- Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 7: Appendix GCR Volume 2, 96:1239 (R;US)

Sandia Labs., Livermore, CA (United States)

- Coupled multiphase flow and closure analysis of repository response to waste-generated gas at the Waste Isolation Pilot Plant (WIPP), 96:1531 (R;US)

Sandia National Labs., Albuquerque, NM (United States)

- 1994 Fernald field characterization demonstration program data report, 96:2571 (R;US)
- A constitutive model for representing coupled creep, fracture, and healing in rock salt, 96:1570 (R;US)
- A general method for the efficient selection of sampling locations for problems in environmental restoration, 96:1030 (R;US)
- A proposed alternative approach for protection of inadvertent human intruders from buried Department of Energy low level radioactive wastes, 96:1022 (R;US)
- A sensitivity analysis of the WIPP disposal room model: Phase 1, 96:1533 (R;US)
- A shaft seal system for the Waste Isolation Pilot Plant, 96:1577 (R;US)
- A status report on the development and certification of the Beneficial Uses Shipping System (BUSS) cask, 96:271 (R;US)
- A successful effort to involve stakeholders in the selection of a site for a corrective action management unit, 96:263 (R;US)
- A successful effort to involve stakeholders in a facility siting decision using LIPS with stakeholder involvement, 96:270 (R;US)
- A summary of methods for approximating salt creep and disposal room closure in numerical models of multiphase flow, 96:1532 (R;US)
- A survey of environmental needs and innovative technologies in Germany, 96:249 (R;US)
- Actinide chemistry research supporting the Waste Isolation Pilot Plant (WIPP): FY94 results, 96:1538 (R;US)
- Adaption of the Magnetometer Towed Array geophysical system to meet Department of Energy needs for hazardous waste site characterization, 96:2569 (R;US)
- Air intake shaft performance tests (Shaft 5): In situ data report (May 1988-July 1995). Waste Isolation Pilot Plant (WIPP) Thermal/Structural Interactions Program, 96:247 (R;US)
- An assessment of simplified methods to determine damage from ship-to-ship collisions, 96:272 (R;US)

- An introduction to the mechanics of performance assessment using examples of calculations done for the Waste Isolation Pilot Plant between 1990 and 1992, 96:1530 (R;US)
- Analysis of a ship-to-ship collision, 96:273 (R;US)
- Analysis of instantaneous profile test data from soils near the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories/New Mexico, 96:1020 (R;US)
- Analytical determination of package response to severe impact, 96:258 (R;US)
- Application of a NAPL partitioning interwell tracer test (PITT) to support DNAPL remediation at the Sandia National Laboratories/New Mexico chemical waste landfill, 96:1034 (R;US)
- Application of Latin hypercube sampling to RADTRAN 4 truck accident risk sensitivity analysis, 96:1537 (R;US)
- Application of non-intrusive geophysical techniques at the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories, New Mexico, 96:1018 (R;US)
- Application of spreadsheets to standardize transportation radiological risk assessments, 96:267 (R;US)
- Assessment of dry barriers for containment of mobile constituents in the unsaturated zone, 96:580 (R;US)
- Brine release based on structural calculations of damage around an excavation at the Waste Isolation Pilot Plant (WIPP), 96:1549 (R;US)
- Case studies of sealing methods and materials used in the salt and potash mining industries, 96:1545 (R;US)
- Characterization of indoor and outdoor pool fires with active calorimetry, 96:1010 (R;US)
- Characterization, monitoring, and sensor technology catalogue, 96:2572 (R;US)
- Chemical compatibility screening results of plastic packaging to mixed waste simulants, 96:253 (R;US)
- Classification of poison inhalation hazard materials into severity groups, 96:275 (R;US)
- Comparison of passive soil vapor survey techniques at a Tijeras Arroyo site, Sandia National Laboratories, Albuquerque, New Mexico, 96:1037 (R;US)
- Compatibility of packaging components with simulant mixed waste, 96:1033 (R;US)
- Complexation of Am(III) by oxalate in NaClO₄ media, 96:1554 (R;US)
- Complexation study of NpO₂⁺ and UO₂²⁺ ions with several organic ligands in aqueous solutions of high ionic strength, 96:1552 (R;US)
- Computational implementation of a systems prioritization methodology for the Waste Isolation Pilot Plant: A preliminary example, 96:1541 (R;US)
- Computational implementation of the multi-mechanism deformation coupled fracture model for salt, 96:1565 (R;US)
- Consideration of critically when directly disposing highly enriched spent nuclear fuel in unsaturated tuff: Bounding estimates, 96:1575 (R;US)
- Corrosion resistance of candidate transportation container materials, 96:1014 (R;US)
- Crush performance of redwood for developing design procedures for impact limiters, 96:257 (R;US)
- Data qualification for the Waste Isolation Pilot Plant, 96:1564 (R;US)
- Data report on the Waste Isolation Pilot Plant Small-Scale Seal Performance Test, Series F grouting experiment, 96:1529 (R;US)
- Determination of buildup factors in titanium and depleted uranium, 96:268 (R;US)
- Determination of kinetic coefficients for the simultaneous reduction of sulfate and uranium by *Desulfovibrio desulfuricans* bacteria, 96:2190 (R;US)
- Development and design of a high pressure carbon dioxide system for the separation of hazardous contaminants from non-hazardous debris, 96:2657 (R;US)
- Development of components for waste management systems using aerospace technology, 96:815 (R;US)
- Development on inelastic analysis acceptance criteria for radioactive material transportation packages, 96:260 (R;US)

- Disposal of mixed waste: Technical, institutional, and policy factors, 96:1029 (R;US)
- DOE's Innovative Treatment Remediation Demonstration Program accelerating the implementation of innovative technologies, 96:1015 (R;US)
- Dynamic pulse buckling of cylindrical shells under axial impact: A comparison of 2D and 3D finite element calculations with experimental data, 96:245 (R;US)
- Effect of explicit representation of detailed stratigraphy on brine and gas flow at the Waste Isolation Pilot Plant, 96:1542 (R;US)
- Effects of Hanford tank simulant waste on plastic packaging to components, 96:1543 (R;US)
- Effects of simulant Hanford tank waste on plastic packaging components, 96:1567 (R;US)
- Estimates of fire environments in ship holds containing radioactive material packages, 96:251 (R;US)
- Estimating the hydrogen ion concentration in concentrated NaCl and Na₂SO₄ electrolytes, 96:250 (R;US)
- Evaluation of constitutive models for crushed salt, 96:1572 (R;US)
- Evaluation of measurement reproducibility using the standard-sites data, 1994 Fernald field characterization demonstration project, 96:2573 (R;US)
- Evaluation of polyacrylonitrile (PAN) as a binding polymer for absorbers used to treat liquid radioactive wastes, 96:2659 (R;US)
- Expected residence time model, 96:278 (R;US)
- Field and laboratory testing of seal materials proposed for the Waste Isolation Pilot Plant, 96:1561 (R;US)
- Formulation and computational aspects of plasticity and damage models with application to quasi-brittle materials, 96:1544 (R;US)
- Framework for DOE mixed low-level waste disposal: Site fact sheets, 96:1011 (R;US)
- Geospatial analyses and system architectures for the next generation of radioactive materials risk assessment and routing, 96:276 (R;US)
- Geostatistics and cost-effective environmental remediation, 96:2191 (R;US)
- Ground water flow velocity in the bank of the Columbia River, Hanford, Washington, 96:581 (R;US)
- Hanford coring bit temperature monitor development testing results report, 96:1547 (R;US)
- Hydraulic testing around Room Q: Evaluation of the effects of mining on the hydraulic properties of Salado Evaporites, 96:1571 (R;US)
- Identification of remediation needs and technology development focus areas for the Environmental Restoration (ER) Project at Sandia National Laboratories/New Mexico (SNL/NM), 96:2568 (R;US)
- Identifying industrial best practices for the waste minimization of low-level radioactive materials, 96:1035 (R;US)
- Impact limiter design for a lightweight tritium hydride vessel transport container, 96:252 (R;US)
- Impact limiter tests of four commonly used materials and establishment of an impact limiter data base, 96:261 (R;US)
- Integration of finite element analysis and numerical optimization techniques for RAM transport package design, 96:255 (R;US)
- International technology catalogue: Foreign technologies to support the environmental restoration and waste management needs of the DOE complex, 96:262 (R;US)
- Investigation of RADTRAN Stop Model input parameters for truck stops, 96:277 (R;US)
- Ion exchange performance of commercial crystalline silicotitanates for cesium removal, 96:2660 (R;US)
- ITEP: A survey of innovative environmental restoration technologies in the Netherlands and France, 96:248 (R;US)
- Large-scale dynamic compaction demonstration using WIPP salt: Fielding and preliminary results, 96:1550 (R;US)
- Large-scale dynamic compaction of natural salt, 96:1573 (R;US)
- Mixed waste chemical compatibility: A testing program for plastic packaging components, 96:1013 (R;US)
- Modeling of capillary barriers and comparison to data, 96:1016 (R;US)
- Motion planning for multiple moving objects, 96:2269 (R;US)
- MPATHav: A software prototype for multiobjective routing in transportation risk assessment, 96:266 (R;US)
- Multitribute utility analysis as a framework for public participation siting a hazardous waste facility, 96:279 (R;US)
- Off site demonstrations for MWLID technologies, 96:1009 (R;US)
- On-site vs off-site management of environmental restoration waste: A cost effectiveness analysis, 96:1026 (R;US)
- Passive and active soil gas sampling at the Mixed Waste Landfill, Technical Area III, Sandia National Laboratories/New Mexico, 96:1017 (R;US)
- Performance assessment of the direct disposal in unsaturated tuff or spent nuclear fuel and high-level waste owned by USDOE: Volume 2, Methodology and results, 96:1539 (R;US)
- Performance benefits of telerobotics and teleoperation - enhancements for an arm-based tank waste retrieval system, 96:2268 (R;US)
- Performance evaluation of the technical capabilities of DOE sites for disposal of mixed low-level waste. Volume 1: Executive summary, 96:741 (R;US)
- Performance evaluation of the technical capabilities of DOE sites for disposal of mixed low-level waste. Volume 2: Technical basis and discussion of results, 96:742 (R;US)
- Performance evaluation of the technical capabilities of DOE sites for disposal of mixed low-level waste: Volume 3, Site evaluations, 96:743 (R;US)
- Petrographic and X-ray diffraction analyses of selected samples from Marker Bed 139 at the Waste Isolation Pilot Plant, 96:1548 (R;US)
- Phase 2 report on the evaluation of polyacrylonitrile (PAN) as a binding polymer for absorbers used to treat liquid radioactive wastes, 96:1036 (R;US)
- Preliminary analysis of NAPL behavior in soil-heated vapor extraction for in-situ environmental restoration, 96:2570 (R;US)
- Preliminary data from an instantaneous profile test conducted near the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories/New Mexico, 96:1032 (R;US)
- Probabilistic risk assessment for the Sandia National Laboratories Technical Area V Liquid Waste Disposal System surface impoundments, 96:1031 (R;US)
- Probability, conditional probability and complementary cumulative distribution functions in performance assessment for radioactive waste disposal, 96:1563 (R;US)
- Properties of dynamically compacted WIPP salt, 96:1574 (R;US)
- Rapid world modelling for robotics, 96:2274 (R;US)
- Recommendations for computer modeling codes to support the UMTRA groundwater restoration project, 96:585 (R;US)
- Report on the treatability study for inerting small quantities of radioactive explosives and explosive components, 96:1025 (R;US)
- Sandia WIPP calibration traceability, 96:1576 (R;US)
- Scoping analysis of toxic metal performance in DOE low-level waste disposal facilities, 96:1028 (R;US)
- Scoping evaluation of the technical capabilities of DOE sites for disposal of mixed low-level waste. Examples: Sandia National Laboratories and Los Alamos National Laboratory, 96:1023 (R;US)
- SEAMIST™ in-situ instrumentation and vapor sampling system applications in the Sandia Mixed Waste Landfill Integrated Demonstration program: Final report, 96:1021 (R;US)
- SNL-1, a highly selective inorganic crystalline ion exchange material for Sr²⁺ in acidic solutions, 96:2658 (R;US)
- South Fence Road - Phase 1 field operations summary, 96:579 (R;US)
- Spent-fuel verification measurements using passive and active radiation techniques, 96:1579 (R;US)
- Steam reforming as a method to treat Hanford underground storage tank (UST) wastes, 96:1540 (R;US)
- Structural analysis in support of the waterborne transport of radioactive materials, 96:1578 (R;US)
- Study of evacuation times based on general accident history, 96:264 (R;US)
- Successful remediation of four uranium calibration pits at Technical Area II, Sandia National Laboratories, Albuquerque, New Mexico, USA, 96:1012 (R;US)

- Summary of field operations Magazine Road North Wells MRN-1 and MRN-2, 96:584 (R;US)
- Summary of field operations Powerline Wells PL-1, PL-2, PL-3, 96:583 (R;US)
- Summary of field operations, well TRN-1, 96:582 (R;US)

 Operability test procedure for the Rotary Mode Core Sampling System Exhausters 3 and 4, 96:1830 (R;US)
 Operability test report for the TK-900 beta/gamma liquid effluent monitoring system, 96:2604 (R;US)
 Operability test report for the TK-900 effluent monitoring station, 96:605 (R;US)
 Operational Environmental Monitoring Program Quality Assurance Project Plan, 96:2587 (R;US)
 Operational test procedure for SY tank farm replacement exhauster unit, 96:1835 (R;US)
 Operational waste volume projection, 96:1708 (R;US)
 Operator coil monitoring Acceptance Test Procedure, 96:1664 (R;US)
 Operator coil monitoring acceptance test procedure, 96:1665 (R;US)
 Organic reactivity analysis in Hanford single-shell tanks: Experimental and modeling basis for an expanded safety criterion, 96:1620 (R;US)
 Overview of the performance objectives and scenarios of TWRS Low-Level Waste Disposal Program. Revision 1, 96:1045 (R;US)
 Ozone destruction of Hanford Site tank waste organics, 96:1906 (R;US)
 Packaging design criteria for the Type B Drum, 96:338 (R;US)
 Passive versus active mitigation cost analysis, 96:1648 (R;US)
 Performance assessment for the disposal of low-level waste in the 200 West Area Burial Grounds, 96:1043 (R;US)
 Performance objectives of the tank waste remediation system low-level waste disposal program, 96:1044 (R;US)
 Permitting plan for the high level waste vitrification plant, 96:1823 (R;US)
 PFP supply fan motor starters, 96:2201 (R;US)
 PFP Wastewater Sampling Facility, 96:2205 (R;US)
 Physical property characterization of 183-H Basin sludge, 96:1105 (R;US)
 Plan for characterization of K Basin spent nuclear fuel and sludge, 96:2602 (R;US)
 Plutonium finishing plant hazards assessment, 96:1977 (R;US)
 Plutonium storage phenomenology, 96:1973 (R;US)
 Pollution Prevention Successes Database (P2SDb) user guide, 96:138 (R;US)
 Pore solution chemistry of simulated low-level liquid waste incorporated in cement grouts, 96:1063 (R;US)
 Position paper: Seismic design criteria, 96:1654 (R;US)
 Practical Modeling of aluminum species in high-pH waste, 96:1053 (R;US)
 Pre-1970 transuranic solid waste at the Hanford Site, 96:1813 (R;US)
 Preliminary design requirements document for Project W-378, low-level waste vitrification plant, 96:1087 (R;US)
 Preliminary engineering evaluation of heat and digest treatment for in-tank removal of radionuclides from complexed waste, 96:1884 (R;US)
 Process control computer software requirements and specifications for the 241-AY and 241-AZ tank farm MICON automation system, 96:1677 (R;US)
 Process control plan for 242-A Evaporator Campaign 95-1, 96:1100 (R;US)
 Production reactor disposal on the Hanford site, 96:2195 (R;US)
 Progress on the Hanford K basins spent nuclear fuel project, 96:1629 (R;US)
 Project B610 process control configuration acceptance test report, 96:2597 (R;US)
 Project C-018H, 242-A evaporator/PUREX Plant Process Condensate Treatment Facility Instrumentation and Control (I&C), 96:2198 (R;US)
 Project C-018H, 242-A Evaporator/PUREX Plant Process Condensate Treatment Facility, functional design criteria. Revision 3, 96:2200 (R;US)
 Project planning at the Hanford Site for International Atomic Energy Agency (IAEA) safeguards of excess fissile material, 96:288 (R;US)
 Project W-236A multi-function waste tank facility waste feed projections, 96:1655 (R;US)
 Project W-320 ALARA Plan, 96:1658 (R;US)
 Pump strongback re-design, pump storage, PM procedures, 96:1820 (R;US)
 PUREX Plant deactivation mission analysis report, 96:2202 (R;US)
 PUREX Plant waste analysis plan. Revision 2, 96:1661 (R;US)

- Quality assurance program plan for radionuclide airborne emissions monitoring, 96:2585 (R;US)
- Quality assurance program plan for radionuclide airborne emissions monitoring, 96:2586 (R;US)
- Quality Assurance Program Plan for the Waste Sampling and Characterization Facility, 96:307 (R;US)
- Quality Assurance Program Plan for FFTF effluent controls. Revision 1, 96:1074 (R;US)
- Quality Assurance Program Plan for Project W-379: Spent Nuclear Fuels Canister Storage Building Project, 96:1659 (R;US)
- Quarterly environmental radiological survey summary: First quarter 1995 100, 200, 300, and 600 Areas, 96:2615 (R;US)
- Quarterly environmental radiological survey summary: Second Quarter 1995 100, 200, 300, and 600 Areas, 96:328 (R;US)
- Quarterly environmental radiological survey summary: Third quarter 1995 100, 200, 300, and 600 Areas, 96:2616 (R;US)
- Quarterly environmental radiological survey summary: Fourth quarter, 1995 100, 200, 300, and 600 Areas, 96:2617 (R;US)
- Quarterly report of RCRA groundwater monitoring data for period October 1 through December 31, 1994, 96:497 (R;US)
- Quarterly report of RCRA groundwater monitoring data for period July 1–September 30, 1995, 96:505 (R;US)
- Quarterly report on the Ferrocyanide Safety Program for the period ending, March 31, 1995, 96:1583 (R;US)
- Quarterly report on the Ferrocyanide Safety Program for the period ending June 30, 1995, 96:1584 (R;US)
- Quarterly report on the Ferrocyanide Safety Program for the period ending September 30, 1995, 96:1585 (R;US)
- Quarterly report on the Ferrocyanide Safety Program for the period ending December 31, 1995, 96:1586 (R;US)
- R-1 (C-620-A) and R-2 (C-620-B) air compressor control logic, computer software description. Revision 1, 96:311 (R;US)
- R-189 (C-620) air compressor control logic software documentation. Revision 1, 96:312 (R;US)
- Radcalc for Windows. Volume 2: Technical manual, 96:320 (R;US)
- Radcalc: A computer program to calculate the radiolytic production of hydrogen gas from radioactive wastes in packages, 96:1614 (R;US)
- Radiation exposure modeling and project schedule visualization, 96:2277 (R;US)
- Radioisotope Thermoelectric Generator Transportation System licensed hardware second certification test series and package shock mount system test, 96:298 (R;US)
- Radionuclide air emissions report for the Hanford site, Calendar year 1994, 96:135 (R;US)
- RCRA groundwater monitoring data. Quarterly report, April 1, 1995–June 30, 1995, 96:504 (R;US)
- Recommended alternative for interim stabilization of Tank 241-C-103, 96:1597 (R;US)
- Remediation and cleanout levels for Hanford site single-shell tanks, 96:1882 (R;US)
- Remote controlled tool systems for nuclear sites have subsea applications, 96:2276 (R;US)
- Removal of mixing pump in tank 102-AP – pump drop onto central pit, 96:1754 (R;US)
- Replacement of the cross-site transfer system liquid waste transport alternatives evaluation, Project W-058, 96:1639 (R;US)
- Report of scouting study on precipitation of strontium, plutonium, and americium from Hanford complexant concentrate waste, 96:1707 (R;US)
- Resolution of USQ regarding source term in the 232-Z Waste Incinerator Building, 96:2196 (R;US)
- Rocky Flats Ash test procedure (sludge stabilization), 96:1070 (R;US)
- Rocky Flats ash test procedure (sludge stabilization), 96:1071 (R;US)
- Routine environmental monitoring schedule, calendar year 1995, 96:325 (R;US)
- Safety analysis for push-mode and rotary-mode core sampling. Rev. 1, 96:1865 (R;US)
- Safety evaluation for packaging CPC metal boxes, 96:322 (R;US)
- Safety Evaluation for Packaging for onsite Transfer of plutonium recycle test reactor ion exchange columns, 96:1079 (R;US)
- Scenarios of the TWRS low-level waste disposal program, 96:1046 (R;US)
- Scenarios of the TWRS low-level waste disposal program. Revision 1, 96:1047 (R;US)
- Seismic analyses of equipment in 2736-Z complex. Revision 1, 96:1975 (R;US)
- Selection of replacement material for the failed surface level gauge wire in Hanford waste tanks, 96:1623 (R;US)
- Site management system executive summary report – March 1995, 96:330 (R;US)
- Site Support Program Plan Infrastructure Program, 96:339 (R;US)
- Small Water System Management Program: 100 K Area, 96:318 (R;US)
- Software Configuration Management Plan for sample trucks no. 2, 3, and 4 alarm & control logic, 96:1675 (R;US)
- Software Development Plan for the 241-AY and 241-AZ Tank Farm MICON automation system, 96:1868 (R;US)
- Soil structure interaction analysis of buried tank subjected to vertical excitations, 96:1618 (R;US)
- Solid Waste Assurance Program Implementation Plan, 96:1101 (R;US)
- Solid waste handling, 96:1880 (R;US)
- Solid waste operations complex W-113: Preliminary design report. Volume I, 96:838 (R;US)
- Solid waste operations complex W-113: Specifications. Preliminary design report. Volume III, 96:839 (R;US)
- Solid Waste Operations Complex W-113: Project cost estimate. Preliminary design report. Volume IV, 96:840 (R;US)
- Solid waste operations complex W-113: Engineering assessments and lists. Preliminary design report. Volume V, 96:841 (R;US)
- Solid Waste Operations Complex W-113, Detail Design Report (Title II). Volume 1: Title II design report, 96:1084 (R;US)
- Solid Waste Operations Complex W-113, Detail Design Report (Title II). Volume 3: Specifications, 96:1085 (R;US)
- Solid Waste Program Fiscal Year 1996 Multi-Year Program Plan WBS 1.2.1, Revision 1, 96:1110 (R;US)
- Spent Nuclear Fuel Project Configuration Management Plan, 96:2216 (R;US)
- Spent Nuclear Fuel Project FY 1996 Multi-Year Program Plan WBS No. 1.4.1, Revision 1, 96:1909 (R;US)
- Spent Nuclear Fuel Project technical baseline document fiscal year 1995. Volume 2: Supporting data, 96:2218 (R;US)
- Standard-B auto grab sampler hydrogen monitoring system, Acceptance Test Report, 96:1668 (R;US)
- Standard-C hydrogen monitoring system. Acceptance test report, 96:1669 (R;US)
- Statement of work for analytical services provided to Westinghouse Hanford Company by the Pacific Northwest Laboratory Analytical Chemistry Laboratory, 96:283 (R;US)
- Statement of work for services provided by the Waste Sampling and Characterization Facility for Effluent Monitoring during Calendar Year 1996, 96:2589 (R;US)
- Statements of work for FY 1995 to 2000, 96:1098 (R;US)
- Statements of work for FY 1996 to 2001 for the Hanford Low-Level Tank Waste Performance Assessment Project, 96:1099 (R;US)
- Status report for inactive miscellaneous underground storage tanks at Hanford Site 200 Areas, 96:1596 (R;US)
- Status report on resolution of Waste Tank Safety Issues at the Hanford Site. Revision 1, 96:1588 (R;US)
- Strategy for resolution of the Flammable Gas Safety Issue, 96:1877 (R;US)
- Stress evaluation of the primary tank of a double-shell underground storage tank facility, 96:1608 (R;US)
- Structural analysis of 241C106 contingency chiller design, 96:1681 (R;US)
- Structural analysis of the Heel Jet secondary catch mechanism, 96:1086 (R;US)
- Structural evaluation of mixer pump installed in Tank 241-AN-107 for caustic addition project, 96:1679 (R;US)
- Studies of the chemistry of transuranium elements and technetium at the Institute of Physical Chemistry, Russian Academy of Sciences, supported by the US Department of Energy, 96:290 (R;US)

