Cybersecurity and Information Sharing: Comparison of H.R. 1560 and H.R. 1731 as Passed by the House

Eric A. Fischer
Senior Specialist in Science and Technology

Stephanie M. Logan
Research Assistant

June 4, 2015
Summary

Effective sharing of information in cybersecurity is generally considered an important tool for protecting information systems and their contents from unauthorized access by cybercriminals and other adversaries. Five bills on such sharing have been introduced in the 114th Congress—H.R. 234, H.R. 1560, H.R. 1731, S. 456, and S. 754. The White House has also submitted a legislative proposal and issued an executive order on the topic.

In the House, H.R. 1560, the Protecting Cyber Networks Act (PCNA), was reported out of the Intelligence Committee. H.R. 1731, the National Cybersecurity Protection Advancement Act of 2015 (NCPAA), was reported by the Homeland Security Committee. Both bills passed the House, amended, the week of April 20, and were combined, with the PCNA becoming Title I and the NCPAA Title II of H.R. 1560.

The PCNA and the NCPAA have many similarities but also significant differences. Both focus on information sharing among private entities and between them and the federal government. They address the structure of the information-sharing process, issues associated with privacy and civil liberties, and liability risks for private-sector sharing, and both address some other topics in common.

The NCPAA would amend portions of the Homeland Security Act of 2002, and the PCNA would amend parts of the National Security Act of 1947. They differ in how they define some terms in common such as cyber threat indicator, the roles they provide for federal agencies (especially, the Department of Homeland Security and the intelligence community), processes for nonfederal entities to share information with the federal government, processes for protecting privacy and civil liberties, uses permitted for shared information, and reporting requirements.

S. 754 has been reported by the Senate Intelligence Committee. Presumably, if the Senate passes a bill on information sharing, any inconsistencies between the PCNA and the NCPAA could be reconciled during the process for resolving differences between the House and Senate bills.

All of the bills would address commonly raised concerns about barriers to sharing information about threats, attacks, vulnerabilities, and other aspects of cybersecurity—both within and across sectors. Such barriers are considered by many to hinder protection of information systems, especially those associated with critical infrastructure. Private-sector entities often claim that they are reluctant to share such information among themselves because of concerns about legal liability, antitrust violations, and protection of intellectual property and other proprietary business information. Institutional and cultural factors have also been cited—traditional approaches to security tend to emphasize secrecy and confidentiality, which would necessarily impede sharing of information.

All the bills have provisions aimed at facilitating information sharing among private-sector entities and providing protections from liability that might arise from such sharing. While reduction or removal of such barriers may provide benefits, concerns have also been raised about potential adverse impacts, especially on privacy and civil liberties, and potential misuse of shared information. The legislative proposals all address many of the concerns. In general, the proposals limit the use of shared information to purposes of cybersecurity and law enforcement, and they limit government use, especially for regulatory purposes. All include provisions to shield information shared with the federal government from public disclosure and to protect privacy and
civil liberties with respect to shared information that is not needed for cybersecurity purposes. All the proposals require reports to Congress on impacts of their provisions.

Most observers appear to believe that legislation on information sharing is either necessary or at least potentially beneficial—provided that appropriate protections are included—but two additional factors in particular may be worthy of consideration as the various legislative proposals are debated. First, resistance to sharing of information among private-sector entities might not be substantially reduced by the actions contemplated in the legislation. Second, information sharing is only one of many facets of cybersecurity that organizations need to address to secure their systems and information.

This report compares provisions in two bills in the House of Representatives that address information sharing and related activities in cybersecurity:1

- H.R. 1560, the Protecting Cyber Networks Act (PCNA), as passed by the House on April 22; and
- H.R. 1731, the National Cybersecurity Protection Advancement Act of 2015 (NCPAA), as passed by the House on April 23.2

Both bills focus on information sharing among private entities and between them and the federal government. They address the structure of the information-sharing process, issues associated with privacy and civil liberties, and liability risks for private-sector sharing, and both address some other topics in common. In addition to other provisions, the NCPAA would explicitly amend portions of the Homeland Security Act of 2002 (6 U.S.C. 101 et seq.), and the PCNA would amend parts of the National Security Act of 1947 (50 U.S.C. 3021 et seq.).

This report consists of an overview of those and other legislative proposals on information sharing, along with selected associated issues, followed by a side-by-side analysis of the two House bills as passed. For information on economic aspects of information sharing, see CRS Report R43821, *Legislation to Facilitate Cybersecurity Information Sharing: Economic Analysis*, by N. Eric Weiss. For discussion of legal issues, see CRS Report R43941, *Cybersecurity and Information Sharing: Legal Challenges and Solutions*, by Andrew Nolan. For an overview of cybersecurity issues, see CRS Report R43831, *Cybersecurity Issues and Challenges: In Brief*, by Eric A. Fischer.

**House Consideration of the Two Bills**

The House Committee on Rules held a hearing on proposed amendments to both H.R. 1560 and H.R. 1731 on April 21. More than 30 amendments were submitted for H.R. 1731 and more than 20 for H.R. 1560.3 The committee reported H.Res. 212 (H.Rept. 114-88) on the two bills on April 21, with a structured rule allowing consideration of five amendments to H.R. 1560 and 11 for H.R. 1731. For each bill, a manager’s amendment would serve as the base bill for floor consideration, with debate on H.R. 1560 held on April 22 and on H.R. 1731 on April 23. The rule further stated that upon passage of both bills, the text of H.R. 1731 would be appended to H.R. 1560, and H.R. 1731 would be tabled.

