ACKNOWLEDGMENTS

Two years ago, Marylee Adams and Barry L. Butler of Sandia Laboratories compiled the original bibliography on which this present publication is based. Since that time, members of Sandia's Technical Library have added many references to the listing. John Stathis, Information Systems Analyst for the Sandia Technical Library, wrote the programs to output the bibliography from library data files. These contributions are sincerely appreciated.

INTRODUCTION

This bibliography of reports, periodical articles, and conference papers represents research carried out by Sandia Laboratories in solar energy. Within each entry authors are listed alphabetically.