Summary of FY 1994 Raman spectroscopy technology cold test activities, 96:2611 (R;US)

Summary of FY-95 NIR moisture measurement development and implementation activities, 96:1864 (R;US)

Summary of radioactive solid waste received in the 200 Areas during calendar year 1994, 96:2580 (R;US)

Supporting document for the Southeast Quadrant historical tank content estimate report for AN-Tank Farm. Vols. I and II, 96:1709 (R;US)

Supporting document for the Southeast quadrant historical tank content estimate report for AP-tank farm. Volume 1 and 2, 96:1710 (R;US)

Supporting Document for the Southeast Quadrant Historical Tank Content Estimate Report for AW-Tank Farm - Volume I and II, 96:1711 (R;US)

Supporting document for the southeast quadrant historical tank content estimate report for AY-tank farm, 96:1712 (R;US)

Supporting document for the southeast quadrant historical tank content estimate report for AZ-tank farm (Volume 1 and 2), 96:1713 (R;US)

Supporting document for the Southeast Quadrant historical tank content estimate report for SY-tank farm, 96:1714 (R;US)

Surveillance and prediction methods for the plutonium limit in the K-East Fuel Storage Basin Sandfilter Backwash Pit, 96:1978 (R;US)

System design specification for rotary mode core sample trucks No. 2, 3, and 4 programmable logic controller, 96:1869 (R;US)

T Plant canyon deck-level allowable floor-load study, 96:2230 (R;US)

Tank 241-A-101 headspace gas and vapor characterization results for samples collected in June 1995, 96:1801 (R;US)

Tank 241-A-102 auger sampling and analysis plan, 96:1897 (R;US)

Tank 241-A-102 tank characterization plan, 96:1893 (R;US)

Tank 241-AX-102 headspace gas and vapor characterization results for samples collected in June 1995, 96:1802 (R;US)

Tank 241-B-101 tank characterization plan, 96:1889 (R;US)

Tank 241-B-103 headspace gas and vapor characterization results for samples collected in February 1995, 96:1756 (R;US)

Tank 241-B-103 vapor sampling and analysis tank characterization report, 96:1755 (R;US)

Tank 241-B-106 push mode core sampling and analysis plan, 96:1895 (R;US)

Tank 241-B-106 Tank Characterization Plan, 96:1890 (R;US)

Tank 241-B-203 Push Mode Core Sampling and Analysis Plan, 96:1896 (R;US)

Tank 241-B-203 tank characterization plan, 96:1891 (R;US)

Tank 241-BX-103 tank characterization plan, 96:1887 (R;US)

Tank 241-BX-104 headspace gas and vapor characterization results for samples collected in December 1994, 96:1758 (R;US)

Tank 241-BX-104 vapor sampling and analysis tank characterization report, 96:1757 (R;US)

Tank 241-BY-103 headspace gas and vapor characterization results for samples collected in May 1994 and November 1994, 96:1747 (R;US)

Tank 241-BY-103 vapor sampling and analysis tank characterization report, 96:1746 (R;US)

Tank 241-BY-104 headspace gas and vapor characterization results for samples collected in April 1994 and June 1994, 96:1721 (R;US)

Tank 241-BY-104 rotary core sampling and analysis plan, 96:1900 (R;US)

Tank 241-BY-104 vapor sampling and analysis tank characterization report, 96:1719 (R;US)

Tank 241-BY-104 vapor sampling and analysis tank characterization report. Revision 1, 96:1720 (R;US)

Tank 241-BY-105 Headspace Gas and Vapor Characterization Results for Samples Collected in May 1994 and July 1994. Revision 2, 96:1724 (R;US)

Tank 241-BY-105 vapor sampling and analysis tank characterization report, 96:1722 (R;US)

Tank 241-BY-105 vapor sampling and analysis tank characterization report. Revision 1, 96:1723 (R;US)

Tank 241-BY-106 headspace gas and vapor characterization results for samples collected in May 1994 and July 1994, 96:1727 (R;US)

Tank 241-BY-106 vapor sampling and analysis tank characterization report, 96:1725 (R;US)

Tank 241-BY-106 vapor sampling and analysis tank characterization report. Revision 1, 96:1726 (R;US)

Tank 241-BY-107 headspace gas and vapor characterization results for samples collected in March 1994 and October 1994, 96:1730 (R;US)

Tank 241-BY-107 vapor sampling and analysis tank characterization report, 96:1728 (R;US)

Tank 241-BY-107 vapor sampling and analysis tank characterization report. Revision 1, 96:1729 (R;US)

Tank 241-BY-108 headspace gas and vapor characterization results for samples collected in March 1994 and October 1994, 96:1980 (R;US)

Tank 241-BY-108 vapor sampling and analysis tank characterization report, 96:1731 (R;US)

Tank 241-BY-108 vapor sampling and analysis tank characterization report. Revision 1, 96:1732 (R;US)

Tank 241-BY-110 Headspace Gas and Vapor Characterization Results for Samples Collected in November 1994. Revision 2, 96:1750 (R;US)

Tank 241-BY-110 vapor sampling and analysis tank characterization report, 96:1748 (R;US)

Tank 241-BY-110 vapor sampling and analysis tank characterization report. Revision 1, 96:1749 (R;US)

Tank 241-BY-111 headspace gas and vapor characterization results for samples collected in May 1994 and November 1994, 96:1760 (R;US)

Tank 241-BY-111 vapor sampling and analysis tank characterization report, 96:1759 (R;US)

Tank 241-BY-112 headspace gas and vapor characterization results for samples collected in November 1994, 96:1762 (R;US)

Tank 241-BY-112 vapor sampling and analysis tank characterization report, 96:1761 (R;US)

Tank 241-C-101 headspace gas and vapor characterization results for samples collected in September 1994, 96:1786 (R;US)

Tank 241-C-101 vapor sampling and analysis tank characterization report, 96:1785 (R;US)

Tank 241-C-102 headspace gas and vapor characterization results for samples collected in August 1994, 96:1788 (R;US)

Tank 241-C-104 headspace gas and vapor characterization results for samples collected in March 1994, 96:1764 (R;US)

Tank 241-C-104 vapor sampling and analysis tank characterization report, 96:1763 (R;US)

Tank 241-C-105 headspace gas and vapor characterization results for samples collected in February 1994. Revision 1, 96:1766 (R;US)

Tank 241-C-105 vapor sampling and analysis tank characterization report, 96:1765 (R;US)

Tank 241-C-106 headspace gas and vapor characterization results for samples collected in February 1994, 96:1768 (R;US)

Tank 241-C-106 process test report, 96:1745 (R;US)

Tank 241-C-106 thermal hydraulic analysis to establish the cooling liquid at a minimum level, 96:1799 (R;US)

Tank 241-C-106 vapor sampling and analysis tank characterization report, 96:1767 (R;US)

Tank 241-C-107 headspace gas and vapor characterization results for samples collected in September 1994, 96:1770 (R;US)

Tank 241-C-107 vapor sampling and analysis tank characterization report, 96:1769 (R;US)

Tank 241-C-108 headspace gas and vapor characterization results for samples collected in July 1993 and August 1994, 96:1735 (R;US)

Tank 241-C-108 vapor sampling and analysis tank characterization report, 96:1733 (R;US)

Tank 241-C-108 vapor sampling and analysis tank characterization report. Revision 1, 96:1734 (R;US)

Tank 241-C-109 headspace gas and vapor characterization results for samples collected in August 1994. Revision 2, 96:1738 (R;US)

- Tank 241-C-109 vapor sampling and analysis tank characterization report, 96:1736 (R;US)
- Tank 241-C-109 vapor sampling and analysis tank characterization report. Revision 1, 96:1737 (R;US)

Personal Author Index

Authors' surnames are indexed in the form appearing in the publication cited; given names generally have been reduced to initials. For documents with multiple authors, each author name is indexed. The entry for a primary author (first author listed on an abstracted document) includes the full document title and citation number. Entries for other authors provide a cross-reference to the primary author. Also included is information on the document type, country of publication, and the document language listed in parentheses in the format (J;FR;In French and English). Accent marks are not input because of computer alphabetization. Spelling and transliteration follow standard conventions.

Subject Index

This index is arranged by subject descriptors selected from those assigned to each citation in this publication. Subject descriptors are selected from a controlled thesaurus of terms, ETDE/PUB-2(Rev.1), *International Energy: Subject Thesaurus*. In order to enhance indexing, subject descriptor entries generally consist of a pair of descriptors: a main term and a qualifier term. Each entry includes the full title (which may be followed by supplementary descriptive information in parentheses) and the citation number. Additional information given in parentheses indicates the document type (an abbreviation such as B for book), the country of publication (such as DE for Federal Republic of Germany), and the language if non-English.

See references guide users from synonymous terms to the descriptors selected for the concept. See also references indicate subject concepts that are more specific than a particular descriptor. To gain complete subject coverage, all such terms should be reviewed.

A

ABANDONED SITES

Decontamination

Results of the independent radiological verification survey at the former C.H. Schnoor and Company Site, 644 Garfield Street, Springdale, Pennsylvania (CPV001), 96:2177 (R;US)

Ground Water

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Maybell, Colorado, 96:452 (R;US)

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Naturita, Colorado, 96:447 (R;US)

Ground water protection strategy for the Uranium Mill Tailings Site at Green River, Utah. Final, Revision 2, Version 5: Appendix E to the remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Green River, Utah, 96:462 (R;US)

Remedial Action Plan and Site Design for stabilization of the inactive Uranium Mill Tailings sites at Slick Rock, Colorado: Appendix A to Attachment 3, Tables. Final, 96:409 (R;US)

UMTRA project water sampling and analysis plan, Naturita, Colorado. Revision 1, 96:423 (R;US)

Lithology

Remedial Action Plan and Site Design for Stabilization of the Inactive Uranium Mill Tailings Sites at Slick Rock, Colorado: Appendix B to Attachment 3, Lithologic logs and monitor well construction information. Final report, 96:2033 (R;US)

Monitoring

Road Transportable Analytical (RTAL) laboratory system. Quarterly report, February 1995–April 1995, 96:2363 (R;US)

Remedial Action

Final audit report of remedial action construction at the UMTRA Project Falls City, Texas, site, 96:2052 (R;US)

Preliminary remediation goals for ecological endpoints, 96:2439 (R;US)

Remedial Action Plan and Site design for stabilization of the inactive Uranium Mill Tailings sites at Slick Rock, Colorado: Revision 1. Remedial action selection report, Attachment 2, geology report, Attachment 3, ground water hydrology report, Attachment 4, water resources protection strategy. Final, 96:2031 (R;US)

Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado. Appendix D, Final report, 96:2079 (R;US)

Supplement to the UMTRA project water sampling and analysis plan, Slick Rock, Colorado, 96:431 (R;US)

UMTRA project water sampling and analysis plan, Falls City, Texas. Revision 1, 96:418 (R;US)

UMTRA project water sampling and analysis plan, Naturita, Colorado. Revision 1, 96:423 (R;US)

Uranium Mill Tailings Remedial Action Project (UMTRAP), Slick Rock, Colorado, Revision 1. Volume 1, Calculations, Final design for construction, 96:2035 (R;US)

Uranium Mill Tailings Remedial Action Project (UMTRAP), Slick Rock, Colorado, Revision 1. Bid schedule, special conditions, specifications, and subcontract drawings, 96:2032 (R;US)

Uranium Mill Tailings Remedial Action Project (UMTRAP), Slick Rock, Colorado, Revision 1, Volume 3. Calculations, Final design for construction, 96:2037 (R;US)

Uranium Mill Tailings Remedial Action Project (UMTRAP), Slick Rock, Colorado, Revision 1, Volume 4. Calculations, Final design for construction, 96:2038 (R;US)

Uranium Mill Tailings Remedial Action Project (UMTRAP), Slick Rock, Colorado, Revision 1. Volume 2, Calculations, Final design for construction, 96:2036 (R;US)

Work plan for monitor well installation water and sediment sample collection aquifer testing and topographic surveying at the Riverton, Wyoming, UMTRA Project Site, 96:449 (R;US)

Site Characterization

Remedial Action Plan and Site Design for stabilization of the inactive Uranium Mill Tailings sites at Slick Rock, Colorado: Appendix C to Attachment 3, Calculations. Final, 96:2034 (R;US)

Remedial Action Plan and Site design for stabilization of the inactive Uranium Mill Tailings sites at Slick Rock, Colorado: Revision 1. Remedial action selection report, Attachment 2, geology report, Attachment 3, ground water hydrology report, Attachment 4, water resources protection strategy. Final, 96:2031 (R;US)

Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado. Appendix D, Final report, 96:2079 (R;US)

Remedial action plan for stabilization of the inactive uranium mill tailings site at Monument Valley, Arizona, 96:2082 (R;US)

UMTRA project water sampling and analysis plan, Falls City, Texas. Revision 1, 96:418 (R;US)

Work plan for monitor well installation water and sediment sample collection aquifer testing and topographic surveying at the Riverton, Wyoming, UMTRA Project Site, 96:449 (R;US)

ABRASIVES

Sampling and analysis plan for the 116-C-5 retention basins characteristic dangerous waste determination, 96:2304 (R;US)

ABSORBED DOSES

Alpha contamination assessment for D&D activities: Monitoring concrete surfaces, 96:2149 (R;US)

ALPHA-BEARING WASTES

Actinide partitioning studies using dihexyl-N,N-diethylcarbamoylethyl phosphonate and dissolved zirconium calcine, 96:2643 (R;US)

Chemical Analysis

Quality assurance procedures for the analysis of TRU waste samples, 96:1212 (R;US)
Radiological, physical, and chemical characterization of additional alpha contaminated and mixed low-level waste for treatment at the advanced mixed waste treatment project, 96:889 (R;US)
Transuranic waste characterization sampling and analysis methods manual, 96:2433 (R;US)
Transuranic waste characterization sampling and analysis methods manual. Revision 1, 96:2434 (R;US)
Transuranic waste characterization sampling and analysis plan, 96:2490 (R;US)

Chemical Composition

Idaho National Engineering Laboratory code assessment of the Rocky Flats transuranic waste, 96:2461 (R;US)

Classification

Identification of potential transuranic waste tanks at the Hanford Site, 96:1814 (R;US)
Waste treatability guidance program. User's guide. Revision 0, 96:1289 (R;US)

Combustion

Evaluation of pressure response in the Los Alamos controlled air incinerator during three incident scenarios, 96:946 (R;US)

Computerized Tomography

Application of gamma-ray active and passive computed tomography to nondestructively assay TRU waste, 96:2579 (R;US)
Nondestructive assay of TRU waste using gamma-ray active and passive computed tomography, 96:2578 (R;US)

Contact Handling

Remote-handled transuranic waste study, 96:1224 (R;US)

Containers

Assessment of gas flammability in transuranic waste container, 96:1962 (R;US)
Reliability evaluation methodologies for ensuring container integrity of stored transuranic (TRU) waste, 96:1306 (R;US)

Containment

Draft no-migration variance petition. Volume 7, Appendices: SUM, SURV, VOC, WAP, 96:1232 (R;US)
Field and laboratory testing of seal materials proposed for the Waste Isolation Pilot Plant, 96:1561 (R;US)
Position for determining gas phase volatile organic compound concentrations in transuranic waste containers, 96:1963 (R;US)
Preliminary fire hazard analysis for the PUTDR and TRU trenches in the Solid Waste Burial Ground, 96:1093 (R;US)

Data Acquisition

Neural network utility in nondestructive transuranic waste assay, initial investigations, 96:2458 (R;US)

Flammability

Combustion and fuel loading characteristics of Hanford Site transuranic solid waste, 96:1604 (R;US)

Ground Disposal

Environment, safety, health, and quality plan for the TRU- Contaminated Arid Soils Project of the Landfill Stabilization Focus Area Program, 96:2459 (R;US)

Inverse modeling for field-scale hydrologic and transport parameters of fractured basalt, 96:521 (R;US)
Management of Pit 9 - highlights of accomplishments and lessons learned to date, 96:882 (R;US)
Remote technologies for buried waste retrieval, 96:2263 (R;US)
Use of a sensitivity study to identify risk assessment modeling data gaps at the Idaho National Engineering Laboratory's subsurface disposal area, 96:883 (R;US)

Identification Systems

Idaho National Engineering Laboratory code assessment of the Rocky Flats transuranic waste, 96:2461 (R;US)

Information

MWIR-1995 DOE national mixed and TRU waste database users guide, 96:792 (R;US)

Inventories

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 3: Appendix BIR Volume 1, 96:1235 (R;US)
Waste Isolation Pilot Plant Transuranic Waste Baseline inventory report. Volume 2. Revision 1, 96:1202 (R;US)
Waste Isolation Pilot Plant Transuranic Waste Baseline inventory report. Volume 1. Revision 1, 96:1201 (R;US)

Land Transport

Measurement of VOC permeability of polymer bags and VOC solubility in polyethylene drum liner, 96:878 (R;US)
Risk assessment for the transportation of hazardous waste and hazardous waste components of low-level mixed waste and transuranic waste for the U.S. Department of Energy waste management programmatic environmental impact statement, 96:20 (R;US)
Transuranic waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy waste management programmatic environmental impact statement, 96:1179 (R;US)
Uncertainty analysis of the SWEPP drum assay system for graphite content code 300, 96:2473 (R;US)

Materials Handling

Computational implementation of the multi-mechanism deformation coupled fracture model for salt, 96:1565 (R;US)
Waste acceptance criteria for the Waste Isolation Pilot Plant, 96:1269 (R;US)

Melting

Advanced Mixed Waste Treatment Project melter system preliminary design technical review meeting, 96:863 (R;US)

Monitored Retrievable Storage

Basic data report for WQSP 1; WQSP 2; WQSP 3; WQSP 4; WQSP 5; WQSP6; and WQSP 6a, 96:1286 (R;US)
Computational implementation of the multi-mechanism deformation coupled fracture model for salt, 96:1565 (R;US)
Hydraulic testing around Room Q: Evaluation of the effects of mining on the hydraulic properties of Salado Evaporites, 96:1571 (R;US)
Review of the WIPP draft application to show compliance with EPA transuranic waste disposal standards, 96:1222 (R;US)
Transuranic waste baseline inventory report. Revision No. 3, 96:1225 (R;US)
Waste acceptance criteria for the Waste Isolation Pilot Plant, 96:1269 (R;US)

Monitoring

A facility design for repackaging ORNL CH-TRU legacy waste in Building 3525, 96:1346 (R;US)
Neural network utility in nondestructive transuranic waste assay, initial investigations, 96:2458 (R;US)

Nondestructive Analysis

LINAC-based transuranic waste characterization system, 96:1205 (R;US)
Nondestructive assay of TRU waste using gamma-ray active and passive computed tomography, 96:2578 (R;US)

Packaging

A facility design for repackaging ORNL CH-TRU legacy waste in Building 3525, 96:1346 (R;US)

Los Alamos National Laboratory's mobile PAN (Passive/Active Neutron) system for assay of TRU waste in 55 gallon drums, 96:940 (R;US)

Measurement of VOC permeability of polymer bags and VOC solubility in polyethylene drum liner, 96:878 (R;US)

Packaging design criteria for the Type B Drum, 96:338 (R;US)

Transuranic waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy waste management programmatic environmental impact statement, 96:1179 (R;US)

Uncertainty analysis of the SWEPP drum assay system for graphite content code 300, 96:2473 (R;US)

Westinghouse Hanford Company plan for certifying newly generated contact - handled transuranic waste. Revision 1, 96:1910 (R;US)

Precipitation

Optimization of magnetite carrier precipitation process for transuranic waste reduction, 96:1162 (R;US)

Qualitative Chemical Analysis

Los Alamos National Laboratory's mobile PAN (Passive/Active Neutron) system for assay of TRU waste in 55 gallon drums, 96:940 (R;US)