On April 22, all five amendments to H.R. 1560 were adopted and the bill passed the House by a vote of 307 to 116. The amendments were all agreed to by voice vote except a sunset amendment terminating the bill’s provisions seven years after enactment, which passed by recorded vote of

---

1 The analysis is limited to a textual comparison of the bills and is not intended to reach any legal conclusions regarding them.

2 The Rules Committee print is available at http://docs.house.gov/billsthisweek/20150420/CPRT-114-HPRT-RU00-HR1731.pdf.

313 to 110. Similarly, on April 23, the 11 amendments to H.R. 1731 were all adopted and the bill was passed by a vote of 355 to 63. A sunset amendment similar to that approved for H.R. 1560, and all but one other amendment were adopted by voice vote. The exception, requiring a GAO study on privacy and civil liberties impacts, was agreed to by recorded vote, 405 to 8. The engrossed version of H.R. 1560 combined the bills by making the PCNA Title I and the NCPAA Title II.

**Current Legislative Proposals**

Five bills on information sharing have been introduced in the 114th Congress, three in the House and two in the Senate. The White House has also submitted a legislative proposal (WHP) and issued an executive order on the topic. Other proposals include the following:

- The Cyber Intelligence Sharing and Protection Act (CISPA), which passed the House in the 113th Congress, has been reintroduced as H.R. 234.
- S. 456 is an amended version of the White House proposal.
- S. 754, the Cybersecurity Information Sharing Act of 2015 (CISA), from the Senate Intelligence Committee, has many similarities to a bill with the same name introduced in the 113th Congress and shares many provisions with the PCNA, although there are also significant differences between S. 754 and the PCNA.

All the bills would address concerns that are commonly raised about barriers to sharing of information on threats, attacks, vulnerabilities, and other aspects of cybersecurity—both within and across sectors. It is generally recognized that effective sharing of information is an important tool in the protection of information systems and their contents from unauthorized access by cybercriminals and other adversaries.

Barriers to sharing have long been considered by many to be a significant hindrance to effective protection of information systems, especially those associated with critical infrastructure. Private-sector entities often claim that they are reluctant to share such information among themselves because of concerns about legal liability, antitrust violations, and protection of intellectual property and other proprietary business information. Institutional and cultural factors have also been cited—traditional approaches to security tend to emphasize secrecy and confidentiality, which would necessarily impede sharing of information. While reduction or removal of such barriers may provide benefits in cybersecurity, concerns have also been raised

---

6 See Senate Committee on Homeland Security and Government Affairs, *Protecting America from Cyber Attacks: The Importance of Information Sharing*, 2015, http://www.hsrgc.senate.gov/hearings/protecting-america-from-cyber-attacks-the-importance-of-information-sharing. The hearing was not specifically on the White House proposal but it was held after the proposal was submitted and before the introduction of S. 456.
about potential adverse impacts, especially with respect to privacy and civil liberties, and potential misuse of shared information.

The legislative proposals all address many of those concerns, but they vary somewhat in emphasis and method. The NCPAA focuses on the role of the Department of Homeland Security (DHS), and in particular the National Cybersecurity and Communications Integration Center (NCCIC). The PCNA, in contrast, focuses on the role of the intelligence community (IC), including authorization of the recently announced Cyber Threat Intelligence Integration Center (CTIIC). Both CISPA and CISA address roles of both DHS and the IC. The NCPAA, S. 456, and the WHP address roles of information sharing and analysis organizations (ISAOs). ISAOs were defined in the Homeland Security Act (6 U.S.C. §131(5)) as entities that gather and analyze information relating to the security of critical infrastructure, communicate such information to help with defense against and recovery from incidents, and disseminate such information to any entities that might assist in carrying out those goals. Information Sharing and Analysis Centers (ISAoS) are more familiar to most observers. They may also be ISAOs but are not the same, having been originally formed pursuant to a 1998 presidential directive.

On February 20, 2015, President Obama signed Executive Order 13691, which requires the Secretary of Homeland Security to encourage and facilitate the formation of ISAOs, and to choose and work with a nongovernmental standards organization to identify standards and guidelines for the ISAOs. It also requires the NCCIC to coordinate with ISAOs on information sharing, and includes some provisions to facilitate sharing of classified cybersecurity information with appropriate entities.

On April 21, the White House announced support for passage of both the NCPAA and the PCNA by the House, while calling for a narrowing of sweep for the liability protections and additional safeguards relating to use of defensive measures in both bills. It also called for clarifying provisions in the NCPAA on use of shared information in federal law enforcement and ensuring that provisions in the PCNA do not interfere with privacy and civil liberties protections.

8 The IC consists of 17 agencies and others as designated under 50 U.S.C. 3003.
11 Executive Order 13691, “Promoting Private Sector Cybersecurity Information Sharing.”
All of the proposals have provisions aimed at facilitating sharing of information among private-sector entities and providing protections from liability that might arise from such sharing. They vary somewhat in the kinds of private-sector entities and information covered, but almost all of them address information on both cybersecurity threats and defensive measures, the exception being S. 456 and the WHP, which cover only cyber threat indicators. In general, the proposals limit the use of shared information to purposes of cybersecurity and law enforcement, and they limit government use, especially for regulatory purposes.

All address concerns about privacy and civil liberties, although the mechanisms proposed vary to some extent, in particular the roles played by the Attorney General, the DHS Secretary, Chief Privacy Officers, the Privacy and Civil Liberties Oversight Board (PCLOB), and the Inspectors General of DHS and other agencies. All the proposals require reports to Congress on impacts of their provisions. All also include provisions to shield information shared with the federal government from public disclosure, including exemption from disclosure under the Freedom of Information Act (FOIA).

