SUMMARY

Information is reported on new production,
inventory status, operational problems,
and radioisotope sales.

				102:30	\$18,150

Cyclotron Operations

Major repairs to the cyclotron were completed June 11, 1977 and regular production runs were started. Malfunction of some components resulted in operation of the cyclotron at a reduced beam current.

FISSION PRODUCTS

Krypton-85 Enrichment Facility (*R. W. Schaich*)

Fifty percent of the ^{85}Kr enrichment columns were operative during the month of June. A helium leak testing program is still in progress to determine the leak points on the remaining columns, and repairs should be completed by July 1, 1977. Full operation of all the columns should start during July.

Cesium-137 Pilot Production (*R. W. Schaich*) (Production and Inventory Accounts)

1. Process Status

Process equipment is in standby status.