Waste Inspection Tomography (WIT), 96:814 (R;US)

Radiation Hazards

Supplemental information related to risk assessment for the off-site transportation of transuranic waste for the U.S. Department of Energy Waste Management Programmatic Environmental Impact Statement, 96:19 (R;US)

Radioactive Waste Disposal

Alternative disposal options for alpha-mixed low-level waste, 96:893 (R;US)

An analysis of the annual probability of failure of the waste hoist brake system at the Waste Isolation Pilot Plant (WIPP), 96:1220 (R;US)

Area G perimeter surface-soil and single-stage water sampling: Environmental surveillance for fiscal year 1993, 96:2483 (R;US)

Carlsbad Area Office strategic plan, 96:1280 (R;US)

Coupled multiphase flow and closure analysis of repository response to waste-generated gas at the Waste Isolation Pilot Plant (WIPP), 96:1531 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 3: Appendix BIR Volume 1, 96:1235 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 2: Appendices, AAC, BECR, BH, 96:1234 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 1, 96:1233 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 4: Appendix BIR Volume 2, 96:1236 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 6: Appendix GCR Volume 1, 96:1238 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 8: Appendices HY-DRO, IRD, LTM, NUTS, PAR, PMR, QAPD, RBP, 96:1240 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 9: Appendices RM, SCR, SER, SUM, WRAC, 96:1241 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 7: Appendix GCR Volume 2, 96:1239 (R;US)

Draft no-migration variance petition. Volume 1, 96:1226 (R;US)

Draft no-migration variance petition. Volume 2, Appendices: ADM, BAD, BECR, 96:1227 (R;US)

Draft no-migration variance petition. Volume 3, Appendices BH, BWQ, CLP, CONT, D&D, DEF, 96:1228 (R;US)

Draft no-migration variance petition. Volume 5, Appendices: GCR (Vol. 2), HSC, PAR, 96:1230 (R;US)

ALPHA-BEARING WASTES

Radioactive Waste Disposal

Draft no-migration variance petition. Volume 6, Appendices: QAPD, REG, RM, SCR, SER, 96:1231 (R;US)

Draft no-migration variance petition. Volume 7, Appendices: SUM, SURV, VOC, WAP, 96:1232 (R;US)

Environmental impact statement for initiation of transuranic waste disposal at the waste isolation pilot plant, 96:1285 (R;US)

Identification of potential transuranic waste tanks at the Hanford Site, 96:1814 (R;US)

No-migration variance petition: Draft. Volume 4, Appendices DIF, GAS, GCR (Volume 1), 96:1229 (R;US)

Pre-1970 transuranic solid waste at the Hanford Site, 96:1813 (R;US)

Preliminary fire hazard analysis for the PUTDR and TRU trenches in the Solid Waste Burial Ground, 96:1093 (R;US)

Preliminary parametric performance assessment of potential final waste forms for alpha low-level waste at the Idaho National Engineering Laboratory. Revision 1, 96:866 (R;US)

Probability, conditional probability and complementary cumulative distribution functions in performance assessment for radioactive waste disposal, 96:1563 (R;US)

Review of the WIPP draft application to show compliance with EPA transuranic waste disposal standards, 96:1222 (R;US)

Summary of the systems prioritization method (SPM) as a decision-aiding tool for the Waste Isolation Pilot Plant, 96:1551 (R;US)

The WIPP RCRA Part B permit application for TRU mixed waste disposal, 96:1282 (R;US)

The systems prioritization method (SPM) CD-ROM demonstration for Waste Management '96, 96:1557 (R;US)

Transuranic waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy waste management programmatic environmental impact statement, 96:1179 (R;US)

Radioactive Waste Management

1995 Solid Waste 30-year volume summary, 96:1051 (R;US)

1995 solid waste 30-year characteristics volume summary, 96:1055 (R;US)

Computer-aided waste management strategic planning and analysis, 96:625 (R;US)

Department of Energy Idaho Operations Office evaluation of feasibility studies for private sector treatment of alpha and TRU mixed wastes, 96:740 (R;US)

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Volume 2, Site data tables, 96:720 (R;US)

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Volume 1, 96:719 (R;US)

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Summary, 96:718 (R;US)

Innovative technologies for the remediation of transuranic-contaminated landfills, 96:2467 (R;US)

LINAC-based transuranic waste characterization system, 96:1205 (R;US)

Mixed Waste Focus Area integrated technical baseline report, Phase 1: Volume 1, 96:744 (R;US)

Mixed waste focus area Department of Energy technology development needs identification and prioritization, 96:899 (R;US)

Projected transuranic waste loads requiring treatment, storage, and disposal, 96:1177 (R;US)

Test plan guidance for transuranic-contaminated arid landfill remedial technology development, 96:2453 (R;US)

Update of the management strategy for Oak Ridge National Laboratory Liquid Low-Level Waste, 96:963 (R;US)

Waste Inspection Tomography (WIT), 96:814 (R;US)

Radioactive Waste Processing

A comparison of TRUEX and CMP solvent extraction processes for actinide removal from ICPP wastes, 96:1326 (R;US)

Advanced Mixed Waste Treatment Project melter system preliminary design technical review meeting, 96:863 (R;US)

Calculation of projected waste loads for transuranic waste management alternatives, 96:12 (R;US)

Evaluation of pressure response in the Los Alamos controlled air incinerator during three incident scenarios, 96:946 (R;US)

Idaho Chemical Processing Plant Process Efficiency improvements, 96:194 (R;US)

Integrated thermal treatment system study: Phase 2, Results, 96:871 (R;US)

Mixed Waste Integrated Program - Problem-oriented technology development, 96:687 (R;US)

Modeling of thermal plasma arc technology FY 1994 report, 96:855 (R;US)

Proposed Site Treatment Plan (PSTP). Volumes 1 and 2 and Reference Document, 96:1134 (R;US)

Radiological, physical, and chemical characterization of additional alpha contaminated and mixed low-level waste for treatment at the advanced mixed waste treatment project, 96:889 (R;US)

Survey of commercial firms with mixed-waste treatability study capability, 96:902 (R;US)

Technical liaison with the Institute of Physical Chemistry (Russian Academy of Science), 96:301 (R;US)

Thermal oxidation vitrification flue gas elimination system, 96:8 (R;US)

Transuranic waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy waste management programmatic environmental impact statement, 96:1179 (R;US)

Validation of the generic TRUEX model using data from TRUEX demonstrations with actual high-level waste, 96:1157 (R;US)

WRAP module 1 treatment plan, 96:1081 (R;US)

Waste management facilities cost information for transuranic waste, 96:2449 (R;US)

Radioactive Waste Storage

Alternatives to reduce corrosion of carbon steel storage drums, 96:894 (R;US)

DNFSB Recommendation 94-1 Hanford Site Integrated Stabilization Management Plan. Volume 1, 96:1592 (R;US)

Los Alamos National Laboratory's mobile PAN (Passive/Active Neutron) system for assay of TRU waste in 55 gallon drums, 96:940 (R;US)

Measurements of the corrosion of low-carbon steel drums under environmental conditions at Hanford: One-year test results, 96:1049 (R;US)

Method of estimating maximum VOC concentration in void volume of vented waste drums using limited sampling data: Application in transuranic waste drums, 96:2446 (R;US)

Performance test of a gamma/neutron mapper on stored TRU waste drums at the RWMC, 96:2464 (R;US)

Position for determining gas phase volatile organic compound concentrations in transuranic waste containers, 96:1963 (R;US)

TRU drum corrosion task team report, 96:1329 (R;US)

Test plan for a live drum survey using the gamma-neutron sensor, 96:2455 (R;US)

Waste Isolation Pilot Plant Transuranic Waste Baseline inventory report. Volume 2. Revision 1, 96:1202 (R;US)

Waste management facilities cost information for transuranic waste, 96:2449 (R;US)

Radioassay

Uncertainty analysis of the SWEPP drum assay system for graphite content code 300, 96:2473 (R;US)

Remedial Action

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 5: Appendices D and D, DEF, FAC, 96:1237 (R;US)

Preliminary engineering report waste area grouping 5, Old Hydrofracture Facility Tanks content removal project, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:960 (R;US)

Remote Handling

Remote-handled transuranic waste study, 96:1224 (R;US)

Removal

Removal of strontium and transuranics from Hanford tank waste via addition of metal cations and chemical oxidant: FY 1995 test results, 96:1432 (R;US)

Sampling

Transuranic waste characterization sampling and analysis methods manual, 96:2433 (R;US)

Transuranic waste characterization sampling and analysis methods manual. Revision 1, 96:2434 (R;US)

Transuranic waste characterization sampling and analysis plan, 96:2490 (R;US)

Separation Processes

Actinide partitioning from actual ICPP dissolved zirconium calcine using the TRUEX solvent, 96:1308 (R;US)

TRUEX partitioning from radioactive ICPP sodium bearing waste, 96:1307 (R;US)

Solvent Extraction

A comparison of TRUEX and CMP solvent extraction processes for actinide removal from ICPP wastes, 96:1326 (R;US)

Specifications

Transuranic Waste Characterization Quality Assurance Program Plan, 96:1204 (R;US)

WIPP WAC REV. 5 applicability, 96:1283 (R;US)

Stabilization

Test plan guidance for transuranic-contaminated arid landfill remedial technology development, 96:2453 (R;US)

Underground Disposal

A constitutive model for representing coupled creep, fracture, and healing in rock salt, 96:1570 (R;US)

A sensitivity analysis of the WIPP disposal room model: Phase 1, 96:1533 (R;US)

A shaft seal system for the Waste Isolation Pilot Plant, 96:1577 (R;US)

A summary of methods for approximating salt creep and disposal room closure in numerical models of multiphase flow, 96:1532 (R;US)

Actinide chemistry research supporting the Waste Isolation Pilot Plant (WIPP): FY94 results, 96:1538 (R;US)

Brine release based on structural calculations of damage around an excavation at the Waste Isolation Pilot Plant (WIPP), 96:1549 (R;US)

Characterization of void volume VOC concentration in vented TRU waste drums. Final report, 96:858 (R;US)

Complexation of Am(III) by oxalate in NaClO₄ media, 96:1554 (R;US)

Engineered alternatives cost/benefit study. Draft report, 96:1284 (R;US)

Field and laboratory testing of seal materials proposed for the Waste Isolation Pilot Plant, 96:1561 (R;US)

Position for determining gas phase volatile organic compound concentrations in transuranic waste containers. Revision 1, 96:868 (R;US)

Properties of dynamically compacted WIPP salt, 96:1574 (R;US)

Resource Conservation and Recovery Act, Part B permit application. Volume 4, Revision 5, 96:1272 (R;US)

Resource Conservation and Recovery Act: Part B permit application. Volume 10, Chapter I, Appendix I1-Chapter L, Appendix L1, 96:1278 (R;US)

Sandia WIPP calibration traceability, 96:1576 (R;US)

The effect of stratigraphic dip on brine inflow and gas migration at the Waste Isolation Pilot Plant, 96:246 (R;US)

The experimental determination of the solubility product for NpO₂OH in NaCl solutions, 96:1555 (R;US)

The second iteration of the Systems Prioritization Method: A systems prioritization and decision-aiding tool for the Waste Isolation Pilot Plant: Volume 1, Synopsis of method and results, 96:1558 (R;US)

The second iteration of the Systems Prioritization Method: A systems prioritization and decision-aiding tool for the Waste Isolation Pilot Plant: Volume 3, Analysis for final programmatic recommendations, 96:1560 (R;US)

The second iteration of the Systems Prioritization Method: A systems prioritization and decision-aiding tool for the Waste Isolation Pilot Plant: Volume 2, Summary of technical input and model implementation, 96:1559 (R;US)

The waste isolation pilot plant regulatory compliance program, 96:1218 (R;US)

Thermodynamic modeling of neptunium(V)-acetate complexation in concentrated NaCl media, 96:1556 (R;US)

Time domain reflectometry as a rock mass monitoring technique, 96:1287 (R;US)

Sorption

Comprehensive supernate treatment: Task summary, 96:1217 (R;US)

Design alternatives report for the cesium removal demonstration, 96:967 (R;US)

Effects of soluble organic complexants and their degradation products on the removal of selected radionuclides from high-level waste. Part II: Distributions of Sr, Cs, Tc, and Am onto 32 absorbers from four variations of Hanford tank 101-SY simulant solution, 96:1333 (R;US)

Sorption and desorption of cesium and strontium on TA-2 and TA-41 soils and sediments, 96:529 (R;US)

Volatility

Volatility literature of chlorine, iodine, cesium, strontium, technetium, and rhenium; technetium and rhenium volatility testing, 96:1002 (R;US)

CESIUM 134

Hanford Site background: Evaluation of existing soil radionuclide data, 96:2432 (R;US)

CESIUM 137

Ecological Concentration

Concentrations of radionuclides in terrestrial vegetation on the Hanford site of potential interest to Native Americans, 96:2545 (R;US)

The selective removal of ⁹⁰Sr and ¹³⁷Cs from liquid low-level waste at Oak Ridge National Laboratory, 96:699 (R;US)

Packaging

A status report on the development and certification of the Beneficial Uses Shipping System (BUSS) cask, 96:271 (R;US)

Plumes

A joint Russian-American field test at the Chelyabinsk-65 (Mayak) Site: Test description and preliminary results, 96:212 (R;US)

Radiation Monitoring

Waste Area Grouping 2 Remedial Investigation Phase 1 Seep Task data report: Contaminant source area assessment, 96:2523 (R;US)

Radioactive Waste Disposal

Summary of radioactive solid waste received in the 200 Areas during calendar year 1994, 96:2580 (R;US)

Radioactive Waste Storage

Summary of radioactive solid waste received in the 200 Areas during calendar year 1994, 96:2580 (R;US)

Radioecological Concentration

Baseline radionuclide concentrations in soils and vegetation around the proposed Weapons Engineering Tritium Facility and the Weapons Subsystems Laboratory at TA-16, 96:201 (R;US)

Case study of ¹³⁷Cesium plots remediation at Oak Ridge National Laboratory, 96:692 (R;US)

Characterization and immobilization of cesium-137 in soil at Los Alamos National Laboratory, 96:2503 (R;US)

Hanford Site background: Evaluation of existing soil radionuclide data, 96:2432 (R;US)

Remedial investigation/feasibility study for the Clinch River/Poplar Creek operable unit. Volume 5. Appendixes G, H, I, J, 96:2405 (R;US)

Remedial investigation/feasibility study for the Clinch River/Poplar Creek operable unit. Volume 1. Main text, 96:2398 (R;US)

Remedial investigation/feasibility study for the Clinch River/Poplar Creek operable unit. Volume 2. Appendixes A, B, C, D, 96:2399 (R;US)

Remedial investigation/feasibility study for the Clinch River/Poplar Creek operable unit. Volume 4. Appendix F, 96:2402 (R;US)

Remedial investigation/feasibility study for the Clinch River/Poplar Creek operable unit. Volume 3. Appendix E, 96:118 (R;US)

Waste area Grouping 2 Phase I remedial investigation: Sediment and Cesium-137 transport modeling report, 96:2524 (R;US)

Radionuclide Migration

Migration of Sr-20, Cs-137, and Pu-239/240 in Canyon below Los Alamos outfall, 96:2498 (R;US)

Removal

Evaluation of improved technologies for the removal of ⁹⁰Sr and ¹³⁷Cs from process wastewater and groundwater: FY 1995 status, 96:561 (R;US)

Subproject plan for demonstration of 3M technology for treatment of N Basin water, 96:2628 (R;US)

Storage

Waste Encapsulation and Storage Facility mission analysis report, 96:323 (R;US)

Waste Product Utilization

CRPE: Cesium Return Program Experience FY 1995, 96:1613 (R;US)

CESIUM NITRATES

Mass transfer of SCWO processes: Molecular diffusion and mass transfer coefficients of inorganic nitrate species in sub- and supercritical water, 96:2500 (R;US)

CHALK RIVER

Soil treatment to remove uranium and related mixed radioactive heavy metal contaminants. Quarterly report, January-March 1995, 96:807 (R;US)

CHARCOAL

Thermal analysis to support decommissioning of the molten salt reactor experiment, 96:2184 (R;US)

CHELATING AGENTS

Decontamination of process equipment using recyclable chelating solvent, 96:2104 (R;US)

Design, synthesis, and evaluation of polyhydroxamate chelators for selective complexation of actinides, 96:2645 (R;US)

Effects of soluble organic complexants and their degradation products on the removal of selected radionuclides from high-level waste. Part 3, Distributions of Sr, Cs, Tc, Pu, and Am onto 33 absorbers from four variations of a 3:1 dilution of Hanford complexant concentrate (CC) simulant: Part 4, The effects of varying dilution ratios on the distribution, 96:1334 (R;US)

Study of polyelectrolytes for Los Alamos National Laboratory. Final report, 96:205 (R;US)

CHEMICAL ANALYSIS

200-ZP-1 Semi-Annual Groundwater Sampling validation summary: March 1995, 96:376 (R;US)

Contaminant analysis automation, an overview, 96:2499 (R;US)

Data validation summary report for the 100-BC-5 Operable Unit Round 8 Groundwater Sampling, 96:375 (R;US)

Data validation summary report for the 100-HR-3 Round 8, Phases 1 and 2 groundwater sampling task, 96:374 (R;US)

Dynamic quality assurance/quality control (QA/QC) program to maximize the use of on-site measurement, 96:210 (R;US)

Field Raman spectrograph for environmental analysis, 96:2361 (R;US)

Road Transportable Analytical Laboratory (RTAL) system. Quarterly report, May-July 1995, 96:2364 (R;US)

Test plan for phase II of the Retained Gas Sampler system, 96:1886 (R;US)

Validation summary report for the 100-HR-3 Groundwater Round 9 Phase 1 and 2, 96:387 (R;US)

Validation summary report for the 100-KR-4 Groundwater Round 8, 96:386 (R;US)

CHEMICAL COMPOSITION

OWL models update and use for TWRS strategy development, 96:1501 (R;US)

PNL vitrification technology development project glass formulation strategy for LLW vitrification, 96:1509 (R;US)

CHEMICAL EFFLUENTS

216-A-29 Ditch supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:28 (R;US)

216-B-3 Main Pond supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:27 (R;US)

Ecotoxicological screen of Potential Release Site 50-006(d) of Operable Unit 1147 of Mortandad Canyon and relationship to the Radioactive Liquid Waste Treatment Facilities project, 96:203 (R;US)

Guidance document for preparing water sampling and analysis plans for UMTRA Project sites. Revision 1, 96:413 (R;US)

Hazardous waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy Waste Management Programmatic Environmental Impact Statement, 96:637 (R;US)

ICPP environmental monitoring report CY-1994, 96:180 (R;US)

ICPP environmental monitoring report CY-1995, 96:198 (R;US)

Pollution prevention in the analytical laboratory—Microscale and other techniques do add up, 96:2295 (R;US)

Storm water monitoring report for the 1995 reporting period, 96:518 (R;US)

CHEMICAL EXPLOSIVES

A self-directing elastic backscatter lidar system for debris cloud tracking and characterization, 96:2506 (R;US)

Ecological surveys of the proposed high explosives wastewater treatment facility region, 96:912 (R;US)

Transpiring wall supercritical water oxidation test reactor design report, 96:2575 (R;US)

CHEMICAL FEEDSTOCKS

Redox reaction and foaming in nuclear waste glass melting, 96:1380 (R;US)

CHEMICAL PLANTS

Engineering evaluation/cost analysis for the proposed removal action at the Southeast Drainage near the Weldon Spring Site, Weldon Spring, Missouri, 96:823 (R;US)

Liquid abrasive pressure pot scoping tests report, 96:2146 (R;US)

Streamlined RI/FS planning for the groundwater operable unit at the Weldon Spring Site, 96:348 (R;US)

Weldon Spring Site Environmental Report for Calendar Year 1995, 96:2113 (R;US)

Work plan for the remedial investigation/feasibility study for the groundwater operable units at the Chemical Plant Area and

the Ordnance Works Area, Weldon Spring, Missouri, 96:496 (R;US)

CHEMICAL REACTORS

A high temperature pulsed corona plasma reactor, 96:935 (R;US)

Nonthermal plasma technology for organic destruction, 96:994 (R;US)

Transpiring wall supercritical water oxidation test reactor design report, 96:2575 (R;US)

CHEMICAL SPILLS

Calculations of protective action distance for toxic chemical spills using nomographs, 96:864 (R;US)

CHEMICAL WASTES

Fiscal year 1995 final report for TTP SR-1320-04, 96:1143 (R;US)

PNL vitrification technology development project glass formulation strategy for LLW vitrification, 96:1509 (R;US)

The effect of chemical composition on the PCT durability of mixed waste glasses from wastewater treatment sludges, 96:697 (R;US)

Chemical Reactions

ANL technical support program for DOE environmental restoration and waste management. Annual report, October 1993-September 1994, 96:1151 (R;US)

Chemistry

The incorporation of P, S, Cr, F, Cl, I, Mn, Ti, U, and Bi into simulated nuclear waste glasses: Literature study, 96:1481 (R;US)

Corrosion

Apatite- and monazite-bearing glass-crystal composites for the immobilization of low-level nuclear and hazardous wastes, 96:620 (R;US)

Quantitative SEM/EDS analysis of high-level waste glasses, 96:1164 (R;US)

The corrosion behavior of DWPF glasses, 96:1161 (R;US)

The long-term acceleration of waste glass corrosion: A preliminary review, 96:1938 (R;US)

Corrosion Resistance

Glass waste forms for the Na-bearing high activity waste fractions, 96:1959 (R;US)

Long-term test results from a West Valley actinide-doped reference glass, 96:1158 (R;US)

Performance testing of West Valley Reference 6 glass, 96:1156 (R;US)

The effect of chemical composition on the PCT durability of mixed waste glasses from wastewater treatment sludges, 96:697 (R;US)

Crystallization

The effect of quench rate on the TCLP and PCT durability of environmental waste glass, 96:1125 (R;US)

Dissolution

Measurement of the glass dissolution rate in the presence of alteration phases, 96:1168 (R;US)

Evaluation

ANL technical support program for DOE environmental restoration and waste management. Annual report, October 1993–September 1994, 96:1151 (R;US)