H.R. 1735, the National Defense Authorization Act of 2016, as passed by the House on May 15, would provide liability protections similar to those in H.R. 1560 to “operationally critical” defense contractors who are required to report incidents to DOD (10 U.S.C. 391) and cleared contractors required to report network or system penetrations (10 U.S.C. 2224 note).

While most observers appear to believe that legislation on information sharing is either necessary or at least potentially beneficial—provided that appropriate protections are included—two additional factors in particular may be worthy of consideration as the legislative proposals are developed. First, resistance to sharing of information among private-sector entities might not be substantially reduced by the actions contemplated in the legislation. Information received can help an entity prevent or mitigate an attack. However, there is no clear direct benefit associated with providing information, except in the case of providers of cybersecurity services and their clients. More indirect benefits might occur, for example, if a pattern of reciprocity develops among sharing entities, such as through ISACs or ISAOs. While the legislative proposals may reduce the risks to private-sector entities associated with providing information, none include explicit incentives to stimulate such provision. In the absence of mechanisms to balance that asymmetry, the degree to which information sharing will increase under the provisions of the various legislative proposals may be uncertain.

The second point is that information sharing is only one of many facets of cybersecurity. Entities must have the resources and processes in place that are necessary for effective cybersecurity risk management. Sharing may be relatively unimportant for many organizations, especially in comparison with other cybersecurity needs. In addition, most information sharing relates to imminent or near-term threats. It is not directly relevant to broader issues in

---

14 See, for example, Testimony of Martin C. Libicki before the House Committee on Oversight & Government Reform, Subcommittee on Information Technology, hearing on Industry Perspectives on the President’s Cybersecurity Information Sharing Proposal, 2015, http://homeland.house.gov/hearing/subcommittee-hearing-industry-perspectives-president-s-cybersecurity-information-sharing.

cybersecurity such as education and training, workforce, acquisition, or cybercrime law, or major long-term challenges such as building security into the design of hardware and software, changing the incentive structure for cybersecurity, developing a broad consensus about cybersecurity needs and requirements, and adapting to the rapid evolution of cyberspace.

Comparison of the NCPAA and the PCNA

The remainder of the report consists of a side-by-side comparison of provisions in H.R. 1560 and H.R. 1731 as passed by the House and combined as separate titles into a single bill, H.R. 1560. The PCNA became Title I and the NCPAA became Title II.

Notes on the Table

Entries describing provisions in a bill are summaries or paraphrases, with direct quotes enclosed in double quotation marks. The table uses the following formatting conventions to aid in the comparison:

- Related provisions in the two titles are adjacent to each other, with the NCPAA serving as the basis for comparison. As a result, many provisions of the PCNA appear out of sequence in the table.

- **Bold** formatting denotes that the identified provision is the subject of the subsequent text (e.g., (d) or **Sec. 102 (a)**).

- Numbers and names of sections, subsections, and paragraphs (except definitions) added to existing laws by the bills are enclosed in single quotation marks (e.g., ‘Sec. 111(a)’).

- **Underlined** text (visible only in the pdf version) is used in selected cases as a visual aid to highlight differences with a corresponding provision in the other bill that might otherwise be difficult to discern.

- The names of titles, sections, and some paragraphs are stated the first time a provision from them is discussed in the table—for example, **Sec. 103. Authorizations for Preventing, Detecting, Analyzing, and Mitigating Cybersecurity Threats**—but only the number, to the paragraph level or higher, is used thereafter.

- In cases where a provision of the PCNA is out of sequence from that immediately above it, as much of the provision number is repeated as is needed to make its origin clear. For example, on p. 14, a provision from Sec. 103 is described immediately after an entry for Sec. 109 and is therefore labelled **Sec. 103(c)(3)**. That is followed immediately by an entry labelled (a), which is a subsection of Sec. 103 and therefore is not preceded by the section number.

- Page numbers cited within the table are hyperlinked to the provisions they reference in the table; the page numbers themselves refer to pages in the pdf version of the report.

- Explanatory notes on provisions are enclosed in square brackets. Also, the entry “[Similar to NCPAA]” means that the text in that provision in the PCNA is closely similar in text, with no significant difference in meaning, to the corresponding provision in the NCPAA. “[Identical to NCPAA]” means that there are no differences in language in the two provisions.

Sec. 201. Short Title
National Cybersecurity Protection Advancement Act of 2015

Sec. 202. National Cybersecurity and Communications Integration Center
Amends Sec. 226 of the HSA (6 U.S.C. 148). [Note: This section, added by P.L. 113-282, established the National Cybersecurity and Communications Integration Center and is referred to in the bill as the “second section 226” to distinguish it from an identically numbered section added by P.L. 113-277.]

(a) In General
Amends existing definitions:

Cybersecurity Risk: Excludes actions solely involving violations of consumer terms of service or licensing agreements from the definition.

Incident: Replaces the phrase “or actually or imminently jeopardizes, without lawful authority, an information system” with “or constitutes a violation or imminent threat of violation of law, security policies, security procedures, or acceptable use policies.”

Adds the following definitions:

Cybersecurity Threat: An action unprotected by the 1st Amendment to the Constitution that involves an information system and may result in unauthorized efforts to adversely impact the security, integrity, confidentiality, or availability of the system or its contents, but not including actions solely involving violations of consumer terms of service or licensing agreements.

Cyber Threat Indicator:
- a method for network awareness [defined below] of an information system to discern its technical vulnerabilities, if the method is known or reasonably suspected of association with a known or suspected cybersecurity risk, including
- communications that reasonably appear to have “the

Cyber Threat Indicator:

Sec. 103. Authorizations for Preventing, Detecting, Analyzing, and Mitigating Cybersecurity Threats

(f) Small Business Participation

Requires the Small Business Administration to assist small businesses and financial institutions in monitoring, defensive
assessment tools available to them,

Requires a report with recommendations by the administrator to the President within one year of enactment on sharing by those institutions and use of shared information for network defense.

