Personal Author Index

Authors' surnames are indexed in the form appearing in the publication cited; given names generally have been reduced to initials. For documents with multiple authors, each author name is indexed. The entry for a primary author (first author listed on an abstracted document) includes the full document title and citation number. Entries for other authors provide a cross-reference to the primary author. Also included is information on the document type, country of publication, and the document language listed in parentheses in the format (J;FR;In French and English). Accent marks are not input because of computer alphabetization. Spelling and transliteration follow standard conventions.

Subject Index

This index is arranged by subject descriptors selected from those assigned to each citation in this publication. Subject descriptors are selected from a controlled thesaurus of terms, ETDE/PUB-2(Rev.1), *International Energy: Subject Thesaurus*. In order to enhance indexing, subject descriptor entries generally consist of a pair of descriptors: a main term and a qualifier term. Each entry includes the full title (which may be followed by supplementary descriptive information in parentheses) and the citation number. Additional information given in parentheses indicates the document type (an abbreviation such as B for book), the country of publication (such as DE for Federal Republic of Germany), and the language if non-English.

See references guide users from synonymous terms to the descriptors selected for the concept. See also references indicate subject concepts that are more specific than a particular descriptor. To gain complete subject coverage, all such terms should be reviewed.

Radiological survey results at 5 Cliff Street, Beverly, Massachusetts (VB018), 94:2286 (R;US)

Radiological survey results at 6 Cliff Street, Beverly, Massachusetts (VB008), 94:2301 (R;US)

Radiological survey results at 8 Cliff Street, Beverly, Massachusetts (VB009), 94:2302 (R;US)

Radiological survey results at 9 Cliff Street, Beverly, Massachusetts (VB017), 94:2287 (R;US)

Radiological survey results at 9 Porter Street, Beverly, Massachusetts (VB020), 94:2284 (R;US)

Radiological survey results at Beverly Harbor, Beverly, Massachusetts (VB025), 94:2298 (R;US)

Radiological survey results at Porter Street City Park, Beverly, Massachusetts (VB026), 94:2281 (R;US)

Results of the radiological survey at 27 Schlosser Drive, Rochelle Park, New Jersey (RJ004), 94:2306 (R;US)

Results of the radiological survey at 31 Schlosser Drive, Rochelle Park, New Jersey (RJ003), 94:2307 (R;US)

Results of the radiological survey at 37 Schlosser Drive, Rochelle Park, New Jersey (RJ002), 94:2308 (R;US)
Results of the radiological survey at the ALCOA Research Laboratory, 600 Freeport Road, New Kensington, Pennsylvania (ANK001): Environmental Restoration and Waste Management Non-Defense Programs, 94:2303 (R;US)
Results of the radiological survey at the Sacandaga site Glenville, New York: Waste Management Research and Development Programs, 94:2242 (R;US)
Results of the radiological survey at the former ALCOA New Kensington Works, Pine and Ninth Streets, New Kensington, Pennsylvania (ANK002), 94:2304 (R;US)
Results of the radiological survey at the former Alba Craft Laboratory site properties, Oxford, Ohio (OXO001), 94:2310 (R;US)
Results of the radiological survey at the former Chapman Valve Manufacturing Company, Indian Orchard, Massachusetts (CIO001), 94:2300 (R;US)
Results of the radiological survey at the former Herring-Hall-Marvin Safe Company (3rd floor), 1550 Grand Boulevard, Hamilton, Ohio (HO001), 94:2316 (R;US)

Remedial Action

Addressing data heterogeneity: Lessons learned from a multimedia risk assessment, 94:572 (R;US)
Annual report on the US Department of Energy's cultural resource activities at Colorado UMTRA Project sites for October 1991–September 1992, 94:1822 (R;US)
Annual status report on the Uranium Mill Tailings Remedial Action Program, 94:102 (R;US)
Apollo Pennsylvania Nuclear Fuel Facility D&D Project: Quarterly technical progress report, April 1, 1992–June 30, 1992, 94:1833 (R;US)
Apollo Pennsylvania Nuclear Fuel Facility D&D Project: Quarterly technical progress report, July 1, 1992–September 30, 1992, 94:1834 (R;US)
Apollo Pennsylvania Nuclear Fuel Facility D&D Project: Technical progress report, October 1, 1992–December 31, 1992, 94:1835 (R;US)
Baseline risk assessment for groundwater contamination at the uranium mill tailings site, Gunnison, Colorado, 94:147 (R;US)
Engineering evaluation/cost analysis for the proposed decontamination of properties in the vicinity of the Hazelwood Interim Storage Site, Hazelwood, Missouri – environment assessment, 94:2164 (R;US)
Engineering evaluation/cost analysis–environmental assessment for the proposed decontamination of properties in the vicinity of the Hazelwood Interim Storage Site, Hazelwood, Missouri: Revision 1, 94:2165 (R;US)
Environment, safety, and health regulatory implementation plan, 94:1696 (R;US)
Environmental Restoration Quality Program Plan: Environmental Restoration Program, 94:258 (R;US)
Environmental analysis and data report prepared for the environmental assessment of remedial action at the inactive uranium mill tailings site near Falls City, Texas (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1936 (R;US)
Environmental analysis and data report prepared for the environmental assessment of remedial action at the Lowman uranium mill tailings site near Lowman, Idaho: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1935 (R;US)
Environmental assessment of remedial action at the Maybell uranium mill tailings site near Maybell, Colorado, 94:1815 (R;US)
Environmental assessment of remedial action at the Naturita Uranium processing site near Naturita, Colorado: Revision 2, 94:1703 (R;US)
Environmental assessment of remedial action at the Naturita Uranium processing site near Naturita, Colorado: Revision 1, 94:1702 (R;US)
Environmental assessment of remedial action at the Naturita uranium processing site near Naturita, Colorado: Revision 3, 94:1704 (R;US)

Environmental assessment of remedial action at the Slick Rock uranium mill tailings sites Slick Rock, Colorado: Draft, 94:98 (R;US)
Groundwater protection management program plan (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:153 (R;US)
Guidance document for preparing water sampling and analysis plans for UMTRA sites: Final [report], 94:78 (R;US)
Guidance for implementing the UMTRA Project long-term surveillance program: Final report, Revision 1, 94:1937 (R;US)
Hanford Site Environmental Restoration and Waste Technology Plan: Calendar year 1990, 94:1005 (R;US)
Hanford Site waste management and environmental restoration integration plan, 94:433 (R;US)
Hanford Site waste management and environmental restoration integration plan: Supplement 1, Level 2 activity networks, 94:434 (R;US)
Implementation of UMTRA Project Environmental Audit Action Plan status report for period ending September 30, 1992, 94:1948 (R;US)
Investigation of a natural geochemical barrier (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:155 (R;US)
Licensing plan for UMTRA project disposal sites: Final [report], 94:1674 (R;US)
Miscellaneous radioactive materials detected during uranium mill tailings surveys, 94:2330 (R;US)
Mitigation and monitoring plan for impacted wetlands at the Gunnison UMTRA Project site, Gunnison, Colorado (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1934 (R;US)
Modifications to the Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Green River, Utah: RAP Modification No. 1: Final report, 94:1730 (R;US)
Monticello Millsite environmental report for calendar year 1991, 94:1844 (R;US)
Programmatic Environmental Impact Statement for the Uranium Mill Tailings Remedial Action Ground Water Project, 94:61 (R;US)
Public Participation Plan, 94:1820 (R;US)
Radiological audit of remedial action activities at the processing site, transfer site, and Cheney disposal site Grand Junction, Colorado: Audit date, August 9–11, 1993: Final report, 94:2161 (R;US)
Remedial Action Plan and final design for stabilization of the inactive uranium mill tailings at Green River, Utah: Volume 3, Appendix F, Final design, specifications, and drawings: Final report, 94:1733 (R;US)
Remedial Action Plan and final design for stabilization of the inactive uranium mill tailings at Green River, Utah: Volume 1, Text, Appendices A, B, and C: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1731 (R;US)
Remedial Action Plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Spook, Wyoming: Volume 1, Text, Appendices A, B, C, D, and E: Final report, 94:1739 (R;US)
Remedial Action Plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Spook, Wyoming: Volume 2, Appendix F, Final plans and specifications: Final report, 94:1740 (R;US)
Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Attachment 5, Dewatering report: Revised final report, 94:1711 (R;US)
Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Appendix B to Attachment 3, Lithologic logs: Final report, 94:1722 (R;US)
Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Rifle, Colorado: Volume 1, Text: Appendices A, B, and C: Final report, 94:1713 (R;US)
Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: At-

ABANDONED SITES

Remedial Action

- attachment 5, Supplemental radiological data: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1725 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Appendix C to Attachment 3, Calculations: Final report, 94:1723 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Attachment 4, Water resources protection strategy: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1724 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Attachment 6, Supplemental standard for Durango processing site: Revised final report, 94:1712 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Remedial action selection report: Revised final report, 94:1707 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Falls City, Texas: Remedial action selection report: Attachment 2, Geology report; Attachment 3, Groundwater hydrology report; Attachment 4, Water resources protection strategy: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1746 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Attachment 3, Groundwater hydrology report: Revised final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1710 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Remedial action selection report: Final report, 94:1718 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Attachment 2, Geology report: Revised final report, 94:1709 (R;US)
- Remedial Action Plan for stabilization of the inactive uraniferous lignite processing sites at Belfield and Bowman, North Dakota: Volume 1, Text, Appendices A through C: Final report, 94:1747 (R;US)
- Remedial Action Plan for stabilization of the inactive uraniferous lignite processing sites at Belfield and Bowman, North Dakota: Volume 2, Appendices D and E: Final report, 94:1748 (R;US)
- Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 3, Groundwater hydrology report, 94:1676 (R;US)
- Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 2, Geology report, 94:1675 (R;US)
- Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 4, Water resources protection strategy, 94:1680 (R;US)
- Remedial action plan and final design for stabilization of the inactive uranium mill tailings at Green River, Utah: Volume 2A, Appendix D, Supplement, site characterization, Appendix E, Groundwater protection strategy: Final report, 94:1732 (R;US)
- Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Ambrosia Lake, New Mexico: Volume 2, Appendices D and E: Final, 94:1742 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 3, Ground water hydrology report: Preliminary final, 94:1683 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Remedial action selection report, Appendix B, 94:60 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lowman, Idaho: Attachment 2, Geology report: Final report, 94:1736 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix A to Attachment 3, Tables, 94:1677 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado: Final report: Volume 3, Appendix F, Final design, specifications, and drawings, 94:1715 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Tuba City, Arizona: Phase 2, Construction, Subcontract documents: Appendix E, final report: Appendix B of the cooperative agreement, 94:1745 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lowman, Idaho: Remedial action selection report for the Lowman UMTRA project site, Idaho: Final report, 94:1734 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix C to Attachment 3, Calculations, 94:1679 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado: Volume 5, Addenda D6–D8 to Appendix D: Final report, 94:1717 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix B to Attachment 3, Lithologic logs, 94:1678 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado: Final report: Volume 4, Addenda D1–D5 to Appendix D, 94:1716 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Tuba City, Arizona: Text, Appendices A, B, and C: Final report, 94:1744 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado: Volume 2, Appendices D and E: Final report, 94:1714 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Remedial Action Selection Report, Appendix B of Attachment 2: Geology report, Final, 94:1690 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix B of Attachment 3: Groundwater hydrology report, Attachment 4: Water resources protection strategy, Final, 94:1691 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix A of Attachment 3: Calculations, Final, 94:1692 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Remedial action selection report, Attachment 2, Geology report: Preliminary final, 94:1693 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix A of Attachment 3, Calculations: Preliminary final, 94:1695 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Attachment 3, Groundwater hydrology report, Attachment 4, Water resources protection strategy: Preliminary final, 94:1694 (R;US)
- Report on game species of concern associated with the Gunnison Remedial Action Project, Gunnison, Colorado, 94:1933 (R;US)
- Site-specific analysis of radiological and physical parameters for cobbly soils at the Gunnison, Colorado, processing site, 94:66 (R;US)
- Site-specific analysis of the cobbly soils at the Grand Junction processing site (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:148 (R;US)

Executive summary of the Cryofracture demonstration program, 94:215 (R;US)

Electrostatic Separation

Electrostatic curtain studies, 94:228 (R;US)

Engineering scale electrostatic enclosure demonstration, 94:255 (R;US)

Transuranic contamination control using electrostatic curtain (proof-of-principle experiments), 94:186 (R;US)

Environmental Effects

Characterization studies on: (A) Contaminated batch of Rocky Flats soil (B) Uncontaminated batch of INEL soil, 94:2184 (R;US)

Extraction

Pretreatment of neutralized cladding removal waste sludge: Results of the second design basis experiment, 94:1374 (R;US)

Filtration

Feasibility study for an additional HEPA filter leaching system in NWCF, 94:810 (R;US)

Freezing

Executive summary of the Cryofracture demonstration program, 94:215 (R;US)

Ground Disposal

Alternative pretreatment technologies for removal of transuranium elements from selected Hanford Site wastes: Strategic systems engineering waste pretreatment technology, 94:1082 (R;US)

BWID System Design Study, 94:790 (R;US)

Improving iron-enriched basalt with additions of ZrO_2 and TiO_2 , 94:814 (R;US)

Preliminary Systems Design Study assessment report: Volume 8, Appendixes (Evaluation of using specific technologies, system concepts for treating the buried waste and the surrounding contaminated soil.), 94:201 (R;US)

In-Situ Processing

Technical issues associated with in situ vitrification of the INEL Subsurface Disposal Area: Volume 2, Application of technical issues to the Acid Pit, 94:218 (R;US)

Technical issues associated with in situ vitrification of the INEL Subsurface Disposal Area: Volume 1, A systematic approach for identification, prioritization, and closure of technical issues, 94:217 (R;US)

Information

Radioactive waste shipments to Hanford retrievable storage from Babcock and Wilcox, Leechburg, Pennsylvania, 94:1106 (R;US)

Instability

Reactive and unstable chemicals in transuranic retrievable waste at the Hanford Site: A review of available data, 94:1085 (R;US)

Inventories

US Department of Energy interim mixed waste inventory report: Waste streams, treatment capacities and technologies: Volume 3, Site specific—Illinois through New York (Waste mixtures of hazardous wastes and low-level radioactive wastes or transuranic wastes.), 94:737 (R;US)

US Department of Energy interim mixed waste inventory report: Waste streams, treatment capacities and technologies: Volume 4, Site specific—Ohio through South Carolina (Waste mixtures of hazardous wastes and low-level radioactive wastes or transuranic wastes.), 94:738 (R;US)

Leaching

Underground storage tank integrated demonstration: Evaluation of pretreatment options for Hanford tank wastes, 94:1356 (R;US)

Melting

Bench-scale arc melter for R&D in thermal treatment of mixed wastes, 94:815 (R;US)

Minimization

Proceedings of the US Department of Energy Office of Environmental Restoration and Waste Management waste reduction workshop 4, 94:1322 (R;US)

Monitored Retrievable Storage

Radionuclides in shallow groundwater at Solid Waste Storage Area 5 North, Oak Ridge National Laboratory, 94:2333 (R;US)

Retrieval and re-storage of transuranic storage area waste at the Idaho National Engineering Laboratory: Environmental assessment, 94:2166 (R;US)

Neutron Activation Analysis

Test plan for Digface Chemical and Radiation Assay System, 94:251 (R;US)

Oxidation

Preliminary Systems Design Study assessment report: Volume 5, Land disposal compliance and hydrogen generation restricted concepts, 94:199 (R;US)

Packaging

Characterization of mixed CH-TRU waste at Argonne-West: A WIPP project update, 94:2144 (R;US)

Pyrolysis

Preliminary Systems Design Study assessment report: Volume 5, Land disposal compliance and hydrogen generation restricted concepts, 94:199 (R;US)

Qualitative Chemical Analysis

Nondestructive assay of boxed radioactive waste, 94:1167 (R;US)

Quantitative Chemical Analysis

Characterization of past and present solid waste streams from 231-Z, 94:1099 (R;US)

Characterization of past and present solid waste streams from the Plutonium-Uranium Extraction Plant, 94:1096 (R;US)

Radioactive Waste Disposal

A review of the Hanford Site soil corrosion applicable to solid waste containers, 94:2471 (R;US)

Active sites environmental monitoring program: Annual report FY 1992, 94:347 (R;US)

Buried Waste Integrated Demonstration: Selection of potential demonstration locations, 94:204 (R;US)

INEL Operable Unit 7-13 Retrieval/Ex Situ Thermal Treatment configuration options: INEL Buried Waste Integrated Demonstration Systems Analysis project, 94:227 (R;US)

Low-level and transuranic waste transportation, disposal, and facility decommissioning cost sensitivity analysis, 94:223 (R;US)

Master Safety Analysis Report (SAR) approach for solid waste treatment, storage, and disposal facilities, 94:511 (R;US)

Nevada Test Site defense waste acceptance criteria, certification, and transfer requirements: Revision 1, 94:887 (R;US)

Preliminary report on the ecological assessment of Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge,

ALPHA-BEARING WASTES

Radioactive Waste Disposal

- Hanford Site radioactive mixed waste thermal treatment initiative, 94:1202 (R;US)
- Master Safety Analysis Report (SAR) approach for solid waste treatment, storage, and disposal facilities, 94:511 (R;US)
- Mixed Waste Integrated Program interim evaluation report on thermal treatment technologies, 94:723 (R;US)
- Preliminary Systems Design Study assessment report: Volume 5, Land disposal compliance and hydrogen generation restricted concepts, 94:199 (R;US)
- Preliminary design for the Waste Receiving And Processing Facility Module 1: Volume 3, Outline specifications, 94:772 (R;US)
- Preliminary design for the Waste Receiving And Processing Facility Module 1: Volume 2, Title 1 drawings [Engineering Materials], 94:594 (E;US)
- Preliminary systems design study assessment report: Volume 4, Leach resistant/high integrity structure concepts, 94:198 (R;US)
- Preliminary systems design study assessment report: Volume 7, Subsystem concepts (Evaluation of using specific technologies, system concepts for treating the buried waste and surrounding contaminated soil.), 94:200 (R;US)
- Stakeholder involvement in redefining Hanford's Double-Shell Tank waste disposal program, 94:1376 (R;US)
- Systems engineering study for the closure of single-shell tanks: Draft A, Volume 3, 94:1472 (R;US)
- TSA waste stream and final waste form composition, 94:813 (R;US)
- Tank waste decision analysis report: Draft, 94:1522 (R;US)
- Time and motion simulation of the WRAP Module 1 Facility, 94:1197 (R;US)
- Treatment technology for transuranic waste streams: Cementation, vitrification, and incineration testing for the treatment of spent ion exchange media, 94:1033 (R;US)
- US Department of Energy interim mixed waste inventory report: Waste streams, treatment capacities and technologies: Volume 6, Appendices (Waste mixtures of hazardous wastes and low-level radioactive wastes or transuranic wastes.), 94:739 (R;US)

- Waste Management Facilities Cost Information Report, 94:848 (R;US)
- Waste Receiving and Processing Facility, Module 1: Volume 4, Project cost estimate, 94:773 (R;US)
- Waste Receiving and Processing Facility, Module 1: Volume 5, Engineering studies, 94:774 (R;US)
- Waste Receiving and Processing Facility, Module 1: Volume 6, Engineering assessments, 94:775 (R;US)
- Waste Receiving and Processing Facility, Module 1: Volume 7, Project design criteria, 94:776 (R;US)

Radioactive Waste Storage

- Application of service examinations to transuranic waste container integrity at the Hanford Site: Revision 1, 94:501 (R;US)
- Cyclic gas releases in Hanford Site nuclear waste tanks, 94:1610 (R;US)
- Ecological assessment plan for Waste Area Grouping 5, 94:2272 (R;US)
- Master Safety Analysis Report (SAR) approach for solid waste treatment, storage, and disposal facilities, 94:511 (R;US)
- Safety analysis and inventory control of transuranic and low-level waste in common storage, 94:1178 (R;US)
- Westinghouse Hanford Company Plan for certifying newly generated contact-handled transuranic waste for emplacement in the Waste Isolation Pilot Plant, 94:1227 (R;US)

Radiochemical Analysis

- Rapid monitoring for transuranic contaminants during buried waste retrieval, 94:188 (R;US)

Radionuclide Migration

- Radionuclides in shallow groundwater at Solid Waste Storage Area 5 North, Oak Ridge National Laboratory, 94:2333 (R;US)

Remedial Action

- Advanced remediation, technology development in the Underground Storage Tank - Integrated Demonstration, 94:1614 (R;US)
- Buried Waste Integrated Demonstration FY-93 Deployment Plan, 94:236 (R;US)
- Buried Waste Integrated Demonstration Strategy Plan, 94:237 (R;US)
- Buried waste integrated demonstration fiscal year 1992 close-out report, 94:238 (R;US)
- Effectiveness of processes applied to the remediation of mixed transuranic wastes: Foreign trip report, September 28-October 16, 1993, 94:2581 (R;US)

Research Programs

- A strategy for analysis of TRU waste characterization needs, 94:2407 (R;US)

Separation Processes

- Alternative pretreatment technologies for removal of transuranium elements from selected Hanford Site wastes: Strategic systems engineering waste pretreatment technology, 94:1082 (R;US)
- Developing waste separations technologies in the Underground Storage Tank - Integrated Demonstration Program, 94:1633 (R;US)

Storage Facilities

- Resource Conservation and Recovery Act closure plan for the Intermediate-Level Transuranic Storage Facility mixed waste container storage units, 94:673 (R;US)
- Sampling and decontamination plan for the Transuranic Storage Area-1/R container storage unit, 94:1327 (R;US)
- TSA waste stream and final waste form composition, 94:813 (R;US)
- Transuranic Storage Area (TSA)-2 container storage unit RCRA closure plan, 94:1325 (R;US)
- Transuranic Storage Area (TSA)-3 container storage unit RCRA closure plan, 94:1326 (R;US)

Transmutation

- Neutronics-processing interface analyses for the Accelerator Transmutation of Waste (ATW) aqueous-based blanket system, 94:877 (R;US)

Transport

- Fugitive dust control experiments using soil fixatives on vehicle traffic surfaces, 94:230 (R;US)

Low-level and transuranic waste transportation, disposal, and facility decommissioning cost sensitivity analysis, 94:223 (R;US)

Underground Disposal

A brief analysis and description of transuranic wastes in the subsurface disposal area of the radioactive waste management complex at INEL, 94:194 (R;US)
 Damage-induced nonassociated inelastic flow in rock salt, 94:2395 (R;US)
 Dilation-induced permeability changes in rock salt, 94:2403 (R;US)
 Evaluation of alternatives for high-level and transuranic radioactive waste disposal standards, 94:1401 (R;US)
 Exact analysis of a two-dimensional model for brine flow to a borehole in a disturbed rock zone, 94:2390 (R;US)
 In situ vitrification laboratory-scale test work plan, 94:837 (R;US)
 Multiaxial creep of natural rock salt, 94:2384 (R;US)
 Preliminary Systems Design Study assessment report: Volume 1: Executive summary, 94:195 (R;US)
 Probability distributions for parameters of the Munson-Dawson salt creep model, 94:2401 (R;US)
 Reactive and unstable chemicals in transuranic retrievable waste at the Hanford Site: A review of available data, 94:1085 (R;US)
 Three-dimensional finite element simulation of creep deformation in rock salt, 94:2391 (R;US)

Vitrification

Experience base for Radioactive Waste Thermal Processing Systems: A preliminary survey, 94:844 (R;US)
 Fifth in situ vitrification engineering-scale test of simulated INEL buried waste sites, 94:2341 (R;US)
 Hanford Waste Vitrification Plant Project technical exchange plan for fiscal year 1993, 94:1234 (R;US)
 Hanford Waste Vitrification Plant process description and plant status, 94:1165 (R;US)
 Hanford Waste Vitrification Plant: The project and process systems, 94:1127 (R;US)
 Idaho National Engineering Laboratory In Situ Vitrification Project FY-91 progress report, 94:221 (R;US)
 Improving iron-enriched basalt with additions of ZrO_2 and TiO_2 , 94:814 (R;US)
 In situ vitrification laboratory-scale test work plan, 94:837 (R;US)
 In situ vitrification of buried waste: Containment issues and suppression systems, 94:373 (R;US)
 In situ vitrification on buried waste, 94:792 (R;US)
 In situ vitrification program treatability investigation progress report: Revision 1, 94:187 (R;US)
 Permitting of the Hanford Waste Vitrification Plant, 94:1135 (R;US)
 Physical and chemical properties of the products of in situ vitrification engineering tests 5, 6, and 7, 94:214 (R;US)
 Preliminary assessment of blending Hanford tank wastes, 94:1359 (R;US)
 Product evaluation of in situ vitrification engineering, Test 4, 94:210 (R;US)
 Release model for in situ vitrification large-field test off-gas treatment system, 94:224 (R;US)
 Summary of INEL research on the iron-enriched basalt waste form, 94:845 (R;US)
 Technical issues associated with in situ vitrification of the INEL Subsurface Disposal Area: Volume 3, Application of technical issues to the TRU-contaminated pits and trenches, 94:219 (R;US)
 Technical issues associated with in situ vitrification of the INEL Subsurface Disposal Area: Volume 2, Application of technical issues to the Acid Pit, 94:218 (R;US)
 Technical issues associated with in situ vitrification of the INEL Subsurface Disposal Area: Volume 1, A systematic approach for identification, prioritization, and closure of technical issues, 94:217 (R;US)
 Thermal processing system concepts and considerations for RWMC buried waste, 94:846 (R;US)
 Thermal processing systems for TRU mixed waste, 94:797 (R;US)

Use of noninvasive geophysical techniques for the In Situ Vitrification Program: Volume 1, Literature review: Revision 1, 94:191 (R;US)

Use of noninvasive geophysical techniques for the In Situ Vitrification Program: Volume 2, Demonstration at the simulated waste pit, 94:192 (R;US)

Waste Disposal

Decommissioning of a grout- and waste-filled storage tank in the 200 East Area of the Hanford Site, 94:1581 (R;US)

Waste Management

T-Rex system for operation in TRU, LLW, and hazardous zones: Transuranic storage area-retrieval enclosure program, 94:2081 (R;US)

Waste minimization at the Department of Energy's Hanford Site, 94:1136 (R;US)

Waste Processing

Assessment of high-temperature thermal processes to treat mixed waste at the Hanford Site, 94:1141 (R;US)

Waste Retrieval

A summary of the environmental restoration program Retrieval Demonstration Project at the Idaho National Engineering Laboratory, 94:184 (R;US)

A summary of the environmental restoration program retrieval demonstration project at the Idaho National Engineering Laboratory: Revision 1, 94:185 (R;US)

End effectors and attachments for buried waste excavation equipment, 94:254 (R;US)

Final report for the cryogenic retrieval demonstration, 94:233 (R;US)

Fugitive dust control experiments using directed airflow in dumping operations, 94:231 (R;US)

Full-scale retrieval of simulated buried transuranic waste, 94:253 (R;US)

Preconceptual design for the electrostatic enclosure, 94:235 (R;US)

Retrieval/ex situ thermal treatment scoring interaction report, 94:243 (R;US)

Test plan for engineering scale electrostatic enclosure demonstration, 94:239 (R;US)

Test plan for the retrieval demonstration, 94:244 (R;US)

Waste Storage

Application of service examinations to transuranic waste container integrity at the Hanford Site, 94:1158 (R;US)

ALUMINIUM

Corrosion in ICPP fuel storage basins, 94:1245 (R;US)

Underground storage tanks/efficient separations accomplishments, 94:1310 (R;US)

ALUMINUM

Work plan for the removal and subsequent management of specific waste from David Witherspoon, Inc., Knoxville, Tennessee; Environmental Restoration and Waste Management Programs, 94:1855 (R;US)

Surface Properties

A review of the Hanford Site soil corrosion applicable to solid waste containers, 94:2471 (R;US)

Ventilation Systems

Explosion testing for the container venting system, 94:1104 (R;US)

CONTAINMENT SYSTEMS

Air Flow

Development of dry barriers for containment and remediation at waste sites, 94:415 (R;US)

Construction

Testing and monitoring plan for the permanent isolation surface barrier prototype, 94:1758 (R;US)

Design

A peer review of the Hanford Site Permanent Isolation Surface Barrier Development Program, 94:480 (R;US)

Field studies of engineered barriers for closure of low level radioactive waste landfills at Los Alamos, New Mexico, USA, 94:297 (R;US)

Hanford Site Permanent Isolation Surface Barrier Development Program: Fiscal year 1992 and 1993 highlights, 94:1760 (R;US)

Long-term climate change assessment study plan for the Hanford Site Permanent Isolation Surface Barrier Development Program: Revision 1, 94:2479 (R;US)

Permanent isolation surface barrier: Functional performance, 94:1097 (R;US)

Preliminary systems design study assessment report: Volume 3, Process in-place/leave in-place concepts, 94:197 (R;US)

Status report for the Small-Tube Lysimeter Facility; Fiscal year 1992, 94:453 (R;US)

Testing and monitoring plan for the permanent isolation surface barrier prototype, 94:1758 (R;US)

The Hybrid Treatment Process for treatment of mixed radioactive and hazardous wastes, 94:965 (R;US)

The development of permanent isolation surface barriers: Hanford Site, Richland, Washington, U.S.A., 94:509 (R;US)

The mixed waste landfill integrated demonstration, 94:1765 (R;US)

Erosion

Testing and monitoring plan for the permanent isolation surface barrier prototype, 94:1758 (R;US)

Evaluation

An investigation of bermounds as analogs to erosion control factors on protective barriers, 94:1761 (R;US)

Evaluation of an air drilling cuttings containment system, 94:414 (R;US)

Fractures

Evaluation of the cover cracking potential due to ground subsidence at UMTRA Project disposal cells, 94:1672 (R;US)

Moisture

Development of dry barriers for containment and remediation at waste sites, 94:415 (R;US)

Optimization

Federal facility agreement contingency, upgrade, and replacement plans for the ORNL active low-level radioactive waste tank system, 94:907 (R;US)

Performance

A simulation study of moisture movement in proposed barriers for the subsurface disposal area, INEL, 94:1751 (R;US)

In situ grouting of low-level burial trenches with a cement-based grout at Oak Ridge National Laboratory, 94:349 (R;US)

Migration barrier covers for radioactive and mixed waste landfills, 94:296 (R;US)

Model assessment of protective barriers: Part 4, Status of FY 1992 work, 94:1759 (R;US)

Performance modeling of concrete/metal barriers used in low-level waste disposal, 94:631 (R;US)

Permanent isolation surface barrier: Functional performance, 94:1097 (R;US)

Projecting the range of potential future climate change as an aid in the assessment of the effectiveness of the Hanford Site Permanent Isolation Barrier, 94:519 (R;US)

SWSA 6 interim corrective measures environmental monitoring: FY 1990 results: Environmental Restoration Program, 94:1756 (R;US)

Soil erosion rates caused by wind and saltating sand stresses in a wind tunnel, 94:369 (R;US)

Water erosion field tests for Hanford protective barriers: FY 1992 status report, 94:1763 (R;US)

Performance Testing

Testing and monitoring plan for the permanent isolation surface barrier prototype, 94:1758 (R;US)

Reliability

Comparison of reinforced-concrete models for use in the analysis of extreme loads, 94:485 (R;US)

S Codes

Performance modeling of concrete/metal barriers used in low-level waste disposal, 94:631 (R;US)

Structural Models

Soil erosion rates caused by wind and saltating sand stresses in a wind tunnel, 94:369 (R;US)

CONTAINMENT SYSTEMS

Technology Assessment

Technology Assessment

International technology transfer to support the environmental restoration needs of the DOE complex, 94:2611 (R;US)

Tensile Properties

Evaluation of the cover cracking potential due to ground subsidence at UMTRA Project disposal cells, 94:1672 (R;US)

Water Influx

Design of UMTRA covers to mitigate the effect of frost penetration, 94:1673 (R;US)

CONTAMINATION

Radiation Monitoring

- Current status of liquid scintillation at Westinghouse Hanford Company, 94:1168 (R;US)
Environmental restoration and waste management site-specific plan for Richland Operations Office: Hanford site five-year plan, fiscal years 1993-1997, 94:1905 (R;US)
Routine Operational Environmental Monitoring schedule, CY 1994, 94:549 (R;US)

Radionuclide Migration

- Recommended environmental dose calculation methods and Hanford-specific parameters: Revision 2, 94:2334 (R;US)

Remedial Action

- Development and demonstration of treatment technologies for the processing of US Department of Energy Mixed Waste, 94:934 (R;US)
Integrating environmental restoration management within DOE using an alternative identification and evaluation procedure: A methodology and a case history, 94:2591 (R;US)
Management Assessment Quality Assurance Guidance in support of EM environmental sampling and analysis activities, 94:2171 (R;US)
Observational approach implementation guidance: Year-end report, 94:2338 (R;US)

- Summary of US Delegation visit to Germany emphasizing environmental restoration of uranium mining and milling facilities: Foreign trip report, June 29-July 11, 1992, 94:2559 (R;US)
Toxicological benchmarks for screening potential contaminants of concern for effects on sediment-associated biota: Environmental Restoration Program ESD Publication 4107, 94:2199 (R;US)

US - Former Soviet Union environmental restoration and waste management activities, March 1994, 94:2553 (R;US)

Sampling

- Development of an Integrated Performance Evaluation Program (IPEP) for the Department of Energy's Office of Environmental Restoration and Waste Management, 94:2538 (R;US)

Surveillance

- Ground-water sample collection and analysis plan for the ground-water surveillance project, 94:362 (R;US)

ENVIRONMENTAL EFFECTS

- Niagara Falls storage site annual environmental report for calendar year 1990, Lewiston, New York: Surplus Facilities Management Program (SFMP), 94:1880 (R;US)
Technology Integration Division FY 1992 Public Participation Program Management and Implementation Plan, 94:2546 (R;US)

ENVIRONMENTAL ENGINEERING

- A proposed office of technology development education program, 94:2541 (R;US)

ENVIRONMENTAL EXPOSURE

- Model of the PCB and mercury exposure of mink and great blue heron inhabiting the off-site environment downstream from the US Department of Energy Oak Ridge Reservation: Environmental Restoration Program, 94:316 (R;US)

ENVIRONMENTAL EXPOSURE PATHWAY

- GWSCREEN2.01: Groundwater Screen, 94:2205 (CM;US)
GWSCREEN2.02: Groundwater Screen, 94:2206 (CM;US)
GWSCREEN2.0: Groundwater Screen, 94:2204 (CM;US)

ENVIRONMENTAL IMPACT STATEMENTS

- Department of Energy PEIS scoping session, 94:151 (R;US)
Department of Energy Programmatic Environmental Impact Statement (PEIS) scoping session, 94:1701 (R;US)
Draft programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project: Revision 3, 94:101 (R;US)
Managing large-scale environmental impact assessments, 94:1770 (R;US)
Scoping session of the programmatic environmental impact statement for the uranium mill tailings remedial action project, 94:1700 (R;US)

ENVIRONMENTAL IMPACTS

- An approach to establishing cooperative R&D projects with Russian Institutes, 94:2615 (R;US)
Method for evaluating cumulative impacts of projects which involve uncertainty in the baseline environmental conditions, 94:517 (R;US)
Mitigation action plan for remedial action at the uranium mill tailings sites and disposal site, Rifle, Colorado, 94:1932 (R;US)

ENVIRONMENTAL MATERIALS

- Analytical laboratory quality assurance guidance in support of EM environmental sampling and analysis activities, 94:2169 (R;US)
Management Assessment Quality Assurance Guidance in support of EM environmental sampling and analysis activities, 94:2171 (R;US)
Mobile instrumentation platform and robotic accessory for real-time screening of hazardous waste, 94:2088 (R;US)
On-site laboratory support of the Oak Ridge National Laboratory remedial investigation/feasibility study, 94:612 (R;US)
Quality assurance guidance for laboratory assessment plates in support of EM environmental sampling and analysis activities, 94:1829 (R;US)
Road Transportable Analytical Laboratory system: Phase 1, 94:719 (R;US)
Sampling quality assurance guidance in support of EM environmental sampling and analysis activities, 94:2168 (R;US)

Test plan for rapid transuranic monitoring of soil and air dusts by direct large-area alpha spectrometry and L-shell x-ray spectrometry, 94:2182 (R;US)

The integrated performance evaluation program quality assurance guidance in support of EM environmental sampling and analysis activities, 94:2170 (R;US)

ENVIRONMENTAL POLICY

Development of remedial process options: Phase II, Feasibility study: Installation Restoration Program, Naval Air Station Fallon, Fallon, Nevada, 94:350 (R;US)

Environmental Restoration Remedial Action Program records management plan, 94:442 (R;US)

Hanford Environmental Information System (HEIS) sample/data entry flow summary, 94:536 (R;US)

Hanford Site Groundwater Protection Management Program: Revision 1, 94:135 (R;US)

Long-range plan for technology integration programs, Office of Technology Development, 94:2543 (R;US)

Mixed and Low-Level Waste Treatment Facility project: Appendix A, Environmental and regulatory planning and documentation: Draft, 94:830 (R;US)

Remedial Action Program annual conference: Proceedings: Volume 1, Remedial action under the Environmental Restoration and Waste Management Five-Year Plan, 94:30 (R;US)

United States Department of Energy Field Office, Richland, Environmental Protection Implementation Plan, November 9, 1990–November 9, 1991: Revision 1, 94:2175 (R;US)

Uranium Mill Tailings Remedial Action Project Environmental Monitoring Plan, 94:1931 (R;US)

Chemical Analysis

Data validation report for the 100-HR-3 Operable Unit, fifth round groundwater samples, 94:546 (R;US)

Data validation summary report: 300-FF-5 operable unit; Round 6 groundwater, 94:539 (R;US)

External quality control in ground-water sampling and analysis at the Hanford Site, 94:2336 (R;US)

Guidance document for preparing water sampling and analysis plans for UMTRA sites: Final [report], 94:78 (R;US)

Moscow Test Well, INEL Oversight Program: Aqueous geochemistry, 94:111 (R;US)

Phase 1, Remedial investigation report for the 300-FF-5 operable unit: Volume 2, 94:1918 (R;US)

UMTRA Project water sampling and analysis plan: Canonsburg and Burrell, Pennsylvania, 94:89 (R;US)

UMTRA water sampling and analysis plan, Lakeview, Oregon, 94:77 (R;US)

UMTRA water sampling and analysis plan, Tuba City, Arizona: Draft, 94:68 (R;US)

Chemical Composition

Data for surface ionization and complexation modeling, 94:1941 (R;US)

Status of ground water in the 1100 Area, 94:473 (R;US)

Chemical Reactions

Evaluating long-term performance of in situ vitrified waste forms: Methodology and results, 94:368 (R;US)

High-level nuclear waste borosilicate glass: A compendium of characteristics, 94:1267 (R;US)

The reaction of SRL 202 glass in J-13 and DIW, 94:1262 (R;US)

Cleaning

Final report on the waste area grouping perimeter groundwater quality monitoring well installation program at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:308 (R;US)

In situ bioremediation via horizontal wells: Revision 1, 94:555 (R;US)

Configuration

Groundwater maps of the Hanford Site, June 1993, 94:2466 (R;US)

Contamination

Alternative geochemical barrier materials (Taconite and scoria), 94:156 (R;US)

Analysis of ICPP tank farm infiltration, 94:1665 (R;US)

Annual report of the Environmental Restoration Monitoring and Assessment Program at Oak Ridge National Laboratory for FY 1992: Environmental Restoration Program, 94:2254 (R;US)

Application of spectral gamma-ray borehole geophysics for characterization of radionuclide contamination at Hanford, 94:2506 (R;US)

