1.A Vision and Mission	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
------------------------	--	--

Vision

The Safety Analysis & Engineering (SA&E) department provides core competency for safety analysis and risk documentation that supports achievement of the goals and mission as described in the *Hanford Mission Plan, Volume I, Site Guidance* (DOE-RL 1993). SA&E operations are integrated into the programs that plan and conduct safe waste management, environmental restoration, and operational activities. SA&E personnel are key members of task teams assigned to eliminate urgent risks and inherent threats that exist at the Hanford Site. Key to ensuring protection of public health and safety, and that of onsite workers, are the products and services provided by the department. SA&E will continue to provide a leadership role throughout the DOE complex with innovative, cost-effective approaches to ensuring safety during environmental cleanup operations.

Mission

The SA&E mission is to provide support to direct program operations through safety analysis and risk documentation and to maintain an infrastructure responsive to the evolutionary climate at the Hanford Site. SA&E will maintain the appropriate skills mix necessary to fulfill the customers' need to conduct all operations in a safe and cost-effective manner while ensuring the safety of the public and the onsite worker.

1.B Situational Analysis	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
---------------------------------	---	---

Primary Customers

The primary customers supported by this portion of the Site Support Program Plan are the SA&E personnel; the U.S. Department of Energy, Richland Operations Office (DOE-RL); the U.S. Department of Energy, Headquarters (DOE-HQ); Westinghouse Hanford Company (WHC) direct-funded programs and projects; and operating and surplus nuclear and nonnuclear facilities. The SA&E Department provides safety-design support and produces safety-analysis and risk-assessment documentation, safety assessments, criticality analysis, and project safety documentation. The department is responsible for implementing DOE orders and rules for use in safety and risk analysis activities.

Products and Services Provided

This evaluation is divided into three major elements: (1) operations support, (2) program management, and (3) qualification and training.

(1) Operations support provides the building space (occupancy), telephones, network access, computer-maintenance support (through Boeing Computer Services, Richland), medical assistance (through the Hanford Environmental Health Foundation), Engineering Analysis and Technology (EAT) management proration, and building administration.

(2) Program management provides the personnel and resources to ensure implementation of the department charter, assess productivity, maintain total quality involvement within the DOE community, ensure compliance with WHC policies and procedures, trend cost effectiveness and customer satisfaction, support the Site Support Program Plan and the Environment, Health and Safety Management Plan, and ensure that an adequate mix of required skills is available.

(3) Qualification and training for SA&E personnel is provided.

1.B.1 Internal Assessment Summary	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
-----------------------------------	--	--

The major strength of the organization is the ability to redirect limited resources to ever-changing priorities and to maintain the necessary skill base to do so.

Major Activities Performed to Deliver Products and Services

Goals, objectives, and values receive continuous evaluation through staff interaction, management interface with customers, and the involvement of SA&E personnel with the Energy Facilities Contractors Operating Group (EFCOG), professional societies and standards groups, and DOE personnel complex-wide.

Department participation in the development and implementation of the Multi-Year Program Plan (direct) and the Site Support Program Plan (indirect) are major activities that determine the allocation of resources and the acquisition of skills necessary for the department to produce timely, high quality, cost-effective products.

Because safety analysis work is highly specialized, the qualification and certification program for analysts is an essential activity for ensuring high quality products. Adequate training of SA&E personnel to ensure core competency in an ever-changing environment requires a disciplined approach to training and has a direct impact on product quality.

Contracts administration is a major activity necessary to provide the appropriate level of qualified outside services supporting direct staff in meeting commitments.

A managed program for the acquisition, deployment, and maintenance of computing hardware and software is an integral part of the department's daily operation.

As a performing organization, SA&E is a major contributor to the policies and procedures that become part of the *Nonreactor Facility Safety Analysis Manual* (WHC-CM-4-46) managed by the Nuclear Safety Organization.