Leaching

Evaluation of the single-pass flow-through test to support a low-activity waste specification, 96:984 (R;US)

Glass science tutorial: Lecture No. 7, Waste glass technology for Hanford, 96:1603 (R;US)

Technical Note: Updated durability/composition relationships for Hanford high-level waste glasses, 96:1508 (R;US)

The effect of quench rate on the TCLP and PCT durability of environmental waste glass, 96:1125 (R;US)

Mechanical Properties

Evaluation of models of waste glass durability, 96:1160 (R;US)

Performance Testing

Long-term test results from a West Valley actinide-doped reference glass, 96:1158 (R;US)

Phase Studies

Glass waste forms for the Na-bearing high activity waste fractions, 96:1959 (R;US)

Physical Properties

Glass waste forms for the Na-bearing high activity waste fractions, 96:1959 (R;US)

Quantitative Chemical Analysis

Quantitative SEM/EDS analysis of high-level waste glasses, 96:1164 (R;US)

Scanning Electron Microscopy

Quantitative SEM/EDS analysis of high-level waste glasses, 96:1164 (R;US)

Solubility

Initial Experience to Determine the Solubility of Salts in Low-Level Mix Waste Glasses, 96:1120 (R;US)

Solvent Properties

Zirconia solubility in borosilicate glass, 96:1309 (R;US)

Stability

Glass science tutorial: Lecture No. 7, Waste glass technology for Hanford, 96:1603 (R;US)

Waste Forms

Quantitative SEM/EDS analysis of high-level waste glasses, 96:1164 (R;US)

GLASS MELTERS

GROUND DISPOSAL

Environment, safety, health, and quality plan for the TRU- Contaminated Arid Soils Project of the Landfill Stabilization Focus Area Program, 96:2459 (R;US)

GROUND RELEASE

GENII dose calculations for offsite maximum individual and populations from Plutonium Finishing Plant, 96:309 (R;US)

GROUND WATER

Chemical Analysis

200-ZP-1 Semi-Annual Groundwater Sampling validation summary: March 1995, 96:376 (R;US)

Analysis of volatile organic compounds in groundwater samples by gas chromatography-mass spectrometry, 96:613 (R;US)

Data validation summary report for the 100-BC-5 Operable Unit Round 8 Groundwater Sampling, 96:375 (R;US)

Data validation summary report for the 100-HR-3 Round 8, Phases 1 and 2 groundwater sampling task, 96:374 (R;US)

Environmental geochemistry for surface and subsurface waters in the Pajarito Plateau and outlying areas, New Mexico, 96:525 (R;US)

Groundwater Monitoring Plan for the 183-H Solar Evaporation Basins, 96:596 (R;US)

Limited field investigation report for the 100-FR-1 Operable Unit, 96:2119 (R;US)

Modeling groundwater contamination transport for the Hanford Environmental Disposal Facility, 96:593 (R;US)

Road Transportable Analytical Laboratory (RTAL) system. Quarterly report, May–July 1995, 96:2364 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Maybell, Colorado, 96:425 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Mexican Hat, Utah, 96:422 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Monument Valley, Arizona, 96:424 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Riverton, Wyoming, 96:421 (R;US)

Supplement to the UMTRA project water sampling and analysis plan, Slick Rock, Colorado, 96:431 (R;US)

The Speciation of Groundwater Contaminated with Coal Pile Leachate at the Savannah River Site, South Carolina, 96:606 (R;US)

UMTRA Project water sampling and analysis plan, Canonsburg, Pennsylvania. Revision 1, 96:417 (R;US)

UMTRA project water sampling and analysis plan, Falls City, Texas. Revision 1, 96:418 (R;US)

UMTRA project water sampling and analysis plan, Naturita, Colorado. Revision 1, 96:423 (R;US)

Validation summary report for the 100-HR-3 Groundwater Round 9 Phase 1 and 2, 96:387 (R;US)

Validation summary report for the 100-KR-4 Groundwater Round 8, 96:386 (R;US)

GROUND WATER Contamination

Contamination

- 200-UP-1 vertical profiling activity summary report, 96:362 (R;US)
- A joint Russian-American field test at the Chelyabinsk-65 (Mayak) Site: Test description and preliminary results, 96:212 (R;US)
- Baseline risk assessment of ground water contamination at the Monument Valley uranium mill tailings site Cane Valley, Arizona, 96:410 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Maybell, Colorado, 96:453 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Sites near Rifle, Colorado. Revision 2, 96:441 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Maybell, Colorado, 96:452 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Sites near Slick Rock, Colorado. Revision 1, 96:432 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Sites near Rifle, Colorado, 96:439 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Lakeview, Oregon. Revision 2, 96:430 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Naturita, Colorado. Revision 1, 96:448 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Naturita, Colorado, 96:447 (R;US)
- Baseline risk assessment of ground water contamination at the uranium mill tailings site near Lakeview, Oregon. Revision 1, 96:429 (R;US)
- Benchmarking analysis of three multimedia models: RESRAD, MMSOILS, and MEPAS, 96:2418 (R;US)
- Characterizing aquifer hydrogeology and anthropogenic chemical influences on groundwater near the Idaho Chemical Processing Plant, Idaho National Engineering Laboratory, Idaho, 96:480 (R;US)
- Clean option: Berkeley Pit water treatment and resource recovery strategy, 96:565 (R;US)
- Comparison of constant-rate pumping test and slug interference test results at the Hanford Site B pond multilevel test facility, 96:567 (R;US)
- Description of work for vadose zone characterization of the 1301-N and 1325-N liquid waste disposal facilities, Revision 1, 96:2428 (R;US)
- Determination of radium in water, 96:517 (R;US)
- Draft programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project, 96:464 (R;US)
- Electrical resistivity for detecting subsurface non-aqueous phase liquids: A progress report, 96:2509 (R;US)
- Environmental assessment of ground water compliance activities at the Uranium Mill Tailings Site, Spook, Wyoming. Revision 0, 96:463 (R;US)
- Environmental geochemistry for surface and subsurface waters in the Pajarito Plateau and outlying areas, New Mexico, 96:525 (R;US)
- Estimation of contaminant transport in groundwater beneath radioactive waste disposal facilities, 96:405 (R;US)
- Evaluation of improved techniques for the removal of ⁹⁰Sr and ¹³⁷Cs from process wastewater and groundwater: Chabazite zeolite baseline study, 96:557 (R;US)
- Field screening sampling and analysis strategy and methodology for the 183-H Solar Evaporation Basins: Phase 2, Soils, 96:2018 (R;US)
- Groundwater cleanup discussion paper, 96:393 (R;US)
- Groundwater monitoring and assessment plan for the 100-K Area fuel storage basins, 96:595 (R;US)
- Hanford Site ground-water monitoring for 1994, 96:564 (R;US)
- In situ bioremediation using horizontal wells. Innovative technology summary report, 96:472 (R;US)
- Laboratory "proof of principle" investigation for the acoustically enhanced remediation technology, 96:486 (R;US)
- Limited field investigation report for the 100-FR-1 Operable Unit, 96:2119 (R;US)
- Lockheed Martin Energy Systems, Inc., Groundwater Program Office. Annual report for fiscal year 1994, 96:2528 (R;US)
- Metallurgical Laboratory Hazardous Waste Management Facility groundwater monitoring report. First quarter 1995, 96:612 (R;US)
- Mixed Waste Management Facility groundwater monitoring report. First quarter 1995, 96:611 (R;US)
- Optimized remedial groundwater extraction using linear programming, 96:349 (R;US)
- Performance assessment for the disposal of low-level waste in the 200 West Area Burial Grounds, 96:1043 (R;US)
- Proposed plan for interim remedial measure at the 100-KR-4 operable unit, Revision 1, 96:2429 (R;US)
- Qualitative risk assessment for the 100-NR-2 Operable Unit. Revision 1, 96:357 (R;US)
- Refinement of the Kansas City Plant site conceptual model with respect to dense non-aqueous phase liquids (DNAPL), 96:559 (R;US)
- Relating groundwater and sediment chemistry to microbial characterization at a BTEX-contaminated site, 96:406 (R;US)
- Remedial investigation/feasibility study report for the 300-FF-5 Operable Unit, 96:2124 (R;US)
- Risk-based decision analysis for the 200-BP-5 groundwater operable unit. Revision 2, 96:377 (R;US)
- Safety assessment for the proposed pilot-scale treatability tests for the 200-UP-1 and 200-ZP-1 groundwater operable units. Revision 1, 96:356 (R;US)
- Scoping analysis of toxic metal performance in DOE low-level waste disposal facilities, 96:1028 (R;US)
- Site Observational Work Plan for the UMTRA Project Site at Shiprock, New Mexico. Revision, 96:434 (R;US)
- Site observational work plan for the UMTRA Project Site at Grand Junction, Colorado, 96:457 (R;US)
- Site observational work plan for the UMTRA Project site at Falls City, Texas, 96:433 (R;US)
- Subsurface contaminants focus area, 96:477 (R;US)
- Supplement to the site observational work plan for the UMTRA Project Site at Ambrosia Lake, New Mexico, 96:436 (R;US)
- Surfactant-modified zeolites as permeable barriers to organic and inorganic groundwater contaminants, 96:490 (R;US)
- UMTRA Ground Water Project management action process document, 96:459 (R;US)
- Waste and cost reduction using dual wall reverse circulation drilling with multi-level groundwater sampling for contaminant plume delineation, 96:404 (R;US)
- Well drilling summary report for well 199-N-106A, 96:379 (R;US)
- Work plan for the remedial investigation/feasibility study for the groundwater operable units at the Chemical Plant Area and the Ordnance Works Area, Weldon Spring, Missouri, 96:496 (R;US)

Corrosive Effects

- Long-term corrosion behavior of environmental assessment glass, 96:1167 (R;US)

Data Compilation

- Data validation summary report for the 100-NR-2 operable unit groundwater sampling round 8, 96:388 (R;US)

Decontamination

- 100-HR-3 and 100-KR-4 interim remedial measure pump-and-treat acquisition and design strategy plan, 96:396 (R;US)
- Aqueous-stream uranium-removal technology cost/benefit and market analysis, 96:494 (R;US)
- Baseline risk assessment of ground water contamination at the uranium mill tailings site near Canonsburg, Pennsylvania. Revision 1, 96:2041 (R;US)
- Cost effectiveness studies of environmental technologies: Volume 1, 96:206 (R;US)

Development of HUMASORB™, a lignite derived humic acid for removal of metals and organic contaminants from groundwater, 96:491 (R;US)

Engineering evaluation/conceptual plan for the 200-UP-1 Groundwater Operable Unit interim remedial measure. Revision 2, 96:371 (R;US)

N Springs expedited response action performance monitoring plan. Revision 1, 96:366 (R;US)

N Springs pump-and-treat well design. Revision 2, 96:361 (R;US)

Preliminary final programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project. Volume 1, 96:465 (R;US)

Preliminary final programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project. Volume 2, 96:467 (R;US)

The Western Environmental Technology Office (WETO), Butte, Montana. Technology summary, 96:476 (R;US)

Drawdown

An analysis of potential impacts to the groundwater monitoring networks in the Central Plateau. Revision 0, 96:508 (R;US)

Environmental Transport

100-FR-3 groundwater/soil gas supplemental limited field investigation report, 96:507 (R;US)

A source release model with application to the LANL LLRW disposal site performance assessment, 96:938 (R;US)

Application of a NAPL partitioning interwell tracer test (PITT) to support DNAPL remediation at the Sandia National Laboratories/New Mexico chemical waste landfill, 96:1034 (R;US)

Baseline risk assessment of ground water contamination at the Monument Valley uranium mill tailings site Cane Valley, Arizona, 96:410 (R;US)

Buffer zone monitoring plan for the Dos Rios subdivision, Gunnison, Colorado, 96:458 (R;US)

Characterizing aquifer hydrogeology and anthropogenic chemical influences on groundwater near the Idaho Chemical Processing Plant, Idaho National Engineering Laboratory, Idaho, 96:480 (R;US)

Geophysical surveys at the UMTRA project Shiprock, New Mexico site, 96:2077 (R;US)

In situ bioremediation using horizontal wells. Innovative technology summary report, 96:472 (R;US)

Innovative technology for expedited site remediation of extensive surface and subsurface contamination, 96:2024 (R;US)

Inventory of site-derived ³⁶Cl in the Snake River plain aquifer, Idaho National Engineering Laboratory, Idaho, 96:511 (R;US)

Relating groundwater and sediment chemistry to microbial characterization at a BTEX-contaminated site, 96:406 (R;US)

Subsurface contaminants focus area, 96:477 (R;US)

Supplement to the site observational work plan for the UMTRA Project Site at Ambrosia Lake, New Mexico, 96:436 (R;US)

Weldon Spring Site Environmental Report for Calendar Year 1995, 96:2113 (R;US)

Flow Models

Development of a regional groundwater flow model for the area of the Idaho National Engineering Laboratory, Eastern Snake River Plain Aquifer, 96:515 (R;US)

Multimedia Environmental Pollutant Assessment System (MEPAS®): Groundwater pathway formulations, 96:574 (R;US)

Flow Rate

A source release model with application to the LANL LLRW disposal site performance assessment, 96:938 (R;US)

Fluid Flow

Ground water flow velocity in the bank of the Columbia River, Hanford, Washington, 96:581 (R;US)

Ground-water data for the Nevada Test Site and selected other areas in South-Central Nevada, 1992–1993, 96:590 (R;US)

Hanford statewide groundwater flow and transport model calibration report, 96:392 (R;US)

Summary of hydrogeologic controls on ground-water flow at the Nevada Test Site, Nye County, Nevada, 96:492 (R;US)

Geochemistry

Geochemical study of groundwater at Sandia National Laboratories/New Mexico and Kirtland Air Force Base, 96:513 (R;US)

Supplement to the site observational work plan for the UMTRA project site at Ambrosia Lake, New Mexico, 96:435 (R;US)

Hydrology

Ground water elevation monitoring at the Uranium Mill Tailings Remedial Action Salt Lake City, Utah, Vitro processing site, 96:444 (R;US)

Remedial Action Plan and Site Design for stabilization of the inactive Uranium Mill Tailings sites at Slick Rock, Colorado: Appendix A to Attachment 3, Tables. Final, 96:409 (R;US)

Remedial Action Plan and Site design for stabilization of the inactive Uranium Mill Tailings sites at Slick Rock, Colorado: Revision 1. Remedial action selection report, Attachment 2, geology report, Attachment 3, ground water hydrology report, Attachment 4, water resources protection strategy. Final, 96:2031 (R;US)

Maps

Groundwater maps of the Hanford Site, December 1994, 96:592 (R;US)

Mathematical Models

Estimating surface water risk at Oak Ridge National Laboratory: Effects of site conditions on modeling results, 96:2339 (R;US)

Monitoring

100-FR-3 groundwater/soil gas supplemental limited field investigation report, 96:507 (R;US)

1994 Environmental monitoring drinking water and nonradiological effluent programs annual report, 96:174 (R;US)

1994 Site environmental report, 96:163 (R;US)

200-BP-5 operable unit treatability test report, 96:510 (R;US)

An analysis of potential impacts to the groundwater monitoring networks in the Central Plateau. Revision 0, 96:508 (R;US)

Approach and plan for cleanup actions in the 100-FR-2 operable unit of the Hanford Site, Revision 0, 96:834 (R;US)

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Maybell, Colorado, 96:453 (R;US)

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Sites near Rifle, Colorado. Revision 2, 96:441 (R;US)

Basic data report for WQSP 1; WQSP 2; WQSP 3; WQSP 4; WQSP 5; WQSP6; and WQSP 6a, 96:1286 (R;US)

Buffer zone monitoring plan for the Dos Rios subdivision, Gunnison, Colorado, 96:458 (R;US)

Data validation summary report for the 100-FR-3 Operable Unit Round 8 Groundwater, 96:390 (R;US)

Data validation summary report for the 100-NR-2 operable unit groundwater sampling round 8, 96:388 (R;US)

Development of a three-dimensional ground-water model of the Hanford Site unconfined aquifer system: FY 1995 status report, 96:568 (R;US)

Environmental monitoring plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2388 (R;US)

Geochemical study of groundwater at Sandia National Laboratories/New Mexico and Kirtland Air Force Base, 96:513 (R;US)

Groundwater Monitoring Plan for the 183-H Solar Evaporation Basins, 96:596 (R;US)

Groundwater Quality Sampling and Analysis Plan for Environmental Monitoring Waste Area Grouping 6 at Oak Ridge National Laboratory. Environmental Restoration Program, 96:544 (R;US)

Groundwater protection plan for the Environmental Restoration Disposal Facility, 96:358 (R;US)

Groundwater screening evaluation/monitoring plan: 200 Area Treated Effluent Disposal Facility (Project W-049H). Revision 1, 96:598 (R;US)

H-Area, K-Area, and Par Pond Sewage Sludge Application Sites Groundwater Monitoring Report. Fourth quarter 1994 and 1994 summary, 96:610 (R;US)

Hanford Site environmental report for calendar year 1994, 96:227 (R;US)

GROUND WATER Monitoring

Hanford Site ground-water monitoring for 1994, 96:564 (R;US)
Interim-status groundwater monitoring plan for the 216-B-63 trench. Revision 1, 96:594 (R;US)
Long-term surveillance plan for the Bodo Canyon Disposal Site, Durango, Colorado. Revision 1, 96:2040 (R;US)
Long-term surveillance plan for the Gunnison, Colorado disposal site, 96:2073 (R;US)
Long-term surveillance plan for the Mexican Hat Disposal Site, Mexican Hat, Utah, 96:2062 (R;US)
Metallurgical Laboratory Hazardous Waste Management Facility groundwater monitoring report. First quarter 1995, 96:612 (R;US)
Mixed Waste Management Facility groundwater monitoring report. First quarter 1995, 96:611 (R;US)
Quarterly report of RCRA groundwater monitoring data for period July 1–September 30, 1995, 96:505 (R;US)
Quarterly report of RCRA groundwater monitoring data for period October 1 through December 31, 1994, 96:497 (R;US)
RCRA groundwater monitoring data. Quarterly report, April 1, 1995–June 30, 1995, 96:504 (R;US)
Remedial Action Plan and Site Design for Stabilization of the Inactive Uranium Mill Tailings Sites at Slick Rock, Colorado: Appendix B to Attachment 3, Lithologic logs and monitor well construction information. Final report, 96:2033 (R;US)
Report of ground water monitoring for expansion of the golf course, Salt Lake City, Utah, vitro processing site, 96:443 (R;US)
Resource Conservation and Recovery Act: Part B permit application. Volume 1, 96:1279 (R;US)
SEAMIST™. Innovative technology summary report, 96:2348 (R;US)
SRS environmental technology development field test platform, 96:2618 (R;US)
Site environmental report for Calendar Year 1994 on radiological and nonradiological parameters, 96:2006 (R;US)
Site observational work plan for the UMTRA Project Site at Grand Junction, Colorado, 96:457 (R;US)
UMTRA Ground Water Project management action process document, 96:459 (R;US)
UMTRA Project water sampling and analysis plan, Grand Junction, Colorado. Revision 1, Version 6 (Uranium Mill Tailings Remedial Action.), 96:427 (R;US)
UMTRA project water sampling and analysis plan, Tuba City, Arizona, 96:455 (R;US)
Weldon Spring Site Environmental Report for Calendar Year 1995, 96:2113 (R;US)
Well drilling summary report for well 199-N-106A, 96:379 (R;US)
Work plan for preliminary investigation of organic constituents in ground water at the New Rifle site, Rifle, Colorado. Revision 2, 96:454 (R;US)
Work plan for the Oak Ridge National Laboratory groundwater program: Continuous groundwater collection, 96:545 (R;US)
Z-Area Saltstone Disposal Facility groundwater monitoring report. Second quarter 1995, 96:614 (R;US)

Pollution

A Bayesian/geostatistical approach to the design of adaptive sampling programs, 96:347 (R;US)
The Speciation of Groundwater Contaminated with Coal Pile Leachate at the Savannah River Site, South Carolina, 96:606 (R;US)

Processing

200-ZP-1 Phase interim remedial measure conceptual design report, 96:372 (R;US)

Quantitative Chemical Analysis

RCRA groundwater monitoring data. Quarterly report, April 1, 1995–June 30, 1995, 96:504 (R;US)
UMTRA project water sampling and analysis plan, Tuba City, Arizona, 96:455 (R;US)
Validation summary report for the 200-UP-1 groundwater round 2, 96:385 (R;US)

Radiation Monitoring

Aquifer test plan in support of N Springs ERA Performance Monitoring, 96:391 (R;US)

Z-Area Saltstone Disposal Facility groundwater monitoring report. Second quarter 1995, 96:614 (R;US)

Radioactive Waste Processing

100-HR-3 and 100-KR-4 pump-and-treat drilling description of work, 96:397 (R;US)

Radiochemical Analysis

Data validation summary report for the 100-BC-5 Operable Unit Round 9 Groundwater Sampling. Revision 0, 96:389 (R;US)
Validation summary report for the 200-UP-1 groundwater round 2, 96:385 (R;US)

