**SUMMARY OF RADIOACTIVE SOLID WASTE
RECEIVED IN THE 200 AREAS DURING
CALENDAR YEAR 1993**

J. D. Anderson
D. L. Hagel

ABSTRACT

Westinghouse Hanford Company manages and operates the Hanford Site 200 Areas radioactive solid waste storage and disposal facilities for the U.S. Department of Energy, Richland Operations Office, under contract DE-AC06-87RL10930. These facilities include radioactive solid waste disposal sites and radioactive solid waste storage areas. This document summarizes the amount of radioactive materials that have been buried and stored in the 200 Areas radioactive solid waste storage and disposal facilities since startup in 1944 through calendar year 1993. This report does not include backlog waste, solid radioactive waste in storage or disposed of in other areas, or facilities such as the underground tank farms. Unless packaged within the scope of WHC-EP-0063, "Hanford Site Solid Waste Acceptance Criteria," (WHC 1988), liquid waste data are not included in this document.

This page intentionally left blank.

INTRODUCTION

This document summarizes the amount of radioactive materials that have been buried and stored in the 200 Areas burial ground facilities during calendar year 1993 (see Table 1). In addition to the data for calendar year 1993, cumulative data are presented. This document also lists decayed activity for the plant burial sites. It should be noted that storage locations listed in this report are current only on the run date identified at the top of the data sheets, as these locations are subject to frequent change.

Table 1. Summary of Document Data.

Pages	Data
3-29	Amount of radioactive materials buried and stored within the Westinghouse Hanford Company's 200 Area plateau since startup
30-48	Listing of the decayed activities in the various burial ground facilities from startup through calendar year 1993
49-50	Estimate of the radioactive materials in the unsegregated burial sites
51-56	Decay status of unsegregated waste from startup to present
57-92	Amount of radioactive material in the nontransuranic disposal or storage facilities
93-118	Decay status of nontransuranic waste from 1970 to present
119-130	Amount of radioactive material in the transuranic segregated storage sites
131-136	Decay status of transuranic segregated waste from 1970 to present
137-159	Summary of waste received for disposal or storage for calendar year 1993
160-258	Amount of waste received for each burial ground and storage facility for calendar 1993

It should be noted that the summation of ^{90}Sr , ^{106}Ru , ^{137}Cs , and other radionuclides does not equal the total curie amount. The difference is the amount of other mixed fission products present in the burials that are not noted in this report. The reported curie values do not include the activities for the radioactive daughters. The data for plutonium for waste disposed before 1970 could be biased low by about 300 kilograms.

This document was prepared using the Solid Waste Information and Tracking System database (SWITS), which results in more accurate and updated data. Radioisotopic data are based on the book, "Table of Isotopes," Seventh Edition, published by Wiley-Interscience. As a result, some of the data are different from previous editions.

Some numbers for total decayed curies in the 1992 report (WHC 1993) show an increase in value from the 1991 report (WHC 1992). This resulted from previously excluding the presence of daughter products produced in the decay process. Thus, the values were low by this amount. Facility names were changed to reflect Hanford Site standard naming conventions. In 1993 land

usage data were removed from the report data and placed in tables in Appendix B for ease of use.

The computer-generated data in the tables are presented using exponential notation. An example of this form is presented below:

$$2.41 \text{ E}+06 = 2.41 \times 10^{+6} = 2,410,000$$

$$2.41 \text{ E}-06 = 2.41 \times 10^{-6} = 0.00000241$$

Footnotes for 100 Area waste are offset listed for convenience in the OTHER RADIOACTIVITY (CURIES) column for information purposes, but are not included in the totals for OTHER RADIOACTIVITY radionuclides. The ^{137}Cs is included in the ^{137}Cs column, however. An example follows:

OTHER RADIOACTIVITY (CURIES)

	5.660E+02	(OTHER TOTAL)
C-14	1.234E+01	(OTHER)
CO-60	5.537E+02	(OTHER)
