Section 1: Introduction

Introduction

In order to develop a clearer understanding of the demographics of the U.S. particle physics workforce, the U.S. Department of Energy, the National Science Foundation, and the Division of Particles and Fields of the American Physical Society commissioned a survey and census of particle physicists employed in the United States. This survey and census were conducted in 1995, with an update of the census in April 1997. The agencies and the scientific community were represented for the 1995 efforts by Dr. Robert Woods (DOE), Dr. William Chinowsky (NSF), and Prof. Uriel Nauenberg (DPF); for the current census, by Dr. Robert Diebold (DOE), Dr. Marvin Goldberg (NSF), and Dr. Patricia Rankin (NSF). The survey/census were carried out with the assistance of the Particle Data Group at Lawrence Berkeley National Laboratory.

In order to obtain an accurate study of the current workforce and of future needs, we requested that all HEP physicists fill out and return the 1995 survey. There were 2494 respondents. For the 1997 census, a representative of each university and laboratory was asked to provide information on all persons at that institution who spend at least 50% of their research time on particle physics. In some cases this includes accelerator physicists. The total number of physicists in the 1997 census is 3492 from 155 institutions in the United States.

The full survey questionnaires are shown. The primary one was addressed to individual particle physicists, while the secondary one was addressed to principal investigators and sought information about people leaving the field.

There are many possible tables and plots from this survey, with a variety of correlations. Those chosen are representative of a cross-section of the demographic results. It should be emphasized that this survey was a snapshot in time, and does not have the same capabilities as would a series of surveys that are periodic in time. Care should be taken in interpreting the results of the tables and plots. The results on the number of physicists versus year of PhD do not, for example, reflect the number of people leaving the field, which can also vary as a function of time.

See up-to-date census information (plus the 1995 survey results) on the World-Wide Web at:

http://pdg.lbl.gov/doe_nsf/census.html

Section 2: 1995 Census/Survey Forms (questionnaires)

There were two distinct questionnaires used in the 1995 survey/census. The more general questionnaire was given to every U.S. particle physicist and was used for the Directory and for most of the survey results shown. The second questionnaire was addressed to principal investigators and was largely concerned with understanding the entry and exit of people from particle physics, and the professions entered following departure from particle physics.

Census and Workforce Study of High Energy Physics	7
Former Graduate Student and Postdoc Information	9

This survey is being conducted by the DOE with the cooperation of the NSF and the assistance of the PDG. In order to obtain an accurate study of the current workforce and of future needs, we are requesting that all HEP physicists fill out and return this survey as soon as possible. Thank you.

SECTION I—FORMER GRADUATE STUDENT INFORMATION

We are requesting this information from Principal Investigators to insure that our coverage of former graduate students and research associates is as complete as possible. Your response will be used to supplement the DOE/NSF Census that everyone is being asked to fill out. Your help in telling us who has left HEP and where they are now is especially important.

Section 4: 1995 Survey Plots

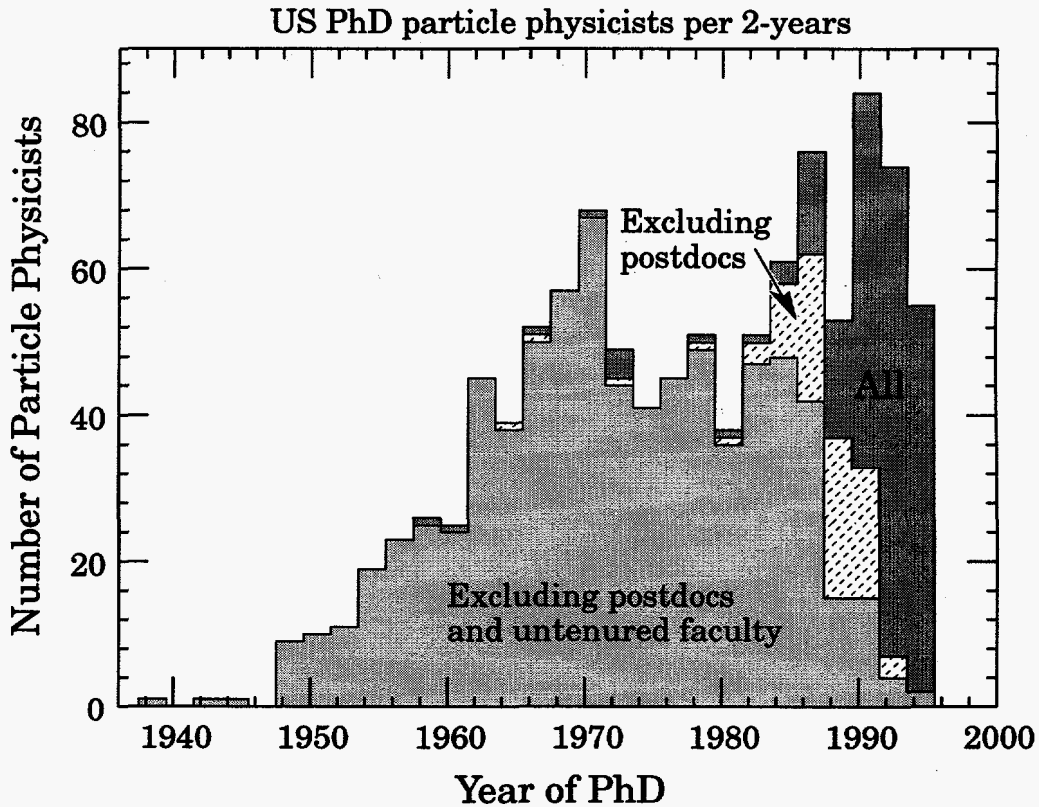

The numbers used to generate these plots are from the 1995 survey/census.

Number of physicists including and excluding postdocs and untenured faculty . . . vs. year of PhD	29
Number of physicists including and excluding postdocs and untenured faculty . . . vs. year of birth	29
Comparing number of physicists at universities and laboratories, including and excluding postdocs and untenured faculty, vs. year of PhD	30
Number of years as Graduate student by decade	31
Number of years as Postdoc by decade	32
Average years as Graduate student vs. year of PhD	33
Average years as Postdoc vs. final year as Postdoc	33
Physics Activities of Theorists	34
Physics Activities of Experimentalists	34
Minorities in Particle Physics vs. year of PhD and vs. employment status	36
Women in Particle Physics vs. year of PhD and vs. employment status	37

Section 6: 1997 Directory of Particle Physicists

This directory was compiled from the 1997 census.

The following "Directory of Particle Physicists" contains names, addresses, affiliations, phone numbers, Fax numbers, and Email addresses. Please note that none of this information has been verified by the individual listed. We have made a modest attempt to standardize affiliations and addresses. We hope to verify all information in the future.

Directory of Particle Physicists 63
