Title X (Public Health Service Act) Family Planning Program

Angela Napili
Information Research Specialist

September 3, 2014
Summary

The federal government provides grants for voluntary family planning services through the Family Planning Program, Title X of the Public Health Service Act (42 U.S.C. §§300 to 300a-6). Enacted in 1970, it is the only domestic federal program devoted solely to family planning and related preventive health services. In 2012, Title X-funded clinics served 4.8 million clients.

Title X is administered through the Office of Population Affairs (OPA) in the Department of Health and Human Services (HHS). Although the authorization of appropriations for Title X ended with FY1985, funding for the program has continued through appropriations bills for the Departments of Labor, Health and Human Services, and Education, and Related Agencies (Labor-HHS-Education).

The FY2014 Consolidated Appropriations Act (P.L. 113-76) provides $286 million for Title X, 3% more than the FY2013 funding level of $278 million. The FY2014 Consolidated Appropriations Act continues previous years’ requirements that Title X funds not be spent on abortions, that all pregnancy counseling be nondirective, and that funds not be spent on promoting or opposing any legislative proposal or candidate for public office. Grantees continue to be required to certify that they encourage “family participation” when minors seek family planning services and to certify that they counsel minors on how to resist attempted coercion into sexual activity. The appropriations law also clarifies that family planning providers are not exempt from state notification and reporting laws on child abuse, child molestation, sexual abuse, rape, or incest.

The law (42 U.S.C. §300a-6) prohibits the use of Title X funds in programs where abortion is a method of family planning. According to OPA, family planning projects that receive Title X funds are closely monitored to ensure that federal funds are used appropriately and that funds are not used for prohibited activities such as abortion. The prohibition on abortion does not apply to all the activities of a Title X grantee, but only to activities that are part of the Title X project. A grantee’s abortion activities must be “separate and distinct” from the Title X project activities.

Title X Program Administration and Grants

The federal government provides grants for voluntary family planning services through the Family Planning Program, Title X of the Public Health Service Act (42 U.S.C. §§300 to 300a-6). Enacted in 1970, it is the only domestic federal program devoted solely to family planning and related preventive health services.

Although Title X is the only federal domestic program primarily focused on family planning, other programs also finance family planning, among their other services. These programs include Medicaid, the Health Centers program under Section 330 of the Public Health Service Act, Maternal and Child Health Block Grants, and Social Services Block Grants. In FY2010, Medicaid accounted for 75% of U.S. public family planning expenditures (including federal, state, and local government spending). In comparison, Title X accounted for 10%.1

Administration

Title X is administered by the Office of Population Affairs’ (OPA’s) Office of Family Planning (OFP), under the Office of the Assistant Secretary for Health in the Department of Health and Human Services (HHS). Although the program is administered through OPA, funding for Title X activities is provided through the Health Resources and Services Administration (HRSA) in HHS. Authorization of appropriations expired at the end of FY1985, but the program has continued to be funded through appropriations bills for the Departments of Labor, Health and Human Services, and Education, and Related Agencies (Labor-HHS-Education).

OPA administers three types of project grants under Title X: family planning services;2 family planning personnel training;3 and family planning service delivery improvement research grants.4

Family Planning Services Grants

Services

Ninety percent of Title X funds are used for clinical services.5 Grants for family planning services fund family planning and related preventive health services, such as contraceptive services; natural family planning methods; infertility services; services to adolescents; breast and cervical cancer screening and prevention; sexually transmitted disease (STD) and HIV prevention.

3 CFDA, Program number 93.260.

4 CFDA, Program number 93.974.

education, counseling, testing, and referral; preconception health services; and counseling on establishing a reproductive life plan. Among the program’s FY2014 priorities is providing preventive health services “in accordance with nationally recognized standards of care.” The services must be provided “without coercion and with respect for the privacy, dignity, social, and religious beliefs of the individuals being served.”

Title X clinics provide confidential screening, counseling, and referral for treatment. In this regard, OPA has expressed a commitment to integrating HIV-prevention services in all family planning clinics. OPA provides supplemental grants to help Title X projects implement the Centers for Disease Control and Prevention’s “Revised Recommendations for HIV Testing of Adults, Adolescents, and Pregnant Women in Health Care Settings.”

Title X services offered to males include condoms, education and counseling, STD testing and treatment, HIV testing, and, in some cases, vasectomy services.

**Client Charges**

Priority for services is given to persons from low-income families, who may not be charged for care. Clients from families with income between 100% and 250% of the federal poverty guideline (FPL) are charged on a sliding scale based on their ability to pay. Clients from families with income higher than 250% FPL are charged fees designed to recover the reasonable cost of providing services.

**Client Characteristics**

In 2012, Title X-funded clinics served 4.764 million clients, primarily low-income women and adolescents. Of those clients, 8% were male, 71% had incomes at or below the federal poverty

---

7 **CFDA**, Program number 93.217. See also 42 C.F.R. §59.5.

