5. DOELAP ACCREDITATION	1

FOREWORD

1. This Department of Energy standard is approved for use by all DOE Components and contractors.

2. Beneficial comments (recommendations, additions, deletions) and any pertinent data that may improve this document should be sent to the Office of Nuclear Safety Policy and Standards (EH-31), U.S. Department of Energy, Washington, DC 20585, by letter or by using the self-addressed Document Improvement Proposal (DOE F 1300.3) appearing at the end of this document.

3. DOE technical standards, such as this technical standard, do not establish requirements. However, all or part of the provisions in a technical standard can become requirements under the following circumstances;

- (1) they are explicitly stated to be requirements in a DOE requirements document; or
- (2) the organization makes a commitment to meet a standard in a contract or in a plan or program required by a DOE requirements document.

Throughout this standard, the word "shall" is used to denote actions which must be performed if this standard is to be met. If the provisions in this technical standard are made requirements through one of the two ways discussed above, then the "shall" statements would become requirements.

1. **SCOPE**

This standard establishes the method for obtaining accreditation of personnel dosimetry systems by the Department of Energy Laboratory Accreditation Program.

2. **PURPOSE**

The purpose of this standard is to provide a consistent methodology for the performance testing, onsite assessment, and accreditation of personnel dosimetry systems.

3. **APPLICABILITY**

This standard is for use by all DOE components and their contractors when seeking accreditation of personnel dosimetry systems used for the assessment of personnel exposure to radiation. For the purposes of accreditation, personnel dosimetry systems currently include only whole body personnel dosimeters.

4. **REFERENCES**

10 CFR Part 835	Occupational Radiation Protection
DOE/EH-0026	Handbook for the Department of Energy Laboratory Accreditation Program for Personnel Dosimetry Systems
DOE/EH-0027	Department of Energy Standard for the Performance Testing of Personnel Dosimetry Systems
ANSI N13.11-1993	Personnel Dosimetry Performance - Criteria for Testing

5. **DOELAP ACCREDITATION**

5.1 The Department established and has operated the Laboratory Accreditation Program for personnel dosimetry systems since 1986. The procedures and standards for obtaining accreditation were published as DOE/EH-0026, Handbook for the Department of Energy Laboratory Accreditation Program for Personnel Dosimetry Systems, December 1986, and DOE/EH-0027, Department of Energy Standard for the Performance Testing of Personnel Dosimetry Systems, December 1986.

5.2 Accreditation of these programs was originally required by DOE Order 5480.11 which incorporated by reference DOE/EH-0026 and DOE/EH-0027. With the replacement of

DOE-STD-1095-95

DOE Order 5480.11 by Title 10 Code of Federal Regulations Part 835, no reference to these technical documents remained. This Technical Standard reestablishes the source of technical criteria used in the accreditation of personnel dosimetry systems to be as originally specified above.

- 5.3 In 1995, a working group was established by the Health Physics Society Standards Committee to revise American National Standards Institute Standard N13.11-1993. Upon completion of this revision, it is the Department's intent to evaluate the new standard as the basis for the accreditation program. This Technical Standard will then be revised to reflect these new criteria. Until such time, the DOELAP program will continue to be operated in accordance with DOE/EH-0026 and DOE/EH-0027.

7. Mailing Address (Street, City, State, Zip Code)

8. Date of Submission

INSTRUCTIONS: In a continuing effort to improve the U.S. Department of Energy (DOE) Technical Standards, this form is provided for use in submitting comments and suggestions for improvements. All users of DOE Technical Standards are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge (DO NOT STAPLE) mailed to the address indicated or faxed to (423) 574-0382.

1. The submitter of this form must complete blocks 1 through 8.
2. The Technical Standards Program Office (TSPO) will forward this form to the Preparing Activity. The Preparing Activity will reply to the submitter within 30 calendar days of receipt from the TSPO.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contractors. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.

OMB Burden Disclosure Statement

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Office of Information Resources Management Policy, Plans, and Oversight, Records Management Division, HR-422 - GTN, Paperwork Reduction Project (1910-0900), U.S. Department of Energy, 1000 Independence Avenue, S.W., Washington, DC 20585; and to the Office of Management and Budget (OMB), Paperwork Reduction Project (1910-0900), Washington, DC 20503.