GROUND WATER Contamination

- Assessment of unsaturated zone radionuclide contamination in the 200 areas of the Hanford site, Washington, 94:2503 (R;US)
- Baseline risk assessment for groundwater contamination at the uranium mill tailings site, Gunnison, Colorado, 94:147 (R;US)
- Baseline risk assessment for groundwater contamination at the uranium mill tailings site near Monument Valley, Arizona: Draft, 94:63 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Shiprock, New Mexico: Revision 1, 94:65 (R;US)
- Baseline risk assessment of groundwater contamination at the Uranium Mill Tailings Site near Gunnison, Colorado, 94:70 (R;US)
- Baseline risk assessment of groundwater contamination at the Uranium Mill Tailings Site near Gunnison, Colorado: Revision 1, 94:71 (R;US)
- Baseline risk assessment of groundwater contamination at the uranium mill tailings site near Shiprock, New Mexico: Draft, 94:64 (R;US)
- Characterization of ground water contamination at the LLNL main site: A case study, 94:2415 (R;US)
- Characterization technologies for environmental remediation, 94:2149 (R;US)
- Colonie Interim Storage Site annual environmental report for calendar year 1991, Colonie, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1882 (R;US)
- Colonie Interim Storage Site environmental report for calendar year 1992, 1130 Central Avenue, Colonie, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1892 (R;US)
- Combining expedited cleanup with innovative technology demonstrations, 94:505 (R;US)
- Cost benefit analysis of remediation alternatives for controlling the flux of strontium-90 into the Columbia River, 94:523 (R;US)
- Cost/benefit analysis comparing *ex situ* treatment technologies for removing carbon tetrachloride from Hanford groundwater, 94:367 (R;US)
- DNAPLs at DOE sites: Background and assessment of characterization technologies, 94:2590 (R;US)
- Effects of diverse organic contaminants on trichloroethylene degradation by methanotrophic bacteria and methane-utilizing consortia, 94:34 (R;US)
- Environmental assessment of remedial action at the Slick Rock uranium mill tailings sites, Slick Rock, Colorado: Revision 1, 94:2163 (R;US)
- Evaluation of the proposed pilot groundwater pump and treat demonstration for the Paducah Gaseous Diffusion Plant: Environmental Restoration Program, 94:288 (R;US)
- Feasibility study report for the 200-BP-1 operable unit: Revision 1, 94:1919 (R;US)
- Final report on the waste area grouping perimeter groundwater quality monitoring well installation program at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:308 (R;US)
- GWSCREEN: A semi-analytical model for assessment of the groundwater pathway from surface or buried contamination: Version 2.0 theory and user's manual, 94:179 (R;US)
- Groundwater impact assessment report for the 1325-N Liquid Waste Disposal Facility, 94:463 (R;US)
- Groundwater impact assessment report for the 216-S-26 Crib, 200 West Area, 94:469 (R;US)
- Groundwater level monitoring sampling and analysis plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:333 (R;US)
- Hanford Site Environmental Data for Calendar year 1992 - Ground water, 94:2361 (R;US)
- Hydrogeologic characterization of the former Vitro processing site, Salt Lake City, Utah: Final report, 94:150 (R;US)
- Hydrogeology of the Hanford Site in South-Central Washington State, 94:2491 (R;US)
- Initial site characterization approach and preliminary results, 200 West Area carbon tetrachloride Expedited Response Action, Hanford Site, Richland, Washington, 94:493 (R;US)
- Liquid effluent study: Ground water characterization data, 94:2459 (R;US)
- Maywood Interim Storage Site: Annual environmental report for calendar year 1990, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1878 (R;US)
- Migration of a groundwater contaminant plume by stratabound flow in Waste Area Grouping 1 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:320 (R;US)
- Minimization of effluent discharge to the Soil Column, 94:529 (R;US)
- Mobile water treatment plant special study: Uranium Mill Tailings Remedial Action Project, 94:163 (R;US)
- Monitoring and modeling contaminated sediment transport in the White Oak Creek watershed: Environmental Restoration Program, 94:313 (R;US)
- Phase I remedial investigation report for the 300-FF-5 operable unit, Volume 1, 94:1917 (R;US)
- Pilot study risk assessment for selected problems at the Fernald Environmental Management Project (FEMP), 94:1795 (R;US)
- Pilot study risk assessment for selected problems at the Nevada Test Site (NTS), 94:430 (R;US)
- Preplanning guidance document for groundwater restoration (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:157 (R;US)
- Prioritization and accelerated remediation of groundwater contamination in the 200 Areas of the Hanford Site, Washington, 94:2504 (R;US)
- Programmatic Environmental Impact Statement for the Uranium Mill Tailings Remedial Action Ground Water Project, 94:61 (R;US)
- Programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project: Revision 2, 94:100 (R;US)
- Programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project: Revision 1, Draft, 94:99 (R;US)
- Radiological survey of shoreline vegetation from the Hanford Reach of the Columbia River, 1990-1992, 94:2354 (R;US)
- Radionuclides in shallow groundwater at Solid Waste Storage Area 5 North, Oak Ridge National Laboratory, 94:2333 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Attachment 3, Groundwater hydrology report: Revised final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1710 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Falls City, Texas: Remedial action selection report: Attachment 2, Geology report; Attachment 3, Groundwater hydrology report; Attachment 4, Water resources protection strategy: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1746 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Remedial action selection report: Final report, 94:1718 (R;US)
- Remedial action measures, 94:257 (R;US)
- Remedial investigation for the chemical plant area of the Weldon Spring Site: Volume 1, 94:638 (R;US)
- Remedial investigation work plan for Bear Creek Valley Operable Unit 4 (shallow groundwater in Bear Creek Valley) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:127 (R;US)
- Response to comments and recommendations on RCRA Facility Investigation Plan for Group 4 at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Volume 2, Operable Unit 2: Environmental Restoration Program, 94:560 (R;US)
- Reverse osmosis applications to low-level radioactive waste, 94:483 (R;US)
- Risk assessment guidance document for the UMTRA project groundwater remediation phase, 94:162 (R;US)

Road Transportable Analytical Laboratory system: Phase 1, 94:719 (R;US)

Selection of water treatment processes special study (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:160 (R;US)

Simulation of the cleanup of the Hanford Site, 94:1181 (R;US)

Summary of FY 1992 operations of the vapor extraction system at the Hanford Site, Washington, 94:515 (R;US)

Technical summary of geological, hydrological, and engineering studies at the Slick Rock Uranium Mill Tailings sites, Slick Rock, Colorado, 94:1949 (R;US)

Technology needs for environmental restoration remedial action: Environmental Restoration Program, 94:261 (R;US)

Transport of contaminants during storms in the White Oak Creek and Melton Branch watersheds, 94:2318 (R;US)

UMTRA Project water sampling and analysis plan, Falls City, Texas, 94:90 (R;US)

UMTRA project water sampling and analysis plan, Durango, Colorado, 94:84 (R;US)

UMTRA project water sampling and analysis plan, Mexican Hat, Utah, 94:95 (R;US)

UMTRA project water sampling and analysis plan, Monument Valley, Arizona, 94:96 (R;US)

UMTRA project water sampling and analysis plan, Riverton, Wyoming, 94:94 (R;US)

UMTRA project water sampling and analysis plan, Spook, Wyoming, 94:93 (R;US)

Use of lysimeters to monitor a sanitary landfill, 94:1768 (R;US)

Vadose Zone Modeling Workshop proceedings, March 29-30, 1993, 94:2485 (R;US)

Work plan for the remedial investigation/feasibility study-environmental assessment for the quarry residuals operable unit at the Weldon Spring Site, 94:1873 (R;US)

Contamination Regulations

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 4, water resources protection strategy: Preliminary final, 94:1687 (R;US)

Corrosive Effects

Disposition of actinides released from high-level waste glass, 94:1282 (R;US)

Data Acquisition

Construction and installation summary for fiscal year 1992 of the hydraulic head monitoring stations at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:319 (R;US)

Decontamination

DOE In Situ Remediation Integrated Program: In situ manipulation technologies subprogram plan, 94:2618 (R;US)

Electrochemical iron generation: The ideal process for simultaneous removal of heavy metals from contaminated groundwater, 94:21 (R;US)

Heavy Metals Contaminated Soil Project, Resource Recovery Project, and Dynamic Underground Stripping Project, 94:655 (R;US)

Pacific Northwest Laboratory tasks supporting the Office of Technology Development national program, 94:2379 (R;US)

Remediation of groundwater containing radionuclides and heavy metals using ion exchange and the AlgaSORB® biosorbent system: Final report, 94:97 (R;US)

Removal of uranium by biosorption, 94:50 (R;US)

X-231B technology demonstration for in situ treatment of contaminated soil: Contaminant characterization and three dimensional spatial modeling, 94:2327 (R;US)

[Travel to The Netherlands and Russia to assess international electrokinetic technology as applied to remedial treatment of metal-contaminated soils and groundwater]: Foreign trip report, December 11-19, 1991, 94:2558 (R;US)

Detoxification

Ultrasonic process for detoxification of groundwater, 94:9 (R;US)

Environmental Exposure Pathway

GWSCREEN2.01: Groundwater Screen, 94:2205 (CM;US)

GWSCREEN2.02: Groundwater Screen, 94:2206 (CM;US)

GWSCREEN2.0: Groundwater Screen, 94:2204 (CM;US)

Environmental Transport

Accounting for time-varying vadose-zone water fluxes caused by infiltration caps using the MEPAS transport, exposure, and risk assessment model, 94:2372 (R;US)

Flow Models

Hanford Site ground-water model: Geographic information system linkages and model enhancements, FY 1993, 94:2363 (R;US)

Phase 1, Remedial investigation report for the 300-FF-5 operable unit: Volume 2, 94:1918 (R;US)

Results of two- and three-dimensional groundwater flow modeling for the design criteria studies in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:332 (R;US)

Simulations of strontium-90 transport from the 100-N Area to the Columbia River using VAM2DH, 94:436 (R;US)

Summary of ground water and surface water flow and contaminant transport computer codes used at the Idaho National Engineering Laboratory (INEL): Version 1.0, 94:113 (R;US)

The Cell Analytical-Numerical (CAN) method for the solution of the Richards equation, 94:45 (R;US)

The method of Laplace Transform MultiQuadrics (LTMQ) for the solution of the groundwater flow equation, 94:2239 (R;US)

Flow Rate

The in situ permeable flow sensor: A device for measuring groundwater flow velocity, 94:408 (R;US)

Flow Visualization

Efficient analysis using custom interactive visualization tools at a Superfund site, 94:2139 (R;US)

Fluid Flow

Analysis of flow processes during TCE infiltration in heterogeneous soils at the Savannah River Site, Aiken, South Carolina, 94:2238 (R;US)

Application of ARC/INFO to regional scale hydrogeologic modeling, 94:2376 (R;US)

Aquifer characterization and groundwater modeling in support of remedial actions at the Weldon Spring Site, 94:2133 (R;US)

Characterization of ground water contamination at the LLNL main site: A case study, 94:2415 (R;US)

Characterization of the vadose zone (Glacial tills), 94:2208 (R;US)

Geohydrologic evaluation for the 200 Area Effluent Treatment Facility State-Approved Land Disposal Site: Addendum to WAC 173-240 Engineering Report, 94:2511 (R;US)

Groundwater flow delineation study at the Massachusetts Military Reservation using the colloidal borescope, 94:2323 (R;US)

Heterogeneity and contaminant transport modeling for the Savannah River integrated demonstration site, 94:425 (R;US)

Hydraulic test results for Savage Island wells: 699-32-22B, 699-42-E9A, and 699-42-E9B, 94:2342 (R;US)

In situ permeable flow sensors at the Savannah River Integrated Demonstration: Phase 1 results, 94:2613 (R;US)

Independent verification and validation testing of the FLASH computer code, Version 3.0, 94:177 (R;US)

Migration of a groundwater contaminant plume by stratabound flow in Waste Area Grouping 1 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:320 (R;US)

Modeling groundwater flow at the chemical plant area of the Weldon Spring Site, 94:18 (R;US)

Preliminary potentiometric map and flow dynamic characteristics for the upper-basalt confined aquifer system, 94:2359 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix A of Attachment 3, Calculations: Preliminary final, 94:1695 (R;US)

Selected hydraulic test analysis techniques for constant-rate discharge tests, 94:2347 (R;US)

Simulating the spatial heterogeneity of sedimentological and hydrogeological characteristics for braided stream deposits, 94:130 (R;US)

GROUND WATER Fluid Flow

Status report on the development of a three-dimensional conceptual model for the Hanford Site unconfined aquifer system, 94:365 (R;US)

Status report on the geology of the Oak Ridge Reservation, 94:2322 (R;US)

Supplement to a hydrologic framework for the Oak Ridge Reservation, Oak Ridge, Tennessee: Summary of groundwater modeling, 94:2325 (R;US)

Three-dimensional finite element simulation of creep deformation in rock salt, 94:2391 (R;US)

Towards identifying data needs for a regional hydrogeologic contamination study using multiple realization simulations, 94:2400 (R;US)

Travel to Karlsruhe, Germany to exchange information on the in situ destruction of volatile organic compounds: Foreign trip report, February 10–16, 1992, 94:2592 (R;US)

Water-table elevations on the Hanford Site and outlying areas, 1991, 94:2339 (R;US)

Hydraulic Conductivity

An evaluation of slug interference tests for aquifer characterization at the Hanford Site, 94:2368 (R;US)

Hydrology

Escarpment seeps at Shiprock, New Mexico, 94:152 (R;US)

Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Attachment 3, Groundwater hydrology report: Final report, 94:1720 (R;US)

Remedial action plan and final design for stabilization of the inactive uranium mill tailings at Green River, Utah: Volume 2A, Appendix D, Supplement, site characterization, Appendix E, Groundwater protection strategy: Final report, 94:1732 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lowman, Idaho: Appendix B: Attachment 3, Groundwater hydrology report: Final report, 94:1735 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 3, Groundwater hydrology report: Preliminary final, 94:1683 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix B of Attachment 3: Groundwater hydrology report, Attachment 4: Water resources protection strategy, Final, 94:1691 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix A of Attachment 3: Calculations, Final, 94:1692 (R;US)

Management

Managing soil moisture on waste burial sites, 94:1705 (R;US)

Maps

Groundwater maps of the Hanford Site, 94:2460 (R;US)

Groundwater maps of the Hanford Site, June 1993, 94:2466 (R;US)

Mathematical Models

Geology and hydrology of the 300 Area and vicinity, Hanford Site, south-central Washington, 94:2474 (R;US)

Modeling technology and techniques special study: Final report, 94:161 (R;US)

Maximum Permissible Dose

Maywood Interim Storage Site: Annual environmental report for calendar year 1990, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1878 (R;US)

Monitoring

A case study of optimization in the decision process: Siting groundwater monitoring wells, 94:346 (R;US)

A new fiber-optic sensor technology for rapid and inexpensive characterization of soil contamination, 94:2417 (R;US)

A quantitative method for groundwater surveillance monitoring network design at the Hanford Site, 94:2358 (R;US)

Annual report for RCRA groundwater monitoring projects at Hanford Site facilities for 1993, 94:142 (R;US)

Annual report on monitoring of the unsaturated zone and recharge areas at INEL to the state of Idaho INEL Oversight Committee, 94:114 (R;US)

Aquifer test plan for the 100-HR-3 Operable Unit, 94:2529 (R;US)

Department of Energy PEIS scoping session, 94:151 (R;US)

Department of Energy Programmatic Environmental Impact Statement (PEIS) scoping session, 94:1701 (R;US)

Description of work for 200-UP-1 characterization of monitoring wells, 94:2516 (R;US)

Draft postclosure permit application for Bear Creek Hydrogeologic Regime at the Oak Ridge Y-12 Plant Oil Landform Hazardous Waste Disposal Unit: Revision, 94:2536 (R;US)

Draft postclosure permit application for Bear Creek hydrogeologic regime at the Oak Ridge Y-12 Burial Grounds Hazardous Waste Disposal Unit: Environmental restoration program, 94:2031 (R;US)

Environmental surveillance at Los Alamos during 1991: Environmental protection group, 94:2218 (R;US)

Groundwater maps of Hanford Site Separations Areas, December 1989, 94:431 (R;US)

Groundwater protection management program plan, 94:88 (R;US)

Groundwater impact assessment for the 216-U-17 Crib, 200 West Area, 94:459 (R;US)

Groundwater impact assessment report for the 100-D Ponds, 94:460 (R;US)

Groundwater impact assessment report for the 216-Z-20 Crib, 200 West Area, 94:462 (R;US)

Groundwater impact assessment report for the 400 Area ponds, 94:451 (R;US)

Groundwater maps of the Hanford Site, June 1992, 94:2464 (R;US)

Groundwater monitoring challenges on the Oak Ridge Reservation, 94:33 (R;US)

Groundwater monitoring plan for the proposed state-approved land disposal structure, 94:2512 (R;US)

Hanford wells, 94:2355 (R;US)

Hydrologic test plan for the Environmental Remediation Disposal Facility, 94:2530 (R;US)

Integrating state-of-the-science technology for a cost-effective hazardous waste site characterization, 94:2157 (R;US)

Long-term surveillance plan for the Lowman, Idaho, Disposal site: Revision 1, 94:1819 (R;US)

Long-term surveillance plan for the Lowman, Idaho, disposal site, 94:1818 (R;US)

Niagara Falls Storage Site environmental report for calendar year 1992, 1397 Pletcher Road, Lewiston, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1891 (R;US)

Overview of DOE's field screening technology development activities, 94:2128 (R;US)

Phase 2 Sampling Plan for Chestnut Ridge Operable Unit 2 (Filled Coal Ash Pond/Upper McCoy Branch) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:756 (R;US)

Postclosure permit application for Bear Creek Hydrogeologic Regime at the Oak Ridge Y-12 Plant S-3 Site, 94:565 (R;US)

Postconstruction report of the United Nuclear Corporation Disposal Site at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:1858 (R;US)

Quarterly report of RCRA groundwater monitoring data for period July 1, 1993–September 30, 1993, 94:140 (R;US)

Quarterly report of RCRA groundwater monitoring data for period October 1, 1993–December 31, 1993, 94:141 (R;US)

RCRA groundwater data analysis protocol for the Hanford Site, Washington, 94:2496 (R;US)

Radionuclides in shallow groundwater at Solid Waste Storage Area 5 North, Oak Ridge National Laboratory, 94:2333 (R;US)

Remedial investigation report for Chestnut Ridge OU 2 (Filled Coal Ash Pond/McCoy Branch) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2535 (R;US)

SWSA 6 interim corrective measures environmental monitoring: FY 1990 results: Environmental Restoration Program, 94:1756 (R;US)

Site Safety Plan for Lawrence Livermore National Laboratory CERCLA investigations, 94:989 (R;US)
 Statistical application of groundwater monitoring data at the Hanford Site, 94:2502 (R;US)
 Statistical approach on RCRA groundwater monitoring projects at the Hanford Site, 94:2489 (R;US)
 Status of ground water in the 1100 Area, 94:473 (R;US)
 Status of remedial investigation activities in the Hanford Site 300 Area groundwater operable unit, 94:522 (R;US)
 UMTRA Project water sampling and analysis plan, Falls City, Texas, 94:90 (R;US)
 Westinghouse Hanford Company Environmental Surveillance annual report: 200/600 Areas: Calendar year 1990: Revision 4, 94:2423 (R;US)
 Work plan for the preliminary assessment and characterization of dense nonaqueous-phase liquids in the Bear Creek Burial Grounds Hazardous Waste Disposal Unit at the Oak Ridge Y-12 Plant, 94:559 (R;US)

Natural Radioactivity

A sitewide approach to the characterization and use of soil and groundwater background at the Hanford Site, 94:2509 (R;US)

Pollution Control

Hanford Site Groundwater Protection Management Program: Revision 1, 94:135 (R;US)
 Research and development for DOE environmental restoration and waste management, 94:2129 (R;US)

Pumping

Evaluation of the proposed pilot groundwater pump and treat demonstration for the Paducah Gaseous Diffusion Plant: Environmental Restoration Program, 94:288 (R;US)

Radiation Monitoring

Hazelwood Interim Storage Site annual environmental report for calendar year 1991, Hazelwood, Missouri, 94:1881 (R;US)
 Hazelwood Interim Storage Site environmental report for calendar year 1992, 9200 Latty Avenue, Hazelwood, Missouri, 94:1893 (R;US)
 Liquid effluent study: Ground water characterization data, 94:2459 (R;US)
 Maywood Interim Storage Site annual environmental report for calendar year 1991, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP) (Maywood Interim Storage Site), 94:1885 (R;US)
 Maywood Interim Storage Site environmental report for calendar year 1992, 100 West Hunter Avenue, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1888 (R;US)
 Maywood Interim Storage Site: Annual environmental report for calendar year 1990, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1878 (R;US)
 Middlesex Sampling Plant environmental report for calendar year 1992, 239 Mountain Avenue, Middlesex, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1890 (R;US)
 New Brunswick Site annual environmental report for calendar year 1991, New Brunswick, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP) (New Brunswick Site), 94:1887 (R;US)
 Niagara Falls Storage Site annual environmental report for calendar year 1991, Lewiston, New York, 94:1884 (R;US)
 Wayne Interim Storage Site annual environmental report for calendar year 1991, Wayne, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP) (Wayne Interim Storage Site), 94:1886 (R;US)
 Wayne Interim Storage Site environmental report for calendar year 1992, 868 Black Oak Ridge Road, Wayne, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1889 (R;US)

Radioactive Waste Processing

Summary report on the demonstration of the Duratek process for treatment of mixed-waste contaminated groundwater, 94:913 (R;US)

Radiochemical Analysis

Data validation summary report: 300-FF-5 operable unit; Round 6 groundwater, 94:539 (R;US)
 Environmental Monitoring Plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1864 (R;US)

Radionuclide Migration

An integrated performance measure for environmental restoration at Oak Ridge National Laboratory, 94:1810 (R;US)
 Aquifer test plan for the 100-HR-3 Operable Unit, 94:2529 (R;US)
 Assessing the performance of the saltstone wasteform at the Savannah River Site, 94:600 (R;US)
 Bioremediation of Hanford groundwater, 94:371 (R;US)
 Contribution of Hanford liquid effluents to strontium-90 levels in offsite soils, 94:2357 (R;US)
 Engineering study of tank leaks related to hydraulic retrieval of sludge from tank 241-C-106: Revision 1, 94:1656 (R;US)
 Environmental monitoring of subsurface low-level waste disposal facilities at Oak Ridge National Laboratory, 94:616 (R;US)
 Evaluation of 1985-1986 corrective actions at ORNL liquid waste disposal trench 7, 94:348 (R;US)
 Evaluation of historical and analytical data on the TAN TSF-07 Disposal Pond, 94:1952 (R;US)
 FLAME: A finite element computer code for contaminant transport in variably-saturated media, 94:176 (R;US)
 GWSCREEN2.01: Groundwater Screen, 94:2205 (CM;US)
 GWSCREEN2.02: Groundwater Screen, 94:2206 (CM;US)
 GWSCREEN2.0: Groundwater Screen, 94:2204 (CM;US)
 GWSCREEN: A semi-analytical model for assessment of the groundwater pathway from surface or buried contamination: Theory and user's manual, 94:174 (R;US)
 Groundwater impact assessment report for the 216-U-14 Ditch, 94:470 (R;US)
 Groundwater monitoring challenges on the Oak Ridge Reservation, 94:33 (R;US)
 Hanford Site ground-water model: Geographic information system linkages and model enhancements, FY 1993, 94:2363 (R;US)
 Hanford groundwater cleanup and restoration conceptual study, 94:445 (R;US)
 Health risk assessment for the Building 3001 Storage Canal at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1972 (R;US)
 Hydraulic test results for Savage Island wells: 699-32-22B, 699-42-E9A, and 699-42-E9B, 94:2342 (R;US)
 Hydrogeologic controls on ground-water and contaminant discharge to the Columbia River near the Hanford Townsite, 94:937 (R;US)
 Hydrogeological influences on radionuclide migration from the major radioactive waste burial sites at Chernobyl (A review), 94:416 (R;US)
 Independent validation testing of the FLAME computer code, Version 1.0, 94:178 (R;US)
 Investigation of groundwater flow zones and contaminant transport in Solid Waste Storage Area 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:325 (R;US)
 Migration of a groundwater contaminant plume by stratabound flow in Waste Area Grouping 1 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:320 (R;US)
 Modeling vertical and horizontal solute transport for the Weldon Spring Site Remedial Action Project, 94:17 (R;US)
 N Springs expedited response action proposal, 94:138 (R;US)
 ORNL results for Test Case 1 of the International Atomic Energy Agency's research program on the safety assessment of Near-Surface Radioactive Waste Disposal Facilities, 94:353 (R;US)
 Pilot study risk assessment for selected problems at the Savannah River Site (SRS), 94:24 (R;US)
 Preliminary investigation of processes that affect source term identification: Environmental Restoration Program, 94:309 (R;US)

RCRA Facility Investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 4, Technical memorandums 06-03A, 06-04A, 06-05A, and 06-08A: Environmental Restoration Program, 94:339 (R;US)

RCRA Facility investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 5, Technical Memorandums 06-09A, 06-10A, and 06-12A: Environmental Restoration Program, 94:340 (R;US)

Technical approach for the management of UMTRA ground water investigation-derived wastes, 94:91 (R;US)

UMTRA Project water sampling and analysis plan: Canonsburg and Burrell, Pennsylvania, 94:89 (R;US)

UMTRA project water sampling and analysis plan – Shiprock, New Mexico (Uranium Mill Tailings Remedial Action), 94:81 (R;US)

UMTRA project water sampling and analysis plan, Ambrosia Lake, New Mexico, 94:87 (R;US)

UMTRA project water sampling and analysis plan, Durango, Colorado, 94:84 (R;US)

UMTRA water sampling and analysis plan, Green River, Utah, 94:83 (R;US)

UMTRA water sampling and analysis plan, Lakeview, Oregon, 94:77 (R;US)

UMTRA water sampling and analysis plan, Tuba City, Arizona: Draft, 94:68 (R;US)

X-231B technology demonstration for in situ treatment of contaminated soil: Contaminant characterization and three dimensional spatial modeling, 94:2327 (R;US)

Y-12 Environmental Restoration Remedial Action Surveillance and Maintenance program plan, Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:563 (R;US)

Velocity

Groundwater flow delineation study at the Massachusetts Military Reservation using the colloidal borescope, 94:2323 (R;US)

Water Chemistry

Supplement to a hydrologic framework for the Oak Ridge Reservation, Oak Ridge, Tennessee: Summary of groundwater modeling, 94:2325 (R;US)

Water Pollution

Comparison of three field screening techniques for delineating petroleum hydrocarbon plumes in groundwater at a site in the southern Carson Desert, Nevada, 94:2324 (R;US)

Groundwater impact assessment report for the 284-WB Power-plant Ponds, 94:465 (R;US)

Water Pollution Control

A co-metabolic approach to groundwater remediation, 94:36 (R;US)

Cometabolic biotreatment of TCE-contaminated groundwater: Laboratory and bench-scale development studies, 94:43 (R;US)

Pilot-scale field tests for the methanotrophic technology cometabolic bioreactor demonstration at the Oak Ridge K-25 Site, 94:358 (R;US)

Water Quality

An evaluation of the results of alluvial groundwater sampling from 1987–1990 at the Durango disposal site, 94:146 (R;US)

Draft programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project: Revision 3, 94:101 (R;US)

Drinking Water Program 1992 annual report, 94:165 (R;US)

Groundwater impact assessment for the 216-U-17 Crib, 200 West Area, 94:459 (R;US)

Groundwater impact assessment report for the 216-Z-20 Crib, 200 West Area, 94:462 (R;US)

Groundwater impact assessment report for the 400 Area ponds, 94:451 (R;US)

Groundwater protection management program plan (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:153 (R;US)

Groundwater quality sampling and analysis plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2263 (R;US)

Investigation of a natural geochemical barrier (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:155 (R;US)

Liquid effluent study: Ground water characterization data, 94:2459 (R;US)

Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Appendix A to Attachment 3, Tables: Final report, 94:1721 (R;US)

Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Appendix C to Attachment 3, Calculations: Final report, 94:1723 (R;US)

Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Attachment 4, Water resources protection strategy: Revised final report, 94:1708 (R;US)

Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 3, Groundwater hydrology report, 94:1676 (R;US)

Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Ambrosia Lake,

GROUND WATER

Water Quality

New Mexico: Volume 2, Appendices D and E: Final, 94:1742 (R;US)

Remedial action plan and site design for stabilization of the inactive Uranium Mill Tailings Site at Lowman, Idaho: Attachment 4, Water resources protection strategy: Final report, 94:1737 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix C to Attachment 3, Calculations, 94:1679 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lakeview, Oregon: Volume 3, Attachments A and B to Appendix F: Final report: Revision 1, 94:1728 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 4, water resources protection strategy: Preliminary final, 94:1687 (R;US)

Results of groundwater quality assessment program at Low-Level Waste Management Area 3 of the low-level burial grounds, 94:535 (R;US)

Tank waste technical options report, 94:1521 (R;US)

Waste management plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2262 (R;US)

Westinghouse Hanford Company Operational Groundwater status report, 1990-1992, 94:452 (R;US)

Water Treatment

Selection of water treatment processes special study (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:160 (R;US)

Technical framework for groundwater restoration (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:158 (R;US)

Underground Storage Tank: Integrated demonstration participant site characteristic summary, 94:1511 (R;US)

Ground Water
Annual report for RCRA groundwater monitoring projects at Hanford Site facilities for 1993, 94:142 (R;US)
Bioremediation of nitrates and carbon tetrachloride in groundwater, 94:388 (R;US)
Ground water maps of the Hanford Site, June 1991, 94:2462 (R;US)
Groundwater Maps of the Hanford Site, December 1991, 94:2463 (R;US)

HANFORD RESERVATION

Ground Water

Groundwater Maps of the Hanford Site, December 1992, 94:2465 (R;US)
Kinetics of in situ bioremediation of Hanford groundwater, 94:379 (R;US)
Quarterly report of RCRA groundwater monitoring data for period July 1, 1993–September 30, 1993, 94:140 (R;US)
Quarterly report of RCRA groundwater monitoring data for period October 1, 1993–December 31, 1993, 94:141 (R;US)
RCRA groundwater data analysis protocol for the Hanford Site, Washington, 94:2496 (R;US)
Remediation of groundwater containing radionuclides and heavy metals using ion exchange and the AlgaSORB® biosorbent system: Final report, 94:97 (R;US)
VOCs in Arid soils: Technology summary, 94:658 (R;US)

Hazardous Materials

Accelerated cleanup of mixed waste units on the Hanford Site, Richland, Washington, 94:1160 (R;US)
Accelerated cleanup of the 316-5 Process Trenches at the Hanford Site, 94:489 (R;US)
Hanford Site annual dangerous waste report: Volume 1, Part 2, Generator dangerous waste report dangerous waste: Calendar Year 1993, 94:765 (R;US)
Hanford Site annual dangerous waste report: Volume 2, Generator dangerous waste report radioactive mixed waste: Calendar Year 1993, 94:766 (R;US)
Hazardous chemical and radioactive wastes at Hanford, 94:963 (R;US)

Hearings

Public comments and responses to the 1989 Hanford cleanup five-year plan, 94:1904 (R;US)

High-Level Radioactive Wastes

Ferrocyanide tank waste stability: Supplement 2, 94:1455 (R;US)
Pretreatment process testing of Hanford tank waste for the US Department of Energy's Underground Storage Tank Integrated Demonstration, 94:1380 (R;US)
Separation processes for high-level radioactive waste treatment, 94:1180 (R;US)

Historical Aspects

Historical genesis of Hanford Site wastes, 94:496 (R;US)
Legacy and legend: Fifty years of defense production at the Hanford Site, 94:475 (R;US)
Legend and legacy: Fifty years of defense production at the Hanford Site, 94:477 (R;US)
Legend and legacy: Fifty years of defense production at the Hanford Site: Revision 1, 94:476 (R;US)
The Hanford Site: An anthology of early histories, 94:1120 (R;US)

Hydrology

Field trip guide to the Hanford Site, 94:479 (R;US)
Hydrogeology of the 100-N Area, Hanford Site, Washington, 94:2519 (R;US)
Hydrogeology of the Hanford Site in South-Central Washington State, 94:2491 (R;US)
Hydrologic test plan for the Environmental Remediation Disposal Facility, 94:2530 (R;US)
Selected hydraulic test analysis techniques for constant-rate discharge tests, 94:2347 (R;US)
Three-dimensional conceptual model for the Hanford Site unconfined aquifer system, FY 1993 status report, 94:2362 (R;US)

Information

Hanford Site Development Plan, 94:1908 (R;US)

Inventories

Annual report of tank waste treatability, 94:1460 (R;US)
Annual report of tank waste treatability, 94:1459 (R;US)

Isotope Separation Plants

A brief history of the PUREX and UO₃ facilities, 94:1121 (R;US)

Land Use

Hanford 200 Areas Development Plan, 94:1909 (R;US)
Hanford Federal Facility state of Washington leased land, 94:763 (R;US)
Hanford Site Development Plan, 94:1916 (R;US)

Liquid Wastes

Facility effluent monitoring plan for the 340 waste handling facility, 94:1043 (R;US)
Plan and schedule for disposition and regulatory compliance for all remaining Miscellaneous Streams, 94:143 (R;US)

Low-Level Radioactive Wastes

Laboratory screening of low-level mixed waste forms, 94:1175 (R;US)

Maintenance

Annual surveillance and maintenance report for the retired Hanford Site facilities, 94:2000 (R;US)

Management

Hanford 300 Area Development Plan, 94:1903 (R;US)

Mapping

Using the global positioning system in support of environmental characterization at the Hanford Site in Washington State, 94:2375 (R;US)

Maps

Groundwater maps of the Hanford Site, June 1992, 94:2464 (R;US)

Nonradioactive Waste Management

Corrective action strategy for single-shell tanks containing organic chemicals, 94:1533 (R;US)

Nuclear Facilities

Compilation of historical information of 300 Area facilities and activities, 94:1116 (R;US)
Deactivation completed at historic Hanford Fuels Laboratory, 94:2021 (R;US)
Establishing a predictive maintenance (PdM) program at the Hanford Site, 94:533 (R;US)
Facility effluent monitoring plan for the 300 Area Fuels Fabrication Facility, 94:1070 (R;US)
Facility effluent monitoring plan for the plutonium finishing plant, 94:1061 (R;US)
Facility effluent monitoring plan for the uranium trioxide facility, 94:1044 (R;US)

Occupational Safety

Risk management of onsite transportation of nuclear waste, 94:1203 (R;US)

Personnel Management

Type B Investigation Report for 241-SY-101 Pump Start and 241-C-106 Pit Cleanout, 94:1571 (R;US)

Pipes

Cathodic protection system operating experience for underground piping at the Hanford Site, 94:1125 (R;US)

Planning

Resource book: Decommissioning of contaminated facilities at Hanford: Volume 1, 94:1986 (R;US)
Resource book: Decommissioning of contaminated facilities at Hanford: Volume 2, 94:1987 (R;US)
Resource book: Decommissioning of contaminated facilities at Hanford: Volume 3, 94:1988 (R;US)

Plants

Vascular plants of the Hanford Site, 94:2477 (R;US)

Ponds

100-D Ponds closure plan, 94:1912 (R;US)
State Environmental Policy Act (SEPA) Environmental Checklist Form 216-B-3 Expansion Ponds Closure Plan: Revision 1, 94:1897 (R;US)

Program Management

Documentation of Hanford Site independent review of the Hanford Waste Vitrification Plant Preliminary Safety Analysis Report: Revision 3, 94:1114 (R;US)
Hanford 200 Areas Development Plan, 94:1909 (R;US)
Security Transition Program Office 1994 fiscal year work plan WBS 6.11, 94:1924 (R;US)
The Hanford Site focus, 1994, 94:1927 (R;US)

Purex Process

Use of the USQ process with an operating SAR for the shutdown/terminal cleanout of the PUREX facility, 94:2011 (R;US)

Radiation Monitoring

Air pathway effects of nuclear materials production at the Hanford Site, 1983 to 1992, 94:957 (R;US)

Current status of liquid scintillation at Westinghouse Hanford Company, 94:1168 (R;US)
Westinghouse Hanford Company Environmental surveillance annual report-200/600 Areas: Calendar year 1990, 94:2422 (R;US)
Westinghouse Hanford Company environmental surveillance annual report - 200/600 Areas: Calendar year 1989, 94:2421 (R;US)

Radioactive Effluents

Assessment of candidate sites for disposal of treated effluents at the Hanford Site, Washington, 94:2494 (R;US)
Facility Effluent Monitoring Plan determination for the Liquid Effluent Retention Facility, 94:1034 (R;US)
Facility effluent monitoring plan for the 284-E and 284-W power plants, 94:1049 (R;US)
Facility effluent monitoring plan for the plutonium-uranium extraction facility, 94:1039 (R;US)
Hydrogeologic controls on ground-water and contaminant discharge to the Columbia River near the Hanford Townsite, 94:937 (R;US)
Radionuclide air emissions report for the Hanford Site, calendar year 1992, 94:139 (R;US)
Registration for the Hanford Site: Sources of radioactive emissions, 94:134 (R;US)

Radioactive Waste Disposal

Accelerated cleanup at the 618-9 Burial Ground, 94:494 (R;US)
Accelerated cleanup of mixed waste units on the Hanford Site, Richland, Washington, 94:1160 (R;US)
Characterization of wastes in and around early reactors at the Hanford Site: The use of historical research, 94:1212 (R;US)
Hanford Site Tank Waste Remediation System, 94:1607 (R;US)
Liquid effluent study characterization data, 94:2457 (R;US)
Nondestructive assay of boxed radioactive waste, 94:1167 (R;US)
Quarterly report on Defense Nuclear Facilities Safety Board Recommendation 90-7 for the period ending June 30, 1992, 94:1052 (R;US)
Systems engineering study for the closure of single-shell tanks: Draft A, Volume 2, 94:1471 (R;US)
Tank 241-C-106 sampling data requirements developed through the data quality objectives (DQO) process, 94:1542 (R;US)
Tank waste decision analysis report: Draft, 94:1522 (R;US)

Radioactive Waste Facilities

105-DR Large Sodium Fire Facility closure plan: Revision 1, 94:1902 (R;US)
303-K Radioactive Mixed-Waste Storage Facility closure plan: Revision 1, 94:1899 (R;US)
Application of remote Raman screening to processing of mixed wastes in drums, 94:1177 (R;US)
Conceptual design for the Waste Receiving And Processing facility Module 2A: Volume 2, Project cost estimate, 94:778 (R;US)
Corrosion considerations for life management of Hanford high-level waste tanks, 94:1635 (R;US)
Decontamination and decommissioning assessment for the Waste Incineration Facility (Building 232-Z) Hanford Site, [Hanford], WA, 94:1926 (R;US)
Description of a Multipurpose Processing and Storage Complex for the Hanford Site's radioactive material, 94:1190 (R;US)
Documentation of Hanford Site independent review of the Hanford Waste Vitrification Plant Preliminary Safety Analysis Report: Revision 2, 94:1113 (R;US)
Establishing a predictive maintenance (PdM) program at the Hanford Site, 94:533 (R;US)
Facility Effluent Monitoring Plan for the 222-S Laboratory, 94:1065 (R;US)
Field characterization plan for the 216-U-8 vitrified clay pipeline, 94:2517 (R;US)
Geophysical investigation of 218-W-4C trenches #1 and #4, 200 west, 94:2522 (R;US)
Hanford Tank Waste Remediation Systems (TWRS) Waste Pretreatment Program strategy and issues, 94:1648 (R;US)