11 42 C.F.R. §59.2 defines “low-income family” as having income at or below 100% of the Federal Poverty Guidelines (FPL). The regulation states that “‘Low-income family’ also includes members of families whose annual family income exceeds this amount, but who, as determined by the project director, are unable, for good reasons, to pay for family planning services. For example, unemancipated minors who wish to receive services on a confidential basis must be considered on the basis of their own resources.”

12 42 C.F.R. §59.5.
level, and 90% had incomes at or below 200% of the federal poverty level.\textsuperscript{13} For 61% of clients, Title X clinics are their “usual” or only regular source of health care.\textsuperscript{14} In 2012, 64% of Title X clients were uninsured.\textsuperscript{15}

**Grantees and Clinics**

In 2012, there were 93 Title X family planning services grantees. Such grantees included 49 state, local, and territorial health departments and 44 nonprofit organizations, such as hospitals, community health agencies, family planning councils, and Planned Parenthood affiliates.\textsuperscript{16}

Title X grantees can provide family planning services directly or they can delegate Title X monies to other agencies to provide services. Although there are no matching requirements for grants, regulations specify that no clinics may be fully supported by Title X funds.\textsuperscript{17} In 2012, Title X provided services through 4,189 clinics located in the 50 states, the District of Columbia, and the U.S. territories.\textsuperscript{18}

**Family Planning Training and Research Grants**

Grants for family planning personnel training are used to train staff and to improve the utilization and career development of paraprofessionals.\textsuperscript{19} Staff are trained through five national training programs for Coordination and Strategic Initiatives; Management and Systems Improvement; Family Planning Service Delivery; Quality Assurance, Quality Improvement and Evaluation; and a National Clinical Training Center.\textsuperscript{20} Family planning service delivery improvement research grants are used for studies to enhance effectiveness and efficiency of the service delivery system.\textsuperscript{21}

Funding

The FY2014 Consolidated Appropriations Act (P.L. 113-76) provides $286.479 million for Title X.22 The President’s FY2015 Budget proposes to fund Title X at the same amount, $286.479 million. Table 1 shows Title X appropriations amounts since FY1971, when the program was created. Figure 1 shows Title X appropriations amounts since FY1978.

FY2015 Budget Request

The President’s FY2015 Budget, submitted March 4, 2014, requests $286.479 million for Title X. This would be the same as the FY2014 enacted level.23 The budget would continue previous years’ requirements that Title X funds not be spent on abortions, that all pregnancy counseling be nondirective, and that funds not be spent on promoting or opposing any legislative proposal or candidate for public office.24

According to the HRSA Justification, the proposed FY2015 funding level would support family planning services for 4.3 million clients. The program’s FY2015 goals include preventing 1,400 cases of infertility through Chlamydia screening and preventing 828,700 unintended pregnancies. The FY2015 target for cost per client served is $291.94, with the goal of maintaining the cost per client below the medical care inflation rate.25

HRSA also plans to use FY2015 funds to train and support family planning clinics “to facilitate full implementation of relevant provisions of the Affordable Care Act (ACA).” According to the HRSA Justification, the Administration expects that clinics will increase revenue, in part by raising the proportion of clients who have health insurance and by billing third parties.26

FY2015 Appropriations Activity

On June 10, 2014, the Senate Appropriations Subcommittee on the Departments of Labor, Health and Human Services, and Education approved its FY2015 Labor-HHS-Education appropriations bill by voice vote. On July 24, 2014, the Senate Appropriations Committee released a copy of the subcommittee-approved bill and draft subcommittee report.27

The Senate subcommittee bill would fund Title X at $300 million, a 5% increase over the FY2014 level. The bill would continue previous year’s requirements that Title X funds not be spent on abortions, all pregnancy counseling be nondirective, and funds not be spent on promoting or
opposing any legislative proposal or candidate for public office. Grantees would continue to be required to certify that they encourage “family participation” when minors decide to seek family planning services and that they counsel minors on how to resist attempted coercion into sexual activity. The bill would also clarify that family planning providers are not exempt from state notification and reporting laws on child abuse, child molestation, sexual abuse, rape, or incest.

The Senate draft subcommittee report expresses continued support for Title X during and after ACA implementation:

Although health reform will result in the expansion of insurance coverage, patients seeking family planning and reproductive health services often have privacy concerns that inhibit the full use of coverage. Many of these patients will turn to safety-net settings, such as title X-funded health centers, for care. Public funding for family planning remains a cost-effective means of providing essential health services and will be important to Federal and State efforts to implement the ACA.28

The Senate draft subcommittee report also expresses support for using Title X funds to invest in infrastructure, such as health information technology. The report also notes, with regard to Title X subgrants, that “The Committee expects that funding decisions will be made solely on the ability of a clinic to achieve the best possible outcomes for the population served.”

The House has yet to take legislative action on their FY2015 Labor-HHS-Education appropriations bill.

