)
CS137	2.356E+03	(105N)
CO58	1.343E-07	(105N)
CO60	4.566E+01	(105N)
EU155	1.846E+00	(105N)
C14	1.249E+00	(105N)
EU154	8.697E+00	(105N)
FE59	4.619E-11	(105N)
MN54	1.964E-01	(105N)
EU152	9.573E-01	(105N)