Requires federal outreach to those institutions to encourage them to exercise the authorities provided under the section.

Specifies that information be guarded against disclosure.

Stipulates that the NCCIC must work with the DHS CPO to ensure that the NCCIC follows privacy and civil liberties policies and procedures under ‘Sec. 226(i)(6)’.

(4) adds new subsections to Sec. 226 of the HSA:

‘(g) Rapid Automated Sharing’

‘(1)’ requires the DHS U/S-CIP to develop capabilities, in coordination with stakeholders and based as appropriate on existing standards and approaches in the information technology industry, that support and advance automated and timely sharing of threat indicators and defensive measures to and from the NCCIC and with SSAs for each CI sector in accordance with ‘Sec. 226(h).’

‘(2)’ requires the U/S-CIP to report to Congress twice per year on the status and progress of that capability until it is fully implemented.

‘(h) Sector Specific Agencies’

Requires the Secretary to collaborate with relevant CI sectors and heads of appropriate federal agencies to recognize each CI SSA designated as of March 25, 2015, in the DHS National Infrastructure Protection Plan. Designates the Secretary as SSA head for each sector for which DHS is the SSA. Requires the Secretary to coordinate with relevant SSAs to
- support CI sector security and resilience activities,
- provide knowledge, expertise, and assistance on request, and
- support timely sharing of threat indicators and defensive measures with the NCCIC.

[Note: For other provisions of ‘Sec. 111(a)(2)’, see pp. 10 and 19.]

‘(b) Definitions’

Defines the following terms by reference to Sec. 110 of the title: Appropriate Federal Entities, Cyber Threat Indicator, Defensive Measure, Federal Entity, and Non-Federal Entity.

(b) Submittal to Congress

Requires that the procedures developed by the DNI be submitted to Congress within 90 days of enactment of the title.

(c) Table of Contents Amendment

Revises the table of contents of the National Security Act of 1947 to reflect the addition of ‘Sec. 111’.
Sec. 104. Sharing of Cyber Threat Indicators and Defensive Measures With Appropriate Federal Entities Other Than the Department of Defense or the National Security Agency

(a) Requirement for Policies and Procedures

(1) Adds new subsections to 'Sec. 111' of the National Security Act of 1947

‘(i) Voluntary Information Sharing Procedures’

‘(1)’ permits voluntary information-sharing relationships for cybersecurity purposes between the NCCIC and nonfederal entities but prohibits requiring such an agreement. Permits the NCCIC, at the sole and unreviewable discretion of the Secretary, acting through the U/S-CIP, to terminate an agreement for repeated, intentional violation of the terms of ‘(i).’ Permits the Secretary, solely and unreviewably and acting through the U/S-CIP, to deny an agreement for national security reasons.

‘(2)’ permits the relationship to be established through a standard agreement for nonfederal entities not requiring specific terms. Stipulates negotiated agreements with DHS upon request of a nonfederal entity where NCCIC has determined that they are appropriate, and at the sole and unreviewable discretion of the Secretary, acting through the U/S-CIP.

Stipulates that any agreement in effect prior to enactment of the title will be deemed in compliance with requirements in ‘(i).’ Requires that those agreements include “relevant privacy protections as in effect” under the CRADA for Cybersecurity Information Sharing and Collaboration, as of December 31st, 2014.” Also stipulates that an agreement is not required for an entity to be in compliance with ‘(i).’

‘(2)’ requires that they be developed in accordance with the privacy and civil liberties guidelines under Sec. 104(b) of the title, and ensure
- real-time sharing of indicators from nonfederal entities with appropriate federal entities except DOD,
- receipt without delay except for good cause, and
- provision to all relevant federal entities,
- audit capability, and
- appropriate sanctions for federal personnel who knowingly and willfully use shared information other than in accordance with the title.

(2) requires that an interim version of the policies and procedures be submitted to Congress within 90 days of enactment of the title, and the final version within 180 days.

(c) National Cyber Threat Intelligence Integration Center

**'(6) Privacy and Civil Liberties Protections'**

Requires the U/S-CIP, in coordination with the DHS CPO and Chief Civil Rights and Civil Liberties Officer, to establish and review annually policies and procedures on information shared with the NCCIC under the section.

Requires that they apply only to DHS, consistent with the need for timely protection of information systems from and mitigation of cybersecurity risks and incidents, the policies and procedures:

- be consistent with DHS FIPPs,

- "reasonably limit, to the extent practicable, receipt, retention, use, and disclosure of cybersecurity threat indicators and defensive measures associated with specific persons" not needed for timely protection of systems and networks,

- minimize impacts on privacy and civil liberties,

- provide data integrity through prompt removal and destruction of obsolete or erroneous personal information unrelated to the information shared and retained by the NCCIC in accordance with this section,

- include requirements to safeguard from unauthorized access or acquisition cyber threat indicators and defensive measures retained by the NCCIC, identifying specific persons, including proprietary or business-sensitive information,

- protect the confidentiality of cyber threat indicators and defensive measures associated with specific persons, to the greatest extent practicable,

- ensure that relevant constitutional, legal, and privacy

Sec. 104(b) Privacy and Civil Liberties

(1) requires the AG, in consultation with appropriate federal agency heads and agency privacy and civil liberties officers, to develop and review periodically guidelines on privacy and civil liberties to govern federal handling of cyber threat indicators obtained through the title’s provisions.