**FY2014 Funding**

The FY2014 Consolidated Appropriations Act (P.L. 113-76) provides $286.479 million for Title X, 3% more than the FY2013 funding level of $278.349 million.29 The FY2014 Consolidated Appropriations Act continues previous years’ requirements that Title X funds not be spent on abortions, that all pregnancy counseling be nondirective, and that funds not be spent on “any activity (including the publication or distribution of literature) that in any way tends to promote public support or opposition to any legislative proposal or candidate for public office.” Grantees continue to be required to certify that they encourage “family participation” when minors decide to seek family planning services and that they counsel minors on how to resist attempted coercion into sexual activity. The law also clarifies that family planning providers are not exempt from

---

28 Ibid., p. 65 of the draft report. Privacy concerns are discussed below in the sections “The Patient Protection and Affordable Care Act and Title X” and “Confidentiality for Minors and Title X.”

29 P.L. 113-76, Division H, Title II. Per §206, the Administration has limited authority to transfer funds among HHS accounts. After transfers, FY2014 Title X funding is $285.760 million, according to HHS, HRSA, Operating Plan for FY2014, http://www.hrsa.gov/about/budget/operatingplan2014.pdf. The FY2013 amount is from HHS, HRSA, Sequestration Operating Plan for FY2013, http://www.hrsa.gov/about/budget/operatingplan2013.pdf. With limited exceptions, the FY2013 Consolidated and Further Continuing Appropriations Act (P.L. 113-6) generally funded discretionary HHS programs at their FY2012 levels, minus an across-the-board rescission of 0.2% per §3004, as interpreted by the Office of Management and Budget (OMB). FY2013 Title X appropriations were also subject to an automatic across-the-board spending reduction, known as sequestration, under the Budget Control Act of 2011 (BCA; P.L. 112-25) and the American Taxpayer Relief Act of 2012 (ATRA; P.L. 112-240). For discretionary nondefense programs subject to sequestration, OMB calculated a sequester percentage of 5.0%. For more background on sequestration, see CRS Report R42050, Budget “Sequestration” and Selected Program Exemptions and Special Rules, coordinated by Karen Spar.
state notification and reporting laws on child abuse, child molestation, sexual abuse, rape, or incest.30

FY2014 appropriations are subject to a clause, known as the Weldon Amendment, stating that “None of the funds made available in this Act may be made available to a Federal agency or program, or to a State or local government, if such agency, program, or government subjects any institutional or individual health care entity to discrimination on the basis that the health care entity does not provide, pay for, provide coverage of, or refer for abortions.”31 Some have argued that the Weldon Amendment conflicts with regulations that require Title X family planning services projects to give pregnant women the opportunity to receive information, counseling, and referral upon request for several options, including “pregnancy termination.”32 In the February 23, 2011, Federal Register, HHS stated of potential conflicts, “The approach of a case by case investigation and, if necessary, enforcement will best enable the Department to deal with any perceived conflicts within concrete situations.”33

History of Funding

Table 1 shows Title X appropriations amounts since FY1971, when the program was created. Figure 1 shows Title X appropriations amounts since FY1978, in current dollars (not adjusted for inflation) and constant FY2013 dollars (adjusted for medical care inflation).

30 P.L. 113-76, Division H, Title II, §209 and §210.
32 42 C.F.R. §59.5(a)(5). Examples of this argument appear in “Weldon Amendment,” Congressional Record, daily edition, vol. 151, no. 51 (April 25, 2005), p. S4222; and “Federal Refusal Clause,” Congressional Record, daily edition, vol. 151, no. 52 (April 26, 2005), p. S425. The National Family Planning and Reproductive Health Association (NFPRHA), many of whose members provide Title X services, filed a lawsuit challenging the Weldon Amendment in the U.S. District Court for the District of Columbia. The court found that “While Weldon may not provide the level of guidance that NFPRHA or its members would prefer, may create a conflict with pre-existing agency regulations, and may impose conditions that NFPRHA members find unacceptable, none of these reasons provides a sufficient basis for the court to invalidate an act of Congress in its entirety.” Upon appeal, the U.S. Court of Appeals for the District of Columbia Circuit found that the plaintiff lacked the standing to challenge the Weldon Amendment. See National Family Planning and Reproductive Health Association, Inc., v. Alberto Gonzales, et al., 468 F.3d 826 (D.C. Cir. 2006), and 391 F. Supp. 2d 200, 209 (D.D.C. 2005).

Institute of Medicine Evaluation

At the request of OFP, the Institute of Medicine (IOM) of the National Academy of Sciences independently evaluated the Title X program and made recommendations in *A Review of the HHS Family Planning Program: Mission, Management, and Measurement of Results* (2009).\(^\text{34}\)

IOM found that family planning—“helping people have children when they want to and avoid conception when they do not—is a critical social and public health goal,” and that the “federal government has a responsibility to support the attainment of this goal.” IOM noted, for example, that family planning can prevent unintended and high-risk pregnancies, thereby reducing fetal, infant, and maternal mortality and morbidity. IOM also stated that the appropriate use of contraception can reduce abortion rates and cited “ample evidence that family planning services are cost-effective.”\(^\text{35}\) IOM made specific recommendations to increase program funding and to improve program management, administration, and evaluation.

