PATENTS	271
THESES	273

ACKNOWLEDGEMENTS

The staff of Laboratory Records has been instrumental in the development of this bibliography. The Patent Section provided assistance in the development of the patent listing. The Health Physics Division staff provided information and suggestions. J. A. Auxier gave general direction and guidance in the development of this bibliography.

INTRODUCTION

The purpose of this bibliography is to document in one source the literature of the Health Physics Division. This document will be used to establish a machine-readable file which can be supplemented on a routine basis. This document should be useful in tracing the growth and development of the health physics profession.

It should be emphasized that this document does not include work of staff members before joining or after departing the Health Physics Division of Oak Ridge National Laboratory. Therefore, if one wishes a complete listing of a particular author's work, one should contact that author.

DESCRIPTION OF BIBLIOGRAPHY

The technical and scientific literature of the Health Physics Division, excluding those documents of the Radiation Ecology Group (which became the Environmental Sciences Division in 1970) are presented. Also included are documents of the Civil Defense Group before joining the Health Physics Division in 1972. The Division participated in the waste management program until 1972; documents published by the Division staff in this program are included. Documents published by the Urban Research Group while a part of the Health Physics Division are included also. Progress Reports may contain work not reported elsewhere in the literature; those reports are cited by section or division--not by author.

Types of Literature Reported

1. Open literature publications
  - a. Books and handbooks (whole or contributions)
  - b. Articles, book reviews, letters and notes which appear in periodicals, journals, proceedings, transactions, etc.
  - c. Notes, papers and reports appearing in written form in non-serial publications
  - d. Testimony given before the United States Congress published in the Congressional Record
2. Report literature
  - a. ORNL in-house publications (including topical reports, technical reports, translations, bibliographic reports, etc.)
  - b. Reports of other installations with contributions by ORNL staff members
3. Special literature
  - a. Patents
  - b. Theses

BLANK PAGE

Master Listing

The master listing contains a listing of the literature by first author in chronological order.

An identification code number has been assigned to enhance the use of this document. The code consists of three parts as shown in the following example:

Author Index

The author index contains all entries contained in the master listing under each author. This index allows the user to locate a reference for a particular author when not first author of a given document.

Special Listings

Separate listings have been made of theses completed and patents granted.

Availability

Reprints of open literature publications usually can be obtained from the author. ORNL in-house publications are included in the Document Collection of the Central Research Library of ORNL. ORNL or other governmental documents in most cases are available for purchase from the Clearinghouse for Federal Scientific and Technical Information, National Bureau of Standards, U.S. Department of Commerce, Springfield, Va. 22151. Copies of patents are on file in the ORNL Patent Section and are available from the U.S. Patent Office, Washington, D.C. Theses not issued as ORNL Reports or Technical Memos should be available from the degree granting institution or from the author.

MASTER LISTING

- 45-0001-R Morgan, K.Z.
Tolerance Levels for Hand and Foot Counters. M-4127
- 45-0002-R Morgan, K.Z.
Table for Reference in Determining Tolerance Values. M-4291

PATENTS

- 57-0002-P Auxier, J.A.; Hurst, G.S.; Zedler, R.E.
Neutron Insensitive Beta-Gamma Dosimeter. U.S. Patent No. 2,974,248
- 74-0008-P Auxier, J.A.; Shinpaugh, W.H.; Thorngate, J.H.; Perdue, P.T.
Determination of Radon in Air. U.S. Patent No. 3,805,070
- 75-0003-P Baird, J.K.
Parabolic Lithium Mirror for a Laser-Driven Pellet Fusion Reactor. Patent Applied for-ORNL Disclosure No. CNID-3230
- 69-0009-P Becker, K.
Stimulated Exoelectron Emission Dosimeters. U.S. Patent No. 3,484,610
- 70-0008-P Becker, K.
Personnel Radon Dosimeter. U.S. Patent No. 3,505,523
- 71-0011-P Becker, K.
Energy Independent Radiophotoluminescence Dosimeter with Good Fading Stability. U.S. Patent No. 3,554,920
- 71-0016-P Becker, K.; Cheka, J.S.; Gammage, R.B.; Robinson, E.M.
High-Sensitivity Stimulated Exoelectron Emission Radiation Dosimeters. U.S. Patent No. 3,612,868
- 75-0013-P Becker, K.; Haywood, F.F.; Perdue, P.T.; Thorngate, J.H.
Fast Neutron Solid State Dosimeter. U.S. Patent No. 3,896,306
- 59-0009-P Birkhoff, R.D.; Hubbell, H.H. Jr.; Johnson, R.M.
Personnel Dosimeter. U.S. Patent No. 2,875,343
- 69-0028-P Carter, J.G.; Christophorou, L.G.
Excimer Scintillators. U.S. Patent No. 3,444,089
- 61-0022-P Davis, D.M.; Gupton, E.D.; Hart, J.C.
Beta-Gamma Personnel Dosimeter. U.S. Patent No. 2,968,731
- 53-0010-P Davis, D.M.; Hart, J.C.
Badge Meter. U.S. Patent No. 2,659,013
- 64-0023-P Davis, F.J.; Reinhardt, P.W.
Neutron Dosimeter Utilizing a Fission Foil. U.S. Patent No. 3,140,398
- 68-0053-P Fish, B.R.; Royster, G.W. Jr.
Surface Contamination Sampler. U.S. Patent No. 3,362,141

BLANK PAGE

- 52-0015-P Hurst, G.S.
Fast Neutron Dosimeter. U.S. Patent No. 2,616,052
- 56-0014-P Hurst, G.S.
Fast Neutron Dosimeter. U.S. Patent No. 2,761,071
- 59-0033-P Hurst, G.S.; Davis, F.J.; Reinhardt, P.W.
Fast Neutron Spectrometer. U.S. Patent No. 2,900,516
- 75-0066-P Hurst, G.S.; Payne, M.G.; Wagner, E.B.
Two-Step Resonance Ionization for Analytical Spectroscopy.
Patent Applied For-ORNL Disclosure No. CNID-3213
- 74-0039-P Compton, R.N.; Stockdale, J.A.D.
Leak Detector. U.S. Patent No. 3,803,481
- 56-0019-P Johnson, J.R.; McVay, T.N.; Morgan, K.Z.; Struxness, E.G.
Self-Sintering of Radioactive Wastes. U.S. Patent No.
2,918,717
- 74-0084-P Kelly, M.J.; Sturm, B.J.; Parkinson, W.W. Jr.
Novel Polystyrene Product Having Rapid Post-Irradiation Decay
of Conductivity and Process of Making Same. U.S. Patent No.
3,835,122
- 68-0108-P Tamura, T.; Slagle, K.A.
Method of Disposing of Waste Materials. U.S. Patent No.
3,379,013
- 61-0067-P Thomas, J.W.; Bradshaw, R.L.
Air Radioactivity Monitor. U.S. Patent No. 2,979,620
- 74-0125-P Thorngate, J.T.; Perdue, P.T.
Stable Pulsed Light Source. U.S. Patent No. 3,385,331
