UNITED STATES DEPARTMENT OF ENERGY

under Contract DE-AC06-76RLO 1830

Printed in the United States of America

Available to DOE and DOE contractors from the
Office of Scientific and Technical Information
P.O. Box 62, Oak Ridge, TN 37831;
prices available from (615) 576-8401.

Available to the public from the National Technical Information Service,
U.S. Department of Commerce, 5285 Port Royal Rd., Springfield, VA 22161

This document was printed on recycled paper.

Background

The purpose of this bibliography is to present a select set of documents that may be of interest to the Offeror, covering a variety of subject areas related to the TWRS Privatization Project. This bibliography is not, nor is it intended to be, exhaustive or complete. It was prepared with the intent of providing a sampling of representative documents potentially helpful to Offerors.

This list of documents does not represent the full extent of available and potentially helpful information nor should it be taken as representative of documents determined to be of greater importance than other documents not referenced herein. There are many documents available to the public that are NOT cited in this bibliography; the Offeror is encouraged to also search for alternate sources of information.

The cited documents, and other relevant information, are available through several sources:

- 1) Benton Franklin County Law Library (Federal and Washington State codes)
Columbia Basin College
Attention: Stephanie Badalamente
Telephone No: (509) 547-0511 Ext. 290
- 2) Center for Environmental Management (DOE-EM)
Telephone No: (800) 736-3282
- 3) Hanford Technical Library
Telephone No: (509) 376-1606
Facsimile No: (509) 376-1422

Note: A limited number of documents will be provided by the Hanford Technical Library at no cost, generally in microfiche format; however, rush service is not available for off-site requests.

Telephone No: (509) 943-7457

Note:

¹ There is a duplicating charge of \$.10 per page, payable in advance.

Contents

This bibliography is organized by subject area. Some of the documents' subject areas overlap and may be listed in more than one subject area. Additionally, assignment of a document to one subject area does not necessarily preclude that document from containing information relevant to other subject areas not identified. In order of presentation the subject areas are:

- Waste Characterization
- Pre-treatment
- High-level Waste Immobilization
- Low-level Waste Immobilization
- Low-level Waste Melter Test Program
- Performance Assessment
- General
- Safety

In addition to this hard-copy document, the bibliography is also available in a searchable electronic format in the DOE Public Reading Room on the software Reference Manager® for Windows. The electronic files may be searched on the DOE Public Reading Room computer or the files may be copied onto disk. Also, this document may be duplicated.

For the convenience of the reader, Revision 2 contains addenda that identify:

A--Documents added in Revision 1;

B--Documents deleted from Revision 1 (those superseded by later documents); and

C--Documents added to Revision 2.

Note: Due to the time needed to clear internal documents for public release, two revisions of the bibliography have been prepared -- this document is the latest of the two. The first was released in early March. Both of these revisions contain additional documents that have only recently been cleared for public release. This latest revision is the last planned.

Copies of the recently cleared documents only are available in the DOE Public Reading Room. These recently cleared documents are denoted in the bibliography by the notation: "(Cleared for Public Release [Date].)" Other documents listed in the bibliography can be obtained through alternate sources.