Among IOM’s recommendations was that OFP “review and update the Program Guidelines to ensure that they are evidence-based.” IOM noted, for example, that the guidelines required female

---

\(^{35}\) Ibid., pp. 4, 70.
Title X clients, including adolescents, to have pelvic and breast examinations within six months of their initial visit, though “relevant abnormalities are rarely found in adolescents.” At the time of the IOM report, Title X Program Guidelines had not been updated since 2001.\(^{36}\)

In response to the IOM recommendations, OPA released new program guidelines in April 2014.\(^{37}\) The new guidelines draw on systematic literature reviews and existing recommendations from organizations, such as the Centers for Disease Control and Prevention, the U.S. Preventive Services Task Force, the American Congress of Obstetricians and Gynecologists, the American Academy of Pediatrics, the American Society for Reproductive Medicine, and the American Urological Association. For example, the new guidelines state that pelvic exams and clinical breast exams are “not needed routinely to provide contraception safely to a healthy client” (though they may be recommended for some cases, such as inserting an intrauterine device, fitting a diaphragm, cancer screening for non-adolescents, assessing gestational age after a positive pregnancy test, if the client has certain STD symptoms, as part of infertility care, or to address other non-contraceptive health needs). OPA states that the new guidelines have “a foundation of empirical evidence and information supporting clinical practice.”\(^{38}\) Also in response to the IOM report, HHS contracted with IOM to convene a Standing Committee to advise the Title X program on issues raised by the 2009 report, as well as other emerging family planning issues.\(^{39}\)

### The Patient Protection and Affordable Care Act and Title X

The Patient Protection and Affordable Care Act (ACA) has numerous provisions that may impact Title X clinics.\(^{40}\) Notably, ACA increases access to health insurance.\(^{41}\) (In 2012, 64% of Title X clients were uninsured.)\(^{42}\) Federal ACA regulations and guidance also require most health plans and health insurers to cover contraceptive services without cost-sharing.

---

\(^{36}\) Ibid., pp. 13, 15, 240; the 2001 guidelines are reprinted in Appendix D.

\(^{40}\) The Patient Protection and Affordable Care Act (P.L. 111-148, March 23, 2010) was amended by the Health Care Education and Reconciliation Act of 2010 (P.L. 111-152, March 30, 2010). These acts will be collectively referred to in this report as “ACA.”

\(^{41}\) The Congressional Budget Office (CBO) and Joint Committee on Taxation (JCT) estimate that “12 million more nonelderly people will have health insurance in 2014 than would have had it in the absence of the ACA. They also project that 19 million more people will be insured in 2015, 25 million more will be insured in 2016, and 26 million more will be insured each year from 2017 through 2024 than would have been the case without the ACA.” CBO, *Updated Estimates of the Effects of the Insurance Coverage Provisions of the Affordable Care Act*, April 2014, April 14, 2014, p. 3, http://www.cbo.gov/publication/45231.

ACA has several provisions that may increase health insurance coverage in the populations currently served by Title X. These provisions could help free up funds that Title X clinics currently spend on serving the uninsured. For example,

- States can expand Medicaid eligibility to include most nonelderly, nonpregnant individuals with income at or below 133% of FPL, effectively 138% FPL with the 5% income disregard. 43 (In 2011, 69% of Title X clients had incomes under 101% of FPL; another 15% had incomes between 101% and 150% of FPL.) 44
- ACA gives states the option, through a Medicaid state plan amendment, of providing targeted Medicaid family planning services and supplies to certain individuals who would otherwise be ineligible for Medicaid. 45
- ACA requires most private health plans that offer dependent coverage for children to continue to make such coverage available for young adult children under the age of 26. 46 (In 2012, 49% of Title X clients were younger than 25 years old; another 21% were aged 25 to 29.) 47
- ACA provides certain individuals and small businesses with access to private health plans through new health insurance exchanges and subsidizes the premium costs for certain individuals. To ensure access for low-income individuals, exchange plans are required to have a sufficient number and geographic distribution of “essential community providers,” which include Title X projects. 48

43 P.L. 111-148, §2001 as modified by §10201; P.L. 111-152, §1004 and §1201. This provision is summarized in CRS Report R43564, The ACA Medicaid Expansion, by Alison Mitchell. Medicaid is jointly financed by federal and state governments. All state Medicaid programs are mandated to include family planning services and supplies in their benefit packages, with no cost-sharing. In states that choose to expand Medicaid eligibility, the federal government will pay 100% of Medicaid expenditures for those in the new eligibility group in 2014 through 2016, including family planning expenditures, gradually declining to 90% in 2020 and thereafter. For all other Medicaid enrollees, the federal government pays 90% of Medicaid family planning expenditures.

46 P.L. 111-148, §1001, as amended by P.L. 111-152, §2301. This dependent coverage provision is effective for plan years beginning on or after September 23, 2010. The provision is summarized in CRS Report R41220, Preexisting Condition Exclusion Provisions for Children and Dependent Coverage under the Patient Protection and Affordable Care Act (ACA), by Bernadette Fernandez.

