DISTRIBUTION OF THIS DOCUMENT IS UNLIMITED

Mound Laboratory manufactures two different configurations of the SE-1 detonator.

The basic detonator is the model SE-1. It has insulated copper pigtail leads AWG #20.

The other model designation, SE-1/31, has a coaxial cable connector with external threads for mounting.

Shown directly below is the SE-1 and below right is the SE-1/31.

COVER STORY

The original was a full color airbrush rendering by a Mound artist of the basic SE-1 detonator.

The SE-1 is often referred to as the "all purpose detonator" due to its popular use as a test unit by the U. S. Department of Defense and ERDA research and development laboratories such as Lawrence Livermore Laboratory, Los Alamos Scientific Laboratory and Sandia Laboratories.