1.B.1 Internal Assessment Summary	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
-----------------------------------	--	--

Evaluation of Major Activities

The cost of products produced could be reduced significantly by relieving the SA&E department of a portion of the nondiscretionary costs. As an indirect program, 100% of all occupancy costs, telephones, medicals, network connections, supplies, program developments, and mandatory training is passed on to the customers as burden. Although the dollar volume of direct-funded work has steadily increased over the last few years, the overhead-funded program has remained essentially constant. However, rising costs have reduced to a critical level the resources available to implement the program objectives. Administrative functions that inform the organization and the company of the program's effectiveness are strained. Adoption and use of sitewide management systems (e.g., Site standard scheduling system) would eliminate redundancy and reduce costs.

Factors that Influence Resource Consumption

The major factors that influence resource consumption are changes to DOE rules and orders, escalation rates, increased training requirements, changing planning and reporting requirements, reorganizations, reprioritizations of funds and personnel, fluctuations in direct-funding bases, rising material and services costs, and emergent work.

Factors that Influence Changes in Types or Nature of Products and Services

The major factors that influence changes in the types or nature of products and services are changes to planning and reporting systems and processes, rising costs, resource limitations, incomplete planning, lack of cost control, new or changing regulations, elimination of previous requirements, customer needs, and reorganizations or reassignment of organizational roles and responsibilities.

1.B.2 External Assessment Summary	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
-----------------------------------	--	--

Summary of Customer Requirements

The customers' needs have been identified through an ongoing dialogue and will continue to evolve with time. At this point, the major expectations of SA&E are to develop, in concert with WHC Nuclear Safety, a standardized approach to safety documentation that reflects DOE rulemaking activities, to continue a qualification and training program for analysts, and to support the Hanford Site Plan through the development of input to the Site Support Program Plan/Multi-Year Program Plan.

Potential Impacts

The strong thrust towards privatization at Hanford and the changing role of the maintenance and operations contractor to one of integrator, could precipitate some impacts to the plans developed in this program. If safety analysis and engineering capability, per se, is outsourced, the program development/excellence portion of the department's operation might be at risk for a clearly defined sponsor. The integrator would, by charter, be concerned with the programmatic aspects of the work. The service contractors would be responsible for the execution. Managed focus on these core competencies of SA&E throughout this transition is recommended to ensure program consistency and continued progress. Additionally, it is unclear what impact increased outsourcing would have on the liquidation base that provides for this program's continued success.

1.C Goals and Objectives	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
--------------------------	--	--

Goals

- 1.0 Ensure that all SA&E personnel work safely at all times. Provide a culture that supports safety in all facets of our employees' lives.
- 2.0 Increase DOE customer support through improved interface meetings and better performance measurement.
- 3.0 Reduce the cost of support services to the direct programs.
- 4.0 Improve the skills mix and capabilities of the department staff in all areas of support.
- 5.0 Enhance processes and procedures to increase worker productivity and reduce product costs.

Objectives

- 1.0 Maintain a high level of quality safety training and achieve 90% or better attendance at monthly safety meetings.
- 2.0 Ensure that all safety and risk-analysis activities are conducted in accordance with the applicable DOE rules and orders, laws, and regulations to protect the health and environment. Update, revise, and eliminate department procedures relating to quality that affect safety and risk-analysis activities.
- 3.0 Conduct monthly DOE customer-interface meetings to review cost, scope, and schedule for the approved work-plan milestones.
- 4.0 Develop resource-loaded schedules for all program milestones and review the status monthly.

1.C Goals and Objectives	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
--------------------------	--	--

- 5.0 Reduce the department overhead (DOH) rate by 10% for fiscal year (FY) 1995.
- 6.0 Develop and implement a qualification program for safety analysts.

1.D Strategies	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
----------------	--	--

Customer Support Strategies

The major program elements have been determined through continuous customer interface. Those quality-affecting elements receive input from internal-staff management and from our DOE customer. The SA&E program must be responsive to changes in DOE guidance/regulations as well as the needs of our internal customers. Constant communication via biweekly interface meetings with the DOE-RL monitor ensure consensus direction of ongoing activities.

SA&E products and services provided to the direct-funded programs are identified in each program's input to the Multi-Year Program Plan and the Fiscal Year Program Plans. Additionally, direct funding is often provided through cross charging of task package control numbers (TPCNs) and work orders for activities related to urgent risks and emergent work.