• Beginning in 2014, ACA's individual mandate provision requires most individuals to have health insurance or pay a penalty.\footnote{P.L. 111-148, §1501 and §10106, as amended by P.L. 111-152, §1002. This provision is summarized in CRS Report R41331, \textit{Individual Mandate Under ACA}, by Annie L. Mach.}

OPA has established FY2014 Program Priorities to guide the project plans of family planning services grantees. In response to ACA, one of these priorities is improving Title X clinics’ ability to bill Medicaid and private health insurance:

Title X supporters state that, although clinics currently funded by Title X could see increased revenues from Medicaid and private insurance in 2014, the Title X program will still be necessary:

In addition to medical care, Title X supports activities that are not reimbursable under Medicaid and commercial insurance plans… Title X has made a major contribution to the training of clinicians; that need remains today… Title X helps to support staff salaries, not just for clinicians but for front-desk staff, educators and finance and administrative staff. Title X provides for individual patient education as well as community-level outreach and public education about family planning and women’s health issues. Title X also helps to support the infrastructure necessary to keep the doors open—subsidizing rent, utilities and infrastructure needs like health information technology.\footnote{Clare Coleman and Kirtly Parker Jones, “Title X: A Proud Past, An Uncertain Future,” \textit{Contraception}, vol. 84 (September 2011), pp. 209-211, http://www.arhp.org/publications-and-resources/contraception-journal/september-2011. See also “The Ongoing Need for Title X,” in Sonfield, Hasstedt, and Gold, \textit{Moving Forward: Family Planning in the Era of Health Reform}, Guttmacher Institute, March 2014, pp. 29-30.}

Some advocates note that even after 2014, family planning services will still be sought by uninsured persons and dependents who, for confidentiality reasons, might not wish to bill
reproductive health services to their parent’s or spouse’s health insurance.54 Advocates maintain that even after 2014, there will still be strong demand for safety net providers, such as many Title X clinics, that provide health care to underserved populations.55

ACA requires most private health plans to cover certain preventive services for women without cost-sharing.56 HHS commissioned the Institute of Medicine to recommend preventive services to be included in this requirement.57 Adopting the IOM recommendations, federal rules and guidelines require that most health plans cover, without cost-sharing, “All Food and Drug Administration approved contraceptive methods, sterilization procedures, and patient education and counseling for all women with reproductive capacity,” as prescribed.58 Some have noted that this requirement, by removing up-front cost barriers, could result in more women switching to longer-acting contraceptive methods, such as hormonal implants and intrauterine devices.59 HRSA has identified “Patient access to a broad range of contraceptive options, including long acting reversible contraceptives (LARC)” as one of the key Title X issues in FY2014.60

ACA may also impact Title X clinics in other ways. For example, because ACA increased the rebate percentage drug makers pay on drugs purchased for Medicaid beneficiaries, Title X clinics likely will receive larger discounts on drugs obtained through the 340B drug discount program.61

---

56 P.L. 111-148, §1101. This requirement does not apply to grandfathered plans. Grandfathered plans are those that existed on March 23, 2010, and have not made certain specified changes (for example, to benefits and cost-sharing).

61 P.L. 111-148, §2501. Title X clinics are among the entities eligible to receive discounts on certain drugs’ prices under §340B of the Public Health Service Act. The maximum prices that drug manufacturers can charge 340B entities are calculated using the Medicaid rebate formula. The ACA provision is summarized in CRS Report R41210, Medicaid and the State Children’s Health Insurance Program (CHIP) Provisions in ACA: Summary and Timeline, by Evelyne P. Baumrucker et al. The 340B program website is http://www.hrsa.gov/opa. There were 3,868 Title X clinic sites enrolled in the 340B program as of July 1, 2011. U.S. Government Accountability Office, Drug Pricing: Manufacturer (continued...)
ACA also increased funding for teen pregnancy prevention efforts, expanded healthcare workforce programs, and increased funding for community health centers (many of which are Title X providers). HHS contracted with IOM to convene a Standing Committee to advise the Title X program. Among other topics, the IOM Standing Committee was tasked with examining the roles of family planning, reproductive health, and Title X in health reform. OPA also announced FY2014 research funding to “conduct data analysis and related research and evaluation on the impact of the Affordable Care Act on Title X funded family planning centers.” For Title X grantees and clinics, the Title X Family Planning National Training Centers have compiled resources and provided training on how ACA may affect Title X.

Abortion and Title X

The law prohibits the use of Title X funds in programs where abortion is a method of family planning. On July 3, 2000, OPA released a final rule with respect to abortion services in family planning projects. The rule updated and revised regulations that had been in effect since 1988. The major revision revoked the “gag rule,” which restricted family planning grantees from providing abortion-related information. The regulation at 42 C.F.R. §59.5 had required, and continues to require, that abortion not be provided as a method of family planning. The July 3, 2000, rule amended the section to add the requirement that a project must give pregnant women the opportunity to receive information and counseling on each of the following options: prenatal care and delivery; infant care, foster care, or adoption; and pregnancy termination. If the woman requests such information and counseling, the project must give “neutral, factual information and nondirective counseling on each of the options, and referral upon request, except with respect to

(...continued)

66 42 U.S.C. §300a-6. In addition, language in annual Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations bills have also prohibited the use of Title X funds for abortions (In FY2014, this provision appeared in P.L. 113-76, Division H, Title II). For background on abortion funding restrictions in general, see CRS Report RL33467, Abortion: Judicial History and Legislative Response, by Jon O. Shimabukuro.

