PREFACE

This title list of publicly available documents pertaining to Three Mile Island Unit 2, Docket 50-320, includes those preincident and postincident documents filed in the NRC Public Document Room as of May 21, 1979. It is divided into preincident and postincident listings, with both listings subdivided into the categories used for filing and searching in the NRC Public Document Room. Those categories are:

- A. Application/construction stage documents and correspondence
- B. Utility Preliminary Safety Analysis Report (PSAR) and amendments
- C. Utility Environmental Report (ER), amendments and correspondence
- D. NRC Draft and Final Environmental (Impact) Statements (DES and FES), supplements and correspondence
- E. NRC Safety Evaluation Report (SER), supplements and correspondence
- F. Security, medical, emergency and fire-protection plans
- G. Adjudicatory correspondence
- H. General correspondence
- I. Financial information
- J. Insurance and indemnity information
- K. Utility Final Safety Analysis Report (FSAR) and amendments
- L. Limited work authorization and related correspondence
- M. Antitrust correspondence
- N. Antitrust hearing transcripts
- O. Advisory Committee on Reactor Safeguards (ACRS) reports and correspondence
- P. Operating license stage documents and correspondence
- Q. Inspection reports, IE Bulletins and correspondence
- R. Periodic operating reports and related correspondence
- S. Reportable occurrences, LERs and related correspondence
- T. Hearing transcripts on non-antitrust matters

Appendix A sets forth these categories and describes the materials available in each. Omission of a category in this report indicates that no documents in that category were filed in the time period of the report.

Title list reports on Three Mile Island may contain titles that refer to Oyster Creek Unit 2 because prior to March 10, 1969 the design was to be used for that plant. When the designation became Three Mile Island Unit 2, the NRC docket number was not changed.

The principal elements of the entries in the list are:

1. NRC/PDR document category (see Appendix A).
2. NRC Accession Number.
3. Description of information contained in the document.
4. Personal author. An asterisk in this position indicates that there is no personal author.
5. Corporate, agency or nonindividual source.
6. Date of document described.
7. Pages in document.
8. If this space is blank, the document is available to the public only in the NRC Public Document Room, 1717 H Street, N.W. Washington, D.C. 20555. If this space is filled, it gives other sources for copies of the document. The entry may be "Available at NRC" for sale; "Available at NTIS"; or "Available at GPO." If the docketed document has a contract (FIN) number or a formal report number, it will appear in the last line following entry 5.

The entries are arranged essentially by date order within each category. In this initial collective report on Three Mile Island, there is often no correlation of accession number and date of the document because much of the material originated prior to initiation of the automated system for entering these documents. In routine daily entry of incoming and outgoing documents there would be close correlation of accession number and date of origination or receipt of a document. This relationship will appear in supplements to this document.

Entries indented and preceded by a dash are items that were submitted as enclosures to the undented document.

Supplements to this document will be issued as sufficient material becomes available. These supplements may appear as regularly as monthly while the incident investigations are under way. When activity on this docket subsides, a cumulated document will be issued periodically. Copies of this document and microfiche of the listed information are available at the NRC Public Document Room for a fee.

We would appreciate your comments, criticisms and suggestions regarding this document. In particular, if there are title descriptions that are not meaningful, please let us know so that we can correct our data base.
