DOE/EI/23621--T1

**North Dakota
SHOPP Final Performance Report
DOE Grant #DE-FC01-92EI23621**

Narrative

During the last four heating seasons, in implementing SHOPP within the state of North Dakota, telephone surveys were conducted covering samples of between 26 and 30 residential propane dealers. In conducting the SHOPP survey in North Dakota, data collection was limited to residential propane prices. The surveys commenced the first Monday in October and ended in March. The surveys were normally conducted on the first and third Monday of each month. However, in the 1992/93 and 1993/94 heating seasons, the collection of data was increased briefly to weekly surveys at the direction of EIA.

In addition to the propane price surveys, the energy office conducted pre and post communications each year with the dealers in the sample. The additional communications with the sample dealerships assist in preparing for actual collection of information and in maintaining relationships and continuity for subsequent survey years.

In conducting the survey, the data was inputted into the PEDRO computerized data system for processing and transmittal to EIA.

Resulting Data

Detailed printouts of the price data from the 1995/96 SHOPP propane survey are contained in the attached tables. These tables contain data for all the survey respondents for all surveys.

The survey data, as analyzed by EIA, resulted in estimated average residential propane prices for the state of North Dakota during the heating season. Attached are line charts which plot this average price for propane within the state against the calculated average for PADD II, of which North Dakota is a part.

Miscellaneous Note

While each year annual budgets were prepared, actual expenditures were less than budgeted. This is due primarily to the fact that while funds were budgeted to attend the SHOPP annual meetings, three out of the four years a representative from North Dakota was unable to attend.