68 42 C.F.R. Part 59, “Grants for family planning services.”
any option(s) about which the pregnant woman indicates she does not wish to receive such information and counseling.”

According to OPA, family planning projects that receive Title X funds are closely monitored to ensure that federal funds are used appropriately and that funds are not used for prohibited activities such as abortion. The prohibition on abortion does not apply to all the activities of a Title X grantee, but only to activities that are part of the Title X project. The grantee’s abortion activities must be “separate and distinct” from the Title X project activities. Safeguards to maintain this separation include (1) careful review of grant applications to ensure that the applicant understands the requirements and has the capacity to comply with all requirements; (2) independent financial audits to examine whether there is a system to account for program-funded activities and non-allowable program activities; (3) yearly comprehensive reviews of the grantees’ financial status and budget report; and (4) periodic and comprehensive program reviews and site visits by OPA regional offices.

It is unclear exactly how many Title X clinics also provide abortions through their non-Title X activities. In 2004, following appropriations conference report directions, HHS surveyed its Title X grantees on whether their clinic sites also provided abortions with non-federal funds. Grantees were informed that responses were voluntary and “without consequence, or threat of consequence, to non-responsiveness.” The survey did not request any identifying information. HHS mailed surveys to 86 grantees and received 46 responses. Of these, 9 indicated that at least one of their clinic sites (17 clinic sites in all) also provided abortions with non-federal funds, and 34 indicated that none of their clinic sites provided abortions with non-federal funds; 3 responses had no numerical data or said the information was unknown.

Title X supporters argue that family planning reduces unintended pregnancies, thereby reducing abortion. HHS estimates that Title X family planning services helped avert 911,000 unintended pregnancies in 2012. The Guttmacher Institute estimates that clinics receiving Title X funds helped avert 363,000 abortions in 2012.

69 On December 19, 2008, HHS published a provider conscience rule which, according to HHS, was “inconsistent” with the requirement that Title X grantees provide clients with abortion referrals upon request (76 Federal Register 78087). The rule was later rescinded in 2011 (76 Federal Register 9968).

71 Email from Barbara Clark, HHS, Office of the Assistant Secretary for Legislation, August 24, 2006. See also OPA Program Instruction Series, OPA 11-01: Title X Grantee Compliance with Grant Requirements and Applicable Federal and State Law, including State Reporting Laws, Letter from Marilyn J. Keefe, Deputy Assistant Secretary for Population Affairs, to Regional Health Administrators, Regions I-X; Title X Grantees, March 1, 2011, http://www.hhs.gov/opa/pdfs/opa-11-01-program-instruction-re-compliance.pdf.

72 HHS, Report to Congress Regarding the Number of Family Planning Sites Funded Under Title X of the Public Health Service Act That Also Provide Abortions with Non-Federal Funds, 2004. HHS was directed to conduct the survey by FY2004 appropriations conference report H.Rept. 108-401, pp. 800-801.

On the other hand, Title X critics argue that federal funds should be withheld from any organization that performs or promotes abortions, such as the Planned Parenthood Federation of America. These critics argue that federal funding for non-abortion activities frees up Planned Parenthood’s other resources for its abortion activities. Some critics also argue that if a family planning program is operated by an organization that also performs abortions, the implicit assumption and the message to clients is that abortion is a method of family planning.

**Teenage Pregnancy and Title X**

In 2012, 19% of Title X clients were aged 19 or younger. Critics argue that by funding Title X, the federal government is implicitly sanctioning nonmarital sexual activity among teens. These critics argue that a reduced teenage pregnancy rate could be achieved if family planning programs emphasized efforts to convince teens to delay sexual activity, rather than efforts to decrease the percentage of sexually active teens who become pregnant. (See CRS Report RS20301, Teenage Pregnancy Prevention: Statistics and Programs, by Carmen Solomon-Fears, for a broader discussion of teen pregnancy.)

The program’s supporters, on the other hand, argue that the Title X program should be expanded to serve more people in order to reduce the rate of unintended pregnancies. According to HHS, in 2012, Title X family planning services helped avert an estimated 178,000 unintended teen pregnancies. Supporters of expanding family planning services argue that the United States has a higher teen pregnancy rate than some countries (such as Sweden) where a similar percentage of teens are sexually active, in part because U.S. teens use contraception less consistently. Some also argue that recent trends in U.S. teen birth rates can be explained in part by changes in teen contraceptive use.

---

76 Examples of this argument can be found in House debate, Congressional Record, daily edition, vol. 154, no. 112 (July 9, 2008), pp. H6320-H6326. 327,166 abortion procedures were performed by Planned Parenthood affiliates in 2012, comprising 3% of Planned Parenthood services that year, according to the Planned Parenthood Federation of America, Planned Parenthood 2012-2013 Annual Report, 2014, pp. 14-15, http://www.plannedparenthood.org/about-us/annual-report.

77 An example of these arguments can be found in U.S. Congress, Senate Committee on Appropriations, Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, Threat to Title X and Other Women’s Health Services, pp. 22-35.