Hanford high-level waste evaporator/crystallizer corrosion evaluation, 94:1636 (R;US)
Integrated sampling and analysis plan for samples measuring >10 mrem/hour, 94:1074 (R;US)
Maintenance Implementation Plan for the Waste Tank maintenance and production management, 94:1662 (R;US)
National emission standards for hazardous air pollutants application for approval to stabilize the 105N Basin, 94:771 (R;US)
Polymers for subterranean containment barriers for underground storage tanks (USTs): Letter report on FY 1992 activities, 94:1296 (R;US)
Preliminary design for the Waste Receiving And Processing Facility Module 1: Volume 3, Outline specifications, 94:772 (R;US)
Preliminary design for the Waste Receiving And Processing Facility Module 1: Volume 2, Title 1 drawings [Engineering Materials], 94:594 (E;US)
Quality assurance program description: Hanford Waste Vitrification Plant, Part 1: Revision 3, 94:1333 (R;US)
Radioactive mixed waste disposal, 94:1172 (R;US)
State Environmental Policy Act (SEPA) environmental checklist forms for 304 Concretion Facility Closure Plan: Revision 2, 94:1898 (R;US)
Technology Evaluation Workshop Report for Tank Waste Chemical Characterization, 94:1109 (R;US)
Waste Receiving and Processing Facility Module 2A: Advanced Conceptual Design Report: Volume 3B, 94:784 (R;US)
Waste Receiving and Processing Facility Module 2A: Advanced Conceptual Design Report: Volume 3A, 94:783 (R;US)
Waste Receiving and Processing Facility Module 2A: Advanced Conceptual Design Report: Volume 2, 94:782 (R;US)
Waste Receiving and Processing Facility Module 2A: Advanced Conceptual Design Report: Volume 1, 94:781 (R;US)
Waste Receiving and Processing Facility, Module 1: Volume 4, Project cost estimate, 94:773 (R;US)
Waste Receiving and Processing Facility, Module 1: Volume 5, Engineering studies, 94:774 (R;US)
Waste Receiving and Processing Facility, Module 1: Volume 6, Engineering assessments, 94:775 (R;US)
Waste Receiving and Processing Facility, Module 1: Volume 7, Project design criteria, 94:776 (R;US)

Radioactive Waste Management

100 Area soil washing treatability test plan, 94:1911 (R;US)
105-DR Large Sodium Fire Facility closure plan: Revision 1, 94:1902 (R;US)
163N Demineralization Plant wastewater stream-specific report: Addendum 4, 94:2429 (R;US)
1992 Solid waste reference forecast summary, 94:1076 (R;US)
1993 Solid Waste Reference Forecast Summary, 94:1077 (R;US)
1993 report on Hanford Site land disposal restrictions for mixed wastes, 94:760 (R;US)
209-E laboratory reflector water stream-specific report: Addendum 31, 94:2454 (R;US)
222-S Laboratory wastewater stream-specific report: Addendum 13, 94:2438 (R;US)
241-A Tank Farm Cooling Water stream-specific report: Addendum 23, 94:2447 (R;US)
241-AV/AZ Tank Farms Steam Condensate stream-specific report: Addendum 30, 94:2453 (R;US)
242-A evaporator process condensate stream-specific report: Addendum 15, 94:2440 (R;US)
242-A evaporator steam condensate stream-specific report: Addendum 26, 94:2450 (R;US)
242-S evaporator steam condensate stream-specific report: Addendum 29, 94:2452 (R;US)
244-AR vault cooling water stream-specific report: Addendum 25, 94:2449 (R;US)
2724-W laundry wastewater stream-specific report: Addendum 11, 94:2436 (R;US)
400 Area Secondary Cooling Water stream-specific report: Addendum 28, 94:2451 (R;US)

HANFORD RESERVATION

Water Quality

Water Quality

Statistical approach on RCRA groundwater monitoring projects at the Hanford Site, 94:2489 (R;US)

Water Springs

Sampling and analysis of 100 Area springs, 94:136 (R;US)

Water Tables

Ground water maps of the Hanford Site, 94:2460 (R;US)

Water-table elevations on the Hanford Site and outlying areas, 1991, 94:2339 (R;US)

Water Wells

Hanford well remediation and decommissioning plan, 94:2023 (R;US)

HAZARDOUS MATERIALS

See also TOXIC MATERIALS

Biodegradation

In-situ bioremediation via horizontal wells, 94:554 (R;US)

Catalysts

Development studies for a novel wet oxidation process, 94:716 (R;US)

Chemical Analysis

Long-term management of Hanford Site single-shell tank waste, 94:1572 (R;US)

Mobile instrumentation platform and robotic accessory for real-time screening of hazardous waste, 94:2088 (R;US)

Chemical Reactions

Sludge Treatment Evaluation: 1992 Technical progress, 94:938 (R;US)

Combustion

Advanced combustion and oxidation techniques for the destruction of hazardous wastes, 94:872 (R;US)

Optimization of a packed bed reactor for liquid waste treatment, 94:880 (R;US)

Concentration Ratio

Engineering study of tank leaks related to hydraulic retrieval of sludge from tank 241-C-106: Revision 1, 94:1656 (R;US)

Containers

Comparison of reinforced-concrete models for use in the analysis of extreme loads, 94:485 (R;US)

Containment

Capping as an alternative for remediating radioactive and mixed waste landfills, 94:1755 (R;US)

Containment Systems

Containment and stabilization technologies for mixed hazardous and radioactive wastes, 94:970 (R;US)

The Hybrid Treatment Process for treatment of mixed radioactive and hazardous wastes, 94:965 (R;US)

Data Compilation

Hazardous waste shipment data collection from DOE sites, 94:805 (R;US)

Offsite hazardous waste shipment data collection, 94:704 (R;US)

Decontamination

Environmental Restoration and Waste Management (EM) program: An introduction, 94:104 (R;US)

Detection

Evaluation of airborne thermal, magnetic, and electromagnetic characterization technologies, 94:2187 (R;US)

Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring: Technical progress report, July 1, 1993–September 30, 1993, 94:720 (R;US)

Ecological Concentration

Toxicological benchmarks for screening potential contaminants of concern for effects on terrestrial plants: Environmental Restoration Program, 94:2197 (R;US)

Emergency Plans

Hazardous Materials Management and Emergency Response training Center needs assessment, 94:1102 (R;US)

Encapsulation

Development, testing, and demonstration of geotechnical and cement-based encapsulant materials for the stabilization of radioactive and hazardous waste disposal structures, 94:487 (R;US)

Polyethylene encapsulation of single-shell tank low-level wastes: FY-93 interim progress report, 94:592 (R;US)

Waste management technology development and demonstration programs at Brookhaven National Laboratory, 94:588 (R;US)

Environmental Effects

Characterization studies on: (A) Contaminated batch of Rocky Flats soil (B) Uncontaminated batch of INEL soil, 94:2184 (R;US)

Maywood Interim Storage Site: Annual environmental report for calendar year 1990, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1878 (R;US)

Environmental Impacts

Maywood Interim Storage Site: Annual environmental report for calendar year 1990, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1878 (R;US)

Environmental Transport

Evaluation of historical and analytical data on the TAN TSF-07 Disposal Pond, 94:1952 (R;US)

GWSCREEN: A semi-analytical model for assessment of the groundwater pathway from surface or buried contamination: Version 2.0 theory and user's manual, 94:179 (R;US)

Evaluation of airborne thermal, magnetic, and electromagnetic characterization technologies, 94:2187 (R;US)
INEL cold test pit demonstration of improvements in information derived from non-intrusive geophysical methods over buried waste sites: Phase 2, Final report, 94:679 (R;US)
INEL cold test pit demonstration of improvements in information derived from non-intrusive geophysical methods over buried waste sites: Phase 1, Final report, 94:678 (R;US)
RCRA Facility investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 5, Technical Memorandums 06-09A, 06-10A, and 06-12A: Environmental Restoration Program, 94:340 (R;US)
RCRA closure plan for the Bear Creek Burial Grounds B Area and Walk-In Pits at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:1853 (R;US)
Robotics subsurface mapping demonstration technology test plan, 94:2082 (R;US)
Status report for the Small-Tube Lysimeter Facility, fiscal year 1990, 94:438 (R;US)
Treatability study for WAG 6 (SWSA 6) trench water, 94:1969 (R;US)
Underground storage tank-integrated demonstration: Applying tomorrow's technology today, 94:1605 (R;US)

Underground Storage

RCRA Facility Investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 3, Appendixes 1 through 8: Environmental Restoration Program, 94:338 (R;US)
Subsurface barrier design alternatives for confinement and controlled advection flow, 94:526 (R;US)

Vitrification

A preliminary study of the controls on melting during in situ vitrification: Environmental Restoration Program, 94:307 (R;US)
Cost performance assessment of in situ vitrification, 94:293 (R;US)
ISV technology development plan for buried waste, 94:229 (R;US)
Implementation of in situ vitrification technology for remediation of Oak Ridge contaminated soil sites: Past results and future plans, 94:624 (R;US)
In situ vitrification application to buried waste: Final report of intermediate field tests at Idaho National Engineering Laboratory, 94:209 (R;US)
In situ vitrification: Providing a comprehensive solution for remediation of contaminated soils, 94:384 (R;US)
In situ vitrification: Technology status and a survey of new applications, 94:375 (R;US)
Product evaluation of in situ vitrification engineering, Test 4, 94:210 (R;US)
Stabilization of contaminated soils by in situ vitrification, 94:1671 (R;US)
Technical baseline description for in situ vitrification laboratory test equipment, 94:203 (R;US)
Technical issues associated with in situ vitrification of the INEL Subsurface Disposal Area: Volume 1, A systematic approach for identification, prioritization, and closure of technical issues, 94:217 (R;US)
Technical issues associated with in situ vitrification of the INEL Subsurface Disposal Area: Volume 2, Application of technical issues to the Acid Pit, 94:218 (R;US)

Waste Disposal

Commercially available broadband electromagnetic systems for US Department of Energy waste-site characterization, 94:677 (R;US)
Determining the number of samples required for decisions concerning remedial actions at hazardous waste sites, 94:1804 (R;US)
Hanford Site Environmental Restoration and Waste Technology Plan: Calendar year 1990, 94:1005 (R;US)
Material properties data and volume estimate of silt loam soil at the NRDWL Reserve, McGee Ranch, 94:2525 (R;US)
Quality control requirements for field methods: Revision 1, 94:1836 (R;US)

Test plan for ISV laboratory-pyrolysis testing, 94:839 (R;US)
Treatability study for WAG 6 (SWSA 6) trench water, 94:1969 (R;US)
Y-12 Environmental Restoration Remedial Action Surveillance and Maintenance program plan, Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:563 (R;US)

Waste Forms

Technical area status report for low-level mixed waste final waste forms: Volume 2, Appendices, 94:725 (R;US)

Waste Management

DOE In Situ Remediation Integrated Program: In situ manipulation technologies subprogram plan, 94:2618 (R;US)
Environmental Restoration and Waste Management site specific plan for DOE-ID: Overview, 94:672 (R;US)
Hazardous Waste Remedial Actions Program: Annual progress report for the period ending September 30, 1989, 94:1837 (R;US)
Methodology and data used for estimating the complex-wide impacts of alternative environmental restoration clean-up goals, 94:398 (R;US)
Overview of FY92/FY93 waste component recycle, treatment, and disposal integrated demonstration (WeDID) activities, 94:977 (R;US)
Overview of waste component recycle, treatment, and disposal integrated demonstration (WeDID) activities, 94:978 (R;US)
Pollution prevention opportunity assessment benchmarking: Recommendations for Hanford, 94:534 (R;US)
Recycle and treatment approaches for weapon components, 94:980 (R;US)
Scaling of silent electrical discharge reactors for hazardous organics destruction, 94:878 (R;US)
Strategic plan for the utilization of remote sensing technologies in the environmental restoration program, 94:2201 (R;US)
Waste management '90: Working towards a cleaner environment: Waste processing, transportation, storage and disposal, technical programs and public education: Volume 1, Overview and general waste management: Proceedings, 94:29 (R;US)
Waste minimization at the Department of Energy's Hanford Site, 94:1136 (R;US)

Waste Processing

An overview of in situ waste treatment technologies, 94:800 (R;US)
Development studies for a novel wet oxidation process, 94:716 (R;US)
Environmental assessment for Retech, Inc.'s Plasma Centrifugal Furnace Evaluation, 94:637 (R;US)
Hazardous waste treatment and environmental remediation research, 94:289 (R;US)
Hazardous waste treatment facility and skid-mounted treatment systems at Los Alamos, 94:875 (R;US)
Preliminary conceptual design for the destruction of organic/ferrocyanide constituents in the Hanford tank waste with low-temperature hydrothermal processing, 94:1397 (R;US)
Preliminary cost comparison of advanced oxidation processes, 94:862 (R;US)
Public acceptability of the use of gamma rays from spent nuclear fuel as a hazardous waste treatment process, 94:785 (R;US)
Solidification of waste sludges using microwave heating, 94:860 (R;US)
The Hybrid Treatment Process for mixed radioactive and hazardous waste treatment, 94:969 (R;US)
Thermal treatment technology study and data base for Department of Energy mixed waste, 94:859 (R;US)

Waste Retrieval

Single-shell tank waste retrieval study, 94:1456 (R;US)

Waste Storage

Decision analysis for INEL hazardous waste storage, 94:828 (R;US)
Hazardous waste storage facility accident scenarios for the U.S. Department of Energy Environmental Restoration and Waste Management Programmatic Environmental Impact Statement, 94:579 (R;US)

HAZARDOUS MATERIALS

Waste Storage

Revised RCRA Closure Plan for the Interim Drum Yard (S-030) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Revision of Y/TS-347/1R3, 94:2029 (R;US)

Waste Transportation

Application of United States Department of Transportation regulations to hazardous material and waste shipments on the Hanford Site, 94:1154 (R;US)

Functional requirements for the Liquid Waste Transfer and Distribution Station at Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1982 (R;US)

Hazardous waste shipment data collection from DOE sites, 94:805 (R;US)

Hazardous waste transportation risk assessment for the US Department of Energy Environmental Restoration and Waste Management Programmatic Environmental Impact Statement – human health endpoints, 94:1783 (R;US)

Is radioactive mixed waste packaging and transportation really a problem, 94:1156 (R;US)

Offsite hazardous waste shipment data collection, 94:704 (R;US)

Work plan for the removal and subsequent management of specific waste from David Witherspoon, Inc., Knoxville, Tennessee: Environmental Restoration and Waste Management Programs, 94:1855 (R;US)

Wet Oxidation Processes

Development studies for a novel wet oxidation process, 94:716 (R;US)

HAZARDS

HIGH-LEVEL RADIOACTIVE WASTES

Calcination

Physical and chemical characteristics of fluorinel/sodium calcine generated during 30 cm Pilot-Plant Run 17, 94:1242 (R;US)

Chemical Analysis

An approach for sampling solid heterogeneous waste at the Hanford Site waste receiving and processing and solid waste projects, 94:1192 (R;US)

An approach to molecular characterization of Hanford Site waste tanks, 94:1606 (R;US)

Assay development status report for total cyanide, 94:1091 (R;US)

Measurement of ferrocyanides and oxyanions in waste sludges by Fourier transform infrared reflection methods, 94:1601 (R;US)

Noble metal behavior during melting of simulated high-level nuclear waste glass feeds, 94:1387 (R;US)

Recent results from characterization of ferrocyanide wastes at the Hanford Site, 94:1622 (R;US)

Strategy plan for management of Hanford tank wastes: Revision 1: Draft, 94:1493 (R;US)

Tank 241-T-111 Core 31 and Core 33 summary results, 94:1566 (R;US)

Tank characterization report for single-shell tank 241-U-110: Revision 1, 94:1095 (R;US)

Chemical Composition

Waste tank properties and contents program plan: Waste Tank Safety Program, 94:1467 (R;US)

Chemical Properties

Characterization and reaction behavior of ferrocyanide simulants and Hanford Site high-level ferrocyanide waste, 94:1653 (R;US)

Criticality

Upgrade activities for the Criticality Safety Program of Hanford High-Level Radioactive Waste Tank Farm, 94:1510 (R;US)

Drainage

Ferrocyanide Safety Program: Waste tank sludge rheology within a hot spot or during draining: Homogeneous flow versus flow through a porous medium, 94:1539 (R;US)

Extraction Chromatography

Evaluation of solid-based separation materials for the pretreatment of radioactive wastes, 94:947 (R;US)

Ferrocyanides

Ferrocyanide tank waste stability: Supplement 2, 94:1455 (R;US)

Fire Hazards

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 5, 94:1551 (R;US)

Flammability

Flammable gas safety issue review tank 241-SY-101, 94:1515 (R;US)

Hanford ferrocyanide reactivity: Effects of other tank constituents, 94:1383 (R;US)

Functional Models

Hanford single-shell tank waste-preliminary pretreatment testing of simulated waste, 94:1375 (R;US)

Gamma Spectrometers

Application of a CdTe gamma-ray spectrometer to remote characterization of high-level radioactive waste tanks, 94:1582 (R;US)

Gamma Spectroscopy

Distributions of 14 elements into 10 liquid extractants from simulated acid-dissolved sludge and acidified supernate solutions of Hanford high-level waste, 94:1346 (R;US)

Ground Disposal

An overview of progress made toward resolving priority one safety issues: Fiscal year 1992, 94:1520 (R;US)

Flammable gas safety issue review tank 241-SY-101, 94:1515 (R;US)

Regulatory analysis for closure of a treatment and storage tank as a landfill, 94:1767 (R;US)

Tank 241-T-111 Core 31 and Core 33 summary results, 94:1566 (R;US)

Tank Farms Restoration and Upgrades Program Plan: Revision 1, 94:1465 (R;US)

Health Hazards

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 7, 94:1553 (R;US)

Limited field investigation report for the 100-BC-1 Operable Unit, 94:2177 (R;US)

In-Situ Processing

In situ vitrification of a mixed-waste contaminated soil site: The 116-B-6A crib at Hanford: CERCLA treatability test report, 94:2345 (R;US)

Infrared Thermography

Infrared scanner parametric test using heated simulant tank waste, 94:1618 (R;US)

Inventories

Miscellaneous information regarding operation and inventory of 618-11 Burial Ground, 94:1118 (R;US)

Tank farm surveillance and waste status summary report for March 1990, 94:1406 (R;US)

Leaks

- Analysis of ICPP tank farm infiltration, 94:1665 (R;US)

LINERS

- Cost effectiveness analysis of the SEAMIST™ membrane system technology, 94:881 (R;US)
- Gamma scans in the annulus of Tank 241-SY-101, 94:1483 (R;US)
- In situ testing to determination field-saturated hydraulic conductivity of UMTRA Project disposal cell covers, liners, and foundation areas: Special study, 94:1697 (R;US)
- Modeling unsteady-state VOC transport in simulated waste drums: Revision 1, 94:827 (R;US)

LIQUID EFFLUENTS

- See LIQUID WASTES

LIQUID WASTES

- See also WASTE WATER

Acid Neutralizing Capacity

- Computational analysis of fluid flow and zonal deposition in ferrocyanide single-shell tanks: Ferrocyanide Safety Program, 94:1362 (R;US)

Biodegradation

- Kinetics of in situ bioremediation of Hanford groundwater, 94:379 (R;US)

Chemical Analysis

- Facility effluent monitoring plan for the 2724-W Protective Equipment Decontamination Facility, 94:1047 (R;US)
- Hanford Environmental Analytical Methods (methods of March 1990): Volume 1, 94:940 (R;US)
- Hanford environmental analytical methods, methods as of March 1990: Appendix A2-R, 94:943 (R;US)
- Liquid effluent study characterization data, 94:2457 (R;US)
- Waste Characterization Data Manual for the inactive liquid low-level waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:744 (R;US)

Chemical Effluents

- Evaluation of 241 AN tank farm flammable gas behavior, 94:1540 (R;US)

Contamination

- Reverse osmosis applications to low-level radioactive waste, 94:483 (R;US)

Decontamination

- Removal of dissolved and suspended radionuclides from Hanford Waste Vitrification Plant liquid wastes, 94:1137 (R;US)

Environmental Effects

- Groundwater impact assessment for the 216-U-17 Crib, 200 West Area, 94:459 (R;US)
- Groundwater impact assessment report for the 100-D Ponds, 94:460 (R;US)
- Groundwater impact assessment report for the 216-Z-20 Crib, 200 West Area, 94:462 (R;US)
- Groundwater impact assessment report for the 400 Area ponds, 94:451 (R;US)

Evaporation

- In-tank evaporator demonstrations during 1990/1991 at the ORNL Melton Valley Storage Tanks, 94:916 (R;US)

Fluid Flow

- Computational analysis of fluid flow and zonal deposition in ferrocyanide single-shell tanks: Ferrocyanide Safety Program, 94:1362 (R;US)

Ground Disposal

- Analysis of proposed postclosure alternatives for the Bear Creek Burial Grounds at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:2027 (R;US)
- Draft postclosure permit application for Bear Creek hydrogeologic regime at the Oak Ridge Y-12 Burial Grounds Hazardous Waste Disposal Unit: Environmental restoration program, 94:2031 (R;US)

In-Situ Processing

- Kinetics of in situ bioremediation of Hanford groundwater, 94:379 (R;US)
- Use of a mathematical model for prediction of optimum feeding strategies for in situ bioremediation, 94:2369 (R;US)

Information

- Expert system for liquid low-level waste management, 94:601 (R;US)

Monitoring

- Facility Effluent Monitoring Plan for the 222-S Laboratory, 94:1065 (R;US)
- Facility Effluent Monitoring Plan for the 242-A Evaporator, 94:1036 (R;US)
- Facility Effluent Monitoring Plan for the 284-E and 284-W power plants, 94:1048 (R;US)
- Facility Effluent Monitoring Plan for the N Reactor, 94:1063 (R;US)
- Facility effluent monitoring plan for the 300 Area Fuels Fabrication Facility, 94:1070 (R;US)
- Facility effluent monitoring plan for the 340 waste handling facility, 94:1043 (R;US)
- Facility effluent monitoring plan for the B Plant, 94:1038 (R;US)
- Facility effluent monitoring plan for the T Plant, 94:1067 (R;US)
- Facility effluent monitoring plan for the plutonium finishing plant, 94:1061 (R;US)
- Facility effluent monitoring plan for the plutonium-uranium extraction facility, 94:1040 (R;US)
- Facility effluent monitoring plan for the tank farms facilities, 94:1064 (R;US)
- Facility effluent monitoring plan for the uranium trioxide facility, 94:1044 (R;US)
- Groundwater impact assessment report for the 400 Area ponds, 94:451 (R;US)
- Upgrade of level instruments in inactive liquid low-level waste tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:1348 (R;US)

Packaging

- Issues and design concepts for high-activity liquid packaging, 94:1654 (R;US)

Packaging development needs to support environmental restoration, 94:507 (R;US)

Physical Properties

Conceptual models for waste tank mechanistic analysis: Status report, January 1991, 94:1351 (R;US)

Radiation Monitoring

Liquid effluent study characterization data, 94:2457 (R;US)

Radioactive Waste Disposal

Evaluation of historical and analytical data on the TAN TSF-07 Disposal Pond, 94:1952 (R;US)

Westinghouse Hanford Company effluent discharges and solid waste management report for calendar year 1989: 200/600 Areas, 94:1004 (R;US)

Radioactive Waste Processing

Hanford Tank Waste Remediation Systems (TWRS) Waste Pre-treatment Program strategy and issues, 94:1648 (R;US)

Idaho Chemical Processing Plant Liquid Effluent Treatment and Disposal Facility hot test report, 94:1243 (R;US)

Radolysis

AIRSOURC code aerosol model in radioactive waste tanks, 94:1652 (R;US)

Removal

Robotic system for decommissioning the Gunite tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2047 (R;US)

Sampling

Facility effluent monitoring plan for the 340 waste handling facility, 94:1043 (R;US)

Liquid effluent study characterization data, 94:2457 (R;US)

Waste Characterization Data Manual for the inactive liquid low-level waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:744 (R;US)

Solidification

Feasibility study on the solidification of liquid low-level radioactive mixed waste in the inactive tank system at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:896 (R;US)

Treatability study for the bench-scale solidification of nonincinerable LDR low-level mixed waste, 94:823 (R;US)

Viscosity

Effect of viscosity on seismic response of waste storage tanks, 94:1292 (R;US)

Vitrification

Cost performance assessment of in situ vitrification, 94:293 (R;US)

Inspection

Design considerations for an intelligent mobile robot for mixed-waste inspection, 94:2077 (R;US)

Inventories

DOE's mixed waste inventory and waste generation rates, 94:968 (R;US)

Development and demonstration of treatment technologies for the processing of US Department of Energy Mixed Waste, 94:934 (R;US)

GTCC LLW mixed waste assessment final report: National low-level waste management program, 94:700 (R;US)

Inventory and characteristics of current and projected low-level radioactive materials and waste in the United States, 94:632 (R;US)

Miscellaneous information regarding operation and inventory of 618-11 Burial Ground, 94:1118 (R;US)

US Department of Energy interim mixed waste inventory report: Waste streams, treatment capacities and technologies: Volume 3, Site specific—Illinois through New York (Waste mixtures of hazardous wastes and low-level radioactive wastes or transuranic wastes.), 94:737 (R;US)

US Department of Energy interim mixed waste inventory report: Waste streams, treatment capacities and technologies: Volume 4, Site specific—Ohio through South Carolina (Waste mixtures of hazardous wastes and low-level radioactive wastes or transuranic wastes.), 94:738 (R;US)

Leaching

In situ electrochemical characterization of grouted radioactive waste, 94:1169 (R;US)

Surface radiological investigations of Trench 6 and low-level waste Line Leak Site 7.4b at the Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2247 (R;US)

Minimization

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 6, 94:1552 (R;US)

Proceedings of the US Department of Energy Office of Environmental Restoration and Waste Management waste reduction workshop 4, 94:1322 (R;US)

Monitoring

Upgrade of level instruments in inactive liquid low-level waste tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:1348 (R;US)

Packaging

Conceptual design for the Waste Receiving and Processing facility Module 2A: Conceptual Design Report: Volume 1, 94:777 (R;US)

Greater-than-Class C low-level radioactive waste shipping package/container identification and requirements study: National Low-Level Waste Management Program, 94:712 (R;US)

Low specific activity and surface-contaminated objects determinations key to managing low-level wastes, 94:1189 (R;US)

Production

DOE's mixed waste inventory and waste generation rates, 94:968 (R;US)

Greater-than-Class C low-level radioactive waste characterization: Estimated volumes, radionuclide activities, and other characteristics: Greater-Than-Class C Low-Level Waste Management Program, 94:685 (R;US)

Qualitative Chemical Analysis

Nondestructive assay of boxed radioactive waste, 94:1167 (R;US)

Radiation Monitoring

Waste management plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2262 (R;US)

Radioactive Waste Disposal

1991 State-by-state assessment of low-level radioactive wastes received at commercial disposal sites: National Low-Level Waste Management Program, 94:1706 (R;US)

1992 annual report on low-level radioactive waste management progress: Report to Congress in response to Public Law 99-240, 94:660 (R;US)

A preliminary evaluation of alternatives for disposal of INEL low-level waste and low-level mixed waste, 94:825 (R;US)

Active sites environmental monitoring program: Annual report FY 1992, 94:347 (R;US)

An overview of commercial low-level radioactive waste disposal technology, 94:791 (R;US)

Assessing the performance of the saltstone wasteform at the Savannah River Site, 94:600 (R;US)

Buried Waste Integrated Demonstration: Selection of potential demonstration locations, 94:204 (R;US)

Co-disposal of mixed waste materials, 94:1207 (R;US)

Considerations for closure of low-level radioactive waste engineered disposal facilities, 94:691 (R;US)

DOE site performance assessment activities: Radioactive Waste Technical Support Program, 94:682 (R;US)

Economics of a small-volume low-level radioactive waste disposal facility, 94:707 (R;US)

Effectiveness of processes applied to the remediation of mixed transuranic wastes: Foreign trip report, September 28–October 16, 1993, 94:2581 (R;US)

Environmental Monitoring Plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1864 (R;US)

Environmental assessment for the decommissioning and decontamination of contaminated facilities at the Laboratory for Energy-Related Health Research University of California, Davis, 94:1825 (R;US)

Estimating costs of low-level radioactive waste disposal alternatives for the Commonwealth of Massachusetts, 94:787 (R;US)

Evaluation of Department of Energy-held potential Greater-Than-Class C Low-Level Radioactive Waste: National Low-Level Waste Management Program: Final draft, 94:698 (R;US)

Feasibility study report for the 200-BP-1 operable unit: Revision 1, 94:1919 (R;US)

Field Operations Procedures Manual for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2264 (R;US)

Greater-than-Class C Low-Level Radioactive Waste Program 1992 baseline strategy, 94:709 (R;US)

Hydrogeologic data for science trench boreholes at the Area 5 Radioactive Waste Management Site, Nevada Test Site, Nye County, Nevada, 94:126 (R;US)

Identification of permit and waste acceptance criteria provisions requiring modification for acceptance of commercial mixed waste: National Low-Level Waste Management Program, 94:714 (R;US)

In-situ grouting of the low-level radioactive waste disposal silos at ORNL's Solid Waste Storage Area Six, 94:921 (R;US)

Low-level and transuranic waste transportation, disposal, and facility decommissioning cost sensitivity analysis, 94:223 (R;US)

Low-level radioactive mixed waste land disposal facility – Permanent disposal, 94:1193 (R;US)

Low-level radioactive waste disposal facility fee schedules, 94:705 (R;US)

Master Safety Analysis Report (SAR) approach for solid waste treatment, storage, and disposal facilities, 94:511 (R;US)

Miscellaneous information regarding operation and inventory of 618-11 Burial Ground, 94:1118 (R;US)

Mix ratio measurements of pozzolanic blends by Fourier transform infrared-attenuated total reflectance method, 94:1130 (R;US)

LOW-LEVEL RADIOACTIVE WASTES

Radioactive Waste Disposal

Nevada Test Site defense waste acceptance criteria, certification, and transfer requirements: Revision 1, 94:887 (R;US)

Oak Ridge low-level waste disposal facility designs, 94:598 (R;US)

Overview of tumulus design, construction, and operating experience, 94:597 (R;US)

Performance assessment handbook for low-level radioactive waste disposal facilities, 94:692 (R;US)

Performance assessment review guide for DOE low-level radioactive waste disposal facilities, 94:681 (R;US)

Performance of a feasibility study for remediation of WAG 6 at Oak Ridge National Laboratory, 94:610 (R;US)

Pilot uranium lysimeter studies at the Oak Ridge Y-12 plant, 94:357 (R;US)

Preliminary report on the ecological assessment of Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2256 (R;US)

RCRA closure experience with radioactive mixed waste in the 183-H Solar Evaporation Basins at the Hanford Site, 94:2009 (R;US)

Results of groundwater quality assessment program at Low-Level Waste Management Area 3 of the low-level burial grounds, 94:535 (R;US)

Results of two- and three-dimensional groundwater flow modeling for the design criteria studies in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:332 (R;US)

Reverse osmosis applications to low-level radioactive waste, 94:483 (R;US)

Status of performance assessment studies for the disposal of low-level radioactive waste in the 218-W-5 Burial Ground, 200 West Area, Hanford Site, 94:1149 (R;US)

Summary of expenditures of rebates from the low-level radioactive waste surcharge escrow account for calendar year 1992, 94:650 (R;US)

Summary of expenditures of rebates from the low-level radioactive waste surcharge escrow account for calendar year 1991: Report to Congress in response to Public Law 99-240, 94:648 (R;US)

Summary of expenditures of rebates from the low-level radioactive waste surcharge escrow account for calendar year 1990: Report to Congress in response to Public Law 99-240, 94:646 (R;US)

Surveillance and maintenance plan for Waste Area Groupings at Oak Ridge National Laboratory, Oak Ridge, Tennessee, for FY 1993-2002: Environmental Restoration Program, 94:1971 (R;US)

Systems Engineering Plan and project record Configuration Management Plan for the Mixed Waste Disposal Initiative, 94:852 (R;US)

Tank Waste Disposal Program redefinition, 94:1491 (R;US)

Technical and economic evaluation of selected technologies of the Landfill Characterization System, 94:1764 (R;US)

Removal

Baseline risk assessment for groundwater contamination at the uranium mill tailings site near Monument Valley, Arizona: Draft, 94:63 (R;US)

Site-specific analysis of radiological and physical parameters for cobbly soils at the Gunnison, Colorado, processing site, 94:66 (R;US)

Site Characterization

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix C to Attachment 3, calculations: Preliminary final, 94:1686 (R;US)

Stabilization

An assessment of plant biointrusion at the Uranium Mill Tailings Remedial Action Project rock-covered disposal cells, 94:1942 (R;US)

An evaluation of the results of alluvial groundwater sampling from 1987–1990 at the Durango disposal site, 94:146 (R;US)

Annual status report on the Uranium Mill Tailings Remedial Action Program, 94:102 (R;US)

Bentonite-amended soils special study: Phase 2 evaluation report, 94:1944 (R;US)

DECHEM: A remedial planning tool for metallic contaminants in soil at UMTRA Project sites: Final report and users' guide, 94:1940 (R;US)

Environmental assessment of remedial action at the Maybell uranium mill tailings site near Maybell, Colorado, 94:1815 (R;US)

Environmental assessment of remedial action at the Slick Rock uranium mill tailings sites Slick Rock, Colorado: Draft, 94:98 (R;US)

Miscellaneous radioactive materials detected during uranium mill tailings surveys, 94:2330 (R;US)

Public Participation Plan, 94:1820 (R;US)

Radiological audit of remedial action activities at the processing site, transfer site, and Cheney disposal site Grand Junction, Colorado: Audit date, August 9–11, 1993: Final report, 94:2161 (R;US)

Remedial Action Plan and final design for stabilization of the inactive uranium mill tailings at Green River, Utah: Volume 3, Appendix F, Final design, specifications, and drawings: Final report, 94:1733 (R;US)

Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Rifle, Colorado: Volume 1, Text: Appendices A, B, and C: Final report, 94:1713 (R;US)

Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Remedial action selection report: Revised final report, 94:1707 (R;US)

Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Attachment 5, Dewatering report: Revised final report, 94:1711 (R;US)

Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 2, Geology report, 94:1675 (R;US)

Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 4, Water resources protection strategy, 94:1680 (R;US)

Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 3, Groundwater hydrology report, 94:1676 (R;US)

Remedial action plan and final design for stabilization of the inactive uranium mill tailings at Green River, Utah: Volume 2A, Appendix D, Supplement, site characterization, Appendix E, Groundwater protection strategy: Final report, 94:1732 (R;US)

Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Ambrosia Lake,

New Mexico: Volume 1, Text, Appendices A, B, and C: Final report, 94:1741 (R;US)

Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Ambrosia Lake, New Mexico: Volume 2, Appendices D and E: Final, 94:1742 (R;US)

Remedial action plan and site design for stabilization of the inactive Uranium Mill Tailings Site at Lowman, Idaho: Attachment 1, Specifications and design drawings, LOW; Subcontract Documents: Bid schedule, special conditions, specifications, subcontract drawings: Final design for construction, Appendix B of the Cooperative Agreement, 94:1738 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Remedial action selection report, Appendix B, 94:60 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lakeview, Oregon: Volume 3, Attachments A and B to Appendix F: Final report: Revision 1, 94:1728 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix C to Attachment 3, Calculations, 94:1679 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado: Final report: Volume 3, Appendix F, Final design, specifications, and drawings, 94:1715 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado: Volume 2, Appendices D and E: Final report, 94:1714 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lakeview, Oregon: Volume 2, Appendices E through G: Final report: Revision 1, 94:1727 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix B to Attachment 3, Lithologic logs, 94:1678 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lowman, Idaho: Attachment 2, Geology report: Final report, 94:1736 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lowman, Idaho: Remedial action selection report for the Lowman UMTRA project site, Idaho: Final report, 94:1734 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado: Volume 5, Addenda D6-D8 to Appendix D: Final report, 94:1717 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Tuba City, Arizona: Text, Appendices A, B, and C: Final report, 94:1744 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lakeview, Oregon: Volume 1, Text and appendices A through D: Final report: Revision 1, 94:1726 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix A to Attachment 3, Tables, 94:1677 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado: Final report: Volume 4, Addenda D1-D5 to Appendix D, 94:1716 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Remedial action selection report, Attachment 2, Geology report: Preliminary final, 94:1693 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix A of Attachment 3, Calculations: Preliminary final, 94:1695 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Attachment 3, Groundwater hydrology report, Attachment 4, Water resources protection strategy: Preliminary final, 94:1694 (R;US)

UMTRA Project Office Records Management Plan, 94:1688 (R;US)

Underground Disposal

Neutron moisture monitoring (NMM) and moisture contents in the Green River, Utah, UMTRA disposal cell (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:149 (R;US)

Groundwater quality sampling and analysis plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2263 (R;US)

Summary report of the drilling technologies tested at the Integrated Demonstration Project for cleanup of organic contaminants in soils and groundwater at non-arid sites, 94:558 (R;US)

Surface acoustic wave sensing of VOCs in harsh chemical environments, 94:2396 (R;US)

Nonradioactive Waste Management

Corrective action strategy for single-shell tanks containing organic chemicals, 94:1533 (R;US)

Oxidation

Acid digestion demonstration (WeDID), 94:1105 (R;US)

Demonstration test and evaluation of Ultraviolet/Ultraviolet Catalyzed Peroxide Oxidation for Groundwater Remediation at Oak Ridge K-25 Site: Final report [March 16, 1993–March 16, 1994], 94:131 (R;US)

Ozonization

Laboratory testing of ozone oxidation of Hanford Site waste from Tank 241-SY-101, 94:1537 (R;US)

Pyrolysis

Energy and costs scoping study for plasma pyrolysis thermal processing system, 94:220 (R;US)

Test plan for ISV laboratory-pyrolysis testing, 94:839 (R;US)

Radiolysis

Status and integration of the gas generation studies performed for the Hydrogen Safety Program: FY 1993, Annual report, 94:1373 (R;US)

Remedial Action

Characterization of the geology, geochemistry, and microbiology of the radio frequency heating demonstration site at the Savannah River Site, 94:2533 (R;US)

Travel to Karlsruhe, Germany to exchange information on the in situ destruction of volatile organic compounds: Foreign trip report, February 10–16, 1992, 94:2592 (R;US)

Removal

Management Plan: Demonstration testing and evaluation of in situ soil heating, 94:132 (R;US)

Office of Technology Development integrated program for development of in situ remediation technologies, 94:382 (R;US)

Phase 1 involvement for potential stakeholders of the VOC-Arid Integrated Demonstration, 94:946 (R;US)

X-231B technology demonstration for in situ treatment of contaminated soil: Laboratory evaluation of in situ vapor stripping, 94:359 (R;US)

Research Programs

Technology projects for characterization–monitoring of volatile organic compounds (VOCs), 94:2210 (R;US)

Risk Assessment

Screening of contaminants in Waste Area Grouping 2 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:311 (R;US)

Storage

Modeling VOC transport in simulated waste drums, 94:826 (R;US)

Thermal Degradation

Test plan for ISV laboratory-pyrolysis testing, 94:839 (R;US)

Toxicity

Comparative evaluation of several small mammal species as monitors of heavy metals, radionuclides, and selected organic compounds in the environment, 94:2319 (R;US)

Toxicological benchmark for screening of potential contaminants of concern for effects on aquatic biota on the Oak Ridge Reservation, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2258 (R;US)

Volatile Matter

Well venting and application of passive soil vapor extraction at Hanford and Savannah River, 94:525 (R;US)

Volatility

Crosswell seismic imaging of an in-situ air stripping waste remediation process, 94:404 (R;US)

Waste Disposal

Quality control requirements for field methods: Revision 1, 94:1836 (R;US)

Waste Processing

Treating contaminated organics using the DETOX process, 94:876 (R;US)

Waste Storage

VOC transport in vented drums containing simulated waste sludge, 94:829 (R;US)

Waste Transportation

VOC transport in vented drums containing simulated waste sludge, 94:829 (R;US)

ORGANIC HALOGEN COMPOUNDS

See also ORGANIC CHLORINE COMPOUNDS

ORGANIC HALOGEN COMPOUNDS

Oxidative degradation of trichloroethylene adsorbed on active carbons: Use of microwave energy, 94:866 (R;US)