(2) requires that, consistent with the need for protection of information systems and threat mitigation, the guidelines:

- be consistent with FIPPs in the White House National Strategy for Trusted Identities in Cyberspace [Note: The two versions of the principles are identical, except that the DHS version applies the principles to DHS whereas the White House document applies them to “organizations”],

- limit receipt, retention, use, and dissemination of cybersecurity threat indicators containing personal information of or identifying specific persons, including by establishing processes for prompt destruction of information known not to be directly related to uses for cybersecurity purposes, setting limitations on retention of indicators, and notifying recipients that indicators may be used only for cybersecurity purposes,

- limit impacts on privacy and civil liberties of federal activities under the title, including guidelines for removal of personal and personally identifying information handled by federal entities under the title,

- include requirements to safeguard from unauthorized access or acquisition cyber threat indicators containing personal information of or identifying specific persons,

- be consistent with other applicable provisions of law,

<td></td>
</tr>
</tbody>
</table>
The tables below summarize provisions of H.R. 1560 and H.R. 1731:

### NCPAA—Title II
- A list of federal agencies receiving the information,
- Review of sharing of information within the federal government to identify inappropriate stovepiping of shared information, and
- Recommendations for improvements or modifications to sharing under the section.

Requires the DHS CPO and Chief Civil Rights and Civil Liberties Officer, in consultation with the PCLOB, the DHS IG, and senior privacy and civil liberties officers of each federal agency receiving indicators or defensive measures shared with the NCCIC, to submit a biennial report to Congress assessing impacts on privacy and civil liberties of federal activities under ‘(6)’, including recommendations to minimize or mitigate such impacts.

### PCNA—Title I
- A list of federal entities receiving the indicators,
- Review of sharing of indicators among federal entities to identify inappropriate barriers to sharing information,
- Procedures for sharing information and removal of personal and identifying information, and incidents involving improper treatment of it, and
- Recommendations for improvements or modifications to authorities under the title.

Requires that the reports be submitted in unclassified form but permits a classified annex.

Reasons public availability of unclassified parts of the reports.

(1) Adds a new paragraph to Sec. 1061(e) of the Intelligence Reform and Terrorism Prevention Act of 2004:

‘(3)’ requires the PCLOB to submit a biennial report to Congress and the President assessing impacts of activities under the title on and sufficiency of policies, procedures, and guidelines in addressing concerns about privacy and civil liberties, including recommendations for improvements or modifications to authorities under the title.

Requires that the reports be submitted in unclassified form but permits a classified annex.

Requires public availability of unclassified parts of the reports.

(a) Biennial Report on Implementation

(1) Adds to ‘Sec. 111’ of the National Security Act

‘(c) Biennial Report on Implementation’

‘(1)’ requires the DNI to submit a report to Congress on implementation of the title, (2) within one year of enactment and ‘(1)’ at least biennially thereafter, (2) including
- Review of types of indicators shared with the federal government,
- The degree to which such information may impact privacy and civil liberties of specific persons, along with quantitative and qualitative assessment of such impacts and adequacy of federal efforts to reduce them,
- Assessment of sufficiency of policies, procedures, and guidelines to ensure effective and responsible sharing under Sec. 4 [sic] of PCNA,
- Sufficiency of procedures under Sec. 3 [sic] for timely sharing. [Note: References ‘Sec. 111(a)(1)’ as added by the title; see p. 10],
### NCPAA—Title II

- appropriateness of classification of indicators and accounting of security clearances authorized,
- federal actions taken based on shared indicators, including appropriateness of subsequent use or dissemination under the title,
- description of any significant federal violations of the requirements of the title, including assessments of all reports of federal personnel misusing information provided under the title and all disciplinary actions taken, and
- a summary of the number and types of nonfederal entities receiving classified indicators from the federal government and evaluation of risks and benefits of such sharing.

- assessment of personal or personally identifying information not directly related to a threat that was shared by a nonfederal entity with the federal government in contravention to Sec. 3(d)(2) or within the government in contravention of Sec. 4(b) guidelines. [Note: Intended reference presumably to Sec. 103 and 104 respectively.]

‘(3)’ permits reports to include recommendations for improvements or modifications to authorities and processes under the title.

‘(4)’ requires that the reports be submitted in unclassified form but permits a classified annex.

‘(5)’ requires public availability of unclassified parts of the reports.

### Sec. 103. Authorizations for Preventing, Detecting, Analyzing, and Mitigating Cybersecurity Threats

#### (d) Protection and Use of Information

[Nonfederal Entities]

Permits a nonfederal, nongovernment entity that shares indicators or defensive measures with the NCCIC to use indicators or defensive measures shared or received under (d) to monitor or operate a defensive measure on its own information systems or those of other nonfederal or federal entities upon written authorization from them, with further use, retention, or sharing subject to lawful restrictions by the sharing entity or otherwise applicable provisions of law.

Requires reasonable efforts prior to sharing to safeguard personally identifying information from unintended disclosure and unauthorized access or acquisition, and remove or exclude such information where it is reasonably believed when shared to be unrelated to a cybersecurity risk or incident.

Requires compliance with appropriate restrictions on subsequent disclosure or retention placed by a federal or nonfederal entity on indicators or defensive measures disclosed to other entities.

Stipulates that the information shall be deemed voluntarily shared.

Requires implementation and utilization of security controls to protect against unauthorized access or acquisition.

(3) permits a nonfederal entity [Note: including government entities], for a cybersecurity purpose, to use indicators or defensive measure shared or received under (d) to monitor or operate a defensive measure on its own information systems or those of other nonfederal or federal entities upon written authorization from them, with [See (2), p. 13, describing requirements for removal of personal information].