79 An example of these arguments can be found in U.S. Congress, Senate Committee on Appropriations, Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, Threat to Title X and Other Women’s Health Services, pp. 22-35.

Confidentiality for Minors and Title X

By law, Title X providers are required to “encourage” family participation when minors seek family planning services.82 However, confidentiality is required for personal information about Title X services provided to individuals, including adolescents.83 OPA instructs grantees on confidentiality for minors:

It continues to be the case that Title X projects may not require written consent of parents or guardians for the provision of services to minors. Nor can any Title X project staff notify a parent or guardian before or after a minor has requested and/or received Title X family planning services.84

The April 2014 Title X guidelines state,

Providers of family planning services should offer confidential services to adolescents and observe all relevant state laws and any legal obligations, such as notification or reporting of child abuse, child molestation, sexual abuse, rape, or incest, as well as human trafficking. Confidentiality is critical for adolescents and can greatly influence their willingness to access and use services. As a result, multiple professional medical associations have emphasized the importance of providing confidential services to adolescents.

Providers should encourage and promote communication between the adolescent and his or her parent(s) or guardian(s) about sexual and reproductive health. Adolescents who come to the service site alone should be encouraged to talk to their parents or guardians. Educational materials and programs can be provided to parents or guardians that help them talk about sex and share their values with their child. When both parent or guardian and child have agreed, joint discussions can address family values and expectations about dating, relationships, and sexual behavior.85

Although minors are to receive confidential services, Title X providers are not exempt from state notification and reporting laws on child abuse, child molestation, sexual abuse, rape, or incest.86

---

82 42 U.S.C. 300(a) states that Title X grantees shall encourage family participation “to the extent practical.” P.L. 113-76, Division H, §209 requires Title X grantees to certify that they encourage family participation in minors’ decisions to seek family planning services.

83 42 C.F.R. §59.11. Also, several court cases have interpreted Title X statute as supporting confidentiality for minors; see Glenn A. Guarino, “Provision of family planning services under Title X of Public Health Service Act (42 U.S.C.A. §300-300a-8) and implementing regulations,” American Law Reports Federal, 1985, 71 A.L.R. Fed. 961.

Some minors who use Title X clinics have dependent health coverage through a parent’s private health insurance policy. However, for confidentiality reasons, they may not wish to bill family planning or STD services to their parent’s health insurance. According to OPA, Title X clinics “commonly forgo billing” health insurers in order to maintain confidentiality.\footnote{Private health insurance policy holders often receive “explanations of benefits” that describe services charged to their insurance policy. Often policy holders may also view a history of claims made under their policies. These common health insurance practices may inadvertently breach the confidentiality of dependents who receive care through those policies. OPA has announced research funding to study these practices’ effects on Title X clinics’ revenues. HHS, OPA, \textit{FY14 Announcement of Availability of Funds for Family Planning Affordable Care Act (ACA) Impact Analysis Research Cooperative Agreements}, March 7, 2014, pp. 5-6, 10-11, https://www.grantsolutions.gov/gs/preaward/previewPublicAnnouncement.do?id=49223. See also Abigail English, Rachel Benson Gold, and Elizabeth Nash, \textit{et al.}, \textit{Confidentiality for Individuals Insured as Dependents: A Review of State Laws and Policies}, Guttmacher Institute, July 2012, http://www.guttmacher.org/pubs/confidentiality-review.pdf.}

As for payment of services provided to minors, Title X regulations indicate that “unemancipated minors who wish to receive services on a confidential basis must be considered on the basis of their own resources.”\footnote{42 C.F.R. \textsection 59.2.} Program requirements instruct that “Eligibility for discounts for unemancipated minors who receive confidential services must be based on the income of the minor.”\footnote{HHS, OPA, \textit{Program Requirements for Title X Funded Family Planning Projects}, April 2014, p. 13.}

Supporters of confidentiality argue that parental notification or parental consent requirements would lead some sexually active adolescents to delay or forgo family planning services, thereby increasing their risk of pregnancy or sexually transmitted diseases.\footnote{An example of this argument is in Rachel K. Jones, Alison Purcell, and Susheela Singh \textit{et al.}, “Adolescents’ Reports of Parental Knowledge of Adolescents’ Use of Sexual Health Services and Their Reactions to Mandated Parental Notification for Prescription Contraception,” \textit{JAMA}, vol. 293, no. 3 (January 19, 2005), pp. 340-348. See also the staff quotations in RTI International, \textit{An Assessment of Parent Involvement Strategies in Programs Serving Adolescents: Final Report}, 2007, pp. 5-10.}

Critics argue that confidentiality requirements can interfere with parents’ right to know of and to guide their children’s health care. Some critics also disagree with discounts for minors without regard to parents’ income, because the Title X program was intended to serve “low-income families.”\footnote{Examples of these arguments appear in \textit{Congressional Record}, daily edition, vol. 142 (July 11, 1996), pp. H7348-H7349, and U.S. Congress, Senate Committee on Appropriations, Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, \textit{Threat to Title X and Other Women’s Health Services}, 104\textsuperscript{th} Cong., 1\textsuperscript{st} sess., August 10, 1995, S.Hrg. 104-416 (Washington: GPO, 1996), pp. 22-23. See also the discussion in RTI International, \textit{An Assessment of Parent Involvement Strategies in Programs Serving Adolescents: Final Report}, 2007, pp. 5-9.}