ORGANIC MATTER

Adsorption and desorption of contaminants, 94:55 (R;US)
Organic carbon in Hanford single-shell tank waste, 94:1371 (R;US)
Portable acoustic wave sensors for volatile organic compounds, 94:403 (R;US)
Test plan for ISV laboratory-pyrolysis testing, 94:839 (R;US)

ORGANIC SOLVENTS

CMPO purity tests in the TRUEX solvent using americium-241, 94:1252 (R;US)
Groundwater cleanup and update of the Savannah River Site experience, 94:556 (R;US)

ORGANIC WASTES

Characterization, Monitoring and Sensor Technology Integrated Program, 94:2213 (R;US)
In situ redox manipulation: Enhancement of contaminant destruction and immobilization, 94:389 (R;US)
Report of results of the vapor vacuum extraction test at the Radioactive Waste Management Complex (RWMC) on the Idaho National Engineering Laboratory (INEL) in the state of Idaho, 94:795 (R;US)
Technical review of Molten Salt Oxidation, 94:659 (R;US)
The mixed waste landfill integrated demonstration, 94:1765 (R;US)
Thermal Enhanced Vapor Extraction System, 94:406 (R;US)

ORGANOPHOSPHINIC ACIDS

See PHOSPHINIC ACIDS

ORGDP

Biological Monitoring and Abatement Program for the Oak Ridge K-25 Site, 94:2273 (R;US)
Characterization summary report for pond waste commercial disposal project: Environmental Restoration Program, 94:851 (R;US)
Data evaluation technical memorandum on the K-1407C Retention Basin at the Oak Ridge K-25 Site, Oak Ridge, Tennessee: Environmental Restoration Program, 94:284 (R;US)
Decontamination and decommissioning surveillance and maintenance report for FY 1991: Environmental Restoration Program, 94:1955 (R;US)
Effects of diverse organic contaminants on trichloroethylene degradation by methanotrophic bacteria and methane-utilizing consortia, 94:34 (R;US)
Handling 78,000 drums of mixed-waste sludge, 94:596 (R;US)
Oak Ridge K-25 Site Technology Logic Diagram: Volume 1, Technology evaluation, 94:280 (R;US)
Oak Ridge K-25 Site Technology Logic Diagram: Volume 2, Technology Logic Diagrams, 94:281 (R;US)
Oak Ridge K-25 Site Technology Logic Diagram: Volume 3, Technology evaluation data sheets; Part A, Characterization, decontamination, dismantlement, 94:282 (R;US)
Oak Ridge K-25 Site Technology Logic Diagram: Volume 3, Technology evaluation data sheets; Part B, Remedial action, robotics/automation, waste management, 94:283 (R;US)
Preconceptual design of the gas-phase decontamination demonstration cart, 94:1961 (R;US)
Site descriptions of environmental restoration units at the Oak Ridge K-25 Site, Oak Ridge, Tennessee, 94:285 (R;US)
Surface radiological investigations at White Wing Scrap Yard, Oak Ridge Reservation, Oak Ridge, Tennessee, 94:891 (R;US)

ORNL

Abandoned Wells

Plugging and abandonment plan for wells and coreholes at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:1975 (R;US)

Accelerator Facilities

Annual summary report of the decontamination and decommissioning surveillance and maintenance program at Oak Ridge National Laboratory for period ending September 30, 1991, 94:1974 (R;US)

Buildings

Site Characterization Plan for decontamination and decommissioning of Buildings 3506 and 3515 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2269 (R;US)

Chemical Wastes

Surveillance Plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:335 (R;US)

Decommissioning

Oak Ridge National Laboratory Technology Logic Diagram: Indexes, 94:1983 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Volume 2, Technology Logic Diagram: Part A, Decontamination and Decommissioning, 94:1985 (R;US)

Decontamination

Oak Ridge National Laboratory Technology Logic Diagram: Indexes, 94:1983 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Volume 2, Technology Logic Diagram: Part A, Decontamination and Decommissioning, 94:1985 (R;US)

Environment

RCRA Facility Investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 4, Technical memorandums 06-03A, 06-04A, 06-05A, and 06-08A: Environmental Restoration Program, 94:339 (R;US)

Flood Control

Floodplain and wetlands assessment of the White Oak Creek Embayment, 94:344 (R;US)

Floods

Floodplain and wetlands assessment of the White Oak Creek Embayment, 94:344 (R;US)

Ground Disposal

Underground Storage Tank: Integrated demonstration participant site characteristic summary, 94:1511 (R;US)

Hydrology

Results of two- and three-dimensional groundwater flow modeling for the design criteria studies in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:332 (R;US)

Liquid Wastes

Treatment requirements for decontamination of ORNL low-level liquid waste, 94:908 (R;US)

Low-Level Radioactive Wastes

Treatment requirements for decontamination of ORNL low-level liquid waste, 94:908 (R;US)

Management

Environmental Restoration Program pollution prevention performance measures for FY 1993 and 1994 remedial investigations: Management training manual, 94:264 (R;US)

Property Management

Decontamination and decommissioning surveillance and maintenance report for FY 1991: Environmental Restoration Program, 94:1955 (R;US)

Radioactive Effluents

Water quality monitoring report for the White Oak Creek Embayment: Environmental Restoration Program, 94:324 (R;US)
White Oak Creek Embayment time-critical CERCLA removal action sediment-retention structure: Environmental Restoration Program, 94:345 (R;US)
White Oak Creek embayment sediment retention structure: The Oak Ridge model in action, 94:48 (R;US)

Radioactive Waste Disposal

An innovative approach to multimedia waste reduction: Measuring performance for environmental cleanup projects, 94:853 (R;US)
Overview of tumulus design, construction, and operating experience, 94:597 (R;US)
Surface radiological investigations of Trench 6 and low-level waste Line Leak Site 7.4b at the Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2247 (R;US)

Radioactive Waste Facilities

- Dewatering equipment recommendations for the solids/liquid separation project at Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:894 (R;US)
- Ecological assessment plan for Waste Area Grouping 5, 94:2272 (R;US)
- Field Operations Procedures Manual for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2264 (R;US)
- RCRA Facility Investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 2, Sections 4 through 9: Environmental Restoration Program, 94:337 (R;US)
- RCRA Facility Investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 3, Appendixes 1 through 8: Environmental Restoration Program, 94:338 (R;US)
- Risk assessment calculations using MEPAS, an accepted screening methodology, and an uncertainty analysis for the reranking of Waste Area Groupings at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2249 (R;US)

Radioactive Waste Management

- Detailed leak detection test plan and schedule for the Oak Ridge National Laboratory LLLW active pipelines: Environmental Restoration and Waste Management Programs, 94:745 (R;US)
- Liquid low-level waste generation projections for ORNL in 1993, 94:930 (R;US)
- Oak Ridge National Laboratory Technology Logic Diagram: Volume 1, Technology Evaluation: Part A, Decontamination and Decommissioning, 94:1984 (R;US)
- Site Characterization Plan for the Old Hydrofracture Facility at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2270 (R;US)
- Strategy for upgrade of ORNL treatment facilities to minimize secondary waste generation, 94:615 (R;US)
- Underground storage tank waste characterization needs assessment workshop, 94:1071 (R;US)

Radioactive Waste Processing

- Development of treatment technologies for the processing of US Department of Energy mixed waste, 94:623 (R;US)
- Treatment studies at the Process Waste Treatment Plant at Oak Ridge National Laboratory, 94:903 (R;US)

Radioactive Waste Storage

- Design demonstrations for Category B tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:754 (R;US)
- Design demonstrations for the remaining 19 Category B tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:750 (R;US)
- Federal Facility Agreement plans and schedules for liquid low-level radioactive waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:742 (R;US)
- Implementation of environmental compliance for operating radioactive liquid waste systems at the Oak Ridge National Laboratory, 94:617 (R;US)
- Remediation schedule for inactive liquid low-level waste storage tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:743 (R;US)
- Risk characterization data manual for Category D inactive liquid low-level waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:747 (R;US)
- Risk characterization data manual for Category D inactive liquid low-level waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:746 (R;US)

Radiometric Surveys

- Results of the radiological characterization survey of the Building 7819 Decontamination Facility at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2260 (R;US)

Remedial Action

- An innovative approach to multimedia waste reduction: Measuring performance for environmental cleanup projects, 94:853 (R;US)
- An integrated performance measure for environmental restoration at Oak Ridge National Laboratory, 94:1810 (R;US)
- Annual summary report on the surveillance and maintenance plan for Waste Area Groupings at Oak Ridge National Laboratory for period ending September 30, 1992: Environmental Restoration Program, 94:2259 (R;US)
- Application of the observational approach to environmental restoration at the Oak Ridge National Laboratory, 94:608 (R;US)
- Data Base Management Plan for the remedial investigation of Waste Area Grouping 10, Operable Unit 3, at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2268 (R;US)
- Environmental Restoration Program pollution prevention performance measures for FY 1993 and 1994 remedial investigations, 94:262 (R;US)
- Environmental restoration and management of low-level radioactive and mixed waste at Oak Ridge National Laboratory, 94:636 (R;US)
- Environmental restoration: Oak Ridge National Laboratory perspective, 94:1801 (R;US)
- Environmental, safety, and health plan for the remedial investigation of Waste Area Grouping 10, Operable Unit 3, at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:342 (R;US)
- Guidance document for the preparation of waste management plans for the Environmental Restoration Program at Oak Ridge National Laboratory: Environmental Restoration Program, 94:897 (R;US)
- Health and safety plan for the Remedial Investigation and Site Investigation of Waste Area Grouping 2 at the Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:329 (R;US)
- Interim remedial action work plan for the cesium plots at Waste Area Grouping 13 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1857 (R;US)
- Oak Ridge National Laboratory Technology Logic Diagram: Volume 1, Technology Evaluation: Part C, Waste Management, 94:901 (R;US)
- Oak Ridge National Laboratory Technology Logic Diagram: Volume 2, Technology Logic Diagram: Part C, Waste Management, 94:902 (R;US)
- On-site laboratory support of the Oak Ridge National Laboratory remedial investigation/feasibility study, 94:612 (R;US)
- Performance of a feasibility study for remediation of WAG 6 at Oak Ridge National Laboratory, 94:610 (R;US)
- Quality Assurance Plan for the remedial investigation of Waste Area Grouping 2 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:321 (R;US)
- Second annual report of the Environmental Restoration Monitoring and Assessment Program at Oak Ridge National Laboratory, 94:2261 (R;US)
- Summary of activities of the life cycle costing workshop conducted by the Environmental Restoration Program of Oak Ridge National Laboratory: Environmental Restoration Program, 94:318 (R;US)
- Technology needs for environmental restoration remedial action: Environmental Restoration Program, 94:261 (R;US)
- Waste Management Plan for the Remedial Investigation of Waste Area Grouping 10, Operable Unit 3, at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:898 (R;US)
- Waste management plan for the remedial investigation/feasibility study of Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:343 (R;US)
- Work plan to assess treatment of trench water from Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge,

**ORNL
Remedial Action**

Tennessee: Environmental Restoration Program, 94:317 (R;US)

Site Characterization

Site Characterization Plan for decontamination and decommissioning of Buildings 3506 and 3515 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2269 (R;US)

Underground Storage Tank: Integrated demonstration participant site characteristic summary, 94:1511 (R;US)

WAG 2 remedial investigation and site investigation site-specific work plan/health and safety checklist for the soil and sediment task: Environmental Restoration Program, 94:330 (R;US)

Storage Facilities

Criticality safety studies for the storage of waste from nuclear fuel service in Intercell Storage Wells 2 and 3 of Building 3019, 94:918 (R;US)

Health risk assessment for the Building 3001 Storage Canal at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1972 (R;US)

Surplus Nuclear Facilities

Annual summary report on surveillance and maintenance activities of the surplus contaminated facilities program at Oak Ridge National Laboratory for period ending September 30, 1991, 94:1973 (R;US)

Tanks

Risk-based prioritization for the interim remediation of inactive low-level liquid radioactive waste underground storage tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1347 (R;US)

Waste Disposal

Evaluation of sulfur polymer cement as a waste form for the immobilization of low-level radioactive or mixed waste, 94:933 (R;US)

Waste Management

Active sites environmental monitoring program: Annual report FY 1992, 94:347 (R;US)

Application of the observational approach to environmental restoration at the Oak Ridge National Laboratory, 94:608 (R;US)

Environmental Restoration Program pollution prevention performance measures for FY 1993 and 1994 remedial investigations: Generator training manual, 94:263 (R;US)

Evaluation of sulfur polymer cement as a waste form for the immobilization of low-level radioactive or mixed waste, 94:933 (R;US)

Groundwater level monitoring sampling and analysis plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:333 (R;US)

Groundwater quality sampling and analysis plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2263 (R;US)

Liquid and Gaseous Waste Operations Department annual operating report, CY 1992, 94:922 (R;US)

Modern and Pleistocene climatic patterns in the west, 94:2475 (R;US)

PLUGGING

Well plugging and abandonment plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:314 (R;US)

PLUMES

Application of neural networks to waste site screening, 94:2191 (R;US)

Simulations of infiltration of meteoric water and contaminant plume movement in the vadose zone at single-shell tank 241-T-106 at the Hanford Site, 94:432 (R;US)

PLUTONIUM

Adsorption

Adsorption of plutonium on shallow sediments at the Hanford Site, 94:504 (R;US)

Carcinogenesis

Pilot study risk assessment for selected problems at the Nevada Test Site (NTS), 94:430 (R;US)

Electrostatic Separation

Test plan for electrostatic curtain studies, 94:190 (R;US)

Monitoring

Application of non-radiometric methods to the determination of plutonium: Literature review conducted for the Buried Waste Integrated Program, 94:2211 (R;US)

Precipitation

Disposition of PUREX facility tanks D5 and E6 uranium and plutonium solutions: Final report, 94:1235 (R;US)

Homogeneous precipitations for separations and waste treatment, 94:868 (R;US)

Processing

Addressing mixed waste in plutonium processing, 94:869 (R;US)

Characterization of past and present solid waste streams from the plutonium finishing plant, 94:1086 (R;US)

Plutonium finishing plant wastewater stream-specific report, 94:2433 (R;US)

Production

Deactivation completed at historic Hanford Fuels Laboratory, 94:2021 (R;US)

Legend and legacy: Fifty years of defense production at the Hanford Site, 94:477 (R;US)

Quantitative Chemical Analysis

Application of non-radiometric methods to the determination of plutonium: Literature review conducted for the Buried Waste Integrated Program, 94:2211 (R;US)

High-resolution inductively coupled plasma-atomic emission spectrophotometric analysis of PUREX [Plutonium-Uranium Extraction] head-end solutions, 94:1016 (R;US)

Radiochemical Analysis

Field test of the Rapid Transuranic Monitoring Laboratory, 94:849 (R;US)

Radionuclide Migration

Pilot study risk assessment for selected problems at the Nevada Test Site (NTS), 94:430 (R;US)

Recovery

Integrated unit operations within the Advanced Testing Line for Actinide Separations (ATLAS), 94:867 (R;US)

Removal

Decontamination and decommissioning assessment for the Waste Incineration Facility (Building 232-Z) Hanford Site, [Hanford], WA, 94:1926 (R;US)

Separation Processes

Integrated unit operations within the Advanced Testing Line for Actinide Separations (ATLAS), 94:867 (R;US)

Solubility

Long term plutonium solubility and speciation studies in a synthetic brine, 94:409 (R;US)

Transport

Operational guidance for using DOT-6M/2R packaging, 94:1222 (R;US)

PLUTONIUM 239

Rapid monitoring for transuranic contaminants during buried waste retrieval, 94:188 (R;US)

Westinghouse Hanford Company Environmental Surveillance annual report: 200/600 Areas: Calendar year 1990: Revision 4, 94:2423 (R;US)

Westinghouse Hanford Company environmental surveillance annual report: Calendar year 1991, 94:1079 (R;US)

PLUTONIUM IONS

Separation of actinide ions from radioactive waste solutions using extraction chromatography, 94:1163 (R;US)

PLUTONIUM NITRATES

The chemistry of tributyl phosphate at elevated temperatures in the Plutonium Finishing Plant Process Vessels, 94:1107 (R;US)

- Road Transportable Analytical Laboratory (RTAL) system: Quarterly technical report, December 1992-February 1993, 94:718 (R;US)

Occupational Exposure

Progress toward resolution of vapor problems associated with tank 241-C-103, 94:1642 (R;US)

Radiation Monitoring

- Facility effluent monitoring plan for K Area Fuel Storage Basins, 94:1069 (R;US)
- Facility effluent monitoring plan for the 222-S Laboratory, 94:1066 (R;US)
- Facility effluent monitoring plan for the 284-E and 284-W power plants, 94:1049 (R;US)
- Facility effluent monitoring plan for the Plutonium Finishing Plant: Revision 1, 94:1062 (R;US)
- Facility effluent monitoring plan for the plutonium-uranium extraction facility, 94:1039 (R;US)

Radioactive Waste Disposal

Westinghouse Hanford Company effluent discharges and solid waste management report for calendar year 1989: 200/600 Areas, 94:1004 (R;US)

Radioactive Waste Processing

Secondary wastes and treatment of effluents from leaching of uranium from soils, 94:53 (R;US)

Radionuclide Migration

Evaluation of closure alternatives for the Building 3001 Storage Canal at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:1980 (R;US)

Regulations

Facility Effluent Monitoring Plan for the uranium trioxide facility, 94:1045 (R;US)

Sampling

Facility Effluent Monitoring Plan for the 340 Waste Handling Facility, 94:1042 (R;US)

Stack Disposal

NESHAPs compliance tasks for the PUREX plant, 94:2019 (R;US)

RADIOACTIVE GASEOUS WASTES

See GASEOUS WASTES
RADIOACTIVE WASTES

RADIOACTIVE MATERIALS

See also RADIOACTIVE WASTES

Containment Systems

Contaminated soil stabilization demonstration, 94:500 (R;US)

Environmental Transport

GWSCREEN: A semi-analytical model for assessment of the groundwater pathway from surface or buried contamination: Version 2.0 theory and user's manual, 94:179 (R;US)

In-Situ Processing

In situ vitrification application to buried waste: Final report of intermediate field tests at Idaho National Engineering Laboratory, 94:209 (R;US)

Technical baseline description for in situ vitrification laboratory test equipment, 94:203 (R;US)

Inventories

Material Not Categorized As Waste (MNCWA) data report: Radioactive Waste Technical Support Program, 94:713 (R;US)

Magnetic Materials

High gradient magnetic separation applied to environmental remediation, 94:298 (R;US)

Packaging

International performance-oriented packaging standards adopted in the United States: Status and impact reports, 94:1170 (R;US)

Packaging development needs to support environmental restoration, 94:507 (R;US)

Radioactive material packaging performance testing, 94:1150 (R;US)

Radiation Monitoring

Groundwater quality sampling and analysis plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2263 (R;US)

Radioactive Waste Processing

Treatability study of aqueous, land disposal restricted mixed wastes, 94:822 (R;US)

Recycling

Issues in recycling and disposal of radioactively contaminated materials, 94:582 (R;US)

Remedial Action

Test plan for the field evaluation and demonstration of the Contamination Control Unit, 94:242 (R;US)

Remote Handling

Development and implementation of automated radioactive materials handling systems, 94:2085 (R;US)

Removal

Office of Technology Development integrated program for development of in situ remediation technologies, 94:382 (R;US)

Preliminary evaluation of selected in situ remediation technologies for Volatile Organic Compound contamination at Arid sites, 94:366 (R;US)

Reverse osmosis applications to low-level radioactive waste, 94:483 (R;US)

Road Transport

Motor Carrier Evaluation Program procedure: Revision 2, 94:1015 (R;US)

Motor carrier evaluation program plan: Revision 1, 94:1013 (R;US)

Storage

Material Not Categorized As Waste (MNCWA) data report: Radioactive Waste Technical Support Program, 94:713 (R;US)

Storage Facilities

Maywood Interim Storage Site: Annual environmental report for calendar year 1990, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1878 (R;US)

Transport

Future changes in the transporting of hazardous materials and wastes, 94:1144 (R;US)

Transportation Management Workshop: Proceedings, 94:2064 (R;US)

Transportation institutional considerations of NEPA [National Environmental Policy Act] implementation, 94:1022 (R;US)

Transportation management workshop: Proceedings, 94:2040 (R;US)

Travel to Austria to attend the International Atomic Energy Agency's Technical Committee Meeting on Issues related to Low Specific Activity Materials and Surface Contaminated Objects: Foreign trip report, October 8-16, 1993, 94:2600 (R;US)

Travel to England for conference on nuclear transport systems: Foreign trip report, June 7-10, 1993, 94:2598 (R;US)

Travel to United Kingdom for investigation of the contamination weeping program: Foreign trip report, May 5-11, 1991, 94:2576 (R;US)

Underground Disposal

Remedial Action Plan and final design for stabilization of the inactive uranium mill tailings at Green River, Utah: Volume 1, Text, Appendices A, B, and C: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1731 (R;US)

Underground Storage

Ferrocyanide Safety Program rationale for removing six tanks from the safety watch list, 94:1569 (R;US)

Vitrification

Implementation of in situ vitrification technology for remediation of Oak Ridge contaminated soil sites: Past results and future plans, 94:392 (R;US)

Implementation of in situ vitrification technology for remediation of Oak Ridge contaminated soil sites: Past results and future plans, 94:624 (R;US)

In situ vitrification application to buried waste: Final report of intermediate field tests at Idaho National Engineering Laboratory, 94:209 (R;US)

Stabilization of contaminated soils by in situ vitrification, 94:1671 (R;US)

Technical baseline description for in situ vitrification laboratory test equipment, 94:203 (R;US)

Waste Management

Overview of FY92/FY93 waste component recycle, treatment, and disposal integrated demonstration (WeDID) activities, 94:977 (R;US)

RADIOACTIVE PARTICULATES

See RADIOACTIVE AEROSOLS

RADIOACTIVE WASTE DISPOSAL

Initial performance assessment of the disposal of spent nuclear fuel and high-level waste stored at Idaho National Engineering Laboratory: Volume 1, Methodology and results, 94:986 (R;US)

Preliminary Systems Design Study assessment report: Volume 5, Land disposal compliance and hydrogen generation restricted concepts, 94:199 (R;US)

Preliminary Systems Design Study assessment report: Volume 8, Appendixes (Evaluation of using specific technologies, system concepts for treating the buried waste and the surrounding contaminated soil.), 94:201 (R;US)

Preliminary systems design study assessment report: Volume 3, Process in-place/leave in-place concepts, 94:197 (R;US)

Preliminary systems design study assessment report: Volume 7, Subsystem concepts (Evaluation of using specific technologies, system concepts for treating the buried waste and surrounding contaminated soil.), 94:200 (R;US)

Abandoned Sites

Geophysical survey work plan for White Wing Scrap Yard (Waste Area Grouping 11) at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2265 (R;US)

Meteorological Monitoring Sampling and Analysis Plan for Environmental Monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:334 (R;US)

Containment Systems

A peer review of the Hanford Site Permanent Isolation Surface Barrier Development Program, 94:480 (R;US)

An investigation of berm mounds as analogs to erosion control factors on protective barriers, 94:1761 (R;US)

RADIOACTIVE WASTE DISPOSAL

Cranes

Cranes

Implementation of damped-oscillation crane control for existing ac induction motor-driven cranes, 94:2048 (R;US)

Engineered Safety Systems

Long-Term Climate Change Assessment Task for the Hanford Site Permanent Isolation Barrier Development Program: Status through FY 1992, 94:2482 (R;US)

[Travel to Belgium to attend Workshop on in situ testing of radioactive waste forms and engineered barriers]: Foreign trip report, October 10–17, 1992, 94:2560 (R;US)

Environmental Effects

Groundwater impact assessment report for the 1325-N Liquid Waste Disposal Facility, 94:463 (R;US)

Environmental Impacts

Biological assessment for the remedial action at the chemical plant area of the Weldon Spring site, 94:1790 (R;US)

Groundwater impact assessment report for the 216-U-14 Ditch, 94:470 (R;US)

Evaluation

Preliminary performance assessment strategy for single-shell tank waste disposal, 94:1463 (R;US)

Process for selecting a soil column disposal site to receive treated effluent containing tritium, 94:2497 (R;US)

Feasibility Studies

Permanent isolation surface barrier development plan, 94:461 (R;US)

Geologic Models

Techniques for determining probabilities of geologic events and processes, 94:2382 (B;US)

Health Hazards

Radiological assessment for the dumping of radioactive wastes in the oceans, 94:971 (R;US)

Hearings

Public comments and responses to the 1989 Hanford cleanup five-year plan, 94:1904 (R;US)

Historical Aspects

Characterization of wastes in and around early reactors at the Hanford Site: The use of historical research, 94:1212 (R;US)

Legal Aspects

Evaluation of Department of Energy-held potential Greater-Than-Class C Low-Level Radioactive Waste: National Low-Level Waste Management Program: Final draft, 94:698 (R;US)

Life-Cycle Cost

Waste Management Facilities Cost Information Report, 94:848 (R;US)

Performance

Status of performance assessment studies for the disposal of low-level radioactive waste in the 218-W-5 Burial Ground, 200 West Area, Hanford Site, 94:1149 (R;US)

Performance Testing

Initial performance assessment of the disposal of spent nuclear fuel and high-level waste stored at Idaho National Engineering Laboratory: Volume 2: Appendices, 94:987 (R;US)

Permits

Identification of permit and waste acceptance criteria provisions requiring modification for acceptance of commercial mixed waste: National Low-Level Waste Management Program, 94:714 (R;US)

Radioactive Waste Facilities

1991 annual report on low-level radioactive waste management progress: Report to Congress in response to Public Law 99-240, 94:649 (R;US)

Considerations for closure of low-level radioactive waste engineered disposal facilities, 94:691 (R;US)

Regulations

1993 report on Hanford Site land disposal restrictions for mixed wastes, 94:760 (R;US)

Remedial Action

Accelerated cleanup at the 618-9 Burial Ground, 94:494 (R;US)
Buried Waste Integrated Demonstration test objectives, 94:252 (R;US)

Evaluation of 1985–1986 corrective actions at ORNL liquid waste disposal trench 7, 94:348 (R;US)

Test plan for the Rapid Geophysical Surveyor, 94:2192 (R;US)

Remote Sensing

Survey of fiber-optic sensor for remote sensing in radiologically and chemically harsh environments: Revision 2, 94:1599 (R;US)

Risk Assessment

Preliminary report on the ecological assessment of Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2256 (R;US)

Safety Analysis

Tank 241-C-106 sampling data requirements developed through the data quality objectives (DQO) process, 94:1542 (R;US)

Site Characterization

Geohydrologic evaluation for the 200 Area Effluent Treatment Facility State-Approved Land Disposal Site: Addendum to WAC 173-240 Engineering Report, 94:2511 (R;US)

Hydrogeologic data for science trench boreholes at the Area 5 Radioactive Waste Management Site, Nevada Test Site, Nye County, Nevada, 94:126 (R;US)

Meetings on hydrogeologic studies associated with radioactive waste disposal: Foreign trip report, May 30–June 16, 1992, 94:2569 (R;US)

Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Attachment 2, Geology report: Final report, 94:1719 (R;US)

Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 2, Geology report: Appendix B, Preliminary final, 94:1682 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Remedial Action Selection Report, Appendix B of Attachment 2: Geology report, Final, 94:1690 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix A of Attachment 3: Calculations, Final, 94:1692 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix B of Attachment 3: Groundwater hydrology report, Attachment 4: Water resources protection strategy, Final, 94:1691 (R;US)

[Coordination of work on two-phase flow properties in halite and anhydrite]: Foreign trip report, November 5–18, 1992, 94:2554 (R;US)

Solidification

Sulfur polymer cement, a new stabilization agent for mixed and low-level radioactive waste, 94:1749 (R;US)

Specifications

Characterization summary report for pond waste commercial disposal project: Environmental Restoration Program, 94:851 (R;US)

Standards

Evaluation of alternatives for high-level and transuranic radioactive waste disposal standards, 94:1401 (R;US)

Statistical Models

PORPST: A statistical postprocessor for the PORMC computer code: User's manual, Version 1.0, 94:441 (R;US)

Surcharges

Summary of expenditures of rebates from the low-level radioactive waste surcharge escrow account for calendar year 1992, 94:650 (R;US)

Surveillance

Comment and response document for the long-term surveillance plan for the Collins Ranch Disposal Site Lakeview, Oregon, 94:1816 (R;US)

Tanks

Review of technologies for the pretreatment of retrieved single-shell tank waste at Hanford, 94:1350 (R;US)

Technology Assessment

Permanent isolation surface barrier development plan, 94:461 (R;US)

RADIOACTIVE WASTE FACILITIES

See also WIPP

Site maps and facilities listings, 94:1830 (R;US)

Abandoned Sites

Niagara Falls Storage Site environmental report for calendar year 1992, 1397 Pletcher Road, Lewiston, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1891 (R;US)

Accidents

Overview of the facility accident analysis for the U.S. Department of Energy Environmental Restoration and Waste Management Programmatic Environmental Impact Statement, 94:1780 (R;US)

Biointrusion

Animal intrusion field test plan, 94:2424 (R;US)

Animal intrusion status report for fiscal year 1990, 94:2467 (R;US)

Capacity

Radioactive mixed waste disposal, 94:1172 (R;US)

Charges

Low-level radioactive waste disposal facility fee schedules, 94:705 (R;US)

Chemical Analysis

Integrated sampling and analysis plan for samples measuring >10 mrem/hour, 94:1074 (R;US)

Closures

105-DR Large Sodium Fire Facility closure plan: Revision 1, 94:1902 (R;US)

303-K Radioactive Mixed-Waste Storage Facility closure plan: Revision 1, 94:1899 (R;US)

Considerations for closure of low-level radioactive waste engineered disposal facilities, 94:691 (R;US)

State Environmental Policy Act (SEPA) environmental checklist forms for 304 Concretion Facility Closure Plan: Revision 2, 94:1898 (R;US)

Computerized Control Systems

Overview of the DOE Waste Facilities Operations Robotics Technology Development Program, 94:2121 (R;US)

Construction

Application for approval to construct the Waste Receiving And Processing facility, 94:762 (R;US)

Functional requirements for the Liquid Waste Transfer and Distribution Station at Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1982 (R;US)

Hanford Waste Vitrification Plant process description and plant status, 94:1165 (R;US)

Hanford Waste Vitrification Plant: The project and process systems, 94:1127 (R;US)

Mechanical design of the storage tubes in the Hanford Waste Vitrification Plant Canister Storage Building, 94:1186 (R;US)

Nonradioactive air emissions notice of construction for the Waste Receiving And Processing facility, 94:137 (R;US)

Radioactive air emissions notice of construction for the Waste Receiving And Processing facility, 94:761 (R;US)

Tolerancing requirements for remote handling at the Hanford Waste Vitrification Plant, 94:2118 (R;US)

Containers

Geophysical investigation of 218-W-4C trenches #1 and #4, 200 west, 94:2522 (R;US)

Containment Systems

Functional requirements of the borrow area and haul route for the Waste Area Grouping projects at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:315 (R;US)

Corrosion

Corrosion considerations for life management of Hanford high-level waste tanks, 94:1635 (R;US)

Hanford high-level waste evaporator/crystallizer corrosion evaluation, 94:1636 (R;US)

Cost

Conceptual design for the Waste Receiving And Processing facility Module 2A: Volume 2, Project cost estimate, 94:778 (R;US)

Estimating costs of low-level radioactive waste disposal alternatives for the Commonwealth of Massachusetts, 94:787 (R;US)

Systems engineering study for the closure of single-shell tanks: Draft A, Volume 5, 94:1475 (R;US)

Waste Receiving and Processing Facility Module 2A: Advanced Conceptual Design Report: Volume 2, 94:782 (R;US)

Waste Receiving and Processing Facility, Module 1: Volume 4, Project cost estimate, 94:773 (R;US)

Coverings

Accounting for time-varying vadose-zone water fluxes caused by infiltration caps using the MEPAS transport, exposure, and risk assessment model, 94:2372 (R;US)

Data Acquisition

Generic data acquisition system for robotic waste characterization, 94:2107 (R;US)

Decommissioning

Annual summary report on the Decontamination and Decommissioning Program at the Oak Ridge Y-12 Plant for the period ending September 30, 1992: Environmental Restoration Program, 94:2030 (R;US)

Benefits of integrating decontamination and decommissioning RCRA/CERCLA site cleanup actions at Hanford, 94:518 (R;US)

Decontamination and decommissioning assessment for the Waste Incineration Facility (Building 232-Z) Hanford Site, [Hanford], WA, 94:1926 (R;US)

Department of Energy decontamination and decommissioning project experience, 94:1772 (R;US)

Dewatering equipment recommendations for the solids/liquid separation project at Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:894 (R;US)

Draft postclosure permit application for Bear Creek hydrogeologic regime at the Oak Ridge Y-12 Burial Grounds Hazardous Waste Disposal Unit: Environmental restoration program, 94:2031 (R;US)

Low-level and transuranic waste transportation, disposal, and facility decommissioning cost sensitivity analysis, 94:223 (R;US)

Plugging and abandonment plan for wells and coreholes at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:1975 (R;US)

Postclosure permit application for Bear Creek Hydrogeologic Regime at the Oak Ridge Y-12 Plant S-3 Site, 94:565 (R;US)

RCRA Facility Investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 1, Sections 1 through 3: Environmental Restoration Program, 94:336 (R;US)

RCRA closure experience with radioactive mixed waste in the 183-H Solar Evaporation Basins at the Hanford Site, 94:2009 (R;US)

Decontamination

Annual summary report on the Decontamination and Decommissioning Program at the Oak Ridge Y-12 Plant for the period ending September 30, 1992: Environmental Restoration Program, 94:2030 (R;US)

Benefits of integrating decontamination and decommissioning RCRA/CERCLA site cleanup actions at Hanford, 94:518 (R;US)

Decontamination and decommissioning assessment for the Waste Incineration Facility (Building 232-Z) Hanford Site, [Hanford], WA, 94:1926 (R;US)

Decontamination solution development studies, 94:1989 (R;US)

Department of Energy decontamination and decommissioning project experience, 94:1772 (R;US)

Design

Characterization of mixed CH-TRU waste at Argonne-West: A WIPP project update, 94:2144 (R;US)

Conceptual design for the Waste Receiving and Processing facility Module 2A: Conceptual Design Report: Volume 1, 94:777 (R;US)

Conceptual design for the Waste Receiving and Processing facility Module 2A: Outline specifications: Volume 3, 94:779 (R;US)

Laboratories

A comparative risk evaluation for the siting of a Waste Analysis Laboratory, 94:2495 (R;US)

Leak Testing

Application of intrinsic germanium spectral gamma-ray logging for characterization of high-level nuclear waste tank leaks, 94:1651 (R;US)

Leaks

Tank farm surveillance and waste status summary report for November 1990, 94:1413 (R;US)

Magnetic Surveys

Rapid geophysical surveyor, 94:803 (R;US)

Maintenance

Establishing a predictive maintenance (PdM) program at the Hanford Site, 94:533 (R;US)

Maintenance Implementation Plan for solid waste, 94:1231 (R;US)

Surveillance and maintenance activities of waste area groupings at Oak Ridge National Laboratory: Annual summary report for period ending September 30, 1991: Environmental Restoration Program, 94:312 (R;US)

Surveillance and maintenance plan for Waste Area Groupings at Oak Ridge National Laboratory, Oak Ridge, Tennessee, for FY 1993-2002: Environmental Restoration Program, 94:1971 (R;US)

Mapping

A Remote Characterization System for subsurface mapping of buried waste sites, 94:2370 (R;US)

Electromagnetic survey of the K1070A burial ground at the Oak Ridge K-25 Site, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2214 (R;US)

Technology evaluation report for the Buried Waste Robotics Program Subsurface Mapping Project, 94:2083 (R;US)

Mission Analysis

Functional requirements for the Liquid Waste Transfer and Distribution Station at Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1982 (R;US)

Modifications

Upgrading a 1944 plutonium-extraction plant to a modern decontamination facility, 94:2015 (R;US)

Monitoring

Colonie Interim Storage Site annual environmental report for calendar year 1991, Colonie, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1882 (R;US)

Colonie Interim Storage Site environmental report for calendar year 1992, 1130 Central Avenue, Colonie, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1892 (R;US)

Intelligent mobile sensor system for drum inspection and monitoring: Phase 1: Topical report, October 1, 1992-June 8, 1993, 94:2071 (R;US)

Long-term surveillance plan for the Lowman, Idaho, Disposal site: Revision 1, 94:1819 (R;US)

Occupational Exposure

Design basis personnel exposure estimates for the Hanford Waste Vitrification Plant, 94:1152 (R;US)

Occupational Safety

Mixed and low-level waste treatment project: Appendix C, Health and safety criteria for the mixed and low-level waste treatment facility at the Idaho National Engineering Laboratory: Part 1, Waste streams and treatment technologies, 94:833 (R;US)

Mixed and low-level waste treatment project: Appendix C, Health and safety criteria for the mixed and low-level waste treatment facility at the Idaho National Engineering Laboratory: Part 2, Chemical constituents, 94:834 (R;US)

Operation

Conceptual design for the Waste Receiving and Processing facility Module 2A: System descriptions: Volume 5, 94:780 (R;US)

Expanded public notice: Washington State notice of intent for corrective action management unit, Hanford Environmental Restoration Disposal, 94:1925 (R;US)

Hanford Site Grout Disposal Program interim management plan, 94:1028 (R;US)

Hanford Waste Vitrification Plant Project Waste Form Qualification Program Plan, 94:1072 (R;US)

Maintenance Implementation Plan for the Waste Tank maintenance and production management, 94:1662 (R;US)

Miscellaneous information regarding operation and inventory of 618-11 Burial Ground, 94:1118 (R;US)

Overview of tumulus design, construction, and operating experience, 94:597 (R;US)

Preliminary systems design study assessment report: Volume 7, Subsystem concepts (Evaluation of using specific technologies, system concepts for treating the buried waste and surrounding contaminated soil.), 94:200 (R;US)

Time and motion simulation of the WRAP Module 1 Facility, 94:1197 (R;US)

Upgrading a 1944 plutonium-extraction plant to a modern decontamination facility, 94:2015 (R;US)

Waste Receiving and Processing Facility, Module 1: Volume 6, Engineering assessments, 94:775 (R;US)

Overburden

Test Plan for the overburden removal demonstration, 94:241 (R;US)

Performance

Integration and interpretation of results from performance assessments of low-level radioactive waste disposal facilities, 94:614 (R;US)

Long-term uncertainty in radiological performance assessments of low-level waste facilities at Savannah River Site, 94:603 (R;US)

Performance assessment handbook for low-level radioactive waste disposal facilities, 94:692 (R;US)

Performance assessment review guide for DOE low-level radioactive waste disposal facilities, 94:681 (R;US)

The Department of Energy Performance Assessment Task Team, 94:1147 (R;US)

The United States Department of Energy process for performance assessment for disposal of low-level radioactive waste, 94:1200 (R;US)

Performance Testing

Developing conceptual models for performance assessment of waste management sites, 94:2383 (R;US)

Permit Applications

Postclosure permit application for Bear Creek Hydrogeologic Regime at the Oak Ridge Y-12 Plant S-3 Site, 94:565 (R;US)

Pipelines

Field characterization plan for the 216-U-8 vitrified clay pipeline, 94:2517 (R;US)

Planning

1991 annual report on low-level radioactive waste management progress: Report to Congress in response to Public Law 99-240, 94:649 (R;US)

Report to Congress in response to Public Law 99-240: 1990 Annual report on low-level radioactive waste management progress, 94:647 (R;US)

Process Solutions

Waste Receiving and Processing Facility Module 2A: Advanced Conceptual Design Report: Volume 3A, 94:783 (R;US)