Radionuclide Migration

A joint Russian-American field test at the Chelyabinsk-65 (Mayak) Site: Test description and preliminary results, 96:212 (R;US)
Argonne's Expedited Site Characterization: An integrated approach to cost- and time-effective remedial investigation, 96:2292 (R;US)
Development of a three-dimensional ground-water model of the Hanford Site unconfined aquifer system: FY 1995 status report, 96:568 (R;US)
Environmental geochemistry for surface and subsurface waters in the Pajarito Plateau and outlying areas, New Mexico, 96:525 (R;US)
Facility effluent monitoring plan for K Area Spent Fuel. Revision 1, 96:2582 (R;US)
Groundwater model recalibration and remediation well network design at the F-Area Seepage Basins, 96:609 (R;US)
Hanford sitewide groundwater remediation - supporting technical information, 96:383 (R;US)
Hydrochemistry and hydrogeologic conditions within the Hanford Site upper basalt confined aquifer system, 96:566 (R;US)
Interim-status groundwater monitoring plan for the 216-B-63 trench. Revision 1, 96:594 (R;US)
Large-scale multimedia modeling applications, 96:999 (R;US)
Metallurgical Laboratory Hazardous Waste Management Facility groundwater monitoring report. First quarter 1995, 96:612 (R;US)
Microgravity survey of the Oak Ridge K-25 Site, Oak Ridge, Tennessee, 96:524 (R;US)
Mixed Waste Management Facility groundwater monitoring report. First quarter 1995, 96:611 (R;US)
Modeling groundwater contamination transport for the Hanford Environmental Disposal Facility, 96:593 (R;US)
N-Springs aquifer test report for Well 199-N-103A, 96:394 (R;US)
Optimized remedial groundwater extraction using linear programming, 96:349 (R;US)
Preliminary engineering assessment of treatment alternatives for groundwater from the Hanford 200 Area 200-BP-5 plumes, 96:380 (R;US)
Qualitative risk assessment for the 100-NR-2 Operable Unit. Revision 1, 96:357 (R;US)
Radionuclides in an underground environment, 96:537 (R;US)
Remedial investigation report on Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Volume 4: Appendix C, Risk assessment, 96:2392 (R;US)
Review of selected 100-N waste sites related to N-Springs remediation projects, 96:363 (R;US)
Risk-based decision analysis for the 200-BP-5 groundwater operable unit. Revision 2, 96:377 (R;US)
The efficiency calibration and development of environmental correction factors for an in situ high-resolution gamma spectroscopy well logging system, 96:522 (R;US)
Three multimedia models used at hazardous and radioactive waste sites, 96:670 (R;US)
Use of probabilistic methods for analysis of cost and duration uncertainties in a decision analysis framework, 96:1566 (R;US)
Weathering products of basic rocks as sorptive materials of natural radionuclides, 96:215 (R;US)

Raman Spectroscopy

Field Raman spectrograph for environmental analysis, 96:2360 (R;US)

Remedial Action

- 100-HR-3 Operable Unit focused feasibility study, 96:2123 (R;US)
- 100-KR-4 Operable Unit focused feasibility study, 96:2122 (R;US)
- 200-UP-1 groundwater pump-and-treat Phase 1 quarterly report, September 1995–November 1995, 96:381 (R;US)
- 200-ZP-1 Phase interim remedial measure conceptual design report, 96:372 (R;US)
- A demonstration of in situ bioremediation of CCL₄ at the Hanford Site, 96:569 (R;US)
- An economic decision framework using modeling for improving aquifer remediation design, 96:552 (R;US)
- Aquifer test results, 200-UP-1 operable unit IRM plume: Wells 299-W19-39 and 299-W19-36, 96:384 (R;US)
- Argonne's Expedited Site Characterization: An integrated approach to cost- and time-effective remedial investigation, 96:2292 (R;US)
- Assessment of remote sensing technologies to discover and characterize waste sites, 96:2484 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Naturita, Colorado. Revision 1, 96:448 (R;US)
- Baseline risk assessment of ground water contamination at the uranium mill tailings site near Riverton, Wyoming. Revision 1, 96:412 (R;US)
- Baseline risk assessment of ground water contamination at the uranium mill tailings site near Lakeview, Oregon. Revision 1, 96:429 (R;US)
- Baseline risk assessment of ground water contamination at the uranium mill tailings site near Durango, Colorado. Revision 1, 96:437 (R;US)
- Baseline risk assessment of ground water contamination at the uranium mill tailings site near Salt Lake City, Utah. Revision 1, 96:428 (R;US)
- Baseline risk assessment of ground water contamination at the uranium mill tailings sites near Rifle, Colorado. Revision 1, 96:440 (R;US)
- Baseline risk assessment of groundwater contamination at the uranium mill tailings site, near Gunnison, Colorado. Revision 2, 96:411 (R;US)
- Cometabolic bioreactor demonstration at the Oak Ridge K-25 Site: Final report, 96:556 (R;US)
- Conceptual air sparging decision tool in support of the development of an air sparging optimization decision tool, 96:2355 (R;US)
- Cost effectiveness of in situ bioremediation at Savannah River, 96:535 (R;US)
- DOE's Innovative Treatment Remediation Demonstration Program accelerating the implementation of innovative technologies, 96:1015 (R;US)
- Daytime multispectral scanner aerial surveys of the Oak Ridge Reservation, 1992–1994: Overview of data processing and analysis by the Environmental Restoration Remote Sensing Program, Fiscal year 1995, 96:2440 (R;US)
- Demonstration test and evaluation of ultraviolet/ultraviolet catalyzed peroxide oxidation for groundwater remediation at Oak Ridge K-25 Site, 96:495 (R;US)
- Deploying in situ bioremediation at the Hanford Site, 96:2559 (R;US)
- Description of work for vadose zone characterization of the 1301-N and 1325-N liquid waste disposal facilities, Revision 1, 96:2428 (R;US)
- Design criteria for the 200-ZP-1 interim remedial measure, 96:364 (R;US)
- Determination of kinetic coefficients for the simultaneous reduction of sulfate and uranium by *Desulfovibrio desulfuricans* bacteria, 96:2190 (R;US)
- Developing innovative environmental technologies for DOE needs, 96:2287 (R;US)
- Discovery, interception, and treatment of a groundwater plume: Oak Ridge National Laboratory, 96:407 (R;US)
- Draft programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project, 96:464 (R;US)
- Dynamic underground stripping. Innovative technology summary report, 96:473 (R;US)
- Engineering evaluation/conceptual plan for the 200-UP-1 groundwater operable unit interim remedial measure, 96:370 (R;US)
- Engineering evaluation/conceptual plan for the 200-UP-1 groundwater operable unit interim remedial measure, 96:369 (R;US)
- Evaluation of improved technologies for the removal of ⁹⁰Sr and ¹³⁷Cs from process wastewater and groundwater: FY 1995 status, 96:561 (R;US)
- Existing air sparging model and literature review for the development of an air sparging optimization decision tool, 96:2354 (R;US)
- Final Report on Testing of Off-Gas Treatment Technologies for Abatement of Atmospheric Emissions of Chlorinated Volatile Organic Compounds, 96:1128 (R;US)
- Final programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project. Volume 1, 96:466 (R;US)
- Final programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project. Volume 2, 96:468 (R;US)
- Ground water work breakdown structure dictionary, 96:438 (R;US)
- Groundwater Monitoring Plan for the 183-H Solar Evaporation Basins, 96:596 (R;US)
- Groundwater cleanup discussion paper, 96:393 (R;US)
- Hanford sitewide groundwater remediation - supporting technical information, 96:383 (R;US)
- Hanford stakeholder participation in evaluating innovative technologies: VOC product line, Passive soil vapor extraction using borehole flux tunable hybrid plasma, 96:562 (R;US)
- Hazard classification for the 200-ZP-1 Operable Unit Phase 2 and 3 interim remedial measure, 96:382 (R;US)
- In situ air stripping using horizontal wells. Innovative technology summary report, 96:471 (R;US)
- In situ bioremediation of chlorinated solvent with natural gas, 96:607 (R;US)
- Innovative technology for expedited site remediation of extensive surface and subsurface contamination, 96:2024 (R;US)
- Integrated test plan for the field demonstration of the supported liquid membrane unit, 96:359 (R;US)
- Laboratory testing of the in-well vapor-stripping system, 96:578 (R;US)
- Laboratory treatability studies preparatory to field testing a resting-cell in situ microbial filter bioremediation strategy, 96:1040 (R;US)
- Lockheed Martin Energy Systems, Inc., Groundwater Program Office. Annual report for fiscal year 1994, 96:2528 (R;US)
- Mixed waste characterization, treatment, and disposal focus area. Technology summary, 96:724 (R;US)
- Optimized remedial groundwater extraction using linear programming, 96:349 (R;US)
- Performance of immunoassay kits for site characterization and remediation, 96:2334 (R;US)
- Possible stakeholder concerns regarding volatile organic compound in arid soils integrated demonstration technologies not evaluated in the stakeholder involvement program, 96:2564 (R;US)
- Preliminary engineering assessment of treatment alternatives for groundwater from the Hanford 200 Area 200-BP-5 plumes, 96:380 (R;US)
- Preliminary investigation of the 317 Area, ANL-E, 96:1999 (R;US)
- Qualitative risk assessment for the 100-NR-2 Operable Unit. Revision 1, 96:357 (R;US)
- RCRA groundwater monitoring data. Quarterly report, April 1, 1995–June 30, 1995, 96:504 (R;US)

GROUND WATER Remedial Action

Readiness evaluation plan for operation of the 200-ZP-1 pump-and-treat system, 96:2302 (R;US)

Recommendations for computer modeling codes to support the UMTRA groundwater restoration project, 96:585 (R;US)

Relating groundwater and sediment chemistry to microbial characterization at a BTEX-contaminated site, 96:406 (R;US)

Remedial investigation work plan for the Upper East Fork Poplar Creek characterization area, Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 96:2409 (R;US)

Risk-based decision analysis for groundwater operable units, 96:365 (R;US)

Safety assessment for the proposed pilot-scale treatability tests for the 200-UP-1 and 200-ZP-1 groundwater operable units. Revision 1, 96:356 (R;US)

Site Observational Work Plan for the UMTRA Project Site at Shiprock, New Mexico. Revision, 96:434 (R;US)

Site characterization summary report for Waste Area Grouping 10 Wells at the Old Hydrofracture Facility, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2514 (R;US)

Site descriptions of environmental restoration units at the Oak Ridge K-25 Site, Oak Ridge, Tennessee, 96:200 (R;US)

Site observational work plan for the UMTRA Project site at Falls City, Texas, 96:433 (R;US)

Site observational work plan for the UMTRA Project site at Monument Valley, Arizona, 96:451 (R;US)

Site observational work plan for the UMTRA project site at Grand Junction, Colorado, 96:456 (R;US)

Soil washing technology evaluation, 96:2622 (R;US)

Stakeholder acceptance analysis ResonantSonic drilling, 96:576 (R;US)

Stakeholder acceptance analysis: In-well vapor stripping, in-situ bioremediation, gas membrane separation system (membrane separation), 96:575 (R;US)

Subsurface microbial communities and degradative capacities during trichloroethylene bioremediation, 96:401 (R;US)

Supplement to the site observational work plan for the UMTRA project site at Ambrosia Lake, New Mexico, 96:435 (R;US)

Surfactant-modified zeolites as permeable barriers to organic and inorganic groundwater contaminants, 96:490 (R;US)

Technical Assistance Contractor management plan. Revision 1, 96:2043 (R;US)

Technical considerations for the implementation of subsurface microbial barriers for restoration of groundwater at UMTRA sites, 96:586 (R;US)

Technology application analyses at five Department of Energy Sites, 96:2090 (R;US)

Treatability test report for the 200-UP-1 Operable Unit, Hanford Site, 96:500 (R;US)

UMTRA Surface Project management action process document. Final report: Revision 1, 96:2069 (R;US)

Ultrasonic process for remediation of organics-contaminated groundwater/wastewater, 96:354 (R;US)

Sampling

100-FR-3 groundwater/soil gas supplemental limited field investigation report, 96:507 (R;US)

200-ZP-1 Semi-Annual Groundwater Sampling validation summary: March 1995, 96:376 (R;US)

Basic data report for WQSP 1; WQSP 2; WQSP 3; WQSP 4; WQSP 5; WQSP6; and WQSP 6a, 96:1286 (R;US)

Buffer zone monitoring plan for the Dos Rios subdivision, Gunnison, Colorado, 96:458 (R;US)

Data validation summary report for the 100-BC-5 Operable Unit Round 8 Groundwater Sampling, 96:375 (R;US)

Data validation summary report for the 100-BC-5 Operable Unit Round 9 Groundwater Sampling. Revision 0, 96:389 (R;US)

Data validation summary report for the 100-FR-3 Operable Unit Round 8 Groundwater, 96:390 (R;US)

Data validation summary report for the 100-HR-3 Round 8, Phases 1 and 2 groundwater sampling task, 96:374 (R;US)

Data validation summary report for the 100-NR-2 operable unit groundwater sampling round 8, 96:388 (R;US)

Dual wall reverse circulation drilling with multi-level groundwater sampling for groundwater contaminant plume delineation at

Paducah Gaseous Diffusion Plant, Paducah, Kentucky, 96:558 (R;US)

FY94 site characterization and multilevel well installation at a west Bear Creek Valley research site on the Oak Ridge Reservation, 96:2536 (R;US)

Field screening sampling and analysis strategy and methodology for the 183-H Solar Evaporation Basins: Phase 2, Soils, 96:2018 (R;US)

SEAMIST™. Innovative technology summary report, 96:2348 (R;US)

Scope of work-supplemental standards-related fieldwork - Salt Lake City UMTRA Project Site, Salt Lake City, Utah, 96:2080 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Maybell, Colorado, 96:425 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Mexican Hat, Utah, 96:422 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Monument Valley, Arizona, 96:424 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Riverton, Wyoming, 96:421 (R;US)

Supplement to the UMTRA project water sampling and analysis plan, Slick Rock, Colorado, 96:431 (R;US)

UMTRA Project water sampling and analysis plan, Canonsburg, Pennsylvania. Revision 1, 96:417 (R;US)

UMTRA Project water sampling and analysis plan, Salt Lake City, Utah. Revision 1, 96:419 (R;US)

UMTRA ground water sampling techniques: Comparison of the traditional and low flow methods, 96:445 (R;US)

UMTRA project water sampling and analysis plan, Falls City, Texas. Revision 1, 96:418 (R;US)

UMTRA project water sampling and analysis plan, Naturita, Colorado. Revision 1, 96:423 (R;US)

UMTRA project water sampling and analysis plan, Tuba City, Arizona, 96:455 (R;US)

Validation summary report for the 100-HR-3 Groundwater Round 9 Phase 1 and 2, 96:387 (R;US)

Validation summary report for the 100-KR-4 Groundwater Round 8, 96:386 (R;US)

Validation summary report for the 200-UP-1 groundwater round 2, 96:385 (R;US)

Standardized Terminology

Groundwater, A century of word evolution, 96:560 (R;US)

Testing

200-BP-5 operable unit treatability test report, 96:510 (R;US)

Tracer Techniques

Application of a NAPL partitioning interwell tracer test (PITT) to support DNAPL remediation at the Sandia National Laboratories/New Mexico chemical waste landfill, 96:1034 (R;US)

Biological tracer for waste site characterization, 96:402 (R;US)

Rectangular Schlumberger resistivity arrays for delineating vadose zone clay-lined fractures in shallow tuff, 96:536 (R;US)

Water Pollution

Annual report for RCRA groundwater monitoring projects at Hanford Site facilities for 1995, 96:509 (R;US)

Groundwater monitoring plan for the 300 Area process trenches, 96:597 (R;US)

Private well/spring position paper, Rifle, Colorado, sites, 96:442 (R;US)

Streamlined RI/FS planning for the groundwater operable unit at the Weldon Spring Site, 96:348 (R;US)

Water Quality

Comment and response document for the ground water protection strategy for the Uranium Mill Tailings Site at Green River, Utah, 96:446 (R;US)

Ground water protection strategy for the Uranium Mill Tailings Site at Green River, Utah. Final, Revision 2, Version 5: Appendix E to the remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Green River, Utah, 96:462 (R;US)

Groundwater protection plan for the Environmental Restoration Disposal Facility, 96:358 (R;US)

Overview of groundwater and surface water standards pertinent to the Idaho National Engineering Laboratory. Revision 3, 96:514 (R;US)

Remedial Action Plan and Site Design for stabilization of the inactive Uranium Mill Tailings sites at Slick Rock, Colorado: Appendix C to Attachment 3, Calculations. Final, 96:2034 (R;US)

Remedial action plan for stabilization of the inactive uranium mill tailings site at Monument Valley, Arizona, 96:2082 (R;US)

PFP supply fan motor starters, 96:2201 (R;US)

Nuclear Materials Management

Acceptance test procedure for High Pressure Water Jet System, 96:317 (R;US)
Basis document for sludge stabilization. Revision 1, 96:2203 (R;US)
Development test procedure High Pressure Water Jet System, 96:2219 (R;US)
High exposure hardware removal activity readiness evaluation, 96:2019 (R;US)

Maintenance Implementation plan for T Plant. Revision 2, 96:329 (R;US)
Progress on the Hanford K basins spent nuclear fuel project, 96:1629 (R;US)
Spent Nuclear Fuel Project FY 1996 Multi-Year Program Plan WBS No. 1.4.1, Revision 1, 96:1909 (R;US)

Occupational Safety

HAMMER FY 1996 Multi-Year Program Plan: WBS #8.2, 96:1111 (R;US)
Safety assessment for the 118-B-1 Burial Ground excavation treatability tests. Revision 2, 96:1185 (R;US)
Westinghouse Hanford Company Health and Safety Performance Report. First quarter calendar year 1995, 96:326 (R;US)

Pollution Abatement

1994 Annual report on waste generation and waste minimization progress as required by DOE Order 5400.1, Hanford Site, 96:140 (R;US)
Pollution Prevention Successes Database (P2SDB) user guide, 96:138 (R;US)

Pollution Regulations

Hanford Site radionuclide national emission standards for hazardous air pollutants registered and and unregistered stack (powered exhaust) source assessment, 96:2591 (R;US)

Procurement

BHI purchase card system manager's guide. Revision 1, 96:42 (R;US)

Program Management

300 Area fuel supply facilities deactivation mission analysis report, 96:2214 (R;US)
HAMMER FY 1996 Multi-Year Program Plan: WBS #8.2, 96:1111 (R;US)
Liquid Effluent Monitoring Information System test plans releases 2.0 and 3.0, 96:2613 (R;US)
Maintenance implementation plan for fuel supply shutdown, 96:1911 (R;US)
Multi-Function Waste Tank Facility Quality Assurance Program Plan, Project W-236A. Revision 2, 96:1652 (R;US)
Richland Environmental Restoration Project management action process document, 96:143 (R;US)

Radiation Monitoring

Hanford Site background: Evaluation of existing soil radionuclide data, 96:2432 (R;US)
Quality assurance program plan for radionuclide airborne emissions monitoring, 96:2585 (R;US)
Quarterly environmental radiological survey summary. Third quarter 1995 100, 200, 300, and 600 Areas, 96:2616 (R;US)

Radiation Protection

Environmental restoration contract radiological controls performance indicator report for 1st Quarter '96, 96:44 (R;US)

Radioactive Waste Disposal

118-B-1 burial ground excavation treatability test report, 96:2430 (R;US)
216-U-12 Crib supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:33 (R;US)
Contaminated liquid drain system operability test, 96:1831 (R;US)
Disposal facility data for the interim performance, 96:1103 (R;US)
Functional design criteria, Project W-211, Initial Tank Retrieval Systems. Revision 1, 96:1642 (R;US)
Hanford Site Long-term Surface Barrier Development Program: Fiscal year 1994 highlights, 96:563 (R;US)
Historical model evaluation data requirements, 96:1705 (R;US)
In situ monitoring of grouted electrolytes, 96:1062 (R;US)
Operator coil monitoring Acceptance Test Procedure, 96:1664 (R;US)
Overview of the performance objectives and scenarios of TWRS Low-Level Waste Disposal Program. Revision 1, 96:1045 (R;US)
Pre-1970 transuranic solid waste at the Hanford Site, 96:1813 (R;US)

Preliminary design requirements document for Project W-378, low-level waste vitrification plant, 96:1087 (R;US)
Proposed plan for interim remedial measures at the 100-HR-1 Operable Unit, Hanford Site, Richland, Washington, 96:2425 (R;US)
Soil washing pilot plant treatability test for the 100-DR-1 Operable Unit, 96:835 (R;US)
Statements of work for FY 1995 to 2000, 96:1098 (R;US)
Vapor and Gas Sampling of Single-Shell Tank 241-TX-105 Using the Vapor Sampling System, 96:1844 (R;US)
Vapor and gas sampling of single-shell tank 241-BX-104 using the vapor sampling system, 96:1842 (R;US)
Vapor and gas sampling of single-shell tank 241-BY-103 using the vapor sampling system, 96:1848 (R;US)
Vapor and gas sampling of single-shell tank 241-BY-107 using the Vapor Sampling System, 96:1846 (R;US)
Vapor and gas sampling of single-shell tank 241-BY-108 using the vapor sampling system, 96:1847 (R;US)
Vapor and gas sampling of single-shell tank 241-BY-110 using the vapor sampling system, 96:1849 (R;US)
Vapor and gas sampling of single-shell tank 241-BY-111 using the vapor sampling system, 96:1850 (R;US)
Vapor and gas sampling of single-shell tank 241-BY-112 using the vapor sampling system, 96:1851 (R;US)
Vapor and gas sampling of single-shell tank 241-C-108 using the vapor sampling system, 96:1839 (R;US)
Vapor and gas sampling of single-shell tank 241-C-109 using the vapor sampling system, 96:1840 (R;US)
Vapor and gas sampling of single-shell tank 241-C-111 using the vapor sampling system, 96:1845 (R;US)
Vapor and gas sampling of single-shell tank 241-C-112 using the vapor sampling system, 96:1841 (R;US)
Vapor and gas sampling of single-shell tank 241-T-107 using the vapor sampling system, 96:1852 (R;US)
Vapor and gas sampling of single-shell tank 241-TX-118 using the vapor sampling system, 96:1843 (R;US)
Waste characterization of the 101-SY hydrogen mitigation mixing pump shipping container, 96:1875 (R;US)
Waste specification system, 96:1048 (R;US)

Radioactive Waste Facilities

100 Area rock screening study, 96:2315 (R;US)
100 Area source operable unit focused feasibility study. Volume 1, 96:127 (R;US)
296-B-10 stack monitoring and sampling system annual system assessment report, 96:1878 (R;US)
300 Area dangerous waste tank management system: Compliance plan approach. Final report, 96:979 (R;US)
60-day safety screen results for tank 241-BY-106, rotary mode, cores 64 and 65, 96:1683 (R;US)
Acceptance Test Procedure for Cathodic Protection, Rectifier 11, 96:1638 (R;US)
Acceptance criteria for non-destructive examination of double-shell tanks, 96:1662 (R;US)
Aqueous sample from B-Plant, Tank 9-1. Revision 1, 96:1682 (R;US)
Central waste complex interim safety basis, 96:1096 (R;US)
Compliance matrix for the mixed waste disposal facilities, trenches 31 and 34, burial ground 218-W-5. Revision 2, 96:1102 (R;US)
Data quality objective to support resolution of the organic fuel rich tank safety issue, 96:1703 (R;US)
Data quality objectives for generic in-tank health and safety vapor issue resolution. Revision 1, 96:1701 (R;US)
Data requirements for the Ferrocyanide Safety Issue developed through the data quality objectives process. Revision 1, 96:1704 (R;US)
Equipment sizing calculations for the Extensive Separations Alternative engineering data package, 96:1697 (R;US)
Evaluation of HWVP feed preparation chemistry for an NCAW simulant - Fiscal year 1993: Effect of noble metals concentration on offgas generation and ammonia formation, 96:1354 (R;US)