(1) requires implementation of appropriate security controls to protect against unauthorized access or acquisition. [Note:

<td>Exempts the information from disclosure under nonfederal disclosure laws or regulations, except as required in criminal prosecutions.</td>
</tr>
</tbody>
</table>

Prohibits use for regulation of lawful activities of nonfederal entities.

‘(8) Liability Exemptions’

Sec. 106. Protection from Liability

(a) Monitoring of Information Systems
### NCPAA—Title II

<table>
<thead>
<tr>
<th>States that “no cause of action shall lie or be maintained in any court” against nonfederal, nongovernment entities for conducting network awareness under ‘(4)’ in accordance with the section or for sharing indicators or defensive measures under ‘(3),’ or a good-faith failure to act if sharing is done in accordance with the section.</th>
</tr>
</thead>
<tbody>
<tr>
<td>States that “no cause of action shall lie or be maintained in any court” against private entities for monitoring information systems under Sec. 103(a) conducted in accordance with the title or for information sharing under Sec. 103(c) in accordance with the title, or a good-faith failure to act if sharing is done in accordance with the title.</td>
</tr>
</tbody>
</table>

**Stipulates that nothing in the section**

- requires dismissal of a cause of action against a nonfederal, nongovernment entity that engages in willful misconduct in the course of activities under the section.
- undermines or limits availability of otherwise applicable common law or statutory defenses.

Establishes the burden of proof as clear and convincing evidence from the plaintiff of injury-causing gross negligence or willful misconduct.

 Defines willful misconduct as an act or omission taken intentionally to achieve a wrongful purpose, knowingly without justification, and in disregard of risk of highly probable harm that outweighs any benefit.

### ‘(9) Federal Government Liability for Violations of Restrictions on the Use and Protection of Voluntarily Shared Information’

<table>
<thead>
<tr>
<th>Makes the federal government liable to injured persons for intentional or willful violation of restrictions on federal disclosure and use under ‘Sec. 226,’ with minimum damages of $1,000 plus reasonable attorney fees as determined by the court and other reasonable litigation costs in any case under (a) where “the complainant has substantially prevailed.”</th>

NCPAA—Title II

Exempts nonfederal entities from violation of antitrust laws for sharing indicators or defensive measures or providing assistance for cybersecurity purposes, provided that the action is taken to assist with preventing, investigating, or mitigating a cybersecurity risk or incident.

‘(11) Construction and Preemption’

Stipulates that the section does not limit or prohibit otherwise lawful disclosures or participation in an investigation by a nonfederal entity of information to any other federal or nonfederal entity.

Sec. 109(b) Otherwise Lawful Disclosures

Stipulates that the title does not limit or prohibit otherwise lawful disclosures by a nonfederal entity of information to any other federal or nonfederal entity, or any otherwise lawful use by a federal entity, whether or not the disclosures duplicate those made under the title.

(c) Whistle Blower Protections

Stipulates that the title does not prohibit or limit disclosures protected under 5 U.S.C. 2302(b)(8), 5 U.S.C. 7211, 10 U.S.C. 1034, or similar provisions of federal or state law.

(e) Relationship to Other Laws

Stipulates that the title does not affect any requirements under other provisions of law for nonfederal entities providing information to federal entities.

(g) Preservation of Contractual Obligations and Rights

Stipulates that the title does not affect any requirements under other provisions of law for nonfederal entities providing information to federal entities, or abrogate trade-secret or intellectual property rights.

(h) Anti-Tasking Restriction

Stipulates that the title does not permit the federal government to require nonfederal entities to provide it with information, or condition sharing of indicators or defensive measures on provision by such entities of indicators or defensive measures, or condition award of grants, contracts, or purchases on such provision.

(i) No Liability for Non-Participation

Stipulates that the title does not create liabilities for any nonfederal entities that choose not to engage in the voluntary activities authorized in the section.

(j) Use and Retention of Information

Stipulates that the title does not authorize or modify existing federal authority to retain and use information shared under the title for uses other than those permitted under the title.

Stipulates that the section does not restrict or condition sharing for cybersecurity purposes among nonfederal entities or require sharing by them with the NCCIC.

Stipulates that nothing in the bill “shall be construed to permit price-fixing, allocating a market between competitors,

PCNA—Title I

Sec. 109(b) Otherwise Lawful Disclosures

Stipulates that the title does not limit or prohibit otherwise lawful disclosures by a nonfederal entity of information to any other federal or nonfederal entity, or any otherwise lawful use by a federal entity, whether or not the disclosures duplicate those made under the title.

(c) Whistle Blower Protections

Stipulates that the title does not prohibit or limit disclosures protected under 5 U.S.C. 2302(b)(8), 5 U.S.C. 7211, 10 U.S.C. 1034, or similar provisions of federal or state law.

(e) Relationship to Other Laws

Stipulates that the title does not affect any requirements under other provisions of law for nonfederal entities providing information to federal entities.

(g) Preservation of Contractual Obligations and Rights

Stipulates that the title does not affect any requirements under other provisions of law for nonfederal entities providing information to federal entities, or abrogate trade-secret or intellectual property rights.

(h) Anti-Tasking Restriction

Stipulates that the title does not permit the federal government to require nonfederal entities to provide it with information, or condition sharing of indicators or defensive measures on provision by such entities of indicators or defensive measures, or condition award of grants, contracts, or purchases on such provision.

(i) No Liability for Non-Participation

Stipulates that the title does not create liabilities for any nonfederal entities that choose not to engage in a voluntary activity authorized in the title.

(j) Use and Retention of Information

Stipulates that the title does not authorize or modify existing federal authority to retain and use information shared under the title for uses other than those permitted under the title.
monopolizing or attempting to monopolize a market, boycotting, or exchanges of price or cost information, customer lists, or information regarding future competitive planning.”