Program Management

Dry Cask Storage Project, conceptual design report and line item proposal for FY-1993: Volume 1, 94:1259 (R;US)

Waste Tank Safety and Operations Program management plan, 94:1501 (R;US)

Quality Assurance

Quality assurance program description: Hanford Waste Vitrification Plant, Part 1: Revision 3, 94:1333 (R;US)

Radiation Monitoring

Annual summary report on the surveillance and maintenance plan for Waste Area Groupings at Oak Ridge National Laboratory for period ending September 30, 1992: Environmental Restoration Program, 94:2259 (R;US)

Surface radiological investigation of Trench 5 in Waste Area Grouping 7 at Oak Ridge National Laboratory, Oak Ridge,

RADIOACTIVE WASTE FACILITIES

Radiation Monitoring

Tennessee: Environmental Restoration Program, 94:2246 (R;US)

Surveillance and maintenance plan for Waste Area Groupings at Oak Ridge National Laboratory, Oak Ridge, Tennessee, for FY 1993-2002: Environmental Restoration Program, 94:1971 (R;US)

Radioactive Waste Management

Department of Energy remedial action program annual conference: Proceedings: Volume 2, Remedial action under the environmental restoration and waste management five-year plan, 94:31 (R;US)

Regulations

Hanford Site radioactive solid waste acceptance criteria, 94:998 (R;US)

Remedial Action

100-D Area technical baseline report, 94:540 (R;US)

200-BP-5 operable unit Technical Baseline report, 94:474 (R;US)

Buried Waste Integrated Demonstration Plan: Revision 1, 94:211 (R;US)

Elevation of surficial sediment/basalt contact in the Subsurface Disposal Area, Idaho National Engineering Laboratory, 94:167 (R;US)

Evaluation of historical and analytical data on the TAN TSF-07 Disposal Pond, 94:1952 (R;US)

Hanford Site surface soil radioactive contamination control plan for fiscal year 1993, 94:448 (R;US)

Hanford Site waste management and environmental restoration integration plan, 94:433 (R;US)

Hanford Site waste management and environmental restoration integration plan: Supplement 1, Level 2 activity networks, 94:434 (R;US)

Hanford Tank Waste Remediation Systems (TWRS) Waste Pretreatment Program strategy and issues, 94:1648 (R;US)

Mixed-waste technology: Research, development, demonstration, testing, and evaluation, 94:606 (R;US)

Multivariate methods in nuclear waste remediation: Needs and applications, 94:374 (R;US)

Niagara Falls Storage Site environmental report for calendar year 1992, 1397 Pletcher Road, Lewiston, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1891 (R;US)

Oak Ridge National Laboratory Technology Logic Diagram: Executive Summary, 94:900 (R;US)

Parametric design studies of long-reach manipulators, 94:2059 (R;US)

Pit 9 project: A private sector initiative, 94:808 (R;US)

Polyethylene encapsulation of single-shell tank low-level wastes: FY-93 interim progress report, 94:592 (R;US)

Preliminary results of a seismic borehole test using downhole shaped charges at the DOE Hanford Site, 94:2510 (R;US)

Preliminary systems design study assessment report: Volume 4, Leach resistant/high integrity structure concepts, 94:198 (R;US)

Recent progress of the waste processing and disposal projects within the Underground Storage Tank-Integrated Demonstration, 94:1313 (R;US)

Remedial investigation for the 200-BP-1 operable unit, Hanford Site, Richland, Washington, 94:2492 (R;US)

St. Louis airport site annual environmental report for calendar year 1990, St. Louis, Missouri: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1879 (R;US)

Summary of the landfill remediation problems and technology needs of the Oak Ridge Reservation Environmental Restoration Programs, 94:1753 (R;US)

Technology Evaluation Workshop Report for Tank Waste Chemical Characterization, 94:1109 (R;US)

Technology development needs summary, FY 1995, 94:2552 (R;US)

Test Plan for the overburden removal demonstration, 94:241 (R;US)

Test plan for the retrieval demonstration, 94:244 (R;US)

The role of the observational approach in RI planning: WAG 5 case study, 94:611 (R;US)

Risk Assessment

Documentation of Hanford Site independent review of the Hanford Waste Vitrification Plant Preliminary Safety Analysis Report: Revision 2, 94:1113 (R;US)

Hanford Waste Vitrification Systems Risk Assessment: Final report supporting information: Part 2, 94:1031 (R;US)

Management of radioactive waste from nuclear power plants, 94:5 (R;US)

Risk assessment calculations using MEPAS, an accepted screening methodology, and an uncertainty analysis for the reranking of Waste Area Groupings at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2249 (R;US)

Safety

Design basis personnel exposure estimates for the Hanford Waste Vitrification Plant, 94:1152 (R;US)

Hanford Waste Vitrification Plant Project Plan: Revision 1, 94:1332 (R;US)

Safety Analysis

Annual summary report on the Decontamination and Decommissioning Program at the Oak Ridge Y-12 Plant for the period ending September 30, 1992: Environmental Restoration Program, 94:2030 (R;US)

Master Safety Analysis Report (SAR) approach for solid waste treatment, storage, and disposal facilities, 94:511 (R;US)

The impact of safety analyses on the design of the Hanford Waste Vitrification Plant, 94:1182 (R;US)

Site Characterization

Cross borehole electromagnetic imaging of chemical and mixed waste landfills, 94:2394 (R;US)

Data evaluation technical memorandum on the K-1407C Retention Basin at the Oak Ridge K-25 Site, Oak Ridge, Tennessee: Environmental Restoration Program, 94:284 (R;US)

Elevation of surficial sediment/basalt contact in the Subsurface Disposal Area, Idaho National Engineering Laboratory, 94:167 (R;US)

Hanford Waste Vitrification Plant Preliminary Safety Analysis Report: Draft, Revision B: Volume 1, 94:1007 (R;US)

Mixed and Low-Level Waste Treatment Facility project: Appendix A, Environmental and regulatory planning and documentation: Draft, 94:830 (R;US)

Preliminary Systems Design Study assessment report: Volume 8, Appendixes (Evaluation of using specific technologies, system concepts for treating the buried waste and the surrounding contaminated soil.), 94:201 (R;US)

Site Selection

A comparative risk evaluation for the siting of a Waste Analysis Laboratory, 94:2495 (R;US)

GIS analysis of the siting criteria for the Mixed and Low-Level Waste Treatment Facility and the Idaho Waste Processing Facility, 94:786 (R;US)

Specifications

Functional requirements baseline for the closure of single-shell tanks: Draft, 94:1452 (R;US)

Radioactive waste shipments to Hanford retrievable storage from Babcock and Wilcox, Leechburg, Pennsylvania, 94:1106 (R;US)

Stability

Long-Term Climate Change Assessment Task for the Hanford Site Permanent Isolation Barrier Development Program: Status through FY 1992, 94:2482 (R;US)

Stabilization

National emission standards for hazardous air pollutants application for approval to stabilize the 105N Basin, 94:771 (R;US)

Surveillance

Long-term surveillance plan for the Collins Ranch Disposal Site, Lakeview, Oregon: Revision 2, 94:1817 (R;US)

Long-term surveillance plan for the Lowman, Idaho, disposal site, 94:1818 (R;US)

Surveys

Technology evaluation report for the Buried Waste Robotics Program Subsurface Mapping Project, 94:2083 (R;US)

Technology Assessment

Elements of uncertainty in a radiological performance assessment of a Saltstone Disposal Facility for low level waste, 94:599 (R;US)

Water Influx

Benchmark and partial validation testing of the FLASH computer code, Version 3.0, 94:169 (R;US)

Well Logging

RCRA Facility investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 6, Technical memorandums 06-13, 06-14, and 06-15: Environmental Restoration Program, 94:341 (R;US)

Progress toward resolution of vapor problems associated with tank 241-C-103, 94:1642 (R;US)

Packaging

Treatment methods and waste forms for long-term storage and ultimate disposal of radioactive biological materials: National Low-Level Waste Management Program, 94:699 (R;US)

Program Management

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 1, 94:1547 (R;US)

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 2, 94:1548 (R;US)

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 5, 94:1551 (R;US)

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 3, 94:1549 (R;US)

Tank Farm Upgrades Program Plan, 94:1464 (R;US)

Waste tank properties and contents program plan: Waste Tank Safety Program, 94:1467 (R;US)

Quality Assurance

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 2, 94:1548 (R;US)

Radiation Protection

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 7, 94:1553 (R;US)

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 4, 94:1550 (R;US)

Radioactive Waste Facilities

Design demonstrations for Category B tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:754 (R;US)

Recommendations

Annotated list of regulations and guidance applicable to temporary storage of commercial Low-Level Radioactive Waste, 94:697 (R;US)

RADIOACTIVE WASTE STORAGE Recommendations

Low-Level Radioactive Waste temporary storage issues, 94:694 (R;US)

Regulations

Annotated list of regulations and guidance applicable to temporary storage of commercial Low-Level Radioactive Waste, 94:697 (R;US)

Managing Hanford Site solid waste through strict acceptance criteria, 94:1153 (R;US)

Remote Sensing

Survey of fiber-optic technology for nuclear waste cleanup applications, 94:1615 (R;US)

Revegetation

Vegetation growth patterns on six rock-covered UMTRA Project disposal cells, 94:1946 (R;US)

Risk Assessment

Ecological assessment plan for Waste Area Grouping 5, 94:2272 (R;US)

Risk characterization data manual for Category D inactive liquid low-level waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:746 (R;US)

Risk characterization data manual for Category D inactive liquid low-level waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:747 (R;US)

Safeguard Regulations

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 1, 94:1547 (R;US)

Safeguards

High-level waste storage tank farms/242-A evaporator standards/requirements identification document (S/RID), Vol. 3, 94:1549 (R;US)

Safety

Characterization and reaction behavior of ferrocyanide simulants and Hanford Site high-level ferrocyanide waste, 94:1653 (R;US)

Progress toward mitigation of flammable gas Tank 241-SY-101, 94:1649 (R;US)

Safety Analysis

Ferrocyanide Safety Program: Quarterly report for the period ending March 31, 1994, 94:1058 (R;US)

Ferrocyanide Safety Project Task 3 Ferrocyanide Aging Studies FY 1993 annual report, 94:1364 (R;US)

Organic carbon in Hanford single-shell tank waste, 94:1371 (R;US)

Progress toward resolution of vapor problems associated with tank 241-C-103, 94:1642 (R;US)

Resolving the Ferrocyanide Safety Issue at the Hanford Site, 94:1647 (R;US)

Tank 241-C-103 headspace flammability, 94:1545 (R;US)

The Hanford Site Tank Waste Remediation System: An update, 94:1645 (R;US)

Stability

Summary of single-shell tank waste stability, 94:1453 (R;US)

Tanks

Risk characterization data manual for Category D inactive liquid low-level waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:747 (R;US)

Temperature Monitoring

Thermocouple placement and hot spots in radioactive waste tanks, 94:1579 (R;US)

RADIOACTIVE WASTES

See also ALPHA-BEARING WASTES
CALCINED WASTES
HIGH-LEVEL RADIOACTIVE WASTES
INTERMEDIATE-LEVEL RADIOACTIVE WASTES
LOW-LEVEL RADIOACTIVE WASTES
RADIOACTIVE EFFLUENTS

Accounting

Tank farm surveillance and waste status report for March 1991, 94:1417 (R;US)

Aging

Resolving the safety issue for radioactive waste tanks with high organic content, 94:1616 (R;US)

Tank waste chemistry: A new understanding of waste aging, 94:1384 (R;US)

Alpha Reactions

(Alpha,n) reactions in vitrified waste, 94:1128 (R;US)

Calcination

¹³⁷Cs and ¹³¹I tracer studies on Zr/Na and Al/Na pilot plant calcine to evaluate thermal processes as calcine pretreatment options, 94:1241 (R;US)

Three candidate treatment technologies for remediating Hanford Site watch-list tanks, 94:1626 (R;US)

Chemical Analysis

A literature review of methods of analysis of organic analytes in radioactive wastes with an emphasis on sources from the United Kingdom, 94:959 (R;US)

Investigation of the organic matter in inactive nuclear tank liquids: Environmental Restoration Program, 94:889 (R;US)

Separation techniques for the clean-up of radioactive mixed waste for ICP-AES/ICP-MS analysis, 94:925 (R;US)

Status and integration of the gas generation studies performed for the Hydrogen Safety Program: FY 1993, Annual report, 94:1373 (R;US)

Tank characterization data report: Tank 241-C-112, 94:1527 (R;US)

Tank characterization report: Tank 241-C-109, 94:1531 (R;US)
Technology Evaluation Workshop Report for Tank Waste Chemical Characterization, 94:1109 (R;US)

Chemical Composition

Analysis of Tank 241-AN-106 characterization and grout performance criteria, 94:1355 (R;US)

Tank wastes discharged directly to the soil at the Hanford Site, 94:472 (R;US)

Underground storage tank waste characterization needs assessment workshop, 94:1071 (R;US)

Chemical Reactions

Resolving the safety issue for radioactive waste tanks with high organic content, 94:1616 (R;US)

Simulation and rheological analysis of Hanford Tank 241-SY-101: Final report, 94:1345 (R;US)

Sludge Treatment Evaluation: 1992 Technical progress, 94:938 (R;US)

Summary of single-shell tank waste stability, 94:1453 (R;US)

Compiled Data

Radioactive Waste Management Information for 1991 and Record-to-Date, 94:668 (R;US)

Radioactive Waste Management Information for 1992 and record-to-date, 94:669 (R;US)

Containment Systems

Preliminary systems design study assessment report: Volume 3, Process in-place/leave in-place concepts, 94:197 (R;US)

The Hybrid Treatment Process for treatment of mixed radioactive and hazardous wastes, 94:965 (R;US)

Corrosion

Colloid formation during the corrosion of SRL 200 glass, 94:1283 (R;US)

Cutting

Idaho National Engineering Laboratory decontamination and de-commissioning robotics development program, 94:2120 (R;US)

Data Base Management

Integrated Data Base for 1991: US spent fuel and radioactive waste inventories, projections, and characteristics: Revision 7, 94:2178 (R;US)

Data Compilation

Hazardous waste shipment data collection from DOE sites, 94:805 (R;US)

Offsite hazardous waste shipment data collection, 94:704 (R;US)

Decontamination

Environmental Restoration and Waste Management (EM) program: An introduction, 94:104 (R;US)

Initial evaluation of Sandia National Laboratory-prepared crystalline silico-titanates for cesium recovery, 94:958 (R;US)

Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring: [Quarterly] technical progress report, April 1, 1993–June 30, 1993, 94:1846 (R;US)

Detection

Test plan for dig-face characterization performance testing, 94:245 (R;US)

Test plan for the Rapid Geophysical Surveyor, 94:2192 (R;US)

Diffusion

Physical modeling of contaminant diffusion from a cementitious waste form, 94:499 (R;US)

Dissolution

Constraints on the affinity term for modeling long-term glass dissolution rates, 94:997 (R;US)

Three candidate treatment technologies for remediating Hanford Site watch-list tanks, 94:1626 (R;US)

Drill Cores

Ephemeral radioactive tracers for hydrostatic balancing fluids when drilling core samples in radioactive waste tanks, 94:2490 (R;US)

Ecological Concentration

Hydrogeology of the 100-N Area, Hanford Site, Washington, 94:2519 (R;US)

Encapsulation

Development, testing, and demonstration of geotechnical and cement-based encapsulant materials for the stabilization of radioactive and hazardous waste disposal structures, 94:487 (R;US)

Environmental Exposure Pathway

Radiological assessment for the dumping of radioactive wastes in the oceans, 94:971 (R;US)

Evaluation

Waste Tank Safety Screening Module: An aspect of Hanford Site tank waste characterization, 94:1400 (R;US)

Excavation

Development of a teleoperated backhoe for buried waste excavation, 94:2039 (R;US)

Development of robotics technology for remote characterization and remediation of buried waste, 94:2038 (R;US)

Remote excavation using the telerobotic small emplacement excavator, 94:2044 (R;US)

Remote excavation using the telerobotic small emplacement excavator, 94:2058 (R;US)

Flammability

Waste Tank Safety Programs overview plan: N2 End Function: Revision 3, 94:1482 (R;US)

Fluid Flow

Conceptual models for waste tank mechanistic analysis: Status report, January 1991, 94:1351 (R;US)

Fluidized-Bed Combustion

Unvented thermal process for treatment of hazardous and mixed wastes, 94:2124 (R;US)

Freezing

Test plan for cryofracture demonstration, sampling, and analysis, 94:207 (R;US)

Gamma Spectroscopy

Development of self-absorption coefficients for the determination of gamma-emitting radionuclides in environmental and mixed waste samples, 94:567 (R;US)

Gas Analysis

Technology Evaluation Workshop Report for Tank Waste Chemical Characterization, 94:1109 (R;US)

Geophysical Surveys

An application of the Ultrasonic Ranging and Data System (US-RADS) as a verification tool, 94:619 (R;US)

Ground Disposal

1993 report on Hanford Site land disposal restrictions for mixed wastes, 94:760 (R;US)

Analysis of proposed postclosure alternatives for the Bear Creek Burial Grounds at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:2027 (R;US)

Buried waste integrated demonstration technology integration process, 94:2587 (R;US)

Draft postclosure permit application for Bear Creek hydrogeologic regime at the Oak Ridge Y-12 Burial Grounds Hazardous Waste Disposal Unit: Environmental restoration program, 94:2031 (R;US)

Electromagnetic survey of the K1070A burial ground at the Oak Ridge K-25 Site, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2214 (R;US)

Examination of representative drum from 618-9 Burial Ground, 94:1083 (R;US)

Geophysical survey of 105-DR Pluto Crib, 116-DR-4, 100-D Area, 94:2523 (R;US)

Hanford land disposal restrictions plan for mixed wastes, 94:758 (R;US)

Integrated instrument platform for in situ characterization of tank wastes, 94:1619 (R;US)

Mixed Waste Landfill Integrated Demonstration: Technology summary, 94:654 (R;US)

ORNL results for Test Case 1 of the International Atomic Energy Agency's research program on the safety assessment of Near-Surface Radioactive Waste Disposal Facilities, 94:353 (R;US)

Physical and hydraulic properties of sediments and engineered materials associated with grouted double-shell tank waste disposal at Hanford, 94:1360 (R;US)

Preliminary Systems Design Study assessment report: Volume 8, Appendixes (Evaluation of using specific technologies, system concepts for treating the buried waste and the surrounding contaminated soil), 94:201 (R;US)

Radioactive mixed waste disposal, 94:1172 (R;US)

Simulation of the cleanup of the Hanford Site, 94:1181 (R;US)

Tank wastes discharged directly to the soil at the Hanford Site, 94:472 (R;US)

Testing and monitoring plan for the permanent isolation surface barrier prototype, 94:1758 (R;US)

Grouting

Development of grout formulations for 106-AN waste: Mixture-experiment results and analysis: Volume 1, Narrative and recommendations, 94:927 (R;US)

Development of grout formulations for 106-AN waste: Mixture-experiment results and analysis: Volume 2, Data presentation, 94:928 (R;US)

Evaluation of dry-solids-blend material source for grouts containing 106-AN waste: Final report, 94:906 (R;US)

Evaluation of dry-solids-blend material source for grouts containing 106-AN waste: September 1990 progress report, 94:912 (R;US)

Field demonstration of in situ grouting of radioactive solid waste burial trenches with polyacrylamide, 94:1670 (R;US)

Hanford Site Grout Disposal Program interim management plan, 94:1028 (R;US)

Hazards

Waste Tank Safety Programs overview plan: N2 End Function: Revision 3, 94:1482 (R;US)

Heat Transfer

Conceptual models for waste tank mechanistic analysis: Status report, January 1991, 94:1351 (R;US)

Hydration

Development of a process to neutralize water-reactive wastes, 94:883 (R;US)

Hydraulic Fracturing

Test plan for cryofracture demonstration, sampling, and analysis, 94:207 (R;US)

Image Processing

Infrared imaging systems for the ferrocyanide waste tanks at the US Department of Energy's Hanford Site, 94:1664 (R;US)

In-Situ Processing

An overview of in situ waste treatment technologies, 94:800 (R;US)

Evaluating long-term performance of in situ vitrified waste forms: Methodology and results, 94:368 (R;US)

In situ redox manipulation: Enhancement of contaminant destruction and immobilization, 94:389 (R;US)

In situ technology evaluation and functional and operational guidelines for treatability studies at the radioactive waste

RADIOACTIVE WASTES

In-Situ Processing

management complex at the Idaho National Engineering Laboratory, 94:208 (R;US)

Parametric melting studies for in situ vitrification, 94:212 (R;US)
Predictions of PuO_2 and tracer compound release from ISV melts, 94:225 (R;US)

Tracer-level radioactive pilot-scale test of in situ vitrification technology for the stabilization of contaminated soil sites at ORNL: Environmental Restoration Program, 94:305 (R;US)

Use of noninvasive geophysical techniques for the in situ vitrification program: Volume 3, Discussion and recommendations, 94:193 (R;US)

Information

Hanford Site annual dangerous waste report: Volume 2, Generator dangerous waste report radioactive mixed waste: Calendar Year 1993, 94:766 (R;US)

Inspection

Overview of the DOE Waste Facilities Operations Robotics Technology Development Program, 94:2121 (R;US)
Remote visual examination system for characterization of waste sites, 94:1171 (R;US)

Inventories

Integrated Data Base for 1992: US spent fuel and radioactive waste inventories, projections, and characteristics: Revision 8, 94:2179 (R;US)
Miscellaneous underground radioactive waste tanks, 94:1508 (R;US)
Organic carbon in Hanford single-shell tank waste, 94:1371 (R;US)
Summary of radioactive solid waste received in the 200 Areas during calendar year 1990, 94:1002 (R;US)
Summary of radioactive solid waste received in the 200 Areas during calendar year 1992, 94:1003 (R;US)
Summary of radioactive solid waste received in the 200 Areas during calendar year 1989, 94:1001 (R;US)
Tank Farm surveillance and waste status summary report for April 1993, 94:1441 (R;US)
Tank Farm surveillance and waste status summary report for July 1993, 94:1444 (R;US)
Tank Farm surveillance and waste status summary report for June 1992, 94:1432 (R;US)
Tank Farm surveillance and waste status summary report for March 1993, 94:1440 (R;US)
Tank Farm surveillance and waste status summary report for May 1992, 94:1431 (R;US)
Tank Farm surveillance and waste status summary report for September 1993, 94:1445 (R;US)
Tank farm surveillance and waste status report for February 1991, 94:1416 (R;US)

Tank farm surveillance and waste status summary report for June 1993, 94:1443 (R;US)
Tank farm surveillance and waste status summary report for March 1992, 94:1429 (R;US)
Tank farm surveillance and waste status summary report for May 1993, 94:1442 (R;US)
US Department of Energy interim mixed waste inventory report: Waste streams, treatment capacities and technologies: Volume 2, Site specific—California through Idaho, 94:736 (R;US)

Investigations

Strategy for management of investigation-derived waste, 94:1148 (R;US)

Leaching

Colloid formation during the corrosion of SRL 200 glass, 94:1283 (R;US)

Mapping

A remote characterization system for subsurface mapping of buried waste sites, 94:2371 (R;US)
Probability mapping of contaminants, 94:2408 (R;US)

Materials Handling

Decontamination Systems Information and Research Program: Quarterly technical progress report, January 1–March 31, 1993, 94:1851 (R;US)

Overview of the DOE Waste Facilities Operations Robotics Technology Development Program, 94:2121 (R;US)

Microwave Heating

Applications of microwave radiation environmental remediation technologies, 94:3 (R;US)

Minimization

Alternatives to land disposal of solid radioactive mixed wastes on the Hanford Site, 94:1011 (R;US)

An innovative approach to multimedia waste reduction: Measuring performance for environmental cleanup projects, 94:853 (R;US)

Analytical procedures for waste minimization and pollution prevention, 94:566 (R;US)

Environmental Restoration and Waste Management (EM) program: An introduction, 94:104 (R;US)

Facility-specific waste minimization plans at Westinghouse Hanford Company, 94:1126 (R;US)

Proceedings of the US Department of Energy Office of Environmental Restoration and Waste Management: Waste reduction workshop 5, 94:1323 (R;US)

Proceedings of the US Department of Energy, Office of Environmental Restoration and Waste Management: Waste Reduction Workshop 6, 94:665 (R;US)

TSD capacity model interface with waste reduction planning in the Environmental Restoration Program, 94:1802 (R;US)

Westinghouse Hanford Company waste minimization and pollution prevention awareness program plan, 94:1068 (R;US)

Mixing

Seismically induced loads on internal components submerged in waste storage tanks, 94:1632 (R;US)

Mixtures

The distillation and incineration of 132,000 liters (35,000 gallons) of mixed-waste hexone solvents from Hanford's REDOX Plant, 94:1078 (R;US)

Monitoring

Digface characterization test plan (remote testing), 94:246 (R;US)

Tank farm surveillance and waste status report for August 1991, 94:1422 (R;US)

Tank farm surveillance and waste status report for September 1991, 94:1423 (R;US)

Tank farm surveillance and waste status summary report for December 1991, 94:1426 (R;US)

Tank farm surveillance and waste status summary report for November 1991, 94:1425 (R;US)

Tank farm surveillance and waste status summary report for October 1991, 94:1424 (R;US)

Test plan for Digface Chemical and Radiation Assay System, 94:251 (R;US)

Packaging

Is radioactive mixed waste packaging and transportation really a problem, 94:1156 (R;US)

Polyethylene liners in radioactive mixed waste packages: An engineering study, 94:1032 (R;US)

Partition

Separation of actinide ions from radioactive waste solutions using extraction chromatography, 94:1163 (R;US)

Ph Value

Hanford environmental analytical methods: Methods as of March 1990: Volume 3, Appendix A2-I, 94:942 (R;US)

Summary of single-shell waste tank stability: Supplement, 94:1454 (R;US)

Plasma Heating

Applications of microwave radiation environmental remediation technologies, 94:3 (R;US)

Processing

Destruction of complexants used in groundwater decontamination, 94:495 (R;US)

Pumping

DOE Hanford Site tank farm interim stabilization during 1990, 94:1577 (R;US)

Quantitative Chemical Analysis

Nuclear Waste Analytical Round Robins 1-6 summary report, 94:1396 (R;US)

Sample preparation for semivolatile organics analysis of Hanford single-shell tank waste with high nitrate/nitrite and water content, 94:961 (R;US)

Radiant Heat Transfer

The essential linearity of thermal radiation net transport, 94:1578 (R;US)

Radiation Hazards

Overview of the facility accident analysis for the U.S. Department of Energy Environmental Restoration and Waste Management Programmatic Environmental Impact Statement, 94:1780 (R;US)

Radiation Monitoring

Groundwater level monitoring sampling and analysis plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:333 (R;US)

Robotic arm design for a remotely-deployed, in situ waste characterization probe, 94:2037 (R;US)

Radioactive Waste Disposal

Accelerated cleanup of mixed waste units on the Hanford Site, Richland, Washington, 94:1160 (R;US)

Functional requirements baseline for the closure of single-shell tanks: Draft, 94:1452 (R;US)

Integrating innovative technology into remedial action at a US Department of Energy facility, 94:270 (R;US)

Mixed Waste Treatment Project: LLNL and LANL computer simulations of integrated flowsheets, 94:885 (R;US)

Mixed-waste technology: Research, development, demonstration, testing, and evaluation, 94:606 (R;US)

Preliminary Systems Design Study assessment report: Volume 5, Land disposal compliance and hydrogen generation restricted concepts, 94:199 (R;US)

Solidification of waste sludges using microwave heating, 94:860 (R;US)

Tank waste technical options report, 94:1521 (R;US)

WINCO Metal Recycle annual report, FY 1993, 94:1249 (R;US)

Radioactive Waste Storage

A miniaturized sensor laboratory for in situ characterization of hazardous waste by a robot, 94:2096 (R;US)

Dynamic soil pressures on rigid cylindrical vaults, 94:1300 (R;US)

Polyethylene liners in radioactive mixed waste packages: An engineering study, 94:1032 (R;US)

SWSA 6 interim corrective measures environmental monitoring: FY 1990 results: Environmental Restoration Program, 94:1756 (R;US)

Tank 241-SX-115 Leak Assessment, 94:1561 (R;US)

Tank Farm surveillance and waste status summary report for March 1993, 94:1440 (R;US)

Westinghouse Hanford Company effluent discharges and solid waste management report for calendar year 1989: 200/600 Areas, 94:1004 (R;US)

Radiochemical Analysis

Long-term management of Hanford Site single-shell tank waste, 94:1572 (R;US)

Preliminary survey of separations technology applicable to the pretreatment of Hanford tank waste (1992-1993), 94:1369 (R;US)

Single-Shell Tank Phase IA/IB Procedure Compendium, 94:1555 (R;US)

Radiometric Surveys

A remote characterization system for subsurface mapping of buried waste sites, 94:2371 (R;US)

Radionuclide Migration

Radiological assessment for the dumping of radioactive wastes in the oceans, 94:971 (R;US)

Subsurface barrier design alternatives for confinement and controlled advection flow, 94:526 (R;US)

Rail Transport

Norfolk Southern boxcar blocking/bracing plan for the mixed waste disposal initiative project: Environmental Restoration Program, 94:854 (R;US)

Remedial Action

A systematic assessment of the state of hazardous waste clean-up technologies: Quarterly technical progress report, April 1-June 30, 1993, 94:1852 (R;US)

RADIOACTIVE WASTES

Remedial Action

An innovative approach to multimedia waste reduction: Measuring performance for environmental cleanup projects, 94:853 (R;US)

Buried Waste Integrated Demonstration: Technology summary, 94:661 (R;US)

Characterization, Monitoring and Sensor Technology Integrated Program, 94:2213 (R;US)

Environmental Restoration and Waste Management (EM) program: An introduction, 94:104 (R;US)

Geophysical survey work plan for White Wing Scrap Yard (Waste Area Grouping 11) at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2265 (R;US)

In Situ Remediation Integrated Program: Technology summary, 94:656 (R;US)

Phase I remedial investigation report for the 300-FF-5 operable unit, Volume 1, 94:1917 (R;US)

Selective retrieval of buried waste using mobile robot manipulator systems, 94:2103 (R;US)

Separation techniques for the clean-up of radioactive mixed waste for ICP-AES/ICP-MS analysis, 94:925 (R;US)

Soil washing physical separations test procedure - 300-FF-1 operable unit, 94:547 (R;US)

Remote Handling

Automating the operation of robots in hazardous environments, 94:2104 (R;US)

Cask system design guidance for robotic handling, 94:2095 (R;US)

Graphical models for simulation and control of robotic systems for waste handling, 94:2097 (R;US)

Robot control system for tank waste retrieval, 94:2116 (R;US)

Remote Sensing

A miniaturized sensor system for in situ robotic characterization of hazardous waste, 94:2389 (R;US)

A survey of fiber optic sensor technology for nuclear waste tank applications, 94:1598 (R;US)

Buried waste remote survey of the Idaho National Engineering Laboratory subsurface disposal area, 94:2148 (R;US)

Removal

Robotic system for decommissioning the Gunite tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2047 (R;US)

Research Programs

R&D activities at DOE applicable to mixed waste, 94:573 (R;US)

Retrieval Systems

Decision and systems analysis for underground storage tank waste retrieval systems and tank waste remediation system, 94:1403 (R;US)

Rheology

Simulation and rheological analysis of Hanford Tank 241-SY-101: Final report, 94:1345 (R;US)

Risk Assessment

RCRA facility investigation for the townsite of Los Alamos, New Mexico, 94:2226 (R;US)

Road Transport

Motor carrier evaluation program procedure: Revision 1, 94:1014 (R;US)

Sample Preparation

Sample preparation for semivolatile organics analysis of Hanford single-shell tank waste with high nitrate/nitrite and water content, 94:961 (R;US)

Sampling

A miniaturized sensor laboratory for in situ characterization of hazardous waste by a robot, 94:2096 (R;US)

Development of an Integrated Performance Evaluation Program (IPEP) for the Department of Energy's Office of Environmental Restoration and Waste Management, 94:2538 (R;US)

Integrated sampling and analysis plan for samples measuring >10 mrem/hour, 94:1073 (R;US)

National emission standards for hazardous air pollutants application for approval to construct rotary mode core-sampling truck and exhaust, 94:1328 (R;US)

Separation techniques for the clean-up of radioactive mixed waste for ICP-AES/ICP-MS analysis, 94:925 (R;US)

Sintered Stainless Steel pre-filter test report, 94:1661 (R;US)

Statistical evaluation of core samples from Hanford tank B110, 94:954 (R;US)

Toxic emission control systems for mixed waste storage tanks, 94:1201 (R;US)

Waste characterization plan for the Hanford Site single-shell tanks: Appendix I, Test plan for sampling and analysis of ten single-shell tanks, 94:1449 (R;US)

Separation Processes

Integrated unit operations within the Advanced Testing Line for Actinide Separations (ATLAS), 94:867 (R;US)

Simulation

106-AN grout pilot-scale test HGTP-93-0501-02, 94:948 (R;US)

Characterization results for 106-AN grout produced in a pilot-scale test, 94:952 (R;US)

Computer simulation of the thermal history of a Hanford Site high heat load waste tank, 94:1623 (R;US)

Destruction of nitrates, organics, and ferrocyanides by hydrothermal processing, 94:1342 (R;US)

Ferrocyanide waste simulant characterization, 94:1090 (R;US)

Sintering

Applications of microwave radiation environmental remediation technologies, 94:3 (R;US)

Solidification

A literature review of mixed waste components: Sensitivities and effects upon solidification/stabilization in cement-based matrices, 94:932 (R;US)

Applications of microwave radiation environmental remediation technologies, 94:3 (R;US)

Specifications

Radioactive waste characterization, 94:1188 (R;US)

Stabilization

Tank waste technical options report, 94:1521 (R;US)

Waste Tank Safety Programs overview plan: N2 End Function: Revision 3, 94:1482 (R;US)

Storage Facilities

303-K Radioactive Mixed-Waste Storage Facility closure plan: Revision 1, 94:1899 (R;US)

Criticality safety studies for the storage of waste from nuclear fuel service in Intercell Storage Wells 2 and 3 of Building 3019, 94:918 (R;US)

Parametric studies to support inspection criteria of the Hanford Site double-shell waste storage tanks: Volume 1, 94:1497 (R;US)

Preliminary investigation of processes that affect source term identification: Environmental Restoration Program, 94:309 (R;US)

Vapor space sampling criteria for single-shell tanks containing ferrocyanide waste: Revision, 94:1479 (R;US)

Surfaces

Final results of the application of a structured light source for surface mapping in the Fernald K-65 silos, 94:2151 (R;US)

Tanks

Safety support for hydrogen reanalysis of Waste Tank 101-SY, 94:1339 (R;US)

Transport

Engineering studies for the Surplus Production Reactor Decommissioning Project at the Hanford Site, 94:2018 (R;US)

Risk management of onsite transportation of nuclear waste, 94:1203 (R;US)

Underground Disposal

A demonstration of remote survey and characterization of a buried waste site using the SRIP [Soldier Robot Interface Project] testbed, 94:2034 (R;US)

Animal intrusion status report for fiscal year 1990, 94:2467 (R;US)

Buried Waste Integrated Demonstration: Technology summary, 94:661 (R;US)

Cathodic protection system operating experience for underground piping at the Hanford Site, 94:1125 (R;US)

Development of Hanford Site lysimeter facilities, 94:482 (R;US)

Development of a long-term post-closure radiation monitor: Phase 1, Final report, [September 30, 1992–February 28, 1994], 94:123 (R;US)

INEL cold test pit demonstration of improvements in information derived from non-intrusive geophysical methods over buried waste sites: Phase 1, Final report, 94:678 (R;US)

INEL cold test pit demonstration of improvements in information derived from non-intrusive geophysical methods over buried waste sites: Phase 2, Final report, 94:679 (R;US)

Laboratory analysis of hydraulic properties of volcanic tuff samples, 94:2223 (R;US)

Postconstruction report of the United Nuclear Corporation Disposal Site at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:1858 (R;US)

RCRA closure plan for the Bear Creek Burial Grounds B Area and Walk-In Pits at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:1853 (R;US)

Robotics subsurface mapping demonstration technology test plan, 94:2082 (R;US)

Site descriptions of environmental restoration units at the Oak Ridge K-25 Site, Oak Ridge, Tennessee, 94:285 (R;US)

Surface stabilization and revegetation test plots: Fiscal year 1993 status report, 94:467 (R;US)

Tank farm surveillance and waste status report for September 1991, 94:1423 (R;US)

Tank farm surveillance and waste status summary report for December 1991, 94:1426 (R;US)

Tank farm surveillance and waste status summary report for November 1991, 94:1425 (R;US)

Tank farm surveillance and waste status summary report for October 1991, 94:1424 (R;US)

Temperature effects on waste glass performance, 94:1261 (R;US)

Test plan for dig-face characterization performance testing, 94:245 (R;US)

Underground storage tank-integrated demonstration: Applying tomorrow's technology today, 94:1605 (R;US)

Use of noninvasive geophysical techniques for the in situ vitrification program: Volume 3, Discussion and recommendations, 94:193 (R;US)

Underground Storage

Barometric pressure variations, 94:2483 (R;US)

Calculation of reaction energies and adiabatic temperatures for waste tank reactions: Waste Tank Safety Program, 94:1357 (R;US)

Dynamic modeling and response of soil-wall systems, 94:1303 (R;US)

Ferrocyanide Safety Program: Safety criteria for ferrocyanide watch list tanks, 94:1535 (R;US)

Long-reach manipulation for waste storage tank remediation, 94:2036 (R;US)

Potential for using a six-phase alternating current power supply system for in situ vitrification, 94:372 (R;US)

Structural analysis of an underground reinforced concrete waste storage tank due to over-pressurization, 94:1295 (R;US)

Subsurface barrier design alternatives for confinement and controlled advection flow, 94:526 (R;US)

Tank 101-SY flammable gas mitigation test project plan, 94:1507 (R;US)

Tank Farm surveillance and waste status summary report for May 1992, 94:1431 (R;US)

Tank farm surveillance and waste status report for April 1991, 94:1418 (R;US)

Tank farm surveillance and waste status report for December 1990, 94:1414 (R;US)

Tank farm surveillance and waste status report for January 1991, 94:1415 (R;US)

Tank farm surveillance and waste status summary for October 1990, 94:1412 (R;US)

Tank farm surveillance and waste status summary for September 1990, 94:1411 (R;US)

Tank farm surveillance and waste status summary report for August 1990, 94:1410 (R;US)

Tank farm surveillance and waste status summary report for August 1992, 94:1434 (R;US)

Tank farm surveillance and waste status summary report for July 1992, 94:1433 (R;US)

Tank farm surveillance and waste status summary report for March 1992, 94:1429 (R;US)

Tank farm surveillance and waste status summary report for November 1990, 94:1413 (R;US)

Technology needs for environmental restoration remedial action: Environmental Restoration Program, 94:261 (R;US)

The essential linearity of thermal radiation net transport, 94:1578 (R;US)

Underground storage tanks/efficient separations accomplishments, 94:1310 (R;US)

Waste Separations and Pretreatment Workshop report, 94:1093 (R;US)

Viscosity

Effect of viscosity on dynamic response of a liquid storage tank, 94:1293 (R;US)

Vitrification

A literature review of surface alteration layer effects on waste glass behavior, 94:1270 (R;US)

Analytical electron microscopy examination of solid reaction products in long-term test of SRL 200 waste glasses, 94:1273 (R;US)

Applications of microwave radiation environmental remediation technologies, 94:3 (R;US)

Disposal of failed melters from defense waste vitrification facilities, 94:1146 (R;US)

Documentation of Hanford Site independent review of the Hanford Waste Vitrification Plant Preliminary Safety Analysis Report, 94:1111 (R;US)