Production Strategies

Products are first prioritized in order of importance (need). Cost estimates for each deliverable, and an accompanying time frame, are determined. Finally, the availability of resources, personnel, and money are considered to determine how much can be accomplished in a given fiscal year. Milestone commitments are clearly defined, and the dedicated resources necessary to accomplish them are identified. A major factor in success is to have deliverables described in enough detail that all involved understand what is expected. All milestone deliverables are accompanied by resource-loaded schedules that are reviewed monthly.

1.D Strategies	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
----------------	--	--

Organization and Management Strategies

The department is essentially structured to support our major, WHC project customers. However, because the products of the support program often benefit all of our customers, organizational structures need to be flexible enough to support changing needs. A management system responsive to changing priorities is essential in today's environment. The department manager has an ongoing evaluation of organizational responsiveness to customer needs and the skills mix of personnel within the department.

1.E Assumptions	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
-----------------	--	--

The following assumptions are the basis for developing the goals and objectives of this plan for FY 1995.

- Assumption 1: Direct funding to support the liquidation labor base for this program will be available at the level necessary. At this time, the direct funding is based on best estimates developed with the program office representatives.
- Assumption 2: The SA&E department will remain intact and be able to adjust the skills mix of the personnel to more effectively support our customers.
- Assumption 3: Creative ways will be developed to have the programs bear the nondiscretionary costs associated with hiring contract personnel to support the workload at hand.
- Assumption 4: The program management infrastructure currently in place will continue to function and to provide increased visibility to our DOE customers on program performance.

1.F Issues and Constraints	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
----------------------------	--	--

Significant increases in outsourcing of work could impact this program. This activity does not bear burden for department overhead and would significantly reduce funds available for the Safety Analysis & Engineering program. However, work scope could be maintained with a significant rate increase. If funds are reduced, the discretionary portion of the program would have reduced work scope in order to meet nondiscretionary expenses.

No known obstacles exist, at present, to prevent accomplishment of the program's objectives.

1.G Performance Measures	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
--------------------------	--	--

The SA&E organization maintains a total quality plan that utilizes performance indicators to assess performance and to plan and indicate the need for corrective actions and improvements. The performance measures are provided on a monthly basis to management.

- 1.0 Meet a least 90% of commitment dates.
- 2.0 Provide analyses and corrective action plans for all variances exceeding a threshold of plus or minus 10% and \$25,000. Monitor corrective action plans and evaluate them for success.
- 3.0 Meet at least 95% of the QUEST response dates.
- 4.0 Submit ECCEL requests that meet or exceed the ECCEL dollar target for FY 1995.
- 5.0 Achieve 90% or better attendance at monthly safety meetings.

2.A.2 Description of Activities	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
Activity number	Activity title	Description
6.3.5.1	Management and Administration	Management and Administration encompasses the management and administrative activities associated with the operations of the SA&E department and the management of department resources. This includes management of fixed departmental costs, discretionary functional management and administration activities, provision for hourly support personnel, and resources for departmental staff moves.
6.3.5.2	Program Management	Program Management addresses budgetary and planning input to the Multi-Year Program Plan, Fiscal Year Work Plan, and Site Support Program Plan. Contract Administration supports the SA&E organization's role in the administration and procurement of subcontracted services (safety analysis documents). Also included is the performance of monthly program reviews, monthly DOE-interface meetings, development of performance analysis/indicators, productivity evaluations, process change control actions, input to the monthly Site Management System Report, and management of the automated data-processing equipment for the department. This activity also manages EFCOG involvement, professional societies' requirements, and corrective action activities for the SA&E department.
6.3.5.3	Qualification and Certification Training	Qualification and Certification Training develops training requirements criteria and training plans and trains analysts.
6.3.5.4	Emergent Work	Emergent Work manages imposed, unbudgeted, and unplanned work scope.

2.C.2 Cost Basis	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
------------------	--	--

6.3.5.1 Management and Administration

The FY 1995 Nondiscretionary Operating Costs activities are estimated on the basis of FY 1994 historical data analysis for Site assessments and services plus three percent escalation for FY 1995 through FY 1997, in accordance with WHC guidance. The FY 1995 cost estimates for 8D100 Management and Hourly Support activities are definitively based because of WHC reorganization and departmental downsizing of support personnel. This level of support is expected to be reduced slightly in FY 1996 and FY 1997. The FY 1995 Staff Moves cost is estimated from FY 1993 and FY 1994 historical data and expectations for a planned move of personnel located at the ETC-1 Building to the 450 Hills Building. It is anticipated that FY 1996 and FY 1997 Staff Moves activities will be minimal.