HANFORD RESERVATION
Radioactive Waste Facilities

Evaluation of remaining life of the double-shell tank waste systems, 96:1752 (R;US)
 Fire hazard analysis of the radioactive mixed waste trenches, 96:1094 (R;US)
 Forty-five day safety screen results for Tank 241-C-107, push mode, cores 68 and 69, 96:1686 (R;US)
 Hazard and operability study of the multi-function Waste Tank Facility. Revision 1, 96:1651 (R;US)
 Interim remedial measure proposed plan for the 200-UP-1 operable unit, Hanford, Washington, Revision 0, 96:501 (R;US)
 Long-term decontamination engineering study. Volume 3: Appendix E, Appendix F, Appendix G, Appendix H, 96:2229 (R;US)
 N-Springs barrier wall drilling program data package. Revision 1, 96:360 (R;US)
 Nonradioactive air emissions notice of construction for the stabilization of the 1300-N emergency dump basin, 96:2431 (R;US)
 Operational test procedure for SY tank farm replacement exhauster unit, 96:1835 (R;US)
 Operational waste volume projection, 96:1708 (R;US)
 Project W-320 ALARA Plan, 96:1658 (R;US)
 RCRA Facility investigation/corrective measures study work plan for the 100-DR-2 Operable Unit, Hanford Site, Richland, Washington. Revision 2, 96:2420 (R;US)
 Radiation screening of excavated waste at Hanford's 118-B-1 burial site, 96:2560 (R;US)
 Software Development Plan for the 241-AY and 241-AZ Tank Farm MICON automation system, 96:1868 (R;US)
 Solid Waste Operations Complex W-113, Detail Design Report (Title II). Volume 1: Title II design report, 96:1084 (R;US)
 Solid Waste Operations Complex W-113, Detail Design Report (Title II). Volume 3: Specifications, 96:1085 (R;US)
 Standard-C hydrogen monitoring system. Acceptance test report, 96:1669 (R;US)
 Supporting Document for the Southeast Quadrant Historical Tank Content Estimate Report for AW-Tank Farm - Volume I and II, 96:1711 (R;US)
 Supporting document for the southeast quadrant historical tank content estimate report for AY-tank farm, 96:1712 (R;US)
 Supporting document for the southeast quadrant historical tank content estimate report for AZ-tank farm (Volume 1 and 2), 96:1713 (R;US)
 T Plant canyon deck-level allowable floor-load study, 96:2230 (R;US)
 Tank 241-BY-108 vapor sampling and analysis tank characterization report. Revision 1, 96:1732 (R;US)
 Tank Farm Waste Transfer Compatibility Program, 96:1827 (R;US)
 Technology basis for the Liquid Effluent Retention Facility Operating Specifications. Revision 3, 96:1083 (R;US)
 Test report - 241-AN-274 Caustic Pump Control Building, 96:1673 (R;US)
 Void fraction instrument software, Version 1.2: Acceptance test procedure, 96:2605 (R;US)
 Waste volume reduction factors for potential 242-A evaporator feed, 96:1876 (R;US)

Radioactive Waste Management

1994 Annual report on waste generation and waste minimization progress as required by DOE Order 5400.1, Hanford Site, 96:140 (R;US)
 1995 Baseline solid waste management system description, 96:983 (R;US)
 216-A-36B Crib supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:31 (R;US)
 241-CX-70, 241-CX-71, and 241-CX-72 underground storage tanks at the strontium semiworks facility supplemental information to the Hanford Facility Contingency Plan, 96:1191 (R;US)
 300 Area fuel supply facilities deactivation mission analysis report, 96:2214 (R;US)
 300 Area waste acid treatment system closure plan. Revision 1, 96:2116 (R;US)

308 Building deactivation mission analysis report, 96:2213 (R;US)
 309 Building deactivation mission analysis report, 96:2220 (R;US)
 324 Building Compliance Project: Selection and evaluation of alternatives for the removal of solid remote-handled mixed wastes from the 324 Building, 96:981 (R;US)
 45-Day safety screen results for tank 241-C-105, push mode, cores 72 and 76, 96:1688 (R;US)
 45-Day safety screen results for tank 241-U-202, push mode, cores 75 and 78, 96:1690 (R;US)
 A parametric study of double-shell tank response to internal high-frequency pressure loading, 96:1605 (R;US)
 Accelerated safety analyses structural analyses Phase 2 ACI code evaluations of the maximum loads in the concrete dome, haunch & upper wall of double-shell waste storage tanks, 96:1866 (R;US)
 Acceptability of Bettis Laboratories waste shipment to WHC solid waste, 96:1635 (R;US)
 Acceptance test procedure for the 105-KW isolation barrier leak rate, 96:602 (R;US)
 An analysis of potential impacts to the groundwater monitoring networks in the Central Plateau. Revision 0, 96:508 (R;US)
 Application of macro material flow modeling to the decision making process for integrated waste management systems, 96:997 (R;US)
 Approach and plan for cleanup actions in the 100-FR-2 operable unit of the Hanford Site, Revision 0, 96:834 (R;US)
 Assessment for potential radionuclide emissions from stacks and diffuse and fugitive sources on the Hanford Site, 96:291 (R;US)
 Assessment of unabated facility emission potentials for evaluating airborne radionuclide monitoring requirements at Pacific Northwest National Laboratory - 1995, 96:2189 (R;US)
 Assuring safe interim storage of Hanford high-level tank wastes, 96:1627 (R;US)
 B plant mission analysis report, 96:2231 (R;US)
 CRPE: Cesium Return Program Experience FY 1995, 96:1613 (R;US)
 Compliance matrix for the mixed waste disposal facilities, trenches 31 and 34, burial ground 218-W-5. Revision 2, 96:1102 (R;US)
 Data validation summary report for the 100-FR-3 Operable Unit Round 8 Groundwater, 96:390 (R;US)
 Data validation summary report for the 100-NR-2 operable unit groundwater sampling round 8, 96:388 (R;US)
 Decontamination systems information and research program - Literature review in support of development of standard test protocols and barrier design models for in situ formed barriers project, 96:1263 (R;US)
 Description of work for vadose zone characterization of the 1301-N and 1325-N liquid waste disposal facilities, Revision 1, 96:2428 (R;US)
 Detailed design data package: 3.1a-Film cooler pressure drop data; Item 3.2a - SBS packing selection; Item 3.2b, 3.2c - Pressure drop data for SBS distribution plate; and Item 3.2e - SBS distribution plate and liquid risers. PHTD pilot-scale melter testing system cost account milesonte 1.2.2.04.15A, 96:1507 (R;US)
 Development and implementation of an analytical quality assurance plan at the Hanford site, 96:235 (R;US)
 Development of models and software for liquidus temperatures of glasses of HWVP products. Final report, 96:1502 (R;US)
 Dry-out and low temperature calcination of DST/SST waste blend high temperature melter feed, 96:1489 (R;US)
 Educational understanding of pollution prevention in decontamination and decommissioning/environmental restoration activities, 96:2194 (R;US)
 Environmental restoration disposal facility applicable or relevant and appropriate requirements study report. Revision 00, 96:2303 (R;US)
 Evaluation of HWVP feed preparation chemistry for an NCAW simulant - Fiscal Year 1991: Evaluation of offgas generation,

- reductant requirements and thermal stability: Technical report, 96:1499 (R;US)
- Evaluation of high-level waste vitrification feed preparation chemistry for an NCAW simulant, FY 1994: Alternate flow-sheets (DRAFT), 96:1490 (R;US)

Work plan for the identification of techniques for in-situ sensing of layering/interfaces of Hanford high level waste tanks, 96:1901 (R;US)

Radioactive Waste Processing

242-A Evaporator Waste Analysis Plan. Revision 5, 96:1092 (R;US)

242-A Evaporator quality assurance plan. Revision 2, 96:1838 (R;US)

Alkaline-side extraction of technetium from tank waste using crown ethers and other extractants, 96:2648 (R;US)

Assessment of commercially available ion exchange materials for cesium removal from highly alkaline wastes, 96:2654 (R;US)

Cesium ion exchange using actual waste: Column size considerations, 96:1517 (R;US)

Chloride removal from vitrification offgas, 96:1879 (R;US)

Comparison of organic and inorganic ion exchangers for removal of cesium and strontium from simulated and actual Hanford 241-AW-101 DSSF tank waste, 96:1516 (R;US)

Description of waste pretreatment and interfacing systems dynamic simulation model, 96:1706 (R;US)

Evaluation of Hanford high level waste vitrification chemistry for an NCAW simulant – FY 1994: Potential exothermic reactions in the presence of formic acid, glycolic acid, and oxalic acid, 96:1384 (R;US)

Glass composition development for plasma processing of Hanford high sodium content low-level radioactive liquid waste, 96:1136 (R;US)

Hanford high-level waste melter system evaluation data packages, 96:1496 (R;US)

Initial evaluation of two organic resins and their ion exchange column performance for the recovery of cesium from Hanford alkaline wastes, 96:2655 (R;US)

Liquid Effluent Retention Facility/Effluent Treatment Facility Hazards Assessment, 96:1077 (R;US)

Mid-year report: IPC liaison and chemistry of thermal reconstitution, 96:1912 (R;US)

Preliminary design requirements document for Project W-378, low-level waste vitrification plant, 96:1087 (R;US)

Process control plan for 242-A Evaporator Campaign 95-1, 96:1100 (R;US)

Project C-018H, 242-A evaporator/PUREX Plant Process Condensate Treatment Facility Instrumentation and Control (I&C), 96:2198 (R;US)

Solid waste handling, 96:1880 (R;US)

Steam reforming as a method to treat Hanford underground storage tank (UST) wastes, 96:1540 (R;US)

Testing and development strategy for the tank waste remediation system, 96:1871 (R;US)

Vitrification technology for Hanford Site tank waste, 96:1615 (R;US)

Radioactive Waste Storage

1995 solid waste 30-year container volume summary, 96:1052 (R;US)

242-A/LERF programmable Logic Controller Ladder. Revision 1, 96:1082 (R;US)

45-Day safety screen results for Tank 241-B-112, auger samples 95-AUG-014 and 95-AUG-015, 96:1685 (R;US)

45-Day safety screen results for Tank 241-BY-103, auger samples 95-AUG-012 and 95-AUG-013, 96:1684 (R;US)

45-Day safety screen results for Tank 241-C-101, auger sample 95-AUG-019, 96:1691 (R;US)

45-Day safety screen results for Tank 241-U-201, push mode, cores 70, 73 and 74, 96:1687 (R;US)

45-day safety screen results and final report for Tank 241-C-203, Auger samples 95 AUG-020 and 95-AUG-021, 96:1692 (R;US)

Acoustic imaging of underground storage tank wastes: A feasibility study. Final report, 96:1335 (R;US)

Analysis of organic carbon and moisture in Hanford single-shell tank waste, 96:1361 (R;US)

Biannual recalibration of two spectral gamma-ray logging systems used for baseline characterization measurements in the Hanford Tank Farms. Vadose Zone Characterization Project at the Hanford Tank Farms, 96:1260 (R;US)

CSER 95-008: Criticality storage category for grouted K Basin cartridge filters at CWC, 96:319 (R;US)

Detection of localized and general corrosion of mild steel in simulated defense nuclear waste solutions using electrochemical noise analysis, 96:1625 (R;US)

- Development of in-structure design spectra for dome mounted equipment on underground waste storage tanks at the Hanford Site, 96:1883 (R;US)
- Engineering Task Plan for Tank 241-C-106 contingency chiller definitive design, 96:1821 (R;US)
- Engineering evaluation of alternatives: Managing the assumed leak from single-shell Tank 241-T-101, 96:1599 (R;US)
- Engineering evaluation of alternatives: Technologies for monitoring interstitial liquids in single-shell tanks, 96:1589 (R;US)
- Ferrocyanide Safety Program: Analysis of postulated energetic reactions and resultant aerosol generation in Hanford Site Waste Tanks, 96:1600 (R;US)
- Functional design criteria SY tank farm cathodic protection, 95G-EWW-430, 96:1660 (R;US)
- Functional design criteria for the retained gas sampler system, 96:1825 (R;US)
- Functions and requirements for Hanford single-shell tank leakage detection and monitoring, 96:1826 (R;US)
- Gas generation from Tank 241-SY-103 waste, 96:1480 (R;US)
- Hazard categorization and baseline documentation for the Sodium Storage Facility. Revision 1, 96:2210 (R;US)
- Ignitability testing for core drilling system. Final report, 96:1894 (R;US)
- Improving sample recovery, 96:2609 (R;US)
- Moisture measurement for high-level-waste tanks using copper activation probe in cone penetrometer, 96:1451 (R;US)
- Moisture monitoring and control system engineering study, 96:1816 (R;US)
- Multi-function Waste Tank Facility path forward engineering analysis - Technical Task 3.6, Estimate of operational risk in 200 West Area, 96:1649 (R;US)
- Operability test procedure for rotary mode core sampling system #3, 96:1828 (R;US)
- Operability test procedure for rotary mode core sampling system #4, 96:1829 (R;US)
- Operability test report for the TK-900 beta/gamma liquid effluent monitoring system, 96:2604 (R;US)
- Permeation of Tank C-103 sludge simulant by organic solvent, 96:1368 (R;US)
- Quarterly report on the Ferrocyanide Safety Program for the period ending December 31, 1995, 96:1586 (R;US)
- Standard-B auto grab sampler hydrogen monitoring system, Acceptance Test Report, 96:1668 (R;US)
- Strategy for resolution of the Flammable Gas Safety Issue, 96:1877 (R;US)
- Stress evaluation of the primary tank of a double-shell underground storage tank facility, 96:1608 (R;US)
- Supporting document for the Southeast Quadrant historical tank content estimate report for AN-Tank Farm. Vols. I and II, 96:1709 (R;US)
- Supporting document for the Southeast Quadrant historical tank content estimate report for SY-tank farm, 96:1714 (R;US)
- Supporting document for the Southeast quadrant historical tank content estimate report for AP-tank farm. Volume 1 and 2, 96:1710 (R;US)
- TWRS privatization support project waste characterization database development, 96:1475 (R;US)
- Tank 241-A-101 headspace gas and vapor characterization results for samples collected in June 1995, 96:1801 (R;US)
- Tank 241-AX-102 headspace gas and vapor characterization results for samples collected in June 1995, 96:1802 (R;US)
- Tank 241-B-101 tank characterization plan, 96:1889 (R;US)
- Tank 241-B-203 Push Mode Core Sampling and Analysis Plan, 96:1896 (R;US)
- Tank 241-BY-104 vapor sampling and analysis tank characterization report, 96:1719 (R;US)
- Tank 241-BY-105 vapor sampling and analysis tank characterization report, 96:1722 (R;US)
- Tank 241-BY-106 vapor sampling and analysis tank characterization report, 96:1725 (R;US)
- Tank 241-BY-107 headspace gas and vapor characterization results for samples collected in March 1994 and October 1994, 96:1730 (R;US)
- Tank 241-BY-108 vapor sampling and analysis tank characterization report, 96:1731 (R;US)
- Tank 241-BY-110 vapor sampling and analysis tank characterization report, 96:1748 (R;US)
- Tank 241-C-101 vapor sampling and analysis tank characterization report, 96:1785 (R;US)
- Tank 241-C-102 headspace gas and vapor characterization results for samples collected in August 1994, 96:1788 (R;US)
- Tank 241-C-110 headspace gas and vapor characterization results for samples collected in August 1994, 96:1798 (R;US)
- Tank 241-C-111 vapor sampling and analysis tank characterization report, 96:1739 (R;US)
- Tank 241-C-112 vapor sampling and analysis tank characterization report, 96:1742 (R;US)
- Tank 241-S-107 tank characterization plan, 96:1888 (R;US)

- Tank waste remediation system: An update, 96:1606 (R;US)
- Test plan for auger sampler improvements, 96:1892 (R;US)
- Vapor and gas sampling of Single-Shell Tank 241-T-111 using the vapor sampling system, 96:1853 (R;US)
- Vapor and gas sampling of Single-Shell Tank 241-U-107 using the Vapor Sampling System, 96:1861 (R;US)
- Vapor and gas sampling of Single-Shell Tank 241-U-111 using the vapor sampling system, 96:1862 (R;US)
- Vapor and gas sampling of single-shell tank 241-B-103 using the vapor sampling system, 96:1854 (R;US)
- Vapor and gas sampling of single-shell tank 241-S-102 using the vapor sampling system, 96:1855 (R;US)
- Vapor and gas sampling of single-shell tank 241-S-111 using the vapor sampling system, 96:1856 (R;US)
- Vapor and gas sampling of single-shell tank 241-SX-103 using the vapor sampling system, 96:1857 (R;US)
- Vapor and gas sampling of single-shell tank 241-SX-106 using the vapor sampling system, 96:1858 (R;US)
- Vapor and gas sampling of single-shell tank 241-TY-101 using the vapor sampling system, 96:1859 (R;US)
- Vapor and gas sampling of single-shell tank 241-TY-103 using the vapor sampling system, 96:1860 (R;US)
- Vapor space characterization of Waste Tank 241-S-111: Results from samples collected on 3/21/95, 96:1423 (R;US)
- Vapor space characterization of Waste Tank 241-TY-104 (in situ): Results from samples collected on 8/5/94, 96:1425 (R;US)
- Vapor space characterization of Waste Tank 241-TY-104: Results from samples collected on 4/27/95, 96:1403 (R;US)
- Vapor space characterization of Waste Tank 241-U-105: Results from samples collected on 2/24/95, 96:1412 (R;US)
- Vapor space characterization of Waste Tank 241-U-106 (in situ): Results from samples collected on 8/25/94, 96:1421 (R;US)
- Vapor space characterization of Waste Tank 241-U-107: Results from samples collected on 2/17/95, 96:1420 (R;US)
- Vapor space characterization of waste Tank 241-B-103: Results from samples collected on 2/8/95, 96:1414 (R;US)

HANFORD RESERVATION
Radioactive Waste Storage

Vapor space characterization of waste Tank 241-BY-103: Results from samples collected on 11/1/94, 96:1413 (R;US)

Vapor space characterization of waste Tank 241-BY-104 (in situ): Results from samples collected on 4/22/94, 96:1362 (R;US)

Vapor space characterization of waste Tank 241-BY-106 (in situ): Results from samples collected on 5/4/94 and 5/5/94, 96:1358 (R;US)

Vapor space characterization of waste Tank 241-BY-108: Results from samples collected on 10/27/94, 96:1376 (R;US)

Vapor space characterization of waste Tank 241-C-104: Results from samples collected on 2/17/94 and 3/3/94, 96:1378 (R;US)

Vapor space characterization of waste Tank 241-C-107: Results from samples collected on 9/29/94, 96:1424 (R;US)

Vapor space characterization of waste Tank 241-C-108: Results from samples collected through the vapor sampling system on 8/5/94, 96:1360 (R;US)

Vapor space characterization of waste Tank 241-C-109 (in situ): Results from samples collected on 6/23/94, 96:1363 (R;US)

Vapor space characterization of waste Tank 241-C-111 (in situ): Results from samples collected on 6/20/94, 96:1364 (R;US)

Vapor space characterization of waste Tank 241-SX-103: Results from samples collected on 3/23/95, 96:1447 (R;US)

Vapor space characterization of waste Tank 241-SX-106: Results from samples collected on 3/24/95, 96:1387 (R;US)

Vapor space characterization of waste Tank 241-TX-118 (in situ): Results from samples collected on 9/7/94, 96:1422 (R;US)

Vapor space characterization of waste Tank 241-TY-101: Results from samples collected on 4/6/95, 96:1415 (R;US)

Vapor space characterization of waste Tank 241-U-103: Results from samples collected on 2/15/95, 96:1446 (R;US)

Variability and scaling of hydraulic properties for 200 Area soils, Hanford Site, 96:2590 (R;US)

Waste segregation analysis for salt well pumping in the 200 W Area – Task 3.4, 96:1650 (R;US)

Work plan for defining a standard inventory estimate for wastes stored in Hanford site underground tanks, 96:1904 (R;US)

Radiometric Surveys

Quarterly environmental radiological survey summary. Fourth quarter, 1995 100, 200, 300, and 600 Areas, 96:2617 (R;US)

Quarterly environmental radiological survey summary: First quarter 1995 100, 200, 300, and 600 Areas, 96:2615 (R;US)

Remedial Action

100 Area source operable unit focused feasibility study. Volume 1, 96:127 (R;US)

100 Areas soil washing tradeoff study, 96:2308 (R;US)

100 and 300 Area Burial Ground remediation study, 96:664 (R;US)

100-B/C demonstration project final report, 96:663 (R;US)

100-BC-1 Excavation Demonstration Project Plan, 96:2128 (R;US)

100-BC-1 Excavation Demonstration Project Plan. Revision 2, 96:137 (R;US)

100-FR-3 groundwater/soil gas supplemental limited field investigation report, 96:507 (R;US)

100-HR-3 and 100-KR-4 interim remedial measure pump-and-treat acquisition and design strategy plan, 96:396 (R;US)

100-HR-3 and 100-KR-4 pump-and-treat drilling description of work, 96:397 (R;US)

105-DR Large Sodium Fire Facility decontamination, sampling, and analysis plan, 96:2207 (R;US)

200-BP-5 operable unit treatability test report, 96:510 (R;US)

200-UP-1 groundwater pump-and-treat Phase 1 quarterly report, September 1995–November 1995, 96:381 (R;US)

200-UP-1 vertical profiling activity summary report, 96:362 (R;US)