Documentation of Hanford Site independent review of the Hanford Waste Vitrification Plant Preliminary Safety Analysis Report: Revision 2, 94:1113 (R;US)

Evaluating long-term performance of in situ vitrified waste forms: Methodology and results, 94:368 (R;US)

Graphite electrode dc arc technology development for treatment of buried wastes, 94:391 (R;US)

Hanford Waste Vitrification Systems Risk Assessment action plan, 94:1025 (R;US)

Hanford Waste Vitrification Systems Risk Assessment: Final report supporting information: Part 1, 94:1030 (R;US)

Hanford waste vitrification systems risk assessment: Final report, 94:1029 (R;US)

ISV technology development plan for buried waste, 94:229 (R;US)

In situ vitrification application to buried waste: Interim report of intermediate field tests at Idaho National Engineering Laboratory: Revision 1, 94:189 (R;US)

In situ vitrification: Providing a comprehensive solution for remediation of contaminated soils, 94:384 (R;US)

In situ vitrification: Technology status and a survey of new applications, 94:375 (R;US)

Parametric melting studies for in situ vitrification, 94:212 (R;US)

Predictions of PuO_2 and tracer compound release from ISV melts, 94:225 (R;US)

Preliminary systems design study assessment report: Volume 3, Process in-place/leave in-place concepts, 94:197 (R;US)

Radioactive waste vitrification technology, 94:1381 (R;US)

Recycle stream impacts on feed treatment flowsheets and glass formulation for the Hanford Waste Vitrification Plant, 94:1145 (R;US)

Resolution of regulatory issues facing the DOE in situ vitrification program, 94:2605 (R;US)

Results of vitrifying Fernald OU-4 wastes, 94:1389 (R;US)

Standard and modified electrode engineering-scale in situ vitrification tests, 94:364 (R;US)

Summary of in situ vitrification modeling and analysis accomplishments for fiscal year 1991, 94:838 (R;US)

Surface layer effects on waste glass corrosion, 94:1277 (R;US)

Technology status report: In situ vitrification applied to buried wastes, 94:363 (R;US)

RADIOACTIVE WASTES

Vitrification

- Thermodynamics of gas-metal-slag equilibria for applications in situ and ex situ vitrification melts, 94:812 (R;US)
- Tracer-level radioactive pilot-scale test of in situ vitrification for the stabilization of contaminated soil sites at ORNL, 94:356 (R;US)
- Tracer-level radioactive pilot-scale test of in situ vitrification technology for the stabilization of contaminated soil sites at ORNL: Environmental Restoration Program, 94:305 (R;US)
- Two methodologies for computing neutron sources from (α ,n) and spontaneous fission reactions in vitrified waste, 94:1196 (R;US)
- Use of noninvasive geophysical techniques for the in situ vitrification program: Volume 3, Discussion and recommendations, 94:193 (R;US)
- Vitrification of underground storage tanks: Technology development, regulatory issues, and cost analysis, 94:377 (R;US)

Volume

- Methodology for generating waste volume estimates, 94:259 (R;US)
- TSD capacity model interface with waste reduction planning in the Environmental Restoration Program, 94:1802 (R;US)

Waste Disposal

- Hanford Site Environmental Restoration and Waste Technology Plan: Calendar year 1990, 94:1005 (R;US)

Waste Forms

- AEM analyses of SRL 131 glass altered as a function of SA/V, 94:1285 (R;US)

Waste Management

- Environmental Restoration Program pollution prevention checklist guide for the feasibility study project phase, 94:266 (R;US)
- Environmental Restoration and Waste Management site specific plan for DOE-ID: Overview, 94:672 (R;US)
- [Environmental aspects of solid waste technology]: Foreign trip report, September 11–20, 1992, 94:2555 (R;US)

Waste Processing

- An overview of in situ waste treatment technologies, 94:800 (R;US)
- Characterization of secondary solid waste anticipated from the treatment of trench water from Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:895 (R;US)
- Environmental assessment for Retech, Inc.'s Plasma Centrifugal Furnace Evaluation, 94:637 (R;US)
- Thermal treatment technology study and data base for Department of Energy mixed waste, 94:859 (R;US)

Waste Retrieval

- Developing a scarifier to retrieve radioactive waste from Hanford single-shell tanks, 94:1394 (R;US)
- Proposed use of a variable geometry truss manipulator for radioactive waste removal from underground storage tanks, 94:1600 (R;US)

Waste Transportation

- Comprehensive transportation risk assessment system based on unit-consequence factors, 94:1778 (R;US)
- Functional requirements for the Liquid Waste Transfer and Distribution Station at Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1982 (R;US)
- Hazardous waste shipment data collection from DOE sites, 94:805 (R;US)
- Is radioactive mixed waste packaging and transportation really a problem, 94:1156 (R;US)
- Offsite hazardous waste shipment data collection, 94:704 (R;US)
- Transportation radiological risk assessment for the programmatic environmental impact statement: An overview of methodologies, assumptions, and input parameters, 94:1779 (R;US)
- Travel to Austria to participate in the IAEA's Seminar on Developments in Radioactive Waste Transport: Foreign trip report, February 21–25, 1994, 94:2601 (R;US)
- Work plan for the removal and subsequent management of specific waste from David Witherspoon, Inc., Knoxville, Tennessee: Environmental Restoration and Waste Management Programs, 94:1855 (R;US)

RADIOACTIVITY

- Preliminary minimum detectable limit measurements in 208-L drums for selected actinide isotopes in mock-waste matrices, 94:993 (R;US)

RADIOAPPLICATORS

- See RADIATION SOURCES

RADIOCARBON DATING

- See CARBON 14

RADIOCHEMICAL ANALYSIS

- Data validation report for the 100-HR-3 Operable Unit, fifth round groundwater samples, 94:546 (R;US)
- Development of an Integrated Performance Evaluation Program (IPEP) for the Department of Energy's Office of Environmental Restoration and Waste Management, 94:2538 (R;US)
- Statistical evaluation of newly acquired environmental chemical analysis data as a validation tool for the Uranium Mill Tailings Action (UMTRA) Project, 94:56 (R;US)

RADIOISOTOPE MIGRATION

- See RADIONUCLIDE MIGRATION

RADIOISOTOPES

- A compilation of radionuclide transfer factors for the plant, meat, milk, and aquatic food pathways and the suggested default values for the RESRAD code, 94:1792 (R;US)
- Accuracy, precision, and lower detection limits (a deficit reduction approach), 94:2207 (R;US)
- Analysis of the low-level waste radionuclide inventory for the Radioactive Waste Management Complex performance assessment, 94:819 (R;US)
- Annual report on the Background Soil Characterization Project on the Oak Ridge Reservation, Oak Ridge, Tennessee: Results of Phase 1 investigation, 94:129 (R;US)
- Assessment of unsaturated zone radionuclide contamination in the 200 areas of the Hanford site, Washington, 94:2503 (R;US)
- Comparative evaluation of several small mammal species as monitors of heavy metals, radionuclides, and selected organic compounds in the environment, 94:2319 (R;US)
- Effects of solution pH and complexing reagents on the desorption of radionuclides in soil, 94:11 (R;US)
- Engineering study for the treatment of spent ion exchange resin resulting from nuclear process applications, 94:1020 (R;US)
- Final report on the Background Soil Characterization Project at the Oak Ridge Reservation, Oak Ridge, Tennessee: Volume 1: Results of Field Sampling Program, 94:1861 (R;US)
- Final report on the Background Soil Characterization Project at the Oak Ridge Reservation, Oak Ridge, Tennessee: Volume 3: Project Plan, 94:1863 (R;US)
- Final report on the Background Soil Characterization Project at the Oak Ridge Reservation, Oak Ridge, Tennessee: Volume 2: Data, 94:1862 (R;US)
- Miscellaneous underground radioactive waste tanks, 94:1508 (R;US)
- Phase 2 sampling and analysis plan, Quality Assurance Project Plan, and environmental health and safety plan for the Clinch River Remedial Investigation: An addendum to the Clinch River RCRA Facility Investigation plan: Energy Systems Environmental Restoration Program; Clinch River Environmental Restoration Program, 94:1856 (R;US)
- Radioactive waste characterization, 94:1188 (R;US)
- Radionuclide air emissions report for the Hanford Site, calendar year 1992, 94:139 (R;US)
- Risk assessment calculations using MEPAS, an accepted screening methodology, and an uncertainty analysis for the reranking of Waste Area Groupings at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2249 (R;US)
- Treating contaminated organics using the DETOX process, 94:876 (R;US)
- Waste characterization plan for the Hanford Site single-shell tanks: Appendix I, Test plan for sampling and analysis of ten single-shell tanks, 94:1449 (R;US)

RADIOLOGICAL PROTECTION

- See RADIATION PROTECTION

RADIOMETERS

Passive environmental radon detector study, 94:1947 (R;US)

RADIONUCLIDE CONCENTRATION

Decontamination and decommissioning surveillance and maintenance report for FY 1991: Environmental Restoration Program, 94:1955 (R;US)

Environmental Restoration and Waste Management site specific plan for DOE-ID: Overview, 94:672 (R;US)

Facility-specific waste minimization plans at Westinghouse Hanford Company, 94:1126 (R;US)

Handling 78,000 drums of mixed-waste sludge, 94:596 (R;US)

Hanford Federal Facility Agreement and Consent Order: Quarterly progress report for the period ending September 30, 1990, 94:759 (R;US)

Hazardous Waste Remedial Actions Program: Annual progress report for the period ending September 30, 1989, 94:1837 (R;US)

Preliminary Hazards Analysis Plasma Hearth Process, 94:731 (R;US)

Underground storage tank compliance activities at the Hanford Site, 94:1573 (R;US)

REINFORCED CONCRETE

Comparison of reinforced-concrete models for use in the analysis of extreme loads, 94:485 (R;US)

Inservice inspection of double-shell storage tanks at the Hanford Site, 94:1496 (R;US)

REMEDIAL ACTION

Remote Excavation System technology evaluation report: Buried Waste Robotics Program, 94:2080 (R;US)

Test plan for prototype dielectric permittivity sensor, 94:250 (R;US)

Administrative Procedures

Environmental Restoration and Waste Management: Five-year plan, fiscal years 1993-1997, 94:145 (R;US)

Taking interim actions: Integrating CERCLA and NEPA to move ahead with site cleanup, 94:8 (R;US)

Appropriate Technology

An overview of the mixed waste landfill integrated demonstration, 94:1766 (R;US)

Bibliographies

Nuclear Facility Decommissioning and Site Remedial Actions: A selected bibliography, Volume 14: Environmental Restoration Program: Part 1, Citations with abstracts, 94:1958 (R;US)

Nuclear Facility Decommissioning and Site Remedial Actions: A selected bibliography, Volume 14: Environmental Restoration Program: Part 2, Indexes, 94:1959 (R;US)

Nuclear facility decommissioning and site remedial actions: A selected bibliography, Volume 13: Part 1, Main text: Environmental Restoration Program, 94:1956 (R;US)

Nuclear facility decommissioning and site remedial actions: A selected bibliography, Volume 13: Part 2, Indexes: Environmental Restoration Program, 94:1957 (R;US)

Bids

Remedial Action Plan and final design for stabilization of the inactive uranium mill tailings at Green River, Utah: Volume 3, Appendix F, Final design, specifications, and drawings: Final report, 94:1733 (R;US)

Remedial Action Plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Spook, Wyoming: Volume 2, Appendix F, Final plans and specifications: Final report, 94:1740 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado: Final report: Volume 3, Appendix F, Final design, specifications, and drawings, 94:1715 (R;US)

Computer Codes

Computer models used to support cleanup decision-making at hazardous and radioactive waste sites, 94:2146 (R;US)

Contractors

UMTRA technical assistance contractor Quality Assurance Program Plan: Revision 4, 94:69 (R;US)

Contracts

Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Ambrosia Lake, New Mexico: Volume 3, Appendix F, Final plans and specifications: Final report, 94:1743 (R;US)

Control Systems

Intelligent automated control of robotic systems for environmental restoration, 94:2099 (R;US)

Cost

Cost estimates for the Uranium-in-Soils Integrated Demonstration field screening technologies, 94:929 (R;US)

Costs of RCRA corrective action: Interim report, 94:911 (R;US)

Probabilistic comparison of alternative characterization technologies at the Fernald Uranium-in-Soils Integrated Demonstration Project, 94:2405 (R;US)

Cost Benefit Analysis

Cost benefit analysis of remediation alternatives for controlling the flux of strontium-90 into the Columbia River, 94:523 (R;US)

Cost Estimation

Uranium Mill Tailings Remedial Action Project: Cost Reduction and Productivity Improvement Program Project Plan: Revised, 94:1938 (R;US)

D Codes

DECHEM: A remedial planning tool for metallic contaminants in soil at UMTRA Project sites: Final report and users' guide, 94:1940 (R;US)

Data Acquisition

An innovative approach to multimedia waste reduction measuring performance for environmental cleanup programs, 94:1813 (R;US)

Data Analysis

Selecting data quality objectives, analytical quality levels, and validation levels for CERCLA data, 94:528 (R;US)

Data Base Management

Data Base Management Plan for the remedial investigation of Waste Area Grouping 10, Operable Unit 3, at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2268 (R;US)

Methodology for integrated evaluation of alternative siting and treatment, storage, and disposal strategies for U.S. Department of Energy waste management, 94:1781 (R;US)

Selecting data quality objectives, analytical quality levels, and validation levels for CERCLA data, 94:528 (R;US)

Demonstration Programs

An environmental restoration project incorporating the bidirectional (US-Germany) transfer of environmental management technologies and inspection of the confirmed technology demonstration site: Foreign trip report, April 12-18, 1993, 94:2597 (R;US)

An overview of the mixed waste landfill integrated demonstration, 94:1766 (R;US)

Buried Waste Integrated Demonstration Plan: Revision 1, 94:211 (R;US)

Combining expedited cleanup with innovative technology demonstrations, 94:505 (R;US)

Definition and compositions of standard wastestreams for evaluation of Buried Waste Integrated Demonstration treatment technologies, 94:240 (R;US)

Environmental technology demonstrations at US DOE facilities: Observations regarding the current process and methods for improvement, 94:2159 (R;US)

Innovative technology demonstrations, 94:2606 (R;US)

Sandia National Laboratories Mixed Waste Landfill Integrated Demonstration, 94:979 (R;US)

The Savannah River integrated demonstration program, 94:553 (R;US)

Documentation

Annotated outlines for documents required by FFA and CERCLA for Oak Ridge Reservation sites, 94:1871 (R;US)

Economic Impact

Colorado economic impact study on the Uranium Mill Tailings Remedial Action Project in Colorado: Colorado state fiscal year 1993, 94:85 (R;US)

Economic impact study of the Uranium Mill Tailings Remedial Action Project in Colorado: Colorado state fiscal year 1993, 94:86 (R;US)

Employment

Economic impact study of the Uranium Mill Tailings Remedial Action Project in Colorado: Colorado state fiscal year 1993, 94:86 (R;US)

Environmental Impact Statements

Programmatic Environmental Impact Statement for the Uranium Mill Tailings Remedial Action Ground Water Project, 94:61 (R;US)

Programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project: Revision 2, 94:100 (R;US)

Programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project: Revision 1, Draft, 94:99 (R;US)

Scoping session of the programmatic environmental impact statement for the uranium mill tailings remedial action project, 94:1700 (R;US)

Environmental Impacts

Biological assessment for rare and endangered plant species: Related to CERCLA characterization activities, 94:2476 (R;US)

Biological assessment for the remedial action at the chemical plant area of the Weldon Spring site, 94:1790 (R;US)

Environmental analysis and data report prepared for the environmental assessment of remedial action at the Lowman uranium mill tailings site near Lowman, Idaho: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1935 (R;US)

Environmental analysis and data report prepared for the environmental assessment of remedial action at the inactive uranium mill tailings site near Falls City, Texas (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1936 (R;US)

Environmental assessment for the decommissioning and decontamination of contaminated facilities at the Laboratory for Energy-Related Health Research University of California, Davis, 94:1825 (R;US)

Environmental assessment of remedial action at the Maybell uranium mill tailings site near Maybell, Colorado, 94:1815 (R;US)

Environmental assessment of remedial action at the Naturita Uranium processing site near Naturita, Colorado: Revision 1, 94:1702 (R;US)

Environmental assessment of remedial action at the Naturita Uranium processing site near Naturita, Colorado: Revision 2, 94:1703 (R;US)

Environmental assessment of remedial action at the Naturita uranium processing site near Naturita, Colorado: Revision 3, 94:1704 (R;US)

Mitigation action plan for remedial action at the uranium mill tailings sites and disposal site, Rifle, Colorado, 94:1932 (R;US)

Proposed plan for remedial action at the chemical plant area of the Weldon Spring site, 94:643 (R;US)

Responses to comments on the Remedial Investigation/Feasibility Study-Environmental Impact Statement for Remedial Action at the chemical plant area of the Weldon Spring Site, November 1992, 94:644 (R;US)

Uranium Mill Tailings Remedial Action Project Environmental Protection Implementation Plan, 94:82 (R;US)

Evaluation

BWID System Design Study, 94:790 (R;US)

Characteristics of the volatile organic compounds - Arid Integrated Demonstration Site, 94:361 (R;US)

Lessons learned on the UMTRA Project: Special study, 94:1945 (R;US)

Niagara Falls Storage Site environmental report for calendar year 1992, 1397 Pletcher Road, Lewiston, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1891 (R;US)

Performance-Based Technology Selection Filter application report for Teledyne Wah Chang Albany Operable Unit Number One: INEL Buried Waste Integrated Demonstration, 94:226 (R;US)

Preliminary Systems Design Study assessment report: Volume 2: Main report, 94:196 (R;US)

Feasibility Studies

Air pathway analysis for cleanup at the chemical plant area of the Weldon Spring site, 94:1787 (R;US)

Environmental Restoration Program pollution prevention checklist guide for the feasibility study project phase, 94:266 (R;US)

Feasibility study for remedial action at the chemical plant area of the Weldon Spring Site: Volume 1, Main text, 94:641 (R;US)

REMEDIAL ACTION Feasibility Studies

Feasibility study for remedial action at the chemical plant area of the Weldon Spring Site: Volume 2, Appendixes, 94:642 (R;US)

Heavy Metals Contaminated Soil Project, Resource Recovery Project, and Dynamic Underground Stripping Project, 94:655 (R;US)

Limited field investigation report for the 100-BC-1 Operable Unit, 94:2177 (R;US)

Phase 1 remedial investigation report for the 300-FF-1 operable unit, 94:1910 (R;US)

Phase I remedial investigation report for the 300-FF-5 operable unit, Volume 1, 94:1917 (R;US)

Remedial Investigation/Feasibility Study (R/FS) process, elements and techniques guidance, 94:2167 (R;US)

Remedial investigation/feasibility study Work Plan and addenda for Operable Unit 4-12: Central Facilities Area Landfills II and III at the Idaho National Engineering Laboratory, 94:1953 (R;US)

Global Aspects

EM International: Volume 1, 94:2549 (R;US)

The role that enviroTRADE will play in the cleanup of the DOE complex, 94:2610 (R;US)

Health Hazards

A comparison of radiological risk assessment methods for environmental restoration, 94:1773 (R;US)

The evolution of risk communication at the Weldon Spring site, 94:2135 (R;US)

Historical Aspects

Summary of the Hanford Site decontamination, decommissioning, and cleanup, FY 1974–FY 1990, 94:1999 (R;US)

Implementation

Implementation of UMTRA Project Environmental Audit Action Plan status report for period ending September 30, 1992, 94:1948 (R;US)

Uranium Mill Tailings Remedial Action Project Environmental Protection Implementation Plan, 94:1930 (R;US)

Information Dissemination

Implementation of the DOE Office of Technology Development Strategic Program Plan for Environmental Education and Development, 94:2542 (R;US)

Information Needs

Environmental restoration and statistics: Issues and needs, 94:2366 (R;US)

Information Systems

A systematic assessment of the state of hazardous waste cleanup technologies: Quarterly technical progress report, April 1–June 30, 1993, 94:1852 (R;US)

EnviroTRADE: An International Environmental Restoration and Waste Management Information System, 94:2614 (R;US)

Remedial action assessment system: Decision support for environmental cleanup, 94:370 (R;US)

International Cooperation

DOE International Technology Exchange Program (ITEP): Technical integration of sensor technology development, 94:2612 (R;US)

International Relations

Status of international environmental remediation activities: A report from the Prague conference, 94:2608 (R;US)

Investigations

Remedial investigation/feasibility study Work Plan and addenda for Operable Unit 4-12: Central Facilities Area Landfills II and III at the Idaho National Engineering Laboratory, 94:1953 (R;US)

Legislation

Applicable or relevant and appropriate requirements (ARARs) for remedial actions at the Paducah Gaseous Diffusion Plant: A compendium of environmental laws and guidance: Environmental Restoration Program, 94:1964 (R;US)

Management

Integrating environmental restoration management within DOE using an alternative identification and evaluation procedure: A methodology and a case history, 94:2591 (R;US)

Technical assistance contractor Management Plan: Final [report], 94:62 (R;US)

Materials Testing

Alternative geochemical barrier materials (Taconite and scoria), 94:156 (R;US)

Measuring Methods

Monitoring remediation of trichloroethylene using a chemical fiber optic sensor: Field studies, 94:420 (R;US)

Meetings

DOE model conference on waste management and environmental restoration: Proceedings, 94:32 (R;US)

Environmental remediation 1991: "Cleaning up the environment for the 21st Century": Proceedings, 94:35 (R;US)

Innovative technologies for cleaning the environment: Air, water, and soil: Foreign trip report, 21 April–2 May 1992, 94:2567 (R;US)

Proceedings of the information exchange meeting on characterization, sensors, and monitoring technologies, 94:2152 (R;US)

Regulatory and institutional issues impending cleanup at US Department of Energy sites: Perspectives gained from an office of environmental restoration workshop, 94:2335 (R;US)

Status of international environmental remediation activities: A report from the Prague conference, 94:2608 (R;US)

Travel to Japan to participate in a series of fact finding meetings and facility tours in Japan, to explore International Technologies that can be applied to US cleanup efforts: Foreign trip report, November 3–15, 1990, 94:2579 (R;US)

Travel to Prague, Czech Republic, to attend the 1993 International Conference on Nuclear Waste Management and Environmental Remediation: Foreign trip report, September 5–11, 1993, 94:2582 (R;US)

Vadose Zone Modeling Workshop proceedings, March 29–30, 1993, 94:2485 (R;US)

Modifications

Modifications to the Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Green River, Utah: RAP Modification No. 1: Final report, 94:1730 (R;US)

Monitoring

DOE capabilities for in-situ characterization and monitoring of formation properties in the vadose zone, 94:2418 (R;US)

Multivariate Analysis

Multivariate methods in nuclear waste remediation: Needs and applications, 94:374 (R;US)

Numerical Solution

A risk-based approach for initial prioritization of operable units for remediation, 94:1811 (R;US)

Occupational Safety

Environmental, safety, and health plan for the remedial investigation of Waste Area Grouping 10, Operable Unit 3, at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:342 (R;US)

UMTRA Project Office Federal Employee Occupational Safety and Health Program Plan: Final draft, 94:1698 (R;US)

Occupations

Opportunities for health and safety professionals in environmental restoration work, 94:290 (R;US)

Performance

Function analysis of the single-shell Tank Waste Retrieval Manipulator System: Environmental Restoration and Waste Management Program, 94:1349 (R;US)

Planning

Annual status report on the Uranium Mill Tailings Remedial Action Program, 94:102 (R;US)

Elevation of surficial sediment/basalt contact in the Subsurface Disposal Area, Idaho National Engineering Laboratory, 94:167 (R;US)

Environmental assessment of remedial action at the Slick Rock uranium mill tailings sites Slick Rock, Colorado: Draft, 94:98 (R;US)

Environmental restoration and waste management site-specific plan for Richland Operations Office: Hanford site five-year plan, fiscal years 1993–1997, 94:1905 (R;US)

- Expedited Site Characterization: A rapid, cost-effective process for preremedial site characterization, 94:1794 (R;US)
- Ground water protection management program plan, 94:88 (R;US)
- Hanford Federal Facility Agreement and Consent Order: Quarterly progress report for the period ending September 30, 1990, 94:759 (R;US)
- Hazardous Waste Remedial Actions Program: Annual progress report for the period ending September 30, 1989, 94:1837 (R;US)
- Long-range plan for technology integration programs, Office of Technology Development, 94:2543 (R;US)
- Miscellaneous radioactive materials detected during uranium mill tailings surveys, 94:2330 (R;US)
- Polymers for subterranean containment barriers for underground storage tanks (USTs): Letter report on FY 1992 activities, 94:1296 (R;US)
- Pretreatment Technology Plan, 94:1089 (R;US)
- Proceedings of the US Department of Energy, Office of Environmental Restoration and Waste Management: Waste Reduction Workshop 6, 94:665 (R;US)
- Program plan for evaluation and remediation of the generation and release of flammable gases in Hanford Site waste tanks, 94:1478 (R;US)
- Public Participation Plan, 94:1820 (R;US)
- Radiological audit of remedial action activities at the processing site, transfer site, and Cheney disposal site Grand Junction, Colorado: Audit date, August 9-11, 1993: Final report, 94:2161 (R;US)
- Remedial Action Plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Spook, Wyoming: Volume 2, Appendix F, Final plans and specifications: Final report, 94:1740 (R;US)
- Remedial Action Plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Spook, Wyoming: Volume 1, Text, Appendices A, B, C, D, and E: Final report, 94:1739 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Remedial action selection report: Revised final report, 94:1707 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Attachment 5, Dewatering report: Revised final report, 94:1711 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Appendix A to Attachment 3, Tables: Final report, 94:1721 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Attachment 4, Water resources protection strategy: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1724 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Attachment 2, Geology report: Final report, 94:1719 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Attachment 5, Supplemental radiological data: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1725 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Attachment 3, Groundwater hydrology report: Final report, 94:1720 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Durango, Colorado: Attachment 4, Water resources protection strategy: Revised final report, 94:1708 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Appendix B to Attachment 3, Lithologic logs: Final report, 94:1722 (R;US)
- Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Rifle, Colorado: Volume 1, Text: Appendices A, B, and C: Final report, 94:1713 (R;US)
- Remedial Action Plan for stabilization of the inactive uraniumiferous lignite processing sites at Belfield and Bowman, North Dakota: Volume 2, Appendices D and E: Final report, 94:1748 (R;US)
- Remedial Action Plan for stabilization of the inactive uraniumiferous lignite processing sites at Belfield and Bowman, North Dakota: Volume 1, Text, Appendices A through C: Final report, 94:1747 (R;US)
- Remedial Investigation Work Plan for Chestnut Ridge Operable Unit 1 (Chestnut Ridge Security Pits) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:749 (R;US)
- Remedial Investigation work plan for Bear Creek Valley Operable Unit 2 (Rust Spoil Area, SY-200 Yard, Spoil Area 1) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:1868 (R;US)
- Remedial Investigation work plan for Bear Creek Valley Operable Unit 4 (shallow groundwater in Bear Creek Valley) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:128 (R;US)
- Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 2, Geology report, 94:1675 (R;US)
- Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 3, Groundwater hydrology report, 94:1676 (R;US)
- Remedial action and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 4, Water resources protection strategy, 94:1680 (R;US)
- Remedial action plan and final design for stabilization of the inactive uranium mill tailings at Green River, Utah: Volume 2A, Appendix D, Supplement, site characterization, Appendix E, Groundwater protection strategy: Final report, 94:1732 (R;US)
- Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Ambrosia Lake, New Mexico: Volume 2, Appendices D and E: Final, 94:1742 (R;US)
- Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings site at Ambrosia Lake, New Mexico: Volume 1, Text, Appendices A, B, and C: Final report, 94:1741 (R;US)
- Remedial action plan and site design for stabilization of the inactive Uranium Mill Tailings Site at Lowman, Idaho: Attachment 4, Water resources protection strategy: Final report, 94:1737 (R;US)
- Remedial action plan and site design for stabilization of the inactive Uranium Mill Tailings Site at Lowman, Idaho: Attachment 1, Specifications and design drawings, LOW; Subcontract Documents: Bid schedule, special conditions, specifications, subcontract drawings: Final design for construction, Appendix B of the Cooperative Agreement, 94:1738 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix C to Attachment 3, Calculations, 94:1679 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix B to Attachment 3, Lithologic logs, 94:1678 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lakeview, Oregon: Volume 1, Text and appendices A through D: Final report: Revision 1, 94:1726 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lowman, Idaho: Remedial action selection report for the Lowman UMTRA project site, Idaho: Final report, 94:1734 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lowman, Idaho: Attachment 2, Geology report: Final report, 94:1736 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lakeview, Oregon: Volume 2, Appendices E through G: Final report: Revision 1, 94:1727 (R;US)

REMEDIAL ACTION Planning

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix A to Attachment 3, Tables, 94:1677 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Remedial action selection report, Appendix B, 94:60 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lowman, Idaho: Appendix B: Attachment 3, Groundwater hydrology report: Final report, 94:1735 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Lakeview, Oregon: Volume 3, Attachments A and B to Appendix F: Final report: Revision 1, 94:1728 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Tuba City, Arizona: Text, Appendices A, B, and C: Final report, 94:1744 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado: Volume 2, Appendices D and E: Final report, 94:1714 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Remedial action selection report, Attachment 2, Geology report: Preliminary final, 94:1693 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Attachment 3, Groundwater hydrology report, Attachment 4, Water resources protection strategy: Preliminary final, 94:1694 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix A of Attachment 3, Calculations: Preliminary final, 94:1695 (R;US)

Remedial investigation work plan for Bear Creek Valley Operable Unit 1 (S-3 Ponds, Boneyard/Burnyard, Oil Landfarm, Sanitary Landfill 1, and the Burial Grounds, including Oil Retention Ponds 1 and 2) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Volume 1, Main text, 94:1860 (R;US)

Remedial investigation/feasibility study work plan for the 100-BC-5 operable unit, Hanford Site, Richland, Washington, 94:1900 (R;US)

Remedial investigation/feasibility study work plan for the 100-KR-1 operable unit, Hanford Site, Richland, Washington, 94:1901 (R;US)

Technical summary of geological, hydrological, and engineering studies at the Slick Rock Uranium Mill Tailings sites, Slick Rock, Colorado, 94:1949 (R;US)

Technology Evaluation Workshop Report for Tank Waste Chemical Characterization, 94:1109 (R;US)

Technology Integration Branch FY 1991 program plan, Office of Technology Development, 94:2544 (R;US)

Technology Integration Division FY 1992 Technology Integration Programs Plan, Office of Technology Development, 94:2548 (R;US)

Technology Integration Programs: Fiscal year 1992 Regulatory Coordination Program Management and Implementation Plan, 94:2547 (R;US)

UMTRA Project Office Records Management Plan, 94:1688 (R;US)

Program Management

Developing an integrated project plan for the preparation of a Remedial Investigation/Feasibility Study Work Plan, 94:1777 (R;US)

Environmental Restoration Quality Program Plan: Environmental Restoration Program, 94:258 (R;US)

Environmental Restoration and Waste Management Site-Specific Plan (SSP) for fiscal year 1992 (FY92), 94:1840 (R;US)

Environmental restoration program pollution prevention checklist guide for the evaluation of alternatives project phase, 94:268 (R;US)

Hanford past-practice strategy, 94:2176 (R;US)

Management challenges in remediating a mixed waste site at the Oak Ridge National Laboratory, 94:607 (R;US)

Proceedings of industrial needs workshop, 94:2540 (R;US)

Site characterization plan for the W-058 Project, 94:2513 (R;US)

Summary of the Hanford Site decontamination, decommissioning, and cleanup, FY 1974-FY 1990, 94:1999 (R;US)

Surface soil sampling plan for the 200-UP-2 operable unit, 94:2518 (R;US)

Uranium Mill Tailings Remedial Action (UMTRA) Surface Project: Project plan: Revision 1, 94:1689 (R;US)

Uranium Mill Tailings Remedial Action 1993 Roadmap, 94:72 (R;US)

Uranium Mill Tailings Remedial Action fiscal year 1992 roadmap, 94:1939 (R;US)

Progress Report

Surface stabilization and revegetation test plots: Fiscal year 1993 status report, 94:467 (R;US)

Public Information

Proposed plan for the United Nuclear Corporation Disposal Site at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:564 (R;US)

Public Opinion

Comment and response document on the final remedial action plan and site design for stabilization of the inactive Uranium Mill Tailings Site at Lakeview, Oregon, 94:1729 (R;US)

Public comments and responses to the 1993 Hanford cleanup five-year plan, 94:1922 (R;US)

Responses to comments on the Remedial Investigation/Feasibility Study-Environmental Impact Statement for Remedial Action at the chemical plant area of the Weldon Spring Site, November 1992, 94:644 (R;US)

Quality Assurance

UMTRA Project Office Quality Assurance Program Plan: Revision 5, 94:80 (R;US)

UMTRA project technical assistance contractor quality assurance implementation plan, 94:79 (R;US)

UMTRA technical assistance contractor Quality Assurance Program Plan: Revision 4, 94:69 (R;US)

R Codes

ReOpt™ V2.1 user documentation, 94:2337 (R;US)

Recommendations

A radiological and chemical investigation of the 7500 Area Contamination Site at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:323 (R;US)

Feasibility study report for the 200-BP-1 operable unit: Revision 1, 94:1919 (R;US)

Ferrocyanide Safety Program: Data requirements for the ferrocyanide safety issue developed through the data quality objectives (DQO) process, 94:1543 (R;US)

General safety basis development guidance for environmental restoration decontamination and decommissioning, 94:2007 (R;US)

Records Management

Environmental Restoration Program Records Management Plan: Revision 1, 94:443 (R;US)

Regulations

Environment, safety, and health regulatory implementation plan, 94:1696 (R;US)

Regulatory analysis of the Underground Storage Tank-Integrated Demonstration Program, 94:1505 (R;US)

Technology Integration Programs: Fiscal year 1992 Regulatory Coordination Program Management and Implementation Plan, 94:2547 (R;US)

Remote Handling Equipment

Function analysis of the single-shell Tank Waste Retrieval Manipulator System: Environmental Restoration and Waste Management Program, 94:1349 (R;US)

Selective retrieval of buried waste using mobile robot manipulator systems, 94:2103 (R;US)

Remote Viewing Equipment

Integrated Computer-Enhanced Remote Viewing System: Quarterly report number 4, July-October 1993, 94:2075 (R;US)

Interactive Computer-Enhanced Remote Viewing System (ICERVS), 94:2073 (R;US)

Research Programs

- A systematic assessment of the state of hazardous waste clean-up technologies: Quarterly technical progress report, April 1-June 30, 1993, 94:1852 (R;US)
- Characterization, Monitoring and Sensor Technology Integrated Program, 94:2213 (R;US)
- DOE In Situ Remediation Integrated Program: In situ manipulation technologies subprogram plan, 94:2618 (R;US)
- Hazardous waste treatment and environmental remediation research, 94:289 (R;US)
- In Situ Remediation Integrated Program: Technology summary, 94:656 (R;US)
- Mining workshop for nuclear waste cleanup, 94:1800 (R;US)
- Research and development for DOE environmental restoration and waste management, 94:2129 (R;US)

Risk Assessment

- A risk computation model for environmental restoration activities, 94:2365 (R;US)
- Limited field investigation report for the 100-BC-1 Operable Unit, 94:2177 (R;US)
- Remedial Investigation/Feasibility Study (RI/FS) process, elements and techniques guidance, 94:2167 (R;US)
- State trends in ecological risk assessment and standard setting, 94:2340 (R;US)
- The strategy for assessing risks associated with remediation of the former production area at Fernald, 94:1788 (R;US)

Safety Analysis

- Preliminary standard review guide for Environmental Restoration/Decontamination and Decommissioning safety analyses, 94:2012 (R;US)

Schedules

- Pretreatment Technology Plan, 94:1089 (R;US)
- Remediation schedule for inactive liquid low-level waste storage tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:743 (R;US)

Site Characterization

- Chemical gas sensors and the characterization, monitoring and sensor technology needs of the US Department of Energy, 94:279 (R;US)
- Remedial Investigation Report on the Abandoned Nitric Acid Pipeline at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Energy Systems Environmental Restoration Program; Y-12 Environmental Restoration Program, 94:1866 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Remedial Action Selection Report: Preliminary final, 94:1681 (R;US)
- Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 4, water resources protection strategy: Preliminary final, 94:1687 (R;US)

Specifications

- Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Tuba City, Arizona: Phase 2, Construction, Subcontract documents: Appendix E, final report: Appendix B of the cooperative agreement, 94:1745 (R;US)

Technology Assessment

- Arid site characterization and technology assessment: Volatile Organic Compounds-Arid Integrated Demonstration, 94:2351 (R;US)
- Buried Waste Integrated Demonstration: Technology summary, 94:661 (R;US)
- Definition and compositions of standard wastestreams for evaluation of Buried Waste Integrated Demonstration treatment technologies, 94:240 (R;US)
- Hanford Integrated Planning Process: 1993 Hanford Site-specific science and technology plan, 94:1920 (R;US)
- Implementation of the buried waste integrated demonstration, 94:796 (R;US)

Mixed Waste Landfill Integrated Demonstration: Technology summary, 94:654 (R;US)

- Mixed-waste technology: Research, development, demonstration, testing, and evaluation, 94:606 (R;US)
- Oak Ridge K-25 Site Technology Logic Diagram: Volume 1, Technology evaluation, 94:280 (R;US)
- Oak Ridge K-25 Site Technology Logic Diagram: Volume 2, Technology Logic Diagrams, 94:281 (R;US)
- Oak Ridge K-25 Site Technology Logic Diagram: Volume 3, Technology evaluation data sheets; Part A, Characterization, decontamination, dismantlement, 94:282 (R;US)
- Oak Ridge K-25 Site Technology Logic Diagram: Volume 3, Technology evaluation data sheets; Part B, Remedial action, robotics/automation, waste management, 94:283 (R;US)
- Pacific Northwest Laboratory tasks supporting the Office of Technology Development national program, 94:2379 (R;US)
- Performance-Based Technology Selection Filter description report: INEL Buried Waste Integrated Demonstration System Analysis project, 94:2588 (R;US)
- Phase 1 involvement for potential stakeholders of the VOC-Arid Integrated Demonstration, 94:946 (R;US)

Technology Transfer

- DOE International Technology Exchange Program (ITEP): Technical integration of sensor technology development, 94:2612 (R;US)
- Summary of US Delegation visit to Germany emphasizing environmental restoration of uranium mining and milling facilities: Foreign trip report, June 29-July 11, 1992, 94:2559 (R;US)
- Technology Catalogue: First edition, 94:2550 (R;US)

Testing

- Preliminary Systems Design Study assessment report: Volume 2: Main report, 94:196 (R;US)

Tomography

- Dynamic Underground Stripping Project, 94:419 (R;US)

Training

- Training and qualification of waste management and remedial action personnel at the Oak Ridge National Laboratory, 94:51 (R;US)

Verification

- An application of the Ultrasonic Ranging and Data System (US-RADS) as a verification tool, 94:619 (R;US)
- Confirmatory radiological survey of the BORAX-V turbine building Idaho National Engineering Laboratory, Idaho Falls, Idaho, 94:2329 (R;US)

Waste Management

- Environmental Restoration Program pollution prevention checklist guide for the facility characterization project phase, 94:2198 (R;US)
- Environmental Restoration Program pollution prevention checklist guide for the surveillance and maintenance project phase, 94:267 (R;US)
- Environmental Restoration Program pollution prevention performance measures for FY 1993 and 1994 remedial investigations, 94:262 (R;US)
- Technical approach for the management of UMTRA ground water investigation-derived wastes, 94:91 (R;US)
- Waste Generation Forecast for DOE-ORO's Environmental Restoration OR-1 Project: FY 1994-FY 2001: Environmental Restoration Program, September 1993 Revision, 94:269 (R;US)