6.3.5.2 Program Management

The costs in FY 1995 for SA&E Program Development and Implementation, Contracts Administration, and CAM Administration are estimated on the basis of planned, discreet milestones and FY 1994 historical data analysis of program documentation requirements specified by DOE-RL and WHC orders and procedures. It is assumed that these requirements will continue into FY 1996 and FY 1997 and are essential for the SA&E department to manage its programs in a cost-effective manner. Estimates for FY 1995 EFCOG Activities and Professional Societies and Standards Groups are based on historical data analysis and management's anticipated support requirement for WHC involvement in seminars, meetings, committees, and conferences. In FY 1996 and FY 1997, SA&E will continue at near the same activity level as FY 1995.

2.C.2 Cost Basis	Westinghouse Hanford Company Safety Analysis & Engineering SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 9/14/94
-------------------------	---	---

6.3.5.3 Qualifications and Training

The cost basis for the FY 1995 SA&E Mandatory Training activities has been developed from FY 1994 historical data analysis to ensure that SA&E personnel receive required Hanford General Employee Training, Management Safety, and Drug-free-in-the-workplace Training, update refresher briefings for employees with special clearances, and job-specific seminars. The Technical Training cost for FY 1995 was developed from historical data analysis and parametric relationships, the number of SA&E nonexempt personnel, at \$300 each annual cost, and the number of exempt personnel, at \$500 each annual cost. Additional funding for unique individual training needs has been developed from historical data. FY 1996 and FY 1997 costs reflect FY 1995 cost plus escalation at three percent.

6.3.5.4 Emergent Work

Emergent Work cost basis will be estimated by utilization of historical, parametric, or definitive estimating techniques applicable subsequent to imposed, unbudgeted, and unplanned work scope.

Westinghouse Hanford Company MILESTONE DESCRIPTION SHEET

Title: Safety Analysis & Engineering FY 1995 DOH Mid-Year Review	Date: 8/30/94
Assigned To: SA&E/PDI (E.P. DiVincenzo/S.M. Godfrey)	CIN:
Program WBS Designator: 6.3.5.2.1 (TPCN# J8D1E)	Due Date: 4/28/95
Control Number: SAE-95-001	Rev: 0

MILESTONE TYPE: ☐ DOE-HQ ☐ DOE-RL ☒ CNTR	DIVISION: ☐ State ☐ Federal ☐ DOE ☐ RCRA ☐ TPA NUMBER <u>WHC Budgets</u>	DELIVERABLE: ☐ Report ☐ Letter ☐ Drawings ☒ Other (specify) Budget Review	ADDRESS TO: ☐ DOE-HQ ☐ DOE-RL ☒ Other (specify) SA&E Program Participants
--	--	--	---

Milestone Description:

Prepare Safety Analysis & Engineering mid-year review data.

Description of what constitutes completion of this milestone:

Issue written guidance to program participants by April 28, 1995 (this could include revised budgets, change notices, etc. as required).

Copies of completed milestone deliverables will be submitted to SA&E Program Development and Implementation (8D170) manager.

Cost Account Manager E.P. DiVincenzo	Date	Program/Project Manager E.P. DiVincenzo	Date 9/19/94

Milestone Description:

 Produce the draft outline of the Safety Analysis and Engineering Transition Plan. Through negotiations with Westinghouse Hanford Company management and DOE-RL, develop planning packages to include an outline for the transition plan.

Description of what constitutes completion of this milestone:

 Issue the draft outline of the SA&E Transition Plan to EAT management. The outline will include the Westinghouse management and DOE-RL agreed approach for development of the Safety Analysis and Engineering Transition Plan.

 Copies of completed milestone deliverables will be submitted to SA&E Program Development and Implementation (8D170) manager.