(k) Federal Preemption

(1) specifies that the section supersedes state and local laws relating to its provisions.

(2) stipulates that the title does not supersede state and local laws on use of authorized law enforcement practices and procedures.

(3) stipulates that, except with respect to exemption from disclosure under Sec. 103(b)(4), the title does not supersede state and local law on private entities performing utility services except to the extent that they restrict activities under the title.

Sec. 204. Information Sharing and Analysis Organizations

Amends Sec. 212 of the HSA to

(1) broaden the functions of ISAOs to include cybersecurity risk and incident information beyond that relating to critical infrastructure, and

(2) add by reference the definitions of cybersecurity risk and incident in 6 U.S.C. 148(a).

Sec. 205. Streamlining of Department of Homeland Security Cybersecurity and Infrastructure Protection Organization

(a) Cybersecurity and Infrastructure Protection Directorate

Renames the DHS National Protection and Programs

(d) Protection of Sources and Methods

Stipulates that the title does not affect federal enforcement actions on classified information or conduct of authorized law-enforcement or intelligence activities, or modify the authority of the President or federal entities to protect and control dissemination of classified information, intelligence sources and methods, and U.S. national security.
NCPAA—Title II

<table>
<thead>
<tr>
<th>(b) Senior Leadership of the Cybersecurity and Infrastructure Protection Directorate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Provides a specific title for the undersecretary in charge of critical infrastructure protection as U/S-CIP. Also adds two deputy undersecretaries, one for cybersecurity and the other for infrastructure protection. Does not require new appointments for current officeholders and specifies that appointment of the undersecretaries does not require Senate confirmation.</td>
</tr>
</tbody>
</table>

(c) Report
Recommends a report to HSC and HSGAC from the U/S-CIP within 90 days of enactment on the feasibility of becoming an operational component of DHS. If that is determined to be the best option for mission fulfillment, requires submission of a legislative proposal and implementation plan. Also requires that the report include plans for more effective execution of the cybersecurity mission, including expediting of information sharing agreements.

Sec. 206. Cyber Incident Response Plans

(a) In General
Amends Sec. 227 of the HSA to change “Plan” to “Plans” in the title, to specify the U/S-CIP as the responsible official, and to add a new subsection:

‘(b) Updates to the Cyber Incident Annex to the National Response Framework’
Requires the Secretary, in coordination with other agency heads and in accordance with the National Cybersecurity Incident Response Plan, to update, maintain, and exercise regularly the Cyber Incident Annex to the DHS National Response Framework.

(b) Clerical Amendment
Amends the table of contents of the act to reflect the title change made by (a).

Sec. 207. Security and Resiliency of Public Safety Communications; Cybersecurity Awareness Campaign

(a) In General
Adds two new sections to the HSA:
‘Sec. 230. Security and Resiliency of Public Safety Communications’
Requires the NCCIC to coordinate with the DHS Office of Emergency Communications to assess information on cybersecurity incidents involving public safety communications to facilitate continuous improvement in those communications.

‘Sec. 231. Cybersecurity Awareness Campaign’
NCPAA—Title II

‘(a) In General’
Requires the U/S-CIP to develop and implement an awareness campaign on risks and best practices for mitigation and response, including at a minimum public service announcements and information on best practices that are vendor- and technology-neutral.

‘(b) Consultation’
Requires consultation with a wide range of stakeholders.

‘Sec. 232. National Cybersecurity Preparedness Consortium’

‘(a) In General’
Authorizes the Secretary to establish the National Cybersecurity Preparedness Consortium to

‘(b) Functions’
- provide cybersecurity training to state and local first responders and officials,
- establish a training curriculum for them using the DHS Community Cyber Security Maturity Model,
- provide technical assistance for improving capabilities,
- conduct training and simulation exercises,
- coordinate with the NCCIC to help states and communities develop information sharing programs, and
- coordinate with the National Domestic Preparedness Consortium to incorporate cybersecurity into emergency management functions.

‘(c) Members’
Stipulates that members be academic, nonprofit, and government partners with prior experience conducting cybersecurity training and exercises in support of homeland security.

(b) Clerical Amendment
Amends the table of contents of the act to include the new sections.

Sec. 208. Critical Infrastructure Protection Research and Development

(a) Strategic Plan; Public-Private Consortiums
Adds a new section to the HSA:

‘Sec. 318. Research and Development Strategy for Critical Infrastructure Protection’

‘(a) In General’
Requires the Secretary to submit to Congress within 180 days of enactment, and biennially thereafter, a strategic plan to guide federal R&D in technology relating to both cyber- and physical security for CI.

‘(b) Contents of Plan’
Requires the plan to include
- CI risks and technology gaps identified in consultation with
stakeholders and a resulting risk and gap analysis,
- prioritized needs based on that analysis, emphasizing
technologies to address rapidly evolving threats and
technology and including clearly defined roadmaps,
- facilities and capabilities required to meet those needs,
- current and planned programmatic initiatives to foster
technology advancement and deployment, including
collaborative opportunities, and
- progress on meeting plan requirements.

'(c) Coordination'
Requires coordination between the DHS Under Secretaries
for Science and Technology and for the National Protection
and Programs Directorate. [Note: Sec. 205 renames the latter
position as the U/S-CIP.]

'(d) Consultation'
Requires the Under Secretary for Science and Technology to
consult with CI Sector Coordinating Councils, heads of other
relevant federal agencies, and state, local, and tribal
governments as appropriate.

(b) Clerical Amendment
Amends the table of contents of the act to include the new
section.