REMOTE AREAS

- Building a Collaboratory in Environmental and Molecular Science, 94:2609 (R;US)

REMOTE HANDLING

- Cask system design guidance for robotic handling, 94:2095 (R;US)

REMOTE HANDLING EQUIPMENT

- See also MANIPULATORS
- Applying interactive control to waste processing operations, 94:2113 (R;US)
- Automating the operation of robots in hazardous environments, 94:2104 (R;US)

REMOTE HANDLING EQUIPMENT

- Combined long reach and dexterous manipulation for waste storage tank applications, 94:2035 (R;US)
- Environmental restoration and waste management: Robotics technology development program: Robotics 5-year program plan: Volume 1, Executive summary, 94:2067 (R;US)
- Environmental restoration and waste management: Robotics technology development program: Robotics 5-year program plan: Volume 3, Site needs and requirements, 94:2069 (R;US)
- Environmental restoration and waste management: Robotics technology development program: Robotics 5-year program plan: Volume 2, Program plan, 94:2068 (R;US)
- Environmental restoration and waste management: Robotics technology development program: Robotics 5-year program plan: Volume 3, Site needs and requirements, 94:2069 (R;US)
- Idaho National Engineering Laboratory decontamination and decommissioning robotics development program, 94:2120 (R;US)
- Intelligent systems for remote decommissioning in hazardous environments, 94:1997 (R;US)
- Remote Excavation System technology evaluation report: Buried Waste Robotics Program, 94:2080 (R;US)
- Robotic system for decommissioning the Gunite tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2047 (R;US)
- Robotics Technology Development Program: Technology summary, 94:2070 (R;US)
- T-Rex system for operation in TRU, LLW, and hazardous zones: Transuranic storage area-retrieval enclosure program, 94:2081 (R;US)
- Update on radiation-hardened microcomputers for robotics and teleoperated systems, 94:2078 (R;US)

REMOTE SENSING

- Survey of fiber-optic sensor for remote sensing in radiologically and chemically harsh environments: Revision 2, 94:1599 (R;US)
- Survey of fiber-optic technology for nuclear waste cleanup applications, 94:1615 (R;US)

REMOTE VIEWING EQUIPMENT

- A video transmission system for low-bandwidth remote driving, 94:2055 (R;US)
- An approach to software quality assurance for robotic inspection systems, 94:2119 (R;US)
- Characterization technologies for environmental remediation, 94:2149 (R;US)
- Integrated Computer-Enhanced Remote Viewing System: Quarterly report No. 3, April-June 1993, 94:2076 (R;US)
- Integrated Computer-Enhanced Remote Viewing System: Quarterly report number 4, July-October 1993, 94:2075 (R;US)
- Integrated computer-enhanced remote viewing system: Quarterly report No. 2, January-March 1993, 94:2074 (R;US)
- Intelligent mobile sensor system for drum inspection and monitoring: Phase 1: Topical report, October 1, 1992-June 8, 1993, 94:2071 (R;US)
- Interactive Computer-Enhanced Remote Viewing System (ICERVS), 94:2073 (R;US)
- Remote visual examination system for characterization of waste sites, 94:1171 (R;US)

RESEARCH REACTORS

Chemical Analysis
Addendum to the Phase 2 Sampling and Analysis Plan for the Clinch River Remedial Investigation, 94:1867 (R;US)

SEDIMENTS

Chemical Analysis

UMTRA water sampling and analysis plan, Lakeview, Oregon, 94:77 (R;US)

Comparative Evaluations

Particle characterization of contaminated soil, 94:2183 (R;US)

Contamination

100 Area Columbia River sediment sampling, 94:543 (R;US)

Accelerated cleanup of the 316-5 Process Trenches at the Hanford Site, 94:489 (R;US)

Adsorption of plutonium on shallow sediments at the Hanford Site, 94:504 (R;US)

An integrated performance measure for environmental restoration at Oak Ridge National Laboratory, 94:1810 (R;US)

Colonie Interim Storage Site annual environmental report for calendar year 1991, Colonie, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1882 (R;US)

Colonie Interim Storage Site environmental report for calendar year 1992, 1130 Central Avenue, Colonie, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1892 (R;US)

Monitoring and modeling contaminated sediment transport in the White Oak Creek watershed: Environmental Restoration Program, 94:313 (R;US)

Phase 1 data summary report for the Clinch River Remedial Investigation: Health risk and ecological risk screening assessment: Environmental Restoration Program, 94:326 (R;US)

Preliminary screening of contaminants in the off-site surface water environment downstream of the US Department of Energy Oak Ridge Reservation: Environmental Restoration Program, 94:2245 (R;US)

Technology needs for environmental restoration remedial action: Environmental Restoration Program, 94:261 (R;US)

Transport and accumulation of cesium-137 and mercury in the Clinch River and Watts Bar Reservoir system: Environmental Restoration Program, 94:2243 (R;US)

White Oak Creek Embayment site characterization and contaminant screening analysis: Environmental Restoration Program, 94:2250 (R;US)

Decontamination

WAG 2 remedial investigation and site investigation site-specific work plan/health and safety checklist for the soil and sediment task: Environmental Restoration Program, 94:330 (R;US)

Erosion

Transport of contaminated sediment during floods in White Oak Creek near Oak Ridge, Tennessee, 94:38 (R;US)

Excavation

Accelerated cleanup of the 316-5 Process Trenches at the Hanford Site, 94:489 (R;US)

Flow Models

Monitoring and modeling contaminated sediment transport in the White Oak Creek watershed: Environmental Restoration Program, 94:313 (R;US)

Fluid Flow

A modeling study of water flow in the vadose zone beneath the Radioactive Waste Management Complex, 94:173 (R;US)

Geologic Models

3D vadose zone modeling using geostatistical inferences, 94:182 (R;US)

Hydraulic Conductivity

The UFA method for site characterization and remediation, 94:2377 (R;US)

Monitoring

Monitoring and modeling contaminated sediment transport in the White Oak Creek watershed: Environmental Restoration Program, 94:313 (R;US)

Westinghouse Hanford Company Environmental Surveillance annual report: 200/600 Areas: Calendar year 1990: Revision 4, 94:2423 (R;US)

Radiation Monitoring

Hazelwood Interim Storage Site annual environmental report for calendar year 1991, Hazelwood, Missouri, 94:1881 (R;US)

Hazelwood Interim Storage Site environmental report for calendar year 1992, 9200 Latty Avenue, Hazelwood, Missouri, 94:1893 (R;US)

Maywood Interim Storage Site annual environmental report for calendar year 1991, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP) (Maywood Interim Storage Site), 94:1885 (R;US)

Maywood Interim Storage Site environmental report for calendar year 1992, 100 West Hunter Avenue, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1888 (R;US)

Middlesex Sampling Plant environmental report for calendar year 1992, 239 Mountain Avenue, Middlesex, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1890 (R;US)

New Brunswick Site annual environmental report for calendar year 1991, New Brunswick, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP) (New Brunswick Site), 94:1887 (R;US)

Niagara Falls Storage Site annual environmental report for calendar year 1991, Lewiston, New York, 94:1884 (R;US)

Wayne Interim Storage Site annual environmental report for calendar year 1991, Wayne, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP) (Wayne Interim Storage Site), 94:1886 (R;US)

Wayne Interim Storage Site environmental report for calendar year 1992, 868 Black Oak Ridge Road, Wayne, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1889 (R;US)

Radionuclide Migration

Health risk assessment for the Building 3001 Storage Canal at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1972 (R;US)

RCRA Facility Investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 2, Sections 4 through 9: Environmental Restoration Program, 94:337 (R;US)

Simulations of infiltration of meteoric water and contaminant plume movement in the vadose zone at single-shell tank 241-T-106 at the Hanford Site, 94:432 (R;US)

White Oak Creek Embayment time-critical CERCLA removal action sediment-retention structure: Environmental Restoration Program, 94:345 (R;US)

White Oak Creek embayment sediment retention structure: The Oak Ridge model in action, 94:48 (R;US)

Remedial Action

Analysis of proposed postclosure alternatives for the Oil Landfarm Waste Management Area at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:2028 (R;US)

Heterogeneity and contaminant transport modeling for the Savannah River integrated demonstration site, 94:425 (R;US)

Removal

Regulatory compliance issues related to the White Oak Creek Embayment time-critical removal action, 94:1803 (R;US)

Sampling

100 Area Columbia River sediment sampling, 94:543 (R;US)

Addendum to the Phase 2 Sampling and Analysis Plan for the Clinch River Remedial Investigation, 94:1867 (R;US)

Annual hydrologic data summary for the White Oak Creek Watershed: Water Year 1990 (October 1989–September 1990), 94:892 (R;US)

Description of work for 216-U-Pond test pits, 94:2514 (R;US)

Field Sampling and Analysis Plan for the Remedial Investigation of Waste Area Grouping 2 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Responses to comments, 94:1870 (R;US)

Phase 2 Sampling Plan for Chestnut Ridge Operable Unit 2 (Filled Coal Ash Pond/Upper McCoy Branch) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:756 (R;US)

Phase 2 Sampling Plan for Chestnut Ridge Operable Unit 2 (Filled Coal Ash Pond/Upper McCoy Branch) at the Oak

Ridge Y-12 Plant, Oak Ridge, Tennessee: Environment Restoration Program, 94:757 (R;US)

Quantification of uranium transport away from firing sites at Los Alamos National Laboratory: A mass balance approach, 94:2227 (R;US)

Regulatory compliance issues related to the White Oak Creek Embayment time-critical removal action, 94:1803 (R;US)

Sampling and analysis of 100 Area springs, 94:136 (R;US)

Sediment and process water characterization in support of 300 Area North Process Pond physical soil washing test, 94:544 (R;US)

UMTRA water sampling and analysis plan, Lakeview, Oregon, 94:77 (R;US)

Transport

Contaminated sediment transport during floods, 94:47 (R;US)

Monitoring and modeling contaminated sediment transport in the White Oak Creek watershed: Environmental Restoration Program, 94:313 (R;US)

Water Removal

DARA Solid Storage Facility evaluation and recommendations, Y-12 Bear Creek Burial Grounds, Oak Ridge, Tennessee: Environmental Restoration Program, 94:562 (R;US)

SEISMIC EFFECTS

Overview of seismic panel activities, 94:1294 (R;US)

SEISMIC SURVEYS

Geophysical data fusion for subsurface imaging: Phase 1, 94:124 (R;US)

TTP AL921102: An integrated geophysics program for non-intrusive characterization of mixed-Waste landfill sites: Final report, 94:676 (R;US)

SELENIUM

Alternative geochemical barrier materials (Taconite and scoria), 94:156 (R;US)

An evaluation of the results of alluvial groundwater sampling from 1987-1990 at the Durango disposal site, 94:146 (R;US)

DECHEM: A remedial planning tool for metallic contaminants in soil at UMTRA Project sites: Final report and users' guide, 94:1940 (R;US)

Monticello Millsite environmental report for calendar year 1991, 94:1844 (R;US)

SELENIUM OXIDES

Leach testing of in situ stabilization grouts containing additives to sequester contaminants, 94:939 (R;US)

SEMICONDUCTOR COUNTERS

See SEMICONDUCTOR DETECTORS

SEMICONDUCTOR DETECTORS

See also GE SEMICONDUCTOR DETECTORS

Radioactive waste characterization, 94:1188 (R;US)

SEPARATION EQUIPMENT

SILICA

Laboratory measurements of metal adsorption from simulated incinerator flue gases: Sorbent selection for cesium capture, 94:604 (R;US)

SITE CHARACTERIZATION

Overview of DOE's field screening technology development activities, 94:2128 (R;US)

Administrative Procedures

Remedial Investigation/Feasibility Study (RI/FS) process, elements and techniques guidance, 94:2167 (R;US)

Beta Detection

Quantitative in situ uranium contaminant mapping using high-resolution gamma-ray spectrometry and beta scintillation counting, 94:2380 (R;US)

Compiled Data

Phase I remedial investigation report for the 300-FF-5 operable unit, Volume 1, 94:1917 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix A to Attachment 3, tables: Preliminary final, 94:1684 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix B to Attachment 3, lithologic logs: Preliminary final, 94:1685 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix C to Attachment 3, calculations: Preliminary final, 94:1686 (R;US)

Cost

Characterization technologies for environmental remediation, 94:2149 (R;US)

Cost Benefit Analysis

Evaluation of soil characterization technologies using a stochastic, value-of-information approach, 94:2402 (R;US)

Data Acquisition

Adaptive sampling strategy support for the unlined chromic acid pit, chemical waste landfill, Sandia National Laboratories, Albuquerque, New Mexico, 94:2137 (R;US)

Data Analysis

Environmental restoration and statistics: Issues and needs, 94:2366 (R;US)

Documentation

Remedial Investigation/Feasibility Study (RI/FS) process, elements and techniques guidance, 94:2167 (R;US)

Electromagnetic Surveys

Commercially available broadband electromagnetic systems for US Department of Energy waste-site characterization, 94:677 (R;US)

Evaluated Data

Remedial investigation/feasibility study Work Plan and addenda for Operable Unit 4-12: Central Facilities Area Landfills II and III at the Idaho National Engineering Laboratory, 94:1953 (R;US)

Feasibility Studies

Evaluation of soil characterization technologies using a stochastic, value-of-information approach, 94:2402 (R;US)

Gamma Spectroscopy

Quantitative in situ uranium contaminant mapping using high-resolution gamma-ray spectrometry and beta scintillation counting, 94:2380 (R;US)

Lithology

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix B to Attachment 3, lithologic logs: Preliminary final, 94:1685 (R;US)

Measuring Methods

The UFA method for site characterization and remediation, 94:2377 (R;US)

Neural Networks

Application of neural networks to waste site screening, 94:2191 (R;US)

SITE CHARACTERIZATION

Optimization

Optimization

Planning a site investigation using analogous groups, 94:2508 (R;US)

Planning

Planning a site investigation using analogous groups, 94:2508 (R;US)

Radiochemical Analysis

A radiological and chemical investigation of the 7500 Area Contamination Site at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:323 (R;US)

Remote Handling Equipment

A teleoperated system for remote site characterization, 94:2378 (R;US)

Remote Viewing Equipment

A teleoperated system for remote site characterization, 94:2378 (R;US)

Seismic Surveys

Integrated test plan for crosswell compressional and shear wave seismic tomography for site characterization at the VOC Arid Site, 94:2532 (R;US)

Statistical Data

Environmental restoration and statistics: Issues and needs, 94:2366 (R;US)

Stochastic Processes

Towards identifying data needs for a regional hydrogeologic contamination study using multiple realization simulations, 94:2400 (R;US)

Technology Assessment

The UFA method for site characterization and remediation, 94:2377 (R;US)

Tomography

Integrated test plan for crosswell compressional and shear wave seismic tomography for site characterization at the VOC Arid Site, 94:2532 (R;US)

SITE REHABILITATION

Soil structure interaction analysis for the Hanford Site 241-SY-101 double-shell waste storage tanks: Volume 1, 94:1494 (R;US)

SOILING

See SURFACE CONTAMINATION

SOILS

Alpha Detection

Applications of the long-range alpha detector for site characterization technology, 94:2234 (R;US)

Evaluation of passive alpha detectors for sensitive/inexpensive/fast characterization of radiological contamination on surfaces and in soils, 94:2158 (R;US)

The use of the long-range alpha detector (LRAD) for alpha emission surveys at active and inactive firing sites, 94:299 (R;US)

Attenuation

Soil density and mass attenuation coefficients for use in shielding calculations at the Hanford Waste Vitrification Plant, 94:498 (R;US)

Background Radiation

A sitewide approach to the characterization and use of soil and groundwater background at the Hanford Site, 94:2509 (R;US)

Chemical Analysis

Field-usable portable analyzer for chlorinated organic compounds, 94:2174 (R;US)

Naval Trench 94 soils report, 94:2484 (R;US)

Phase 1, Remedial investigation report for the 300-FF-5 operable unit: Volume 2, 94:1918 (R;US)

Summary report: Assessment of deep injection well associated surface soils at the Idaho National Engineering Laboratory, 94:170 (R;US)

Surface radiological investigations at White Wing Scrap Yard, Oak Ridge Reservation, Oak Ridge, Tennessee, 94:891 (R;US)

Validation procedures used in the Background Soil Characterization Project on the Oak Ridge Reservation, Oak Ridge, Tennessee: Environmental Restoration Program, 94:265 (R;US)

Chemical Composition

Soil density and mass attenuation coefficients for use in shielding calculations at the Hanford Waste Vitrification Plant, 94:498 (R;US)

Cleaning

Characterization of the geology, geochemistry, and microbiology of the radio frequency heating demonstration site at the Savannah River Site, 94:2533 (R;US)

Decontamination Systems Information and Research Program: Quarterly technical progress report, January 1–March 31, 1993, 94:1851 (R;US)

In situ bioremediation via horizontal wells: Revision 1, 94:555 (R;US)

Contamination

100 Area Hanford soil washing treatability tests, 94:524 (R;US)

A brief analysis and description of transuranic wastes in the subsurface disposal area of the radioactive waste management complex at INEL, 94:194 (R;US)

A radiological and chemical investigation of the 7500 Area Contamination Site at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:323 (R;US)

Accelerated cleanup at the 618-9 Burial Ground, 94:494 (R;US)

Accelerated cleanup of carbon tetrachloride in a radiologically contaminated site on the Hanford Site, 94:491 (R;US)

An integrated performance measure for environmental restoration at Oak Ridge National Laboratory, 94:1810 (R;US)

Analysis of ICPP tank farm infiltration, 94:1665 (R;US)

Analytical Electron Microscopy examination of uranium contamination at the DOE Fernald operation site, 94:2123 (R;US)

Annual report of the Environmental Restoration Monitoring and Assessment Program at Oak Ridge National Laboratory for FY 1992: Environmental Restoration Program, 94:2254 (R;US)

Annual report on the Background Soil Characterization Project on the Oak Ridge Reservation, Oak Ridge, Tennessee: Results of Phase 1 investigation, 94:129 (R;US)

Application of service examinations to transuranic waste container integrity at the Hanford Site, 94:1158 (R;US)

Characterization of site geochemistry in support of environmental restoration, 94:2228 (R;US)

Characterization studies on: (A) Contaminated batch of Rocky Flats soil (B) Uncontaminated batch of INEL soil, 94:2184 (R;US)

Combining expedited cleanup with innovative technology demonstrations, 94:505 (R;US)

Contribution of Hanford liquid effluents to strontium-90 levels in offsite soils, 94:2357 (R;US)

Crosswell seismic imaging of an in-situ air stripping waste remediation process, 94:404 (R;US)

DECHEM: A remedial planning tool for metallic contaminants in soil at UMTRA Project sites: Final report and users' guide, 94:1940 (R;US)

Data evaluation technical memorandum on the K-1407C Retention Basin at the Oak Ridge K-25 Site, Oak Ridge, Tennessee: Environmental Restoration Program, 94:284 (R;US)

Determining uranium speciation in contaminated soils by molecular spectroscopic methods: Examples from the Uranium in Soils Integrated Demonstration, 94:2235 (R;US)

Effects of lag and maximum growth in contaminant transport and biodegradation modeling, 94:378 (R;US)

Effects of solution pH and complexing reagents on the desorption of radionuclides in soil, 94:11 (R;US)

Effects of solution pH and complexing reagents on uranium and thorium desorption under saturated equilibrium conditions, 94:10 (R;US)

Electrostatic curtain studies, 94:228 (R;US)

Environmental characterization of soils and sediments: Progress report, part 2, 94:2409 (R;US)

Evaluation of passive alpha detectors for sensitive/inexpensive/fast characterization of radiological contamination on surfaces and in soils, 94:2158 (R;US)

Evaluation of soil characterization technologies using a stochastic, value-of-information approach, 94:2402 (R;US)

Feasibility study report for the 200-BP-1 operable unit: Revision 1, 94:1919 (R;US)

Field demonstration of technologies for characterization of uranium contamination in surface soils, 94:2122 (R;US)

Field test of Six-Phase Soil Heating and evaluation of engineering design code, 94:385 (R;US)

Field-usable portable analyzer for chlorinated organic compounds, 94:2174 (R;US)

Fixation of soil surface contamination using natural polysaccharides, 94:468 (R;US)

Hydrogeologic characterization of the former Vitro processing site, Salt Lake City, Utah: Final report, 94:150 (R;US)

In situ vitrification: Demonstrated capabilities and potential applications, 94:386 (R;US)

In situ vitrification: Providing a comprehensive solution for remediation of contaminated soils, 94:384 (R;US)

Initial site characterization approach and preliminary results, 200 West Area carbon tetrachloride Expedited Response Action, Hanford Site, Richland, Washington, 94:493 (R;US)

Interim remedial action work plan for the cesium plots at Waste Area Grouping 13 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1857 (R;US)

Mobile instrumentation platform and robotic accessory for real-time screening of hazardous waste, 94:2088 (R;US)

Particle characterization of contaminated soil, 94:2183 (R;US)

Preliminary results from the investigation of thermal effects in electrokinetics soil remediation, 94:2 (R;US)

Probability mapping of contaminants, 94:2408 (R;US)

Project plan for the Background Soil Characterization Project on the Oak Ridge Reservation, Oak Ridge, Tennessee, 94:2193 (R;US)

Radiological characterization survey of the former Diamond Magnesium Company site, 720 Fairport-Nursery Road, Painesville, Ohio (DMP001, DMP002), 94:2320 (R;US)

Radiological re-survey results at 130 West Central Avenue, Maywood, New Jersey (MJ029), 94:2315 (R;US)

Radiological survey results at 13 Congress Street, Beverly, Massachusetts (VB003), 94:2289 (R;US)

Radiological survey results at 15 Congress Street, Beverly, Massachusetts (VB004), 94:2290 (R;US)

Radiological survey results at 9 and 11 Congress Street, Beverly, Massachusetts (VB002), 94:2282 (R;US)

Remedial Action Plan for stabilization of the inactive uraniumiferous lignite processing sites at Belfield and Bowman, North Dakota: Volume 1, Text, Appendices A through C: Final report, 94:1747 (R;US)

Remedial action measures, 94:257 (R;US)

Remedial investigation for the 200-BP-1 operable unit, Hanford Site, Richland, Washington, 94:2492 (R;US)

Remedial investigation for the chemical plant area of the Weldon Spring Site: Volume 1, 94:638 (R;US)

SOILS Contamination

Remedial investigation report on the abandoned nitric acid pipeline at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:1865 (R;US)

Results of the radiological survey at 77 Sinniger Street, Maywood, New Jersey (MJ052), 94:2312 (R;US)

Results of the radiological survey at the former Alba Craft Laboratory site properties, Oxford, Ohio (OXO001), 94:2310 (R;US)

Results of the radiological survey at the former Chapman Valve Manufacturing Company, Indian Orchard, Massachusetts (CIO001), 94:2300 (R;US)

Risk assessment applications for determining cleanup limits for uranium in treated and untreated soils, 94:57 (R;US)

Road Transportable Analytical Laboratory system: Phase 1, 94:719 (R;US)

SOILD: A computer model for calculating the effective dose equivalent from external exposure to distributed gamma sources in soil, 94:7 (R;US)

Simulation of the cleanup of the Hanford Site, 94:1181 (R;US)

Site characterization for the in situ bioremediation of the vadose zone, 94:2142 (R;US)

Site-specific analysis of the cobbly soils at the Grand Junction processing site (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:148 (R;US)

Sitewide soil and debris management program for a DOE site under remediation, 94:275 (R;US)

Soil washing physical separations test procedure - 300-FF-1 operable unit, 94:547 (R;US)

Summary of FY 1992 operations of the vapor extraction system at the Hanford Site, Washington, 94:515 (R;US)

Surface radiological investigations at environmental research area 11, ¹³⁷Cs- and ⁶⁰Co-contaminated plots at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2257 (R;US)

Surface radiological investigations of Trench 6 and low-level waste Line Leak Site 7.4b at the Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2247 (R;US)

Surface soil sampling plan for the 200-UP-2 operable unit, 94:2518 (R;US)

TSA waste stream and final waste form composition, 94:813 (R;US)

Tank wastes discharged directly to the soil at the Hanford Site, 94:472 (R;US)

Technology needs for environmental restoration remedial action: Environmental Restoration Program, 94:261 (R;US)

UMTRA project water sampling and analysis plan, Durango, Colorado, 94:84 (R;US)

Uranium in soils integrated demonstration site characterization at Fernald, Ohio: Report of uranium concentrations in soil determined by in situ LA-ICP-AES, 94:2589 (R;US)

Uranium speciation in Fernald soils: Progress report, January 1-May 31, 1992, 94:2231 (R;US)

Uranium-contaminated soils: Ultramicrotomy and electron beam analysis, 94:2127 (R;US)

Vapor vacuum extraction treatability study at the Idaho National Engineering Laboratory, 94:809 (R;US)

Work plan for the remedial investigation/feasibility study-environmental assessment for the quarry residuals operable unit at the Weldon Spring Site, 94:1873 (R;US)

Work plan, health and safety plan, and site characterization for the Rust Spoil Area (D-106), 94:2534 (R;US)

X-231B technology demonstration for in situ treatment of contaminated soil: Laboratory evaluation of in situ vapor stripping, 94:359 (R;US)

Decontamination

100 Area soil washing treatability test plan, 94:1911 (R;US)

100 area excavation treatability test plan, 94:1914 (R;US)

A systematic assessment of the state of hazardous waste cleanup technologies: Quarterly technical progress report, April 1-June 30, 1993, 94:1852 (R;US)

An integrated approach to the characterization and decontamination of uranium contaminated soils, 94:2406 (R;US)

An integrated approach to the characterization of uranium-contaminated soils, 94:2387 (R;US)

Characterization of uranium contaminated soils from DOE Fernald Environmental Management Project Site: Results of Phase 1 characterization, 94:351 (R;US)

DOE In Situ Remediation Integrated Program: In situ manipulation technologies subprogram plan, 94:2618 (R;US)

Environmental restoration waste materials co-disposal, 94:1208 (R;US)

Hanford Site surface soil radioactive contamination control plan for fiscal year 1992, 94:447 (R;US)

Heavy Metals Contaminated Soil Project, Resource Recovery Project, and Dynamic Underground Stripping Project, 94:655 (R;US)

INEL support to the plutonium in soil integrated demonstration (Nevada): Interim report, 94:232 (R;US)

International technology transfer to support the environmental restoration needs of the DOE complex, 94:2611 (R;US)

Pacific Northwest Laboratory tasks supporting the Office of Technology Development national program, 94:2379 (R;US)

Preliminary Systems Design Study assessment report: Volume 1: Executive summary, 94:195 (R;US)

Preliminary systems design study assessment report: Volume 7, Subsystem concepts (Evaluation of using specific technologies, system concepts for treating the buried waste and surrounding contaminated soil), 94:200 (R;US)

Remediation of TRU-contaminated soil by aqueous phase leaching and coprecipitation, 94:234 (R;US)

Removal of uranium from uranium-contaminated soils - Phase 1: Bench-scale testing: Uranium in Soils Integrated Demonstration, 94:304 (R;US)

Selective leaching of uranium from uranium-contaminated soils: Progress report 1, 94:355 (R;US)

Soil washwater treatment system operating procedure, 94:537 (R;US)

Supporting soil remediation at Fernald by electron beam methods, 94:6 (R;US)

Surface and subsurface cleanup protocol for radionuclides, Gunnison, Colorado, UMTRA project processing site: Final report: Revision 1, 94:75 (R;US)

Thermal Enhanced Vapor Extraction System, 94:406 (R;US)

Three-dimensional computer simulations of bioremediation and vapor extraction, 94:292 (R;US)

Uranium in soils integrated demonstration: 1992 update, 94:271 (R;US)

Uranium speciation in Fernald soils: Progress report, October 1, 1992-May 31, 1993: Revision 1, 94:2230 (R;US)

WAG 2 remedial investigation and site investigation site-specific work plan/health and safety checklist for the soil and sediment task: Environmental Restoration Program, 94:330 (R;US)

[Travel to The Netherlands and Russia to assess international electrokinetic technology as applied to remedial treatment of metal-contaminated soils and groundwater]: Foreign trip report, December 11-19, 1991, 94:2558 (R;US)

Density

Soil density and mass attenuation coefficients for use in shielding calculations at the Hanford Waste Vitrification Plant, 94:498 (R;US)

Dielectric Properties

Test plan for prototype dielectric permittivity sensor, 94:250 (R;US)

Electric Conductivity

Naval Trench 94 soils report, 94:2484 (R;US)

State Waste Discharge Permit Application: Electric resistance tomography testing, 94:144 (R;US)

Erosion

Water erosion field tests for Hanford protective barriers: FY 1992 status report, 94:1763 (R;US)

Excavation

Remedial Action Plan and final design for stabilization of the inactive uranium mill tailings at Green River, Utah: Volume 1, Text, Appendices A, B, and C: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1731 (R;US)

Remote Excavation System technology evaluation report:
Buried Waste Robotics Program, 94:2080 (R;US)

Fluorescence Spectroscopy

Particle characterization of contaminated soil, 94:2183 (R;US)

Freezing

Final report for the cryogenic retrieval demonstration, 94:233 (R;US)

Geology

Process for selecting a soil column disposal site to receive treated effluent containing tritium, 94:2497 (R;US)

Heat Flow

Heat and vapor transport beneath an impermeable cap, 94:2392 (R;US)

Heating

Characterization of the geology, geochemistry, and microbiology of the radio frequency heating demonstration site at the Savannah River Site, 94:2533 (R;US)

Demonstration testing and evaluation of in situ soil heating: Management Plan, 94:133 (R;US)

Investigation of electric fields for low-temperature treatment of soils and liquids, 94:380 (R;US)

Hydraulic Conductivity

The UFA method for site characterization and remediation, 94:2377 (R;US)

Hydrology

Process for selecting a soil column disposal site to receive treated effluent containing tritium, 94:2497 (R;US)

In-Situ Processing

A preliminary study of the controls on melting during in situ vitrification: Environmental Restoration Program, 94:307 (R;US)

Demonstration testing and evaluation of in situ soil heating: Management Plan, 94:133 (R;US)

Technical baseline description for in situ vitrification laboratory test equipment, 94:203 (R;US)

X-231B technology demonstration for in situ treatment of contaminated soil: Laboratory evaluation of in situ vapor stripping, 94:359 (R;US)

Melting

A preliminary study of the controls on melting during in situ vitrification: Environmental Restoration Program, 94:307 (R;US)

Potential for using a six-phase alternating current power supply system for in situ vitrification, 94:372 (R;US)

Migration

Vegetation communities associated with the 100-Area and 200-Area facilities on the Hanford Site, 94:545 (R;US)

Moisture

A new probe for in situ TDR moisture measurement, 94:801 (R;US)

Heat and vapor transport beneath an impermeable cap, 94:2392 (R;US)

Managing soil moisture on waste burial sites, 94:1705 (R;US)

Soil moisture monitoring results at the radioactive waste management complex of the Idaho National Engineering Laboratory, FY-1993, 94:183 (R;US)

Monitoring

Environmental surveillance at Los Alamos during 1991: Environmental protection group, 94:2218 (R;US)

Phase 2 Sampling Plan for Chestnut Ridge Operable Unit 2 (Filled Coal Ash Pond/Upper McCoy Branch) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:756 (R;US)

Remedial investigation report for Chestnut Ridge OU 2 (Filled Coal Ash Pond/McCoy Branch) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2535 (R;US)

Site Safety Plan for Lawrence Livermore National Laboratory CERCLA investigations, 94:989 (R;US)

Use of an Open-path FTIR sensor to measure VOCs at the Hanford Site, 94:532 (R;US)

Westinghouse Hanford Company Environmental Surveillance annual report: 200/600 Areas: Calendar year 1990: Revision 4, 94:2423 (R;US)

Natural Radioactivity

A sitewide approach to the characterization and use of soil and groundwater background at the Hanford Site, 94:2509 (R;US)

Permeability

A negative bioventing feasibility test, 94:635 (R;US)

Functional requirements of the borrow area and haul route for the Waste Area Grouping projects at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:315 (R;US)

Physical Properties

Material properties data and volume estimate of silt loam soil at the NRDWL Reserve, McGee Ranch, 94:2525 (R;US)

QA/QC requirements for physical properties sampling and analysis, 94:538 (R;US)

Pollution Control

Comparative plant uptake and microbial degradation of trichloroethylene in the rhizospheres of five plant species—implications for bioremediation of contaminated surface soils, 94:352 (R;US)

Research and development for DOE environmental restoration and waste management, 94:2129 (R;US)

Porosity

Field test of Six-Phase Soil Heating and evaluation of engineering design code, 94:385 (R;US)

Quantitative Chemical Analysis

Response to comments on remedial investigation report for the Plating Shop Container Areas (S-334 and S-351) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:561 (R;US)

Radiation Monitoring

Remedial Action Plan and site design for stabilization of the inactive uranium mill tailings site at Gunnison, Colorado: Attachment 5, Supplemental radiological data: Final report (Uranium Mill Tailings Remedial Action (UMTRA) Project), 94:1725 (R;US)

Results of the mobile gamma scanning activities in Wayne and Pequannock Townships, New Jersey, 94:2314 (R;US)

Surface and subsurface characterization of uranium contamination at the Fernald environmental management site, 94:2349 (R;US)

Test plan for prototype dielectric permittivity sensor, 94:250 (R;US)

Radioactive Waste Disposal

Engineering evaluation/cost analysis for the proposed decontamination of properties in the vicinity of the Hazelwood Interim Storage Site, Hazelwood, Missouri—environment assessment, 94:2164 (R;US)

Engineering evaluation/cost analysis—environmental assessment for the proposed decontamination of properties in the vicinity of the Hazelwood Interim Storage Site, Hazelwood, Missouri: Revision 1, 94:2165 (R;US)

Radioactivity

Particle characterization of contaminated soil, 94:2183 (R;US)

Radiological survey results at 6 Cliff Street, Beverly, Massachusetts (VB008), 94:2301 (R;US)

Radiological survey results at Beverly Harbor, Beverly, Massachusetts (VB025), 94:2298 (R;US)

Radiochemical Analysis

Environmental characterization of soils and sediments: Progress report, part 2, 94:2409 (R;US)

Radionuclide Migration

A simulation study of moisture movement in proposed barriers for the subsurface disposal area, INEL, 94:1751 (R;US)

Application of spectral gamma-ray borehole geophysics for characterization of radionuclide contamination at Hanford, 94:2506 (R;US)

Data collection handbook to support modeling the impacts of radioactive material in soil, 94:14 (R;US)

Distribution of uranium-bearing phases in soils from Fernald, 94:2126 (R;US)

Ecological assessment plan for Waste Area Grouping 5, 94:2272 (R;US)

Estimating baseline risks from biouptake and food ingestion at a contaminated site, 94:13 (R;US)

SOILS Radionuclide Migration

Evaluation of 1985–1986 corrective actions at ORNL liquid waste disposal trench 7, 94:348 (R;US)
Groundwater impact assessment report for the 216-U-14 Ditch, 94:470 (R;US)
ORNL results for Test Case 1 of the International Atomic Energy Agency's research program on the safety assessment of Near-Surface Radioactive Waste Disposal Facilities, 94:353 (R;US)
RCRA Facility Investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 2, Sections 4 through 9: Environmental Restoration Program, 94:337 (R;US)
RCRA Facility Investigation report for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Volume 3, Appendixes 1 through 8: Environmental Restoration Program, 94:338 (R;US)
Remedial investigation for the 200-BP-1 operable unit, Hanford Site, Richland, Washington, 94:2492 (R;US)
Results of the radiological verification survey of the partial remediation at 90 Avenue C, Lodi, New Jersey (LJ079V), 94:2313 (R;US)
Solubility measurement of uranium in uranium-contaminated soils, 94:2331 (R;US)
Summary of the landfill remediation problems and technology needs of the Oak Ridge Reservation Environmental Restoration Programs, 94:1753 (R;US)
Surface radiological investigation of Trench 5 in Waste Area Grouping 7 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:2246 (R;US)
White Oak Creek Embayment time-critical CERCLA removal action sediment-retention structure: Environmental Restoration Program, 94:345 (R;US)
White Oak Creek embayment sediment retention structure: The Oak Ridge model in action, 94:48 (R;US)

Remedial Action

100 Area Hanford soil washing treatability tests, 94:524 (R;US)
300 Area Hanford past-practice site cleanup and restoration conceptual study, 94:446 (R;US)
Air pathway analysis for cleanup at the chemical plant area of the Weldon Spring site, 94:1787 (R;US)
Analysis of proposed postclosure alternatives for the Bear Creek Burial Grounds at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:2027 (R;US)
Analysis of proposed postclosure alternatives for the Oil Landfarm Waste Management Area at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:2028 (R;US)
Application of surfactant to in situ bioremediation, 94:621 (R;US)
Applications of microwave radiation environmental remediation technologies, 94:3 (R;US)
Arid site characterization and technology assessment: Volatile Organic Compounds-Arid Integrated Demonstration, 94:2351 (R;US)
Bioremediation of nitrates and carbon tetrachloride in groundwater, 94:388 (R;US)
Borehole induction logging for the Dynamic Underground Stripping Project LLNL gasoline spill site, 94:2420 (R;US)
Characterization and remediation of highly radioactive contaminated soil at Hanford, 94:2507 (R;US)
Containment and stabilization technologies for mixed hazardous and radioactive wastes, 94:970 (R;US)
Contaminant resorption during soil washing, 94:552 (R;US)
Cost comparison of laboratory methods and four field screening technologies for uranium-contaminated soil, 94:2160 (R;US)
Cost estimates for the Uranium-in-Soils Integrated Demonstration field screening technologies, 94:929 (R;US)
DECHEM: A remedial planning tool for metallic contaminants in soil at UMTRA Project sites: Final report and users' guide, 94:1940 (R;US)
Development of an ultrasonic process for detoxifying groundwater and soil: Laboratory research: Annual report for fiscal year 1991, 94:22 (R;US)
Direct Sampling Ion Trap Mass Spectrometry, 94:2156 (R;US)
Dynamic Underground Stripping Project, 94:419 (R;US)

Electrokinetic extraction of chromate from unsaturated soils, 94:410 (R;US)
Electrokinetic remediation of anionic contaminants from unsaturated soils, 94:401 (R;US)
Electrokinetic remediation of unsaturated soils, 94:400 (R;US)
Environmental remediation 1991: "Cleaning up the environment for the 21st Century": Proceedings, 94:35 (R;US)
Environmental site characterization and remediation at Lawrence Livermore National Laboratory Site 300, 94:2414 (R;US)
Evaluating long-term performance of in situ vitrified waste forms: Methodology and results, 94:368 (R;US)
Fixation of soil surface contamination using natural polysaccharides, 94:468 (R;US)
Fugitive dust control experiments using directed airflow in dumping operations, 94:231 (R;US)
Hanford Site surface soil radioactive contamination control plan for fiscal year 1993, 94:448 (R;US)
Heap leach studies on the removal of uranium from soil: Report of laboratory-scale test results, 94:300 (R;US)
Heavy Metals Contaminated Soil Project, Resource Recovery Project, and Dynamic Underground Stripping Project, 94:655 (R;US)
High gradient magnetic separation applied to environmental remediation, 94:298 (R;US)
Implementation of in situ vitrification for contaminated soils, 94:393 (R;US)
Implementation of in situ vitrification technology for remediation of Oak Ridge contaminated soil sites: Past results and future plans, 94:624 (R;US)
In Situ Remediation Integrated Program: Technology summary, 94:656 (R;US)
In situ treatment of VOCs by recirculation technologies, 94:924 (R;US)
In situ vitrification: Providing a comprehensive solution for remediation of contaminated soils, 94:384 (R;US)
Innovative environmental restoration and waste management technologies at Argonne National Laboratory, 94:4 (R;US)
Laboratory evaluation of the in situ chemical treatment approach for remediation of Cr(VI)-contaminated soils and groundwater, 94:550 (R;US)
Laboratory evaluation of the in situ chemical treatment approach to soil and groundwater remediation, 94:527 (R;US)
Management Plan: Demonstration testing and evaluation of in situ soil heating, 94:132 (R;US)
Management and disposition of off-site laboratory-generated mixed/low level waste, 94:855 (R;US)
Method and apparatus for removing ions from soil, 94:360 (PA;US)
Monitoring radio-frequency heating of contaminated soils using electrical resistance tomography, 94:2412 (R;US)
Office of Technology Development integrated program for development of in situ remediation technologies, 94:382 (R;US)
PCB dechlorination in anaerobic soil slurry reactors, 94:1312 (R;US)