### Planned Parenthood and Title X

The Planned Parenthood Federation of America (PPFA) operates through a national office and 67 affiliates, which operate more than 700 local health centers.\footnote{Planned Parenthood Federation of America, \textit{Planned Parenthood at a Glance}, http://www.plannedparenthood.org/about-us/who-we-are/planned-parenthood-at-a-glance.} Affiliates participating in Title X

\((...\text{continued})\)

\textit{program-instruction-re-compliance.pdf.}
can receive funds directly from HHS or indirectly from other Title X grantees, such as their state or local health departments.

In May 2010, the Government Accountability Office (GAO) released a report with data on the obligations and expenditures of federal funds for several nonprofit organizations, including PPFA and its affiliates.93

According to the GAO report, in FY2009, HHS reported obligating to Planned Parenthood and its affiliates $18.2 million through the Title X Family Planning Services program and $0.3 million through Title X Family Planning Service Delivery Improvement Research Grants.94 These figures reflected funds that HHS provided directly to these organizations. They did not include Title X funds that reached Planned Parenthood or its affiliates indirectly through subgrants or that passed through from state agencies or other organizations.

The GAO report also showed Planned Parenthood’s expenditures of Title X funds. These expenditures were identified through audit reports that Planned Parenthood and its affiliates submitted to comply with Office of Management and Budget (OMB) audit requirements.95 Expenditures included federal funds provided directly or indirectly to these organizations. The most recent expenditure data were from FY2008, when Planned Parenthood and its affiliates reported spending $53 million from the Title X Family Planning Services program.96

---

95 Organizations with annual expenditures of federal funds of $500,000 or more are required to have an audit. The GAO report includes expenditure data from 85 Planned Parenthood affiliates. GAO, *Federal Funds: Fiscal Years 2002-2009 Obligations, Disbursements, and Expenditures for Selected Organizations Involved in Health-Related Activities*, p. 10 footnote b, p. 22 footnote 1.

Appendix. Summary of Title X of the Public Health Service Act

Below is a summary of Title X of the Public Health Service Act, codified at 42 U.S.C. Section 300 to Section 300a-6, Population Research and Voluntary Family Planning Programs:

Section 1001. Project Grants and Contracts for Family Planning Services

The Secretary may make grants to and enter into contracts with public or nonprofit private entities to assist in the establishment and operation of voluntary family planning projects to offer a broad range of acceptable and effective family planning methods and services (including natural family planning methods, infertility services, and services for adolescents). Entities which receive grants or contracts must encourage family participation in their projects.

Section 1002. Formula Grants to States for Family Planning Services\(^97\)

The Secretary may make grants to state health authorities to assist in planning, establishing, maintaining, coordinating, and evaluating family planning services. The state health authority must have an approved state plan for a coordinated and comprehensive program of family planning services.

Section 1003. Training Grants and Contracts

The Secretary may make grants to public or nonprofit private entities and enter into contracts with public or private entities and individuals to provide the training for personnel to carry out family planning service programs.

Section 1004. Research

The Secretary may conduct and make grants to public or nonprofit private entities and enter into contracts with public or private entities and individuals for projects for research in the biomedical, contraceptive development, behavioral, and program implementation fields related to family planning and population.

Section 1005. Informational and Educational Materials

The Secretary may make grants to public or nonprofit private entities and enter into contracts with public or private entities and individuals to assist in developing and making available family

\(^97\) These formula grants, which were authorized for FY1971-FY1973, were never funded. S.Rept. 101-95, pp. 5, 10.
planning and population growth information (including educational materials) to all persons desiring such information.

Section 1006. Regulations and Payments

The Secretary may promulgate regulations and must determine the conditions for making payments to grantees to assure that such grants will be effectively utilized for the purposes they were made.

Grantees must assure that (1) priority will be given to the furnishing of services to persons from low-income families; and (2) no charge will be made in such project or program for services provided to any person from a low-income family except to the extent that payment will be made by a third party (including a government agency) which is authorized or is under legal obligation to pay the charge.

The Secretary must be satisfied that informational or educational materials developed or made available under the grant or contract will be suitable for the purposes of this title and for the population or community to which they are to be made available.

In the case of any grant or contract under Section 1001, such assurances shall provide for the review and approval of the suitability of such materials, prior to their distribution, by an advisory committee established by the grantee or contractor in accordance with regulations.

Section 1007. Voluntary Participation

The acceptance by any individual of family planning services or family planning or population growth information (including educational materials) shall be voluntary and shall not be a prerequisite to eligibility for or receipt of any other service or assistance from, or to participation in, any other program of the entity or individual that provided such service or information.

Section 1008. Prohibition of Abortion

None of the funds appropriated under this title shall be used in programs where abortion is a method of family planning.