Sec. 209. Report on Reducing Cybersecurity Risks in
DHS Data Centers
Requires a report to HSC and HSGAC within one year of
enactment on the feasibility of creating an environment within
DHS for reduction in cybersecurity risks in data centers,
including but not limited to increased compartmentalization
of systems with a mix of security controls among
compartments.

Sec. 108. Report on Cybersecurity Threats
(a) Report Required
Requires the DNI, in consultation with heads of other
appropriate elements of the IC, to submit within 180 days of
enactment a report to the House and Senate Intelligence
Committees on cybersecurity threats to the U.S. national
security and economy, including attacks, theft, and data
breaches.

(b) Contents
Requires that the report include
(1) assessments of current U.S. intelligence sharing and
cooperation relationships with other countries on such
threats directed against the United States and threatening
U.S. national security interests, the economy, and intellectual
property, identifying the utility of relationships, participation
by elements of the IC, and possible improvements,
(2) a list and assessment of countries and nonstate actors
constituting the primary sources of such threats,
(3) description of how much U.S. capabilities to respond to
<table>
<thead>
<tr>
<th>NCPAA—Title II</th>
<th>PCNA—Title I</th>
</tr>
</thead>
</table>
| or prevent such threats to the U.S. private sector are degraded by delays in notification of the threats, (4) assessment of additional technologies or capabilities that would enhance the U.S. ability to prevent and respond to such threats, and (5) assessment of private-sector technologies or practices that could be rapidly fielded to assist the IC in preventing and responding to such threats. | (c) Form of Report  
Requires that the report be unclassified, but may include a classified annex.  
(d) Public Availability of Report  
Requires that the unclassified portion of the report be publicly available.  
(e) Intelligence Community Defined  
Defines intelligence community as in 50 U.S.C. 3003. |

**Sec. 210. Assessment**

Requires the Comptroller General, within two years of enactment, to submit a report to HSC and HSGAC assessing implementation of the title and, as practicable, findings on increased sharing at NCCIC and throughout the United States.

**Sec. 211. Consultation**

Requires a report from the U/S-CIP on "the feasibility of a prioritization plan in the event of simultaneous multi-CI incidents."

**Sec. 212. Technical Assistance**

Requires the DHS IG to review US-CERT and ICS-CERT operations to assess their capacity for responding to current and potentially increasing requests for technical assistance from nonfederal entities.

**Sec. 213. Prohibition on New Regulatory Authority**

Stipulates that the title does not grant DHS new authority to promulgate regulations or set standards relating to cybersecurity for nonfederal, nongovernmental entities.

**Sec. 214 Sunset**

Ends all requirements for reports in the title seven years after enactment.

**Sec. 215. Prohibition on New Funding**

Stipulates that the title does not authorize additional funds for implementation and must be carried out using available amounts.

**Sec. 216. Protection of Federal Information Systems**

(a) In General
### NCPAA—Title II

**‘Sec. 233. Available Protection of Federal Information Systems’**

**(a) In General**

Requires the Secretary to make available to agencies capabilities, including technologies for continuous diagnostics and mitigation, for protecting federal information systems and their contents from risks.

**(b) Activities**

Authorizes the Secretary to

- access information on a system regardless of location, and permits agency heads to disclose such information to the Secretary or a private entity assisting the Secretary, notwithstanding any other provision of law that would otherwise restrict such disclosure,
- obtain assistance through agreements or otherwise from private entities for implementing technologies under ‘(a),’
- use, retain, and disclose information obtained under this section only to protect federal systems and their contents or, with approval of the AG, to respond to violations of 18 U.S.C. 1030 [on computer fraud and related activities], threats of death or serious bodily harm, serious threats to minors, including sexual exploitation and threats to physical safety, or attempts or conspiracy to commit such offenses.

**(c) Conditions**

Requires that the agreements bar disclosure of identifying information reasonably believed to be unrelated to a cybersecurity risk except to DHS or the disclosing agency, or use of information accessed under the section by a private entity for any purpose other than protecting federal information systems and their contents or administration of the agreement.

**(d) Limitation**

States that no cause of action shall lie against a private entity for assistance provided in accordance with this section and an agreement under ‘(b).’

**(b) Clerical Amendment**

Amends the table of contents of the act to include the new section.

**Sec. 217 Sunset**

Terminates the provisions in the title seven years after enactment.

**Sec. 218. Report on Cybersecurity Vulnerabilities of United States Ports**

Requires a report with recommendations from the Secretary.

### PCNA—Title I

[Note: Sec. 104(d)(5) has related provisions for information shared with the federal government (see p. 19).]
to HSC, HSGAC, House Committee on Transportation and Infrastructure, and Senate Committee on Commerce, Science, and Transportation within 180 days of enactment on cybersecurity vulnerabilities for the ten ports that the Secretary determines are at greatest risk of an incident.

Sec. 219. Report on Cybersecurity and Critical Infrastructure

Authorizes the Secretary to consult with sector-specific entities on a report to HSC and HSGAC on federally funded cybersecurity R&D with private-sector efforts to protect privacy and civil liberties while protecting CI, including promoting R&D for secure and resilient design and construction, enhanced modeling of impacts from incidents or threats, and facilitating incentivization of investments to strengthen cybersecurity and resilience of CI.

Sec. 220. GAO Report on Impact Privacy and Civil Liberties

Requires a report from the Comptroller General to HSC and HSGAC within five years of enactment assessing the impacts of NCCIC activities on privacy and civil liberties.

Sec. 111. Comptroller General Report on Removal of Personal Identifying Information

(a) Report

Requires a report from the Comptroller General to Congress within three years of enactment on federal actions to remove personal information from threat indicators pursuant to Sec. 104(b).

(b) Form

Requires that the report be unclassified but permits a classified annex.