218 E-8 Borrow Pit Demolition Site clean closure soil evaluation report, 96:2208 (R;US)

300 Area Process Trenches supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75). Revision 1, 96:37 (R;US)

300-FF-1 operable unit predesign report, 96:2310 (R;US)

An analysis of potential impacts to the groundwater monitoring networks in the Central Plateau. Revision 0, 96:508 (R;US)

Aquifer test results, 200-UP-1 operable unit IRM plume: Wells 299-W19-39 and 299-W19-36, 96:384 (R;US)

Bechtel Hanford, Inc./ERC team health and safety plan Environmental Restoration Disposal Facility operations, 96:661 (R;US)

Data fusion analysis of a surface direct-current resistivity and well pick data set, 96:2543 (R;US)

Design criteria for the 200-ZP-1 interim remedial measure, 96:364 (R;US)

Design, operations, and maintenance of the soil vapor extraction systems for the 200 West Area Carbon Tetrachloride Expedited Response Action, 96:657 (R;US)

Development and implementation of an analytical quality assurance plan at the Hanford site, 96:235 (R;US)

Engineering evaluation/conceptual plan for the 200-UP-1 Groundwater Operable Unit interim remedial measure. Revision 2, 96:371 (R;US)

Engineering evaluation/conceptual plan for the 200-UP-1 groundwater operable unit interim remedial measure, 96:369 (R;US)

Environmental Restoration Contractor Waste Minimization and Pollution Prevention Plan. Revision 1, 96:26 (R;US)

Environmental Restoration Contractor Waste Minimization and Pollution Prevention Plan, 96:25 (R;US)

Final hazard classification for N basin water filtration and sediment relocation operations, 96:656 (R;US)

Final hazard classification of the 100-D Pond voluntary remediation project, 96:667 (R;US)

Fiscal year 1994 1/25-scale sludge mobilization testing, 96:1386 (R;US)

Fiscal year 1996 U.S. Department of Energy, Richland Operations Office Site summary baseline, 96:146 (R;US)

Focused feasibility study of engineered barriers for waste management units in the 200 areas, 96:124 (R;US)

General design criteria for Richland Environmental Restoration Project, 96:662 (R;US)

Hanford Remedial Action Environmental Impact Statement, Richland, Washington. Implementation Plan, 96:125 (R;US)

Hanford Site Risk Assessment Methodology. Revision 3, 96:123 (R;US)

Hanford Site performance summary – EM funded programs, July 1995, 96:331 (R;US)

Hanford statewide groundwater flow and transport model calibration report, 96:392 (R;US)

Hazard classification for the 200-ZP-1 Operable Unit Phase 2 and 3 interim remedial measure, 96:382 (R;US)

Interim remedial measure proposed plan for the 200-UP-1 operable unit, Hanford, Washington, Revision 0, 96:501 (R;US)

Iodine-129 contamination: Nature, extent, and treatment technologies, 96:506 (R;US)

Mitigation action plan for liquid waste sites in the 100-BC-1, 100-DR-1, and 100-HR-1 units, 96:837 (R;US)

N Area Project Maintenance Plan, 96:2015 (R;US)

N Springs expedited response action performance monitoring plan. Revision 1, 96:366 (R;US)

N Springs pump-and-treat well design. Revision 2, 96:361 (R;US)

N-Springs Pump and Treat Database user guide, 96:2012 (R;US)

Preliminary hazard classification for N-Basin intrusive activities, 96:2021 (R;US)

Proposal plan for interim remedial measures at the 100-KR-1 operable unit, Revision 0, 96:2125 (R;US)

Proposed plan for interim remedial measure at the 100-KR-4 operable unit, Revision 1, 96:2429 (R;US)

RARA FY 1994 summary report, 96:655 (R;US)

Radioactive Tank Waste Remediation Focus Area. Technology summary, 96:1254 (R;US)

Radiological characterization survey methodology and sampling and analysis strategy for the 104-B-1 Tritium Vault and 104-B-2 Tritium Laboratory, 96:2319 (R;US)

Readiness evaluation plan for operation of the 200-ZP-1 pump-and-treat system, 96:2302 (R;US)
Remedial investigation/feasibility study report for the 300-FF-5 Operable Unit, 96:2124 (R;US)
Richland Environmental Restoration Project management action process document, 96:143 (R;US)
Richland Environmental Restoration Project management action process document, 96:2130 (R;US)
Risk evaluation of remedial alternatives for the Hanford Site, 96:2117 (R;US)
Risk-based decision analysis for groundwater operable units, 96:365 (R;US)
Sample activity report for cobalt sampling at the 300-FF-1 South Process Pond, 96:2307 (R;US)
Six phase soil heating. Innovative technology summary report, 96:474 (R;US)
Stakeholder acceptance analysis: Passive soil vapor extraction using borehole flux, 96:2565 (R;US)
Subproject plan for demonstration of 3M technology for treatment of N Basin water, 96:2628 (R;US)
Technical basis and radiological release plan for trackhoe #H0-17-5669 at 100 BC-1, 96:2011 (R;US)
The use of bench- and field-scale data for design of an in situ carbon tetrachloride bioremediation system, 96:571 (R;US)
Work plan for the excavation of contaminated materials from 100-D Ponds, 96:666 (R;US)

Remote Viewing Equipment

Robotics and remote systems applications, 96:2279 (R;US)

Risk Assessment

Nonradiological chemical pathway analysis and identification of chemicals of concern for environmental monitoring at the Hanford Site, 96:231 (R;US)
Pickling Acid Crib remedial investigation/feasibility study, 96:2120 (R;US)
Risk assessment for the on-site transportation of radioactive wastes for the U.S. Department of Energy Waste Management programmatic environmental impact statement, 96:17 (R;US)

Robots

Robotics and remote systems applications, 96:2279 (R;US)

Safety Analysis

A comparative review of accident studies from recent environmental impact statements, 96:16 (R;US)
Final hazard classification for N basin water filtration and sediment relocation operations, 96:656 (R;US)

Sanitary Landfills

126-F-1 radiological investigation and downposting. Final report, 96:668 (R;US)
Sodium Dichromate expedited response action assessment. Revision 2, 96:828 (R;US)

Seismic Surveys

Geophysical investigation of the 116-H-1 liquid waste disposal trench, 100-HR-1 operable unit, 96:2311 (R;US)

Site Characterization

300-FF-1 operable unit predesign report, 96:2310 (R;US)
Calibration models for density borehole logging - construction report, 96:2556 (R;US)
Calibration models for measuring moisture in unsaturated formations by neutron logging, 96:2557 (R;US)
Description of work for vadose zone characterization of the 1301-N and 1325-N liquid waste disposal facilities, Revision 1, 96:2428 (R;US)
Geologic, geochemical, microbiologic, and hydrologic characterization at the In Situ Redox Manipulation Test Site, 96:2550 (R;US)
Geophysical investigation of the 116-H-1 liquid waste disposal trench, 100-HR-1 operable unit, 96:2311 (R;US)
Geophysical investigations in the group II sites 100-D area, 96:2318 (R;US)
Hanford Site ground-water monitoring for 1994, 96:564 (R;US)
Hanford statewide groundwater flow and transport model calibration report, 96:392 (R;US)
Quarterly environmental radiological survey summary. Third quarter 1995 100, 200, 300, and 600 Areas, 96:2616 (R;US)

Safety assessment for the 118-B-1 Burial Ground excavation treatability tests. Revision 2, 96:1185 (R;US)

Solar Ponds

Unit-specific contingency plan for the 183-H solar evaporation basins. Revision 1, 96:36 (R;US)

Solid Wastes

Application of macro material flow modeling to the decision making process for integrated waste management systems, 96:997 (R;US)
Limited field investigation report for the 100-HR-2 Operable Unit, 96:2421 (R;US)
Solid Waste Operations Complex W-113: Project cost estimate. Preliminary design report. Volume IV, 96:840 (R;US)

Spent Fuel Storage

Characterization of stored defense production spent nuclear fuel and associated materials at Hanford Site, Richland Washington: Environmental assessment, 96:2342 (R;US)
Spent Nuclear Fuel Project technical baseline document fiscal year 1995. Volume 2: Supporting data, 96:2218 (R;US)

Storage Facilities

A systematic look at Tank Waste Remediation System privatization, 96:1470 (R;US)
Acoustic imaging of underground storage tank wastes: A feasibility study. Final report, 96:1335 (R;US)
Alkaline-side extraction of technetium from tank waste using crown ethers and other extractants, 96:2648 (R;US)
Biannual recalibration of two spectral gamma-ray logging systems used for baseline characterization measurements in the Hanford Tank Farms. Vadose Zone Characterization Project at the Hanford Tank Farms, 96:1260 (R;US)
Concrete material characterization reinforced concrete tank structure Multi-Function Waste Tank Facility, 96:1643 (R;US)
Cost benefit and risk assessment for selected tank waste process testing alternatives, 96:1815 (R;US)
Decontamination systems information and research program - Literature review in support of development of standard test protocols and barrier design models for in situ formed barriers project, 96:1263 (R;US)
Effect of colloidal aggregation on the sedimentation and rheological properties of tank waste, 96:1429 (R;US)
Engineering evaluation of alternatives: Managing the assumed leak from single-shell Tank 241-T-101, 96:1599 (R;US)
Engineering evaluation of alternatives: Technologies for monitoring interstitial liquids in single-shell tanks, 96:1589 (R;US)
Fiscal year 1994 1/25-scale sludge mobilization testing, 96:1386 (R;US)
Half-liter supernatant sampler system engineering work plan, 96:1903 (R;US)
Hanford Site Long-term Surface Barrier Development Program: Fiscal year 1994 highlights, 96:563 (R;US)
Maintenance implementation plan for the B Plant/WESF. Revision 4, 96:1905 (R;US)
Master equipment list - Phase 1. Revision 1, 96:1676 (R;US)
Modeling needs assessment for Hanford Tank Farm Operations. Vadose Zone Characterization Project at the Hanford Tank Farms, 96:1259 (R;US)
Multi-function Waste Tank Facility path forward engineering analysis - Technical Task 3.6, Estimate of operational risk in 200 West Area, 96:1649 (R;US)
Radioactive Tank Waste Remediation Focus Area. Technology summary, 96:1254 (R;US)
Removal of strontium and transuranics from Hanford waste via hydrothermal processing - FY 1994/95 test results, 96:2555 (R;US)
Single-shell tank closure work plan. Revision A, 96:1266 (R;US)
Stress evaluation of the primary tank of a double-shell underground storage tank facility, 96:1608 (R;US)
TWRS privatization bibliography. Revision 2, 96:240 (R;US)
TWRS privatization support project waste characterization database development, 96:1475 (R;US)
Tank Waste Treatment Science Task quarterly report for October-December 1994, 96:1430 (R;US)
Tank waste remediation system: An update, 96:1606 (R;US)

HANFORD RESERVATION

Storage Facilities

Topographical mapping system for hazardous and radiological environments, 96:2240 (R;US)

Vitrification technology for Hanford Site tank waste, 96:1615 (R;US)

Waste Encapsulation and Storage Facility mission analysis report, 96:323 (R;US)

Tanks

45-Day safety screen results for tank 241-U-203, push mode, cores 79 and 80, 96:1689 (R;US)

Final report for the 1304-N Emergency Dump Tank dose reduction, 96:2010 (R;US)

Functional design criteria SY tank farm cathodic protection, 95G-EWW-430, 96:1660 (R;US)

Safety analysis for push-mode and rotary-mode core sampling. Rev. 1, 96:1865 (R;US)

Tank 241-C-108 vapor sampling and analysis tank characterization report, 96:1733 (R;US)

Vapor and Gas Sampling of Single-Shell Tank 241-TX-105 Using the Vapor Sampling System, 96:1844 (R;US)

Terrestrial Ecosystems

Concentrations of radionuclides in terrestrial vegetation on the Hanford site of potential interest to Native Americans, 96:2545 (R;US)

Waste Disposal

100-N in situ treatment zone design and acquisition strategy plan, 96:395 (R;US)

Hanford Site Long-term Surface Barrier Development Program: Fiscal year 1994 highlights, 96:563 (R;US)

Waste Management

200 Area TEF effluent sampling and analysis plan, 96:600 (R;US)

216-A-10 Crib supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:29 (R;US)

216-A-29 Ditch supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:28 (R;US)

216-A-37-1 Crib supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:30 (R;US)

Centralized consolidation/recycling center, 96:1050 (R;US)

Coal ash usage in environmental restoration at the Hanford site, 96:1059 (R;US)

Hanford Site annual dangerous waste report: Volume 1, Part 1, Generator dangerous waste report, dangerous waste, 96:131 (R;US)

Hanford Site annual dangerous waste report: Volume 1, Part 2, Generator dangerous waste report, dangerous waste, 96:132 (R;US)

Hanford Site annual dangerous waste report: Volume 2, Generator dangerous waste report, radioactive mixed waste, 96:830 (R;US)

Hanford Site annual dangerous waste report: Volume 3, Part 1, Waste Management Facility report, dangerous waste, 96:832 (R;US)

Hanford Site annual dangerous waste report: Volume 3, Part 2, Waste Management Facility report, dangerous waste, 96:831 (R;US)

Hanford Site annual dangerous waste report: Volume 4, Waste Management Facility report, Radioactive mixed waste, 96:833 (R;US)

Hanford site guide for preparing and maintaining generator group pollution prevention program documentation, 96:142 (R;US)

Hanford stakeholder participation in evaluating innovative technologies: VOC product line, Passive soil vapor extraction using borehole flux tunable hybrid plasma, 96:562 (R;US)

Solid Waste Operations Complex W-113: Project cost estimate. Preliminary design report. Volume IV, 96:840 (R;US)

Solid Waste Program Fiscal Year 1996 Multi-Year Program Plan WBS 1.2.1, Revision 1, 96:1110 (R;US)

Tank Waste Remediation System Guide, 96:1390 (R;US)

Waste Processing Plants

WHC-SD-W252-FHA-001, Rev. 0: Preliminary fire hazard analysis for Phase II Liquid Effluent Treatment and Disposal Facility, Project W-252, 96:1656 (R;US)

Waste Storage

Tank characterization report for single-shell Tank B-201, 96:1350 (R;US)

Waste Transportation

Defining waste acceptance criteria for the Hanford Replacement Cross-Site Transfer System, 96:1520 (R;US)

Replacement of the cross-site transfer system liquid waste transport alternatives evaluation, Project W-058, 96:1639 (R;US)

Waste shipment engineering data management plan, 96:1837 (R;US)

Water Pollution

Annual report for RCRA groundwater monitoring projects at Hanford Site facilities for 1995, 96:509 (R;US)

Groundwater monitoring plan for the 300 Area process trenches, 96:597 (R;US)

Water Pollution Abatement

Hanford Site Long-term Surface Barrier Development Program: Fiscal year 1994 highlights, 96:563 (R;US)

Water Treatment

Hanford facilities tracer study report (315 Water Treatment Facility). Revision 1, 96:599 (R;US)

Water Treatment Plants

283-E and 283-W Hazards Assessment, 96:316 (R;US)

Electrical/instrumentation acceptance test report for Project C-018H, 242-A Evaporator/PUREX Plant condensate treatment facility, 96:2199 (R;US)

Water Utilities

Small Water System Management Program: 100 K Area, 96:318 (R;US)

Well Drilling

ResonantSonic drilling. Innovative technology summary report, 96:470 (R;US)

HARBORS

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel: Appendix D, selection and evaluation of potential ports of entry. Volume 2, 96:76 (R;US)

HAZARDOUS MATERIALS

See also TOXIC MATERIALS

Acoustic Monitoring

Volatile organic compound monitoring by photo acoustic radiometry, 96:2492 (R;US)

Biodegradation

Bench-scale/field-scale interpretations: Session overview, 96:573 (R;US)

Biological Effects

Hazardous materials in aquatic environments of the Mississippi River Basin Project management. Technical quarterly progress report, April 1, 1996–June 30, 1996, 96:104 (R;US)

Tulane/Xavier University Hazardous Materials in Aquatic Environments of the Mississippi River Basin. Quarterly progress report, January 1, 1995–March 31, 1995, 96:738 (R;US)

Carbonylation

Carbonylation as a separation technique for removal of non-radioactive species for tank waste, 96:1458 (R;US)

Chemical Analysis

Development and implementation of an analytical quality assurance plan at the Hanford site, 96:235 (R;US)

Field Raman spectrograph for environmental analysis, 96:2361 (R;US)

Chemical Reactions

An advanced open-path atmospheric pollution monitor for large areas, 96:2378 (R;US)

Combustion

An experimental investigation of the reaction of hydrogen chloride with lead oxide under simulated hazardous waste incineration conditions, 96:713 (R;US)

Flameless thermal oxidation. Innovative technology summary report, 96:2347 (R;US)

Graphite electrode arc melter demonstration Phase 2 test results, 96:892 (R;US)

Mixed-waste treatment – What about the residuals? A comparative analysis of MSO and incineration, 96:746 (R;US)

- The comparison of element partitioning in two types of thermal treatment facilities and the effects on potential radiation dose, 96:990 (R;US)
- Containment**
Hanford Site Long-term Surface Barrier Development Program: Fiscal year 1994 highlights, 96:563 (R;US)
- Decomposition**
Non-Thermal Plasma (NTP) session overview: Second International Symposium on Environmental Applications of Advanced Oxidation Technologies (AOTs), 96:944 (R;US)
- Decontamination**
Decontamination systems information and research program. Quarterly report, October 1995–December 1995, 96:2100 (R;US)
- Detection**
Field-usable portable analyzer for chlorinated organic compounds, 96:2365 (R;US)
Field-usable portable analyzer for chlorinated organic compounds. Topical report, September 1992–May 1994, 96:2366 (R;US)
Portable sensor for hazardous waste, 96:2371 (R;US)
Portable sensor for hazardous waste. Topical report, October 1993–September 1994, 96:2372 (R;US)
- Documentation**
Lawrence Livermore National Laboratory offsite hazardous waste shipment data validation report, 96:790 (R;US)
- Ecological Concentration**
Steerable/distance enhanced penetrometer delivery system, 96:488 (R;US)
- Electrolysis**
Experiences with treatment of mixed waste, 96:947 (R;US)
- Emission**
Environmental releases for calendar year 1994, 96:2583 (R;US)
- Encapsulation**
Polyethylene encapsulation full-scale technology demonstration. Final report, 96:669 (R;US)
- Environmental Effects**
Hazardous materials in aquatic environments of the Mississippi River Basin Project management. Technical quarterly progress report, April 1, 1996–June 30, 1996, 96:104 (R;US)
- Environmental Impacts**
Tulane/Xavier Universities hazardous materials in aquatic environments of the Mississippi River Basin. Quarterly progress report, October 1, 1995–December 31, 1995, 96:101 (R;US)
Tulane/Xavier University hazardous materials in aquatic environments of the Mississippi River basin. Quarterly progress report, January 1–March 31, 1996, 96:103 (R;US)
- Environmental Transport**
Multimedia Environmental Pollutant Assessment System (MEPAS®): Groundwater pathway formulations, 96:574 (R;US)
The Multimedia Environmental Pollutant Assessment System (MEPAS®): Atmospheric pathway formulations. Revision, 96:243 (R;US)
Tulane/Xavier University Hazardous Materials in Aquatic Environments of the Mississippi River Basin. Quarterly progress report, January 1, 1995–March 31, 1995, 96:738 (R;US)
- Epidemiology**
Environmental hazards assessment program. Quarterly report, October–December 1995, 96:96 (R;US)
- Fluorescence Spectroscopy**
Portable sensor for hazardous waste, 96:2371 (R;US)
- Ground Disposal**
Frozen soil barrier technology. Innovative technology summary report, 96:475 (R;US)
Interim-status groundwater monitoring plan for the 216-B-63 trench. Revision 1, 96:594 (R;US)
Nonradioactive Dangerous Waste Landfill supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:653 (R;US)
Quality Assurance Project Plan for the treatability study of in situ vitrification of Seepage Pit 1 in Waste Area Grouping 7 at Oak Ridge National Laboratory, 96:221 (R;US)
- Solid Waste Operations Complex W-113: Project cost estimate. Preliminary design report. Volume IV, 96:840 (R;US)
The results of an ecological risk assessment screening at the Idaho National Engineering's waste area group 2, 96:2457 (R;US)
Three-dimensional subsurface imaging synthetic aperture radar, 96:2375 (R;US)
Virtual environmental applications for buried waste characterization technology evaluation report, 96:2444 (R;US)
Waste Area Grouping 4 Site Investigation Data Management Plan, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:952 (R;US)
- Health Hazards**
Applying RESRAD-CHEM for chemical risk assessment, 96:2289 (R;US)
Chemical Exposure Assessment Program at Los Alamos National Laboratory: A risk based approach, 96:211 (R;US)
Environmental Hazards Assessment Program quarterly report: January–March 1996, 96:97 (R;US)
Environmental Hazards Assessment Program. Quarterly report, April–June 1995, 96:93 (R;US)
Environmental hazards assessment program. Quarterly report, October–December 1995, 96:96 (R;US)
Facilitating relative comparisons of health impacts from postulated accidents in environmental impact statements, 96:14 (R;US)
- In-Situ Processing**
In Situ Remediation Integrated Program: FY 1994 program summary, 96:503 (R;US)
- Information**
Hanford Site annual dangerous waste report: Volume 1, Part 1, Generator dangerous waste report, dangerous waste, 96:131 (R;US)
Hanford Site annual dangerous waste report: Volume 1, Part 2, Generator dangerous waste report, dangerous waste, 96:132 (R;US)
Hanford Site annual dangerous waste report: Volume 2, Generator dangerous waste report, radioactive mixed waste, 96:830 (R;US)
Hanford Site annual dangerous waste report: Volume 3, Part 1, Waste Management Facility report, dangerous waste, 96:832 (R;US)
Hanford Site annual dangerous waste report: Volume 3, Part 2, Waste Management Facility report, dangerous waste, 96:831 (R;US)
Hanford Site annual dangerous waste report: Volume 4, Waste Management Facility report, Radioactive mixed waste, 96:833 (R;US)
- Information Dissemination**
1995 Tier Two emergency and hazardous chemical inventory. Emergency Planning and Community Right-To-Know Act, Section 312, 96:836 (R;US)
- Information Needs**
Lawrence Livermore National Laboratory offsite hazardous waste shipment data validation report, 96:790 (R;US)
- Inventories**
1995 Tier Two emergency and hazardous chemical inventory. Emergency Planning and Community Right-To-Know Act, Section 312, 96:836 (R;US)
A comprehensive inventory of radiological and nonradiological contaminants in waste buried or projected to be buried in the subsurface disposal area of the INEL RWMC during the years 1984-2003, Volume 3, 96:875 (R;US)
A comprehensive inventory of radiological and nonradiological contaminants in waste buried or projected to be buried in the subsurface disposal area of the INEL RWMC during the years 1984-2003, Volume 2, 96:874 (R;US)
Greater-than-Class C low-level radioactive waste characterization. Appendix E-2: Mixed GTCC LLW assessment, 96:758 (R;US)
Hazard categorization and baseline documentation for the Sodium Storage Facility. Revision 1, 96:2210 (R;US)

