# Archiving Community Memory Websites

- Web archiving at the Internet Archive is essential
- Need to go beyond web (page) archiving, so as for
  - preserving the context of the community (e.g. contacts of the contributors)
  - preserving the original media files and all the related metadata too
  - long-term data stewardship; trustworthy data repositories; FAIR data principles
- Collaboration between the archivists and the website operators
- Interoperable plug-ins for website data export and import
- (Semi-)automatic and streamlined data workflow for archiving community memory websites
