

I'm very concerned about the Cannon Air Force base Closure.

I would like to point out that Air Force personnel based at Cannon live in very short distance to Eastern New Mexico University. A good low cost school enabling Airmen and their spouses can receive a quality education helping to reach their life goals. Having educated military personnel greatly enhances our military capabilities. A large part of our electronics engineering department is Air Force. This is a win win situation for both Eastern New Mexico University and the Air Force.