Guidance document for preparing water sampling and analysis plans for UMTRA sites: Final [report], 94:78 (R;US)
UMTRA Project water sampling and analysis plan: Canonsburg and Burrell, Pennsylvania, 94:89 (R;US)
UMTRA water sampling and analysis plan, Lakeview, Oregon, 94:77 (R;US)
UMTRA water sampling and analysis plan, Tuba City, Arizona: Draft, 94:68 (R;US)

Contamination

Annual report of the Environmental Restoration Monitoring and Assessment Program at Oak Ridge National Laboratory for FY 1992: Environmental Restoration Program, 94:2254 (R;US)
Colonie Interim Storage Site annual environmental report for calendar year 1991, Colonie, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1882 (R;US)
Colonie Interim Storage Site environmental report for calendar year 1992, 1130 Central Avenue, Colonie, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1892 (R;US)
Determination of sediment accumulation and mixing rates using ^{137}Cs and $^{210}\text{Pb}_{\text{ex}}$ in Watts Bar Reservoir, 94:37 (R;US)
Maywood Interim Storage Site: Annual environmental report for calendar year 1990, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1878 (R;US)
Monitoring and modeling contaminated sediment transport in the White Oak Creek watershed: Environmental Restoration Program, 94:313 (R;US)
Remedial investigation for the chemical plant area of the Weldon Spring Site: Volume 1, 94:638 (R;US)
Remedial investigation work plan for Bear Creek Valley Operable Unit 4 (shallow groundwater in Bear Creek Valley) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 94:127 (R;US)
Road Transportable Analytical Laboratory system: Phase 1, 94:719 (R;US)
Source Areas Investigation Plan and Recommendation for Removal Actions at Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:327 (R;US)
Surface radiological investigations at two creek receiving runoff from White Wing Scrap Yard, Oak Ridge Reservation, Oak Ridge, Tennessee: Environmental Restoration Program, 94:331 (R;US)
Transport and accumulation of cesium-137 and mercury in the Clinch River and Watts Bar Reservoir system: Environmental Restoration Program, 94:2243 (R;US)
White Oak Creek Embayment site characterization and contaminant screening analysis: Environmental Restoration Program, 94:2250 (R;US)
Work plan for the remedial investigation/feasibility study-environmental assessment for the quarry residuals operable unit at the Weldon Spring Site, 94:1873 (R;US)

Decontamination

Heavy Metals Contaminated Soil Project, Resource Recovery Project, and Dynamic Underground Stripping Project, 94:655 (R;US)
Removal of uranium by biosorption, 94:50 (R;US)

Flow Models

Summary of ground water and surface water flow and contaminant transport computer codes used at the Idaho National Engineering Laboratory (INEL): Version 1.0, 94:113 (R;US)

Hydrology

Escarpment seeps at Shiprock, New Mexico, 94:152 (R;US)

Maximum Permissible Dose

Maywood Interim Storage Site: Annual environmental report for calendar year 1990, Maywood, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1878 (R;US)

Monitoring

Development of an operational tool for biomonitoring using constant pressure respirometry: [Final report], 94:2221 (R;US)
Environmental surveillance at Los Alamos during 1991: Environmental protection group, 94:2218 (R;US)
Hydrologic data summary for the White Oak Creek Watershed at Oak Ridge National Laboratory, Oak Ridge, Tennessee, January-December 1992: Environmental Restoration Program, 94:328 (R;US)
Niagara Falls Storage Site environmental report for calendar year 1992, 1397 Pletcher Road, Lewiston, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1891 (R;US)
Westinghouse Hanford Company Environmental Surveillance annual report: 200/600 Areas: Calendar year 1990: Revision 4, 94:2423 (R;US)

Radiation Monitoring

Hazelwood Interim Storage Site annual environmental report for calendar year 1991, Hazelwood, Missouri, 94:1881 (R;US)
Hazelwood Interim Storage Site environmental report for calendar year 1992, 9200 Latty Avenue, Hazelwood, Missouri, 94:1893 (R;US)

Sampling

Addendum to the Phase 2 Sampling and Analysis Plan for the Clinch River Remedial Investigation, 94:1867 (R;US)

Field Sampling and Analysis Plan for the Remedial Investigation of Waste Area Grouping 2 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Responses to comments, 94:1870 (R;US)

Guidance document for preparing water sampling and analysis plans for UMTRA sites: Final [report], 94:78 (R;US)

Phase 2 Sampling Plan for Chestnut Ridge Operable Unit 2 (Filled Coal Ash Pond/Upper McCoy Branch) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environmental Restoration Program, 94:756 (R;US)

Phase 2 Sampling Plan for Chestnut Ridge Operable Unit 2 (Filled Coal Ash Pond/Upper McCoy Branch) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environment Restoration Program, 94:757 (R;US)

UMTRA Project water sampling and analysis plan: Canonsburg and Burrell, Pennsylvania, 94:89 (R;US)

UMTRA project water sampling and analysis plan - Shiprock, New Mexico (Uranium Mill Tailings Remedial Action), 94:81 (R;US)

UMTRA water sampling and analysis plan, Green River, Utah, 94:83 (R;US)

UMTRA water sampling and analysis plan, Lakeview, Oregon, 94:77 (R;US)

UMTRA water sampling and analysis plan, Tuba City, Arizona: Draft, 94:68 (R;US)

Screening

Screening level risk assessment for offsite ecological effects in surface waters downstream from the US Department of Energy Oak Ridge Reservation, 94:2244 (R;US)

Waste Disposal

Kerr Hollow Quarry Remediation Project: Environmental Restoration and Waste Management Program, 94:625 (R;US)

Water Quality

Waste management plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:2262 (R;US)

Water Treatment

Evaluation of surface water treatment and discharge options for the Weldon Spring Site Remedial Action Project, 94:12 (R;US)

SURFACES

Determination of 100-year floodplain elevations at Los Alamos National Laboratory, 94:2216 (R;US)

Final results of the application of a structured light source for surface mapping in the Fernald K-65 silos, 94:2151 (R;US)

Macroscopic surface cleaning using a high repetition rate ultra-violet laser, 94:278 (R;US)

Radiological survey results at 14 Cliff Street, Beverly, Massachusetts (VB011), 94:2294 (R;US)

Removal of contaminated concrete surfaces by microwave heating: Phase 1 results, 94:1805 (R;US)

SURPLUS NUCLEAR FACILITIES

Air Pollution Monitoring

Off-site population radiological dose and risk assessment for potential airborne emissions from the Weldon Spring Site, 94:1789 (R;US)

Contamination

Annual summary report on surveillance and maintenance activities of the surplus contaminated facilities program at Oak Ridge National Laboratory for period ending September 30, 1991, 94:1973 (R;US)

Decommissioning

Decontamination and decommissioning assessment for the Waste Incineration Facility (Building 232-Z) Hanford Site, [Hanford], WA, 94:1926 (R;US)

Oak Ridge National Laboratory Technology Logic Diagram: Volume 1, Technology Evaluation: Part A, Decontamination and Decommissioning, 94:1984 (R;US)

Surplus Facilities and Resource Conservation and Recovery Act Closure program plan, fiscal year 1992, 94:1998 (R;US)

Surveillance and Maintenance Plan for the ORNL Decontamination and Decommissioning Program FY 1993-2002, 94:1976 (R;US)

Decontamination

Decontamination and decommissioning assessment for the Waste Incineration Facility (Building 232-Z) Hanford Site, [Hanford], WA, 94:1926 (R;US)

Oak Ridge National Laboratory Technology Logic Diagram: Volume 1, Technology Evaluation: Part A, Decontamination and Decommissioning, 94:1984 (R;US)

Surveillance and Maintenance Plan for the ORNL Decontamination and Decommissioning Program FY 1993-2002, 94:1976 (R;US)

Environmental Effects

Niagara Falls storage site annual environmental report for calendar year 1990, Lewiston, New York: Surplus Facilities Management Program (SFMP), 94:1880 (R;US)

Environmental Impacts

Baseline assessment for the chemical plant area of the Weldon Spring site, 94:640 (R;US)

Fire Hazards

Fire protection for inactive contaminated structures, 94:2020 (R;US)

Inspection

Annual summary report of the Decontamination and Decommissioning Surveillance and Maintenance Program at Oak Ridge National Laboratory for period ending September 30, 1993: Environmental Restoration Program, 94:1978 (R;US)

Maintenance

Annual summary report of the Decontamination and Decommissioning surveillance and maintenance program at Oak Ridge National Laboratory for period ending September 30, 1992: Environmental Restoration Program, 94:1977 (R;US)

Annual summary report on surveillance and maintenance activities of the surplus contaminated facilities program at Oak Ridge National Laboratory for period ending September 30, 1991, 94:1973 (R;US)

Radiation Monitoring

Annual summary report of the Decontamination and Decommissioning surveillance and maintenance program at Oak Ridge National Laboratory for period ending September 30, 1992: Environmental Restoration Program, 94:1977 (R;US)

Annual surveillance and maintenance report for the retired Hanford Site facilities, 94:2000 (R;US)

Remedial Action

Liners

Gamma scans in the annulus of Tank 241-SY-101, 94:1483 (R;US)

Liquid Wastes

Computational analysis of fluid flow and zonal deposition in ferrocyanide single-shell tanks: Ferrocyanide Safety Program, 94:1362 (R;US)

Maintenance

Federal Facility Agreement plans and schedules for liquid low-level radioactive waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 94:850 (R;US)

Maintenance Implementation Plan for waste tank maintenance and production management: Revision 1, 94:1663 (R;US)

Tank Farms Restoration and Upgrades Program Plan: Revision 1, 94:1465 (R;US)

Waste Tank Safety and Operations Program management plan, 94:1501 (R;US)

Materials

The effect of gamma radiation on reference electrodes and platinum- and carbon-steel bare metal electrodes in a simulated waste solution: Final report, 94:956 (R;US)

Mechanical Properties

Continuum soil modeling in the static analysis of buried structures, 94:512 (R;US)
Nonlinear analysis techniques for use in the assessment of high-level waste storage tank structures, 94:1580 (R;US)

Modifications

Tank Farm Upgrades Program Plan, 94:1464 (R;US)

Monitoring

Action plan for response to abnormal conditions in Hanford high level radioactive liquid waste storage tanks containing flammable gases: Revision 1, 94:1486 (R;US)
An overview of progress made toward resolving priority one safety issues: Fiscal year 1992, 94:1520 (R;US)
Development of tank instrumentation: The search for appropriate monitoring, 94:1588 (R;US)
Fiscal year 1992 program plan for evaluation of ferrocyanide in the Hanford Site waste tanks: Revision 2, 94:1466 (R;US)
Neutron pulse simulation in nuclear waste for waste characterization, 94:1650 (R;US)
Program plan for evaluation of the Ferrocyanide Waste Tank safety issue at the Hanford Site, 94:1541 (R;US)
Tank farm surveillance and waste status report for June 1991, 94:1420 (R;US)
Tank farm surveillance and waste status report for September 1991, 94:1423 (R;US)
Tank farm surveillance and waste status summary report for December 1991, 94:1426 (R;US)
Tank farm surveillance and waste status summary report for November 1991, 94:1425 (R;US)
Tank farm surveillance and waste status summary report for October 1991, 94:1424 (R;US)
Understanding of cyclic venting phenomena in Hanford Site high-level waste tanks: The evaluation of Tank 241-SY-101, 94:1594 (R;US)
Waste Tank 241-A-105 supporting documentation: Miscellaneous reports, letters, memoranda, and data, 94:1557 (R;US)

Operation

Operating watch list tanks: A study in control, 94:1586 (R;US)
Tank Farms Restoration and Upgrades Program Plan: Revision 1, 94:1465 (R;US)

Optimization

Federal facility agreement contingency, upgrade, and replacement plans for the ORNL active low-level radioactive waste tank system, 94:907 (R;US)

Performance

Advancing the US Department of Energy's Technologies through the Underground Storage Tank: Integrated Demonstration Program, 94:1617 (R;US)

Performance Testing

Design demonstrations for Category B tank system piping at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:751 (R;US)

Physical Properties

Waste tank properties and contents program plan: Waste Tank Safety Program, 94:1467 (R;US)

Pressure Dependence

Evaluation of 241 AN tank farm flammable gas behavior, 94:1540 (R;US)

Program Management

Waste Tank Safety and Operations Program management plan, 94:1501 (R;US)

Quality Assurance

Waste Characterization Plan for the Hanford Site single-shell tanks: Appendix D, Quality Assurance Project Plan for characterization of single-shell tanks: Revision 3, 94:1448 (R;US)

Quality Control

Waste Characterization Plan for the Hanford Site single-shell tanks: Appendix D, Quality Assurance Project Plan for characterization of single-shell tanks: Revision 3, 94:1448 (R;US)

Radioactive Waste Storage

Ferrocyanide safety program: Heat load and thermal characteristics determination for selected tanks, 94:1526 (R;US)

Long-term management of Hanford Site single-shell tank waste, 94:1572 (R;US)

Tank farm surveillance and waste status summary report for December 1993, 94:1447 (R;US)

Regulations

Initial implementation of Defense Nuclear Facilities Safety Board Recommendation 90-2 for Hanford Site high-level waste tanks: Identification of codes and standards, 94:1513 (R;US)
Program plan for the resolution of tank vapor issues, 94:1509 (R;US)

Reliability

Tank farm surveillance and waste status summary report for December 1993, 94:1447 (R;US)

Remedial Action

Corrective action strategy for single-shell tanks containing organic chemicals, 94:1533 (R;US)
Development, testing, and demonstration of geotechnical and cement-based encapsulant materials for the stabilization of radioactive and hazardous waste disposal structures, 94:487 (R;US)
Function analysis of the single-shell Tank Waste Retrieval Manipulator System: Environmental Restoration and Waste Management Program, 94:1349 (R;US)
Input shaping filter methods for the control of structurally flexible, long-reach manipulators, 94:2066 (R;US)
Key design requirements for long-reach manipulators, 94:2092 (R;US)
Long-reach manipulation for waste storage tank remediation: FY 1991 report, 94:914 (R;US)
Mitigation/remediation concepts for Hanford Site flammable gas generating waste tanks, 94:1498 (R;US)
Remediation schedule for inactive liquid low-level waste storage tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:743 (R;US)
Risk-based prioritization for the interim remediation of inactive low-level liquid radioactive waste underground storage tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:1347 (R;US)
Subsurface barrier technologies as potential interim actions for Department of Energy underground storage tanks, 94:1608 (R;US)
UST-ID Critical Path: Number 1, October 1991–April 1992, 94:1564 (R;US)
Underground Storage Tank Integrated Demonstration (UST-ID): Technology summary, 94:1320 (R;US)
Waste Tank 241-A-105 supporting documentation: Miscellaneous reports, letters, memoranda, and data, 94:1557 (R;US)

Remote Handling

Combined long reach and dexterous manipulation for waste storage tank applications, 94:2035 (R;US)

Remote Sensing

A miniaturized sensor laboratory for in situ characterization of hazardous waste by a robot, 94:2096 (R;US)
A survey of fiber optic sensor technology for nuclear waste tank applications, 94:1598 (R;US)

Retrieval Systems

Overview of the closure approach for the Hanford Site single-shell tank farm, 94:1591 (R;US)

Retrofitting

Tank Farm Upgrades Program Plan, 94:1464 (R;US)

Risk Assessment

Ferrocyanide containing tanks: A study in risk evaluation, 94:1596 (R;US)
Progress in evaluating the hazards of ferrocyanide waste storage tanks, 94:1595 (R;US)
Quarterly report on Defense Nuclear Facilities Safety Board Recommendation 90-7 for the period ending December 31, 1991, 94:1050 (R;US)
Risk characterization data manual for Category D inactive liquid low-level waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 94:746 (R;US)

TANKS

Safeguard Regulations

Safeguard Regulations

Waste Tank Safety, Operations, and Remediation Strategic Plan:
Fiscal year 1992 through Fiscal year 2002, 94:1492 (R;US)

Safety

A strategy for resolving high-priority Hanford Site radioactive waste storage tank safety issues, 94:1613 (R;US)
Approach to improved safety of high-level radioactive waste storage by the US Department of Energy, 94:1307 (R;US)
Assay development status report for total cyanide, 94:1091 (R;US)
Cyclic gas releases in Hanford Site nuclear waste tanks, 94:1610 (R;US)
Establishing in situ conditions of Hanford waste tanks subjected to the aging effects of thermal degradation and creep of concrete, 94:1629 (R;US)
Evaluation of tanks that release flammable gases, 94:1584 (R;US)
Fiscal year 1992 program plan for evaluation and remediation of the generation and release of flammable gases in Hanford Site waste tanks, 94:1075 (R;US)
Hanford Site waste tank stability assessment: Characterization of headspace vapors by Fourier transform infrared-attenuated total reflectance method, 94:1589 (R;US)
Hanford waste tank safety issues, 94:1583 (R;US)
High heat tank safety issue resolution program plan, 94:1503 (R;US)
High organic containing tanks: Assessing the hazard potential, 94:1585 (R;US)
Implementation plan for the Defense Nuclear Facilities Safety Board Recommendation 90-7: Revision 1, 94:1477 (R;US)
Interim criteria for Organic Watch List tanks at the Hanford Site, 94:1534 (R;US)
Moisture monitoring of ferrocyanide tanks: An evaluation of methods and tools, 94:1530 (R;US)
Program plan for evaluation and remediation of the generation and release of flammable gases in Hanford Site waste tanks, 94:1478 (R;US)
Quarterly report on Defense Nuclear Facilities Safety Board Recommendation 90-7 for the period ending March 31, 1992, 94:1051 (R;US)
Quarterly report on Defense Nuclear Facilities Safety Board Recommendation 90-7 for the period ending September 30, 1992, 94:1053 (R;US)
Quarterly report on ferrocyanide safety program for the period ending December 31, 1993, 94:1057 (R;US)
Radioactive waste tank Initial Pretreatment Module (IPM) technology development and selection, 94:973 (R;US)
Recent results from characterization of ferrocyanide wastes at the Hanford Site, 94:1622 (R;US)
Resolution of safety issues associated with the storage of high-level radioactive waste at the Hanford Site, 94:1382 (R;US)
Resolving the safety issue for radioactive waste tanks with high organic content, 94:1616 (R;US)
Seismic design and evaluation guidelines for the Department of Energy high-level waste storage tanks and appurtenances, 94:1299 (R;US)
Status of tank 241-SY-101 data analyses, 94:1516 (R;US)
Tank characterization report: Tank 241-C-109, 94:1531 (R;US)
Tank waste chemistry: A new understanding of waste aging, 94:1620 (R;US)

Safety Analysis

Documentation of Hanford Site independent review of the Hanford Waste Vitrification Plant Preliminary Safety Analysis Report, 94:1111 (R;US)
Ferrocyanide Safety Program rationale for removing six tanks from the safety watch list, 94:1569 (R;US)
Ferrocyanide safety program: Credibility of drying out ferrocyanide tank waste by hot spots, 94:1529 (R;US)
Ferrocyanide waste simulant characterization, 94:1090 (R;US)
Hanford Site Tank Waste Remediation System: Waste management 1993 symposium papers and viewgraphs, 94:1568 (R;US)

Hanford Site radioactive waste storage tank safety issues: The path to resolution, 94:1592 (R;US)
Hanford high-activity waste tank safety issues, 94:1576 (R;US)
Quarterly report on Defense Nuclear Facilities Safety Board Recommendation 90-7 for the period ending December 31, 1992, 94:1054 (R;US)
Safety analysis of exothermic reaction hazards associated with the organic liquid layer in tank 241-C-103, 94:1660 (R;US)
Tank 241-C-103 headspace flammability, 94:1545 (R;US)
Tank characterization data report: Tank 241-C-112, 94:1527 (R;US)
Upgrade activities for the Criticality Safety Program of Hanford High-Level Radioactive Waste Tank Farm, 94:1510 (R;US)
Waste tank properties and contents program plan: Waste Tank Safety Program, 94:1467 (R;US)
Waste tank safety programs overview plan: W1W end function, 94:1480 (R;US)
Waste tank structural evaluation program: Waste Tank Safety Programs, 94:1468 (R;US)

Sampling

Aerosol and vapor characterization of tank 241-C-103: Flammability assessment sampling system, and method validation, 94:960 (R;US)
Tank 241-C-106 sampling data requirements developed through the data quality objectives (DQO) process, 94:1542 (R;US)
Vapor space sampling criteria for single-shell tanks containing ferrocyanide waste: Revision, 94:1479 (R;US)
Waste characterization plan for the Hanford Site single-shell tanks: Appendix I, Test plan for sampling and analysis of ten single-shell tanks, 94:1449 (R;US)

Seismic Effects

Dynamic response of rigid tanks with inhomogeneous liquids, 94:1305 (R;US)
Dynamic soil pressures on rigid cylindrical vaults, 94:1300 (R;US)
Effect of viscosity on seismic response of waste storage tanks, 94:1292 (R;US)
Hydrodynamic effects in tanks containing layered liquids, 94:1304 (R;US)
Overview of seismic panel activities, 94:1294 (R;US)
Sloshing response of layered liquids in rigid tanks, 94:1301 (R;US)
Soil structure interaction analysis for the Hanford Site 241-SY-101 double-shell waste storage tanks: Volume 2, 94:1495 (R;US)
Soil structure interaction analysis for the Hanford Site 241-SY-101 double-shell waste storage tanks: Volume 1, 94:1494 (R;US)
Spacing effects on seismic responses of underground waste storage tanks, 94:1297 (R;US)

Service Life

Extended tank use analysis, 94:1587 (R;US)
Waste Tank Safety and Operations Program management plan, 94:1501 (R;US)

Soil-Structure Interactions

Soil structure interaction analysis for the Hanford Site 241-SY-101 double-shell waste storage tanks: Volume 1, 94:1494 (R;US)
Soil structure interaction analysis for the Hanford Site 241-SY-101 double-shell waste storage tanks: Volume 2, 94:1495 (R;US)

Stability

DOE Hanford Site tank farm interim stabilization during 1990, 94:1577 (R;US)
Effect of viscosity on dynamic response of a liquid storage tank, 94:1293 (R;US)
Evaluation of 241 AN tank farm flammable gas behavior, 94:1540 (R;US)
Mitigation of Tank 241-SY-101 by pump mixing: Results of testing phases A and B, 94:1368 (R;US)
Tank farm surveillance and waste status report for April 1991, 94:1418 (R;US)

Stabilization

Assessment of dome-fill technology and potential fill materials for the Hanford single-shell tanks, 94:1352 (R;US)

Static Loads

Hydrodynamically induced loads on components submerged in high-level waste-storage tanks, 94:1643 (R;US)

Stresses

Seismically induced loads on internal components submerged in waste storage tanks, 94:1632 (R;US)

Surveillance

Action plan for response to excessive temperature in high heat source waste tank 241-C-106 at the Hanford Site, 94:1490 (R;US)

Tank Farm surveillance and waste status summary report for March 1993, 94:1440 (R;US)

Tank Farm surveillance and waste status summary report for September 1992, 94:1435 (R;US)

Tank farm surveillance and waste status report for December 1990, 94:1414 (R;US)

Tank farm surveillance and waste status report for March 1991, 94:1417 (R;US)

Tank farm surveillance and waste status summary for October 1990, 94:1412 (R;US)

Tank farm surveillance and waste status summary for September 1990, 94:1411 (R;US)

Tank farm surveillance and waste status summary report for April 1992, 94:1430 (R;US)

Tank farm surveillance and waste status summary report for August 1990, 94:1410 (R;US)

Tank farm surveillance and waste status summary report for May 1993, 94:1442 (R;US)

Tank farm surveillance and waste status summary report for November 1990, 94:1413 (R;US)

Tank farm surveillance and waste status summary report for November 1993, 94:1446 (R;US)

Tank farm surveillance and waste status summary report for October 1992, 94:1436 (R;US)

Systems Analysis

Single-shell tank systems analysis description: Draft, 94:1451 (R;US)

Technology Assessment

Underground storage tank waste characterization needs assessment workshop, 94:1071 (R;US)

Temperature Measurement

Thermocouple tree system installation and operation in non-leaking ferrocyanide tanks, Hanford Site, Richland, Washington: Environmental assessment, 94:1315 (R;US)

Temperature Monitoring

Action plan for response to excessive temperature in high heat source waste tank 241-C-106 at the Hanford Site, 94:1490 (R;US)

Thermal Analysis

Ferrocyanide safety program: Heat load and thermal characteristics determination for selected tanks, 94:1526 (R;US)

Thermal Degradation

Thermal degradation of concrete in the temperature range from ambient to 315°C (600°F), 94:1302 (R;US)

Underground Storage

Independent technical review of the Hanford Tank Farm Operations, 94:1318 (R;US)

Radioactive waste storage tanks at the Hanford Site, 94:1574 (R;US)

Regulatory analysis of the Underground Storage Tank-Integrated Demonstration Program, 94:1505 (R;US)

Tank farm surveillance and waste status report for August 1991, 94:1422 (R;US)

Tank farm surveillance and waste status summary for October 1990, 94:1412 (R;US)

Tank farm surveillance and waste status summary for September 1990, 94:1411 (R;US)

Tank farm surveillance and waste status summary report for April 1990, 94:1407 (R;US)

Tank farm surveillance and waste status summary report for August 1990, 94:1410 (R;US)

Tank farm surveillance and waste status summary report for February 1990, 94:1405 (R;US)

Tank farm surveillance and waste status summary report for July 1990, 94:1409 (R;US)

Tank farm surveillance and waste status summary report for June 1990, 94:1408 (R;US)

Tank farm surveillance and waste status summary report for March 1990, 94:1406 (R;US)

Tank farm surveillance and waste status summary report for November 1990, 94:1413 (R;US)

Underground storage tank compliance activities at the Hanford Site, 94:1573 (R;US)

Vapors

Hanford Site waste tank stability assessment: Characterization of headspace vapors by Fourier transform infrared-attenuated total reflectance method, 94:1589 (R;US)

Ventilation

Action plan for response to excessive temperature in high heat source waste tank 241-C-106 at the Hanford Site, 94:1490 (R;US)

An HMS/TRAC analysis of a high-level radioactive waste tank, 94:1338 (R;US)

Evaluation of the generation and release of flammable gases in tank 241-SY-101, 94:1499 (R;US)

Vents

An HMS/TRAC analysis of a high-level radioactive waste tank, 94:1338 (R;US)

Vitrification

Vitrification of underground storage tanks: Technology development, regulatory issues, and cost analysis, 94:377 (R;US)

Waste Retrieval

High-heat tank safety issue resolution program plan: Revision 1, 94:1504 (R;US)

TARGETS

Hanford Site production reactor data pertinent to actinide burning, 94:1198 (R;US)

TBP

Calculation of reaction energies and adiabatic temperatures for waste tank reactions: Waste Tank Safety Program, 94:1357 (R;US)

Destruction of UST organics and nitrates, polymeric organic wastes, and chlorocarbon solvents by steam reforming, 94:405 (R;US)

In situ secondary ion mass spectrometry analysis: 1992 Summary report, 94:2188 (R;US)

The chemistry of tributyl phosphate at elevated temperatures in the Plutonium Finishing Plant Process Vessels, 94:1107 (R;US)

TECHNETIUM 99

Disposal of Hanford site tank wastes, 94:1609 (R;US)

Evaluation and selection of aqueous-based technology for partitioning radionuclides from ICPP calcine, 94:1248 (R;US)

Extraction of technetium from simulated Hanford tank wastes, 94:1281 (R;US)

Leach testing of in situ stabilization grouts containing additives to sequester contaminants, 94:939 (R;US)

National Low-Level Waste Management Program Radionuclide Report Series: Volume 2, Technetium-99, 94:688 (R;US)

TECHNICAL INFORMATION CENTER

See US DOE

TECHNOLOGY TRANSFER

DOE International Technology Exchange Program (ITEP): Technical integration of sensor technology development, 94:2612 (R;US)

Hanford Waste Vitrification Plant Project technical exchange plan for fiscal year 1993, 94:1234 (R;US)

TEFLON

The reaction of SRL 202 glass in J-13 and DIW, 94:1262 (R;US)

TEKTITES

Obsidians and tektites: Natural analogues for water diffusion in nuclear waste glasses, 94:1286 (R;US)

URANIUM

Adsorption

Alternative geochemical barrier materials (Taconite and scoria), 94:156 (R;US)

Data for surface ionization and complexation modeling, 94:1941 (R;US)

Distribution

Analytical Electron Microscopy examination of uranium contamination at the DOE Fernald operation site, 94:2123 (R;US)

Ecological Concentration

Quantification of uranium transport away from firing sites at Los Alamos National Laboratory: A mass balance approach, 94:2227 (R;US)

Environmental Transport

Solubility measurement of uranium in uranium-contaminated soils, 94:2331 (R;US)

Extraction

An integrated approach to the characterization of uranium-contaminated soils, 94:2387 (R;US)

Characterization of uranium contaminated soils from DOE Fernald Environmental Management Project Site: Results of Phase 1 characterization, 94:351 (R;US)

Pretreatment of neutralized cladding removal waste sludge: Results of the second design basis experiment, 94:1374 (R;US)

Selective leaching of uranium from uranium-contaminated soils, 94:620 (R;US)

Geophysical Surveys

An application of the Ultrasonic Ranging and Data System (USRADS) as a verification tool, 94:619 (R;US)

Health Hazards

Baseline risk assessment for groundwater contamination at the uranium mill tailings site, Gunnison, Colorado, 94:147 (R;US)

Performance assessment activities of the Uranium Soils Integrated Demonstration, 94:1812 (R;US)

Isotope Ratio

Response to comments and recommendations on RCRA Facility Investigation Plan for Group 4 at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Volume 2, Operable Unit 2: Environmental Restoration Program, 94:560 (R;US)

Leaching

Selective leaching of uranium from uranium-contaminated soils: Progress report 1, 94:355 (R;US)

Machining

Results of the radiological survey at the former Alba Craft Laboratory site properties, Oxford, Ohio (OXO001), 94:2310 (R;US)

Materials Recovery

An integrated approach to the characterization and decontamination of uranium contaminated soils, 94:2406 (R;US)

Purification of waste uranium for recycle, 94:858 (R;US)

Removal of uranium from uranium-contaminated soils - Phase 1: Bench-scale testing: Uranium in Soils Integrated Demonstration, 94:304 (R;US)

Soil wastewater treatment system operating procedure, 94:537 (R;US)

Microbial Leaching

Removal of uranium by biosorption, 94:50 (R;US)

Mill Tailings

Economic impact study of the Uranium Mill Tailings Remedial Action Project in Colorado: Colorado state fiscal year 1993, 94:86 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix B to Attachment 3, lithologic logs: Preliminary final, 94:1685 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Remedial Action Selection Report: Preliminary final, 94:1681 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Attachment 4, water resources protection strategy: Preliminary final, 94:1687 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix A to Attachment 3, tables: Preliminary final, 94:1684 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado: Appendix C to Attachment 3, calculations: Preliminary final, 94:1686 (R;US)

UMTRA Project water sampling and analysis plan, Falls City, Texas, 94:90 (R;US)

Partition

Effluent testing for the Oak Ridge Toxic Substances Control Act mixed waste incinerator emissions tests of January 16 and 18, 1991, 94:286 (R;US)

Precipitation

Disposition of PUREX facility tanks D5 and E6 uranium and plutonium solutions: Final report, 94:1235 (R;US)

Processing

Modeling vertical and horizontal solute transport for the Weldon Spring Site Remedial Action Project, 94:17 (R;US)

Qualitative Chemical Analysis

Uranium speciation in Fernald soils: Progress report, January 1-May 31, 1992, 94:2231 (R;US)

Uranium speciation in Fernald soils: Progress report, October 1, 1992-May 31, 1993: Revision 1, 94:2230 (R;US)

Radioactive Waste Disposal

Long-term surveillance plan for the Shiprock disposal site, Shiprock, New Mexico, 94:1821 (R;US)

Radiochemical Analysis

Uranium-contaminated soils: Ultramicrotomy and electron beam analysis, 94:2127 (R;US)

Radioecological Concentration

An evaluation of the results of alluvial groundwater sampling from 1987-1990 at the Durango disposal site, 94:146 (R;US)

Baseline risk assessment of groundwater contamination at the uranium mill tailings site near Shiprock, New Mexico: Draft, 94:64 (R;US)

Colonie Interim Storage Site annual environmental report for calendar year 1991, Colonie, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1882 (R;US)

Colonie Interim Storage Site environmental report for calendar year 1992, 1130 Central Avenue, Colonie, New York: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1892 (R;US)

Distribution of uranium-bearing phases in soils from Fernald, 94:2126 (R;US)

Field demonstration of technologies for delineating uranium contaminated soils, 94:407 (R;US)

Hazelwood Interim Storage Site environmental report for calendar year 1992, 9200 Latty Avenue, Hazelwood, Missouri, 94:1893 (R;US)

Middlesex Sampling Plant annual environmental report for calendar year 1991, Middlesex, New Jersey: Formerly Utilized Sites Remedial Action Program (FUSRAP), 94:1883 (R;US)

Quantitative in situ uranium contaminant mapping using high-resolution gamma-ray spectrometry and beta scintillation counting, 94:2380 (R;US)

Radiological survey results at the former Bridgeport Brass Company facility, Seymour, Connecticut, 94:2326 (R;US)

Remedial Investigation Report on the Abandoned Nitric Acid Pipeline at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Energy Systems Environmental Restoration Program; Y-12 Environmental Restoration Program, 94:1866 (R;US)

Technology information profile: RL321103 - In situ gamma spectrometer, 94:2381 (R;US)

Uranium in soils integrated demonstration site characterization at Fernald, Ohio: Report of uranium concentrations in soil determined by in situ LA-ICP-AES, 94:2589 (R;US)

Uranium-contaminated soils: Ultramicrotomy and electron beam analysis, 94:2127 (R;US)

Westinghouse Hanford Company environmental surveillance annual report: Calendar year 1991, 94:1079 (R;US)

Remedial Action

Determining uranium speciation in contaminated soils by molecular spectroscopic methods: Examples from the Uranium in Soils Integrated Demonstration, 94:2235 (R;US)

Economic impact study of the Uranium Mill Tailings Remedial Action Project in Colorado: Colorado state fiscal year 1993, 94:86 (R;US)

Removal

Remediation of groundwater containing radionuclides and heavy metals using ion exchange and the AlgaSORB® biosorbent system: Final report, 94:97 (R;US)

Secondary wastes and treatment of effluents from leaching of uranium from soils, 94:53 (R;US)

Technology needs study: Fernald Environmental Management Project, 94:274 (R;US)

Risk Assessment

Risk assessment applications for determining cleanup limits for uranium in treated and untreated soils, 94:57 (R;US)

Separation Processes

Destruction of complexants used in groundwater decontamination, 94:495 (R;US)

Heap leach studies on the removal of uranium from soil: Report of laboratory-scale test results, 94:300 (R;US)

Treatment tests for ex situ removal of chromate, nitrate, and uranium (VI) from Hanford (100-HR-3) groundwater: Final report, 94:548 (R;US)

Solubility

Solubility measurement of uranium in uranium-contaminated soils, 94:2331 (R;US)

Storage

Results of the radiological survey at the former Chapman Valve Manufacturing Company, Indian Orchard, Massachusetts (CIO001), 94:2300 (R;US)

URANIUM 234

Report Number Index

The report number index consists of the alphanumeric identifiers assigned to report literature as well as patent and conference literature cited in this publication. Entries provide the abstract number; the source(s) of availability of the document; the GPO file prefix for GPO depository library documents; the order number for OSTI and NTIS report ordering purposes; and, if the document was distributed under the DOE distribution program, the category number is shown for paper copy (PC), microfiche (MF), or no distribution (ND). These categories are included to assist DOE librarians in responding to requests for reports in their collections. The index also lists secondary numbers, with the corresponding abstract numbers and cross-references to other identifying numbers.

<i>Report Number</i>	<i>Abstract Number</i>	<i>Source of Availability</i>	<i>GPO Dep.</i>	<i>Order Number</i>	<i>Distribution Category</i>

CONF-940433-		(Spring meeting of the American Institute of Chemical Engineers; Atlanta, GA (United States); 17-21 Apr 1994)			
6 CONF-940436-	94:635	OSTI; NTIS; INIS; GPO Dep. (4. international meeting on nuclear thermal hydraulics, operations and safety; Taipei (Taiwan, Province of China); 3-6 Apr 1994)	E 1.99:	DE94012653	MF-902
2 CONF-940456-	94:2229	See LA-UR-93-2673 (1994 Society for Computer Simulation multiconference; San Diego, CA (United States); 11-15 Apr 1994)			
15	94:1652	See WHC-SA-2185			
16	94:530	See WHC-SA-2186			
17 CONF-940490-	94:1650	See WHC-SA-2159 (7. international symposium on the observation of the continental crust through drilling: continental processes - a decade of drilling discoveries; Santa Fe, NM (United States); 25-30 Apr 1994)			
1 CONF-940499-	94:2237	See LA-UR-94-739 (Federal environmental restoration and waste minimization conference and exhibition; New Orleans, LA (United States); 25-29 Apr 1994)			
7	94:2019	See WHC-SA-2269			
8	94:1765	See SAND-94-0982C			
9 CONF-940501-	94:1221	See WHC-SA-2300 (9. Pacific basin nuclear conference; Sydney (Australia); 1-5 May 1994)			
2 CONF-940506-	94:636	OSTI; NTIS; INIS; GPO Dep. (8. international conference on computer methods and advances in geomechanics; Morgantown, WV (United States); 22-28 May 1994)	E 1.99:	DE94007213	MF-940
1 CONF-9405109-	94:2403	See SAND-93-2670C (Department of Energy defense programs packaging workshop; Knoxville, TN (United States); 16-19 May 1994)			
3 CONF-940524-	94:1222	See WHC-SA-2361 (8. symposium on radiation measurements and applications; Ann Arbor, MI (United States); 16-19 May 1994)			
3 CONF-940528-	94:567	See ANL/CMT-ACL/CP-82554 (Incineration conference: 13th international symposium on thermal treatment technologies; Houston, TX (United States); 9-13 May 1994)			
2 CONF-940536-	94:860	See K/TCO-1080 (10. conference on geologic remote sensing: exploration, environment and engineering; San Antonio, TX (United States); 9-12 May 1994)			
1 CONF-940550-	94:557	See WSRC-MS-94-0233 (Institute of Electrical and Electronics Engineers (IEEE) international conference on robotics; San Diego, CA (United States); 8-13 May 1994)			
5	94:2110	See SAND-93-2380C			
8	94:2066	OSTI; NTIS; INIS; GPO Dep.	E 1.99:	DE94002799	MF-906
12 CONF-940553-	94:2112	See SAND-94-1111C (International high-level radioactive waste management conference; Las Vegas, NV (United States); 22-26 May 1994)			
25	94:1314	OSTI; NTIS; INIS; GPO Dep.	E 1.99:	DE94009162	MF-940
29 CONF-940578-	94:1641	See WHC-SA-2100 (Pollution prevention conference; Denver, CO (United States); 3-5 May 1994)			
3 CONF-940613-	94:566	See ANL/CMT-ACL/CP-82220 (1994 pressure vessels and piping conference; Minneapolis, MN (United States); 19-23 Jun 1994)			
4	94:1639	See WHC-SA-2065