Milestone Description: (Milestone SAE-95-021 rolls up to support this milestone.) Develop a transition plan to become Safety Analysis integrating contractor.			
Description of what constitutes completion of this milestone: Issue the Safety Analysis and Engineering Transition Plan to define the role of the Safety Analysis integrating contractor. The plan will include the approach, plan and schedule to downsize the department and align the new organization for the new mission as integrating contractor. Copies of completed milestone deliverables will be submitted to SA&E Program Development and Implementation (8D170) manager.

--------------	--	---

1J8D10 Safety Analysis & Engineering Operations

Safety Analysis & Engineering Operations is the Cost Account Plan that defines operations management and support functions associated with the development of safety analyses and safety documentation. This element is further subdivided into discrete work packages for the various activities essential for the business unit to function. This element does not include activities associated with development of program- or project-specific safety analyses or safety documentation.

1J8D100A Management and Administration

Management and Administration is the work package that encompasses the management and administrative activities associated with the operations of the SA&E department and the management of department resources. This element includes task packages for fixed departmental costs, discretionary functional management and administration activities, and provision for hourly support personnel (e.g., 1000-hour personnel).

1J8D100A00 Nondiscretionary Operating Costs

Nondiscretionary Operating Costs provides resources for occupancy charges, Hanford Environmental Health Foundation, management proration, Site services, telephones, and network maintenance.

1J8D100A01 Management Activities

Management Activities provides management, administrative labor, and office supplies for the department. Labor charges are limited to those activities deemed strictly department management business. Support for BCSR computer maintenance services is provided as well.

1J8D100A02 Hourly Support

Hourly Support provides for hourly support (retirees) resources for the department.

1J8D100A03 Staff Moves

Staff Moves is the task package that accomplishes office moves and provides office furniture on Site. Funding is also provided for employment candidates' interview travel. Relocation of new hires should be provided by the direct-funding program benefitting from the new hire.

3.C Glossary	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 09/14/94
---------------------	--	---

1J8D100B Program Management

This work package provides the resources to accomplish the planning and business management objectives of the department, support the excellence programs, provide for professional society activities, and maintain the required reporting systems.

1J8D100B00 Program Development and Implementation

Deliverables produced by this task package include input to the Site Support Program Plan, Fiscal Year Work Plan, and the Environment, Safety, and Health Management Plan. Also included is fiscal-year overhead-budget development and management, mid-year budget reviews, departmental transition planning, and automated data-processing equipment management.

1J8D100B02 EFCOG

EFCOG provides for participation in DOE Energy Facilities Contractor Operating Groups. It provides for travel, living, and associated expenses while coordinating with other DOE operating contractors and with DOE-sponsored working groups and committees.

1J8D100B03 Professional Societies and Standards Groups

This task package provides for personnel time, travel, and living costs while SA&E personnel are participating in professional societies and specific standards groups.

1J8D100B04 Contracts Administration

This task package provides the SA&E structure for administration and execution of SA&E contracted-service support.

1J8D100B05 CAM Administration

CAM Administration provides support for the centralized development, implementation, and administration of the Corrective Action Management program within SA&E.

3.C Glossary	Westinghouse Hanford Company Overheads, Safety Analysis & Engineering, SMS/WBS 6.3.5	FY 1995 Site Support Program Plan Date Prepared: 09/14/94
--------------	--	---

1J8D100E Qualification and Training

This work package provides for all mandatory and technical training necessary to assure that SA&E personnel meet the requirements of the various governing policies and procedures within WHC and of DOE orders.

1J8D100E00 Mandatory Training

This task package provides for all the required training of SA&E personnel to assure compliance with applicable WHC policies and procedures.

1J8D100E01-08 Technical Training

These task packages provide the resources for all onsite and offsite training of SA&E personnel to achieve and maintain the technical expertise necessary to fulfill the requirements of the SA&E charter and the Engineering, Analysis and Technology Excellence Program. Tuition reimbursements are included in these task packages.

1J8D100G Emergent Work

This work package provides resources for work imposed on SA&E that was not planned or budgeted for and that cannot be absorbed into the existing work scope and budget.

1J8D100G00 Emergent Work

The definition for this task package is the same as that for 1J8D100G.
