TECHNICAL PROGRESS LETTER

INTRODUCTION

It was agreed at the February, 1951 meeting of the Atomic Energy Commission Technical Information Panel that, wherever practical, progress reports should periodically include a list of previous reports issued in the same series. Such a list would greatly facilitate servicing by installation document rooms since requests are frequently received for reports in a specific series.

This report lists the Technical Progress Letters from 1944 to date, and is distributed to recipients of the Letters in accordance with the recommendations of the Panel. Because of its length it was not deemed practical to include it as a part of the report itself. It is anticipated that it will serve as a reference list and permit reduction of personal files.

IGL:mb

A handwritten signature in dark ink, appearing to read 'I. G. Linkous', written over a horizontal line.
