GENERAL SITE INFORMATION FORM

B-2. Does the company/agency treat, store, recycle, or dispose of dangerous waste? (This does not include treatment-by-generator activity and permit-by-rule activity [see the Definitions section of Book 2: Guidebook and Codes]. Information on treatment-by-generator and permit-by-rule activity will be captured in the GM Form for those generators conducting on-site treatment activities. ☐ Other (please specify).

C. Site-Wide Waste Minimization Activity Information

COMPLETE THIS SECTION ONLY FOR ODD (e.g. 1995, 1997) REPORTING YEARS.

LQGs and TSDRs must complete this section. If you are not an LQG or a TSDR, proceed to Section D, Comments (page 20), if appropriate, or to the Certification (page 21).

Ecology is required by EPA to collect the following information every other year (biennially, during the odd reporting years—e.g., 1995, 1997). These questions replace the EPA Waste Minimization Report that you have received in the past from EPA. Ecology recognizes the limitations of the waste minimization questions contained in this form and in the GM Form and is collecting this information solely for provision to EPA as per EPA requirements. As a matter of policy in the State of Washington, Ecology will rely on the Pollution Prevention Plan and Progress Reports for information through which to analyze businesses' pollution prevention and waste minimization efforts. Please refer to the definitions of source reduction and recycling (see the Definitions section of Book 2: Guidebook and Codes) to help you complete this section.

These questions refer to site-wide waste minimization activities. The questions on the GM Form are waste stream-specific.

C-1. Did this company/agency begin or expand a source reduction activity during 1994 or 1995?

☐ Yes  ☐ No
C-2. Did this company/agency begin or expand a recycling activity during 1994 or 1995?
☑ Yes  ☐ No

C-3. Did this company/agency systematically investigate opportunities for source reduction or recycling during 1994 or 1995?
☑ Yes  ☐ No

D. Comments

Use this section to provide any additional comments, information, or explanation, if necessary. In your comments, always provide the reference to the specific question number (e.g., A-7).

D. COMMENTS - (Continued from Page 6)

Section C - Sitewide Waste Minimization Activity Information

The items addressed below are waste reduction activities that took place in 1995; they do not meet the reporting criteria of the Generation and Management Reporting Form since waste was not generated previously. They are included here to document additional new source reduction and recycling activities at the Hanford Site that could not be reported elsewhere.

1. Approximately 183,000 gallons (895,000 kilograms [kg]) of radioactive nitric acid was shipped to England as product. If this effort had not taken place, the acid would have been considered Low-Level Mixed Waste (LLMW), neutralized, and transferred to the Tank Farms for storage and eventual treatment.

2. Three drums (921 kg) of unneeded potassium permanganate were transferred from the Plutonium Uranium Extraction Facility to T Plant to be used as product. If this had not occurred, the chemical would have been processed as hazardous waste for disposal.

3. Mercury (34 kg) generated from broken barometers, thermometers, and other equipment that utilize mercury, was purified by filtration and distillation and made available for reuse. If this process had not occurred, the mercury would have been processed as LLMW for disposal.

4. A new design vapor mixing system, utilizing dilution, replaces a carbon adsorption vapor treatment process. A source reduction of 7.1 cubic meters (2,600 kg) of LLMW carbon absorber resulted from this.