HAZARDOUS MATERIALS

Land Transport

Land Transport

Risk assessment for the transportation of hazardous waste and hazardous waste components of low-level mixed waste and transuranic waste for the U.S. Department of Energy waste management programmatic environmental impact statement, 96:20 (R;US)

Shipment mobility accountability collection (SMAC), 96:58 (R;US)

Study of evacuation times based on general accident history, 96:264 (R;US)

Material Substitution

Hazardous solvent substitution, 96:169 (R;US)

Materials Recovery

Recovery and removal of mercury from mixed wastes. Final report, September 1994–June 1995, 96:818 (R;US)

Measuring Instruments

Portable sensor for hazardous waste. Topical report, October 1993–September 1994, 96:2372 (R;US)

Mixtures

Performance evaluation of the technical capabilities of DOE sites for disposal of mixed low-level waste: Volume 3, Site evaluations, 96:743 (R;US)

Monitoring

Evaluation of phase 1 and phase 2 sampling and analysis data for the Gunite and Associated Tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:1340 (R;US)

Pinellas Plant Annual Site Environmental Report for calendar year 1994, 96:2160 (R;US)

Portable sensor for hazardous waste. Topical report, October 1993–September 1994, 96:2372 (R;US)

Supporting document for the Southeast Quadrant historical tank content estimate report for AN-Tank Farm. Vols. I and II, 96:1709 (R;US)

Supporting document for the Southeast quadrant historical tank content estimate report for AP-tank farm. Volume 1 and 2, 96:1710 (R;US)

Nondestructive Analysis

LANL's mobile nondestructive assay and examination systems for radioactive wastes, 96:2502 (R;US)

Nonradioactive Waste Management

Oak Ridge National Laboratory program plan for certification of nonradioactive hazardous waste, 96:976 (R;US)

Oxidation

Mixed-waste treatment – What about the residuals? A comparative analysis of MSO and incineration, 96:746 (R;US)

Packaging

Compatibility of packaging components with simulant mixed waste, 96:1033 (R;US)

Needs assessment activity report: Fiscal year 1995, 96:141 (R;US)

Pollution Abatement

Pollution prevention program plan 1996, 96:842 (R;US)

Pyrolysis

Mixed waste treatment using the ChemChar thermolytic detoxification technique, 96:817 (R;US)

The comparison of element partitioning in two types of thermal treatment facilities and the effects on potential radiation dose, 96:990 (R;US)

Radioactive Waste Disposal

Mixed and low-level radioactive waste disposal from the Argonne National Laboratory-East Map Tube Facility, 96:643 (R;US)

Performance evaluation of the technical capabilities of DOE sites for disposal of mixed low-level waste. Volume 2: Technical basis and discussion of results, 96:742 (R;US)

Performance evaluation of the technical capabilities of DOE sites for disposal of mixed low-level waste. Volume 1: Executive summary, 96:741 (R;US)

Review of private sector and Department of Energy treatment, storage, and disposal capabilities for low-level and mixed low-level waste, 96:906 (R;US)

Radioactive Waste Management

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Summary, 96:718 (R;US)

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Volume 2, Site data tables, 96:720 (R;US)

Mixed waste disposal at Argonne National Laboratory-East, 96:644 (R;US)

Mixed waste focus area Department of Energy technology development needs identification and prioritization, 96:899 (R;US)

Radioactive Waste Processing

Alternatives to incineration. Technical area status report, 96:822 (R;US)

Integrated thermal treatment system study – Phase 2 results. Revision 1, 96:872 (R;US)

Mixed Waste Integrated Program – Problem-oriented technology development, 96:687 (R;US)

Modeling of thermal plasma arc technology FY 1994 report, 96:855 (R;US)

Review of private sector and Department of Energy treatment, storage, and disposal capabilities for low-level and mixed low-level waste, 96:906 (R;US)

Survey of commercial firms with mixed-waste treatability study capability, 96:902 (R;US)

WRAP module 1 treatment plan, 96:1081 (R;US)

Radioactive Waste Storage

Review of private sector and Department of Energy treatment, storage, and disposal capabilities for low-level and mixed low-level waste, 96:906 (R;US)

Remedial Action

FY-95 technology catalog. Technology development for buried waste remediation, 96:2091 (R;US)

Projects at the Western Environmental Technology Office. Quarterly technical progress report, April 1–June 30, 1995, 96:749 (R;US)

Solid Waste Operations Complex W-113: Project cost estimate. Preliminary design report. Volume IV, 96:840 (R;US)

Three-dimensional subsurface imaging synthetic aperture radar, 96:2375 (R;US)

Tulane/Xavier University Hazardous Materials in Aquatic Environments of the Mississippi River Basin. Quarterly progress report, January 1, 1995–March 31, 1995, 96:738 (R;US)

Remote Handling

Hydraulically powered dissimilar teleoperated system controller design, 96:2244 (R;US)

Integrated computer-enhanced remote viewing system. Quarterly report Number 5, October 1993–December 1993, 96:2248 (R;US)

Removal

A process for treatment of mixed waste containing chemical plating wastes, 96:930 (R;US)

Sodium dichromate expedited response action assessment, Revision 3, 96:2118 (R;US)

Risk Assessment

Environmental Hazards Assessment Program: Annual report, July 1, 1995–June 30, 1996, 96:99 (R;US)

Environmental Hazards Assessment Program: Quarterly report, April–June, 1996, 96:98 (R;US)

Environmental hazards assessment program. Quarterly report, October–December 1995, 96:96 (R;US)

Hazard classification of environmental restoration activities at the INEL, 96:195 (R;US)

Routing

Geospatial analyses and system architectures for the next generation of radioactive materials risk assessment and routing, 96:276 (R;US)

Sampling

Preliminary hazard classification for N-Basin intrusive activities, 96:2021 (R;US)

Separation Processes

Electromagnetic mixed waste processing system for asbestos decontamination, 96:811 (R;US)

Supercritical Gas Extraction

Development and design of a high pressure carbon dioxide system for the separation of hazardous contaminants from non-hazardous debris, 96:2657 (R;US)

Thermochemical Processes

Integrated thermal treatment system study -- Phase 2 results. Revision 1, 96:872 (R;US)

Transport

Classification of poison inhalation hazard materials into severity groups, 96:275 (R;US)
Development of an expert system for transportation of hazardous and radioactive materials, 96:47 (R;US)
The transportation external coordination working group, 96:86 (R;US)

Transport Regulations

Hazardous Materials Transportation Expert System (HaMTES), 96:60 (R;US)

Underground Disposal

A comprehensive inventory of radiological and nonradiological contaminants in waste buried or projected to be buried in the subsurface disposal area of the INEL RWMC during the years 1984-2003, Volume 2, 96:874 (R;US)
A comprehensive inventory of radiological and nonradiological contaminants in waste buried or projected to be buried in the subsurface disposal area of the INEL RWMC during the years 1984-2003, Volume 3, 96:875 (R;US)
EMFLUX® soil-gas survey of Technical Area 54, Los Alamos National Laboratory, New Mexico, 96:2487 (R;US)
FY-95 technology catalog. Technology development for buried waste remediation, 96:2091 (R;US)
The role of plants and animals in isolation barriers at Hanford, Washington, 96:986 (R;US)

Underground Storage

An advanced open-path atmospheric pollution monitor for large areas, 96:2378 (R;US)
Calculation of reaction energies and adiabatic temperatures for waste tank reactions, 96:1348 (R;US)
Carbonylation as a separation technique for removal of non-radioactive species for tank waste, 96:1458 (R;US)
Fire hazards analysis for solid waste burial grounds, 96:1095 (R;US)
Flammable Gas Safety Program: Mechanisms of gas generation from simulated SY Tank Farm wastes. Progress report, FY 1994, 96:1450 (R;US)
Frozen soil barrier technology. Innovative technology summary report, 96:475 (R;US)
Position paper: Seismic design criteria, 96:1654 (R;US)
Structural analysis of underground gunite storage tanks. Environmental Restoration Program, 96:1339 (R;US)
Tank Vapor Characterization Project: Headspace vapor characterization of Hanford Waste Tank U-204, Results from samples collected on August 8, 1995, 96:1444 (R;US)
Tank Vapor Characterization Project: Headspace vapor characterization of Hanford Waste Tank U-203, Results from samples collected on August 8, 1995, 96:1445 (R;US)
Tank leak detection using electrical resistance methods, 96:1582 (R;US)
Vapor space characterization of waste Tank 241-BY-107: Results from in situ sample collected on 3/25/94, 96:1356 (R;US)
Vapor space characterization of waste tank 241-BY-106: Results from samples collected through the vapor sampling system on July 8, 1994, 96:1353 (R;US)
Waste Tank Vapor Program: Vapor space characterization of Waste Tank 241-T-107. Results from samples collected on January 18, 1995, 96:1393 (R;US)
Waste Tank Vapor Program: Vapor space characterization of waste tank 241-C-110. Results from samples collected on August 18, 1994, 96:1401 (R;US)

Waste Tank Vapor Program: Vapor space characterization of waste tank 241-T-111. Results from samples collected on January 20, 1995, 96:1404 (R;US)

Waste Tank Vapor Program: Vapor space characterization of waste tank 241-C-102: Results from samples collected on August 23, 1994, 96:1402 (R;US)

Vitrification

Apatite- and monazite-bearing glass-crystal composites for the immobilization of low-level nuclear and hazardous wastes, 96:620 (R;US)
Arc melter vitrification of organic and chloride containing materials, 96:890 (R;US)
Graphite electrode arc melter demonstration Phase 2 test results, 96:892 (R;US)
Plasma Hearth Process vitrification of DOE low-level mixed waste, 96:888 (R;US)
Stabilization of vitrified wastes: Task 4. Topical report, October 1994-September 1995, 96:1264 (R;US)

Waste Disposal

Hanford Site Long-term Surface Barrier Development Program: Fiscal year 1994 highlights, 96:563 (R;US)
Hazardous solvent substitution, 96:169 (R;US)
Imaging data analyses for hazardous waste applications. Final report, 96:2385 (R;US)
Update on the Federal Facilities Compliance Act disposal work-group disposal site evaluation - what has worked and what has not, 96:1024 (R;US)
Volatile organic compound monitoring by photo acoustic radiometry, 96:2492 (R;US)

Waste Management

216-A-29 Ditch supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:28 (R;US)
Commercial treatability study capabilities for application to the US Department of Energy's anticipated mixed waste streams, 96:910 (R;US)
Decontamination systems information and research program. Quarterly report, January-March 1995, 96:2097 (R;US)
Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Volume 1, 96:719 (R;US)
Efficient Separations and Processing Crosscutting Program. Technology summary, 96:2634 (R;US)
Efficient separations & processing crosscutting program, 96:2635 (R;US)
Environmental Restoration Contractor Waste Minimization and Pollution Prevention Plan. Revision 1, 96:26 (R;US)
Environmental waste site characterization utilizing aerial photographs and satellite imagery: Three sites in New Mexico, USA, 96:2501 (R;US)
Hazardous waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy Waste Management Programmatic Environmental Impact Statement, 96:637 (R;US)
Mixed waste focus area alternative technologies workshop, 96:934 (R;US)
Waste management facilities cost information for hazardous waste. Revision 1, 96:861 (R;US)

Waste Processing

Commercial treatability study capabilities for application to the US Department of Energy's anticipated mixed waste streams, 96:910 (R;US)
Electrolytic Treatment of ICPP Sodium-Bearing Waste Simulant, 96:1925 (R;US)
Electromagnetic mixed waste processing system for asbestos decontamination, 96:811 (R;US)
Emissions model of waste treatment operations at the Idaho Chemical Processing Plant, 96:1304 (R;US)
Flameless thermal oxidation. Innovative technology summary report, 96:2347 (R;US)
Progress report on the evaluation of porous cathode for the electrochemical reduction of nitrates and nitrites in liquid wastes, 96:1146 (R;US)

HAZARDOUS MATERIALS

Waste Processing

VAC*TRAX - Thermal desorption for mixed wastes, 96:808 (R;US)

Waste Transportation

Argonne National Laboratory, east hazardous waste shipment data validation, 96:791 (R;US)

Compatibility of packaging components with simulant mixed waste, 96:1033 (R;US)

Crush performance of redwood for developing design procedures for impact limiters, 96:257 (R;US)

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Volume 4, Appendix E: Transportation, Appendix F: Accidents, Appendix G: Waste minimization, Appendix H: Technology development, Appendix I: Minority and low-income population distribution, 96:722 (R;US)

Financial assistance to states and tribes to support emergency preparedness and response and the safe transportation of hazardous shipments: 1996 Update, 96:226 (R;US)

Impact limiter tests of four commonly used materials and establishment of an impact limiter data base, 96:261 (R;US)

Lawrence Livermore National Laboratory offsite hazardous waste shipment data validation report, 96:790 (R;US)

Waste management facilities cost information for transportation of radioactive and hazardous materials, 96:178 (R;US)

Wet Oxidation Processes

Assessment for development of an industrial wet oxidation system for burning waste and low-grade fuels. Final report, October 18, 1989–February 28, 1995, 96:752 (R;US)

Development studies for a novel wet oxidation process. Phase 2, 96:810 (R;US)

HAZARDOUS MATERIALS SPILLS

Calculations of protective action distance for toxic chemical spills using nomographs, 96:864 (R;US)

HAZARDS

See also FIRE HAZARDS

HEALTH HAZARDS

Hanford surplus facilities hazards identification document. Revision 2, 96:24 (R;US)

HEALTH HAZARDS

HIGH-LEVEL RADIOACTIVE WASTES

Accidents

Analysis of accident sequences and source terms at waste treatment and storage facilities for waste generated by US-DOE Waste Management Operations: Volume 2, Appendixes A and B, 96:638 (R;US)

Acoustic Measurements

Acoustic imaging of underground storage tank wastes, 96:1598 (R;US)

Calcination

Letter report: Evaluation of dryer/calculator technologies for testing, 96:2567 (R;US)

Potential dispositioning flowsheets for ICPP SNF and wastes, 96:1321 (R;US)

Casks

Life cycle cost report of VHLW cask, 96:1256 (R;US)

Chemical Analysis

FTIR fiber optic methods for the analysis of Hanford Site waste, 96:1616 (R;US)

Work plan for the identification of techniques for in-situ sensing of layering/interfaces of Hanford high level waste tank, 96:1902 (R;US)

Chemical Composition

Changes in chemical composition of tetraphenylboron slurry during pretreatment for vitrification, 96:1118 (R;US)

Characterization and process technology capabilities for Hanford tank waste disposal, 96:1478 (R;US)

Chemistry

Calcination/dissolution chemistry development Fiscal year 1995, 96:1601 (R;US)

Containers

Alternatives for high-level waste forms, containers, and container processing systems, 96:1819 (R;US)

Containment

West Valley Demonstration Project full-scale canister impact tests, 96:1460 (R;US)

Criticality

Criticality evaluation and protocol for DOE-owned spent nuclear fuels, 96:1295 (R;US)

Filtration

Influence of particulates on crossflow filter performance with tetraphenylborate precipitate, 96:1916 (R;US)

Health Hazards

Scoring methods and results for qualitative evaluation of public health impacts from the Hanford high-level waste tanks. Integrated Risk Assessment Program, 96:1419 (R;US)

Hydrolysis

Changes in chemical composition of tetraphenylboron slurry during pretreatment for vitrification, 96:1118 (R;US)

Land Transport

The tracking of high level waste shipments-TRANSCOM system, 96:50 (R;US)

Maritime Transport

SeaRAM: an evaluation of the safety of RAM transport by sea, 96:259 (R;US)

Materials Testing

Comparison of simulants to actual neutralized current acid waste: Process and product testing of three NCAW core samples from Tanks 101-AZ and 102-AZ, 96:1515 (R;US)

Mixing

A parametric study of double-shell tank response to internal high-frequency pressure loading, 96:1605 (R;US)

Laboratory studies of gas generation and potential for tank wall corrosion during blending of high-level wastes at the West Valley Demonstration Project, 96:1381 (R;US)
Validation Analysis for the Calculation of a Turbulent Free Jet in Water Using CFD5-FLOW 3-D and FLUENT, 96:1930 (R;US)

Monitoring

The tracking of high level waste shipments-TRANSCOM system, 96:50 (R;US)

Packaging

Results of intermediate-scale hot isostatic press can experiments, 96:1303 (R;US)

Pyrochemical Reprocessing

Removal of cesium from a high-level calcined waste by high temperature volatilization, 96:2637 (R;US)

Quantitative Chemical Analysis

Comparison of SW-846 method 3051 and SW-846 method 7471A for the preparation of solid waste samples for mercury determination, 96:978 (R;US)

Radiation Hazards

Risk assessment for the off-site transportation of high-level waste for the U.S. Department of Energy Waste Management Programmatic Environmental Impact Statement, 96:18 (R;US)

Radioactive Waste Disposal

An introduction to the mechanics of performance assessment using examples of calculations done for the Waste Isolation Pilot Plant between 1990 and 1992, 96:1530 (R;US)

Closing the circle on the splitting of the atom: The environmental legacy of nuclear weapons production in the United States and what the Department of Energy is doing about it, 96:88 (R;US)

Vitrification of cesium-contaminated organic ion exchange resin, 96:1268 (R;US)

Radioactive Waste Storage

324 Building Compliance Project: Selection and evaluation of alternatives for the removal of solid remote-handled mixed wastes from the 324 Building, 96:981 (R;US)

Alternatives for high-level waste forms, containers, and container processing systems, 96:1819 (R;US)

Comparison of vapor sampling system (VSS) and in situ vapor sampling (ISVS) methods on Tanks C-107, BY-108, and S-102, 96:1522 (R;US)

Consideration of kinematic interaction in determining seismic responses of underground structures, 96:1200 (R;US)

Criticality evaluation and protocol for DOE-owned spent nuclear fuels, 96:1295 (R;US)

Flammable gas tank safety program: Data requirements for core sample analysis developed through the Data Quality Objectives (DQO) process. Revision 1, 96:1702 (R;US)

National high-level waste systems analysis plan, 96:1261 (R;US)

National high-level waste systems analysis report, 96:1262 (R;US)

Passive versus active mitigation cost analysis, 96:1648 (R;US)

Quarterly report on the Ferrocyanide Safety Program for the period ending, March 31, 1995, 96:1583 (R;US)

Radcalc: A computer program to calculate the radiolytic production of hydrogen gas from radioactive wastes in packages, 96:1614 (R;US)

HIGH-LEVEL RADIOACTIVE WASTES

Radioactive Waste Storage

Recommended alternative for interim stabilization of Tank 241-C-103, 96:1597 (R;US)
Safety analysis for push-mode and rotary-mode core sampling. Rev. 1, 96:1865 (R;US)
Status report on resolution of Waste Tank Safety Issues at the Hanford Site. Revision 1, 96:1588 (R;US)
Summary of FY 1994 Raman spectroscopy technology cold test activities, 96:2611 (R;US)
The effect of dilution on the gas retention behavior of Tank 241-SY-103 waste, 96:1457 (R;US)

Radiochemistry

Liaison activities with the Institute of Physical Chemistry/Russian Academy of Science Fiscal Year 1995, 96:337 (R;US)

Remote Handling

324 Building Compliance Project: Selection and evaluation of alternatives for the removal of solid remote-handled mixed wastes from the 324 Building, 96:981 (R;US)
Hot cell remote nuclear scanning of tank core samples, 96:1617 (R;US)

Retrieval Systems

Hazardous waste retrieval strategies using a high-pressure water jet scarifier, 96:1461 (R;US)

Roasting

Calcination/dissolution residue treatment, 96:1591 (R;US)

Sampling

Flammable gas tank safety program: Data requirements for core sample analysis developed through the Data Quality Objectives (DQO) process. Revision 1, 96:1702 (R;US)
Hanford coring bit temperature monitor development testing results report, 96:1547 (R;US)
Physical sampling for site and waste characterization, 96:2620 (R;US)
Safety analysis for push-mode and rotary-mode core sampling. Rev. 1, 96:1865 (R;US)

Separation Processes

Dissolution of two NWCF calcines: Extent of dissolution and characterization of undissolved solids, 96:867 (R;US)
Potential dispositioning flowsheets for ICPP SNF and wastes, 96:1321 (R;US)
Removal of cesium from a high-level calcined waste by high temperature volatilization, 96:2637 (R;US)
TRUOX process applied to radioactive Idaho Chemical Processing Plant high-level waste calcine, 96:1322 (R;US)

Shielding

Determination of buildup factors in titanium and depleted uranium, 96:268 (R;US)

Simulation

Comparison of simulants to actual neutralized current acid waste: Process and product testing of three NCAW core samples from Tanks 101-AZ and 102-AZ, 96:1515 (R;US)

Stabilization

Zirconium phosphate waste forms for low-temperature stabilization of cesium-137-containing waste streams, 96:649 (R;US)

Tanks

Replacement inhibitors for high level waste tank cooling coils, 96:1922 (R;US)

Temperature Measurement

Assessment of Tank 241-C-106 temperature response indications, 96:1382 (R;US)

Truex Process

Application of single ion activity coefficients to determine solvent extraction mechanism for components of high level nuclear waste, 96:1176 (R;US)

Underground Disposal

ANL technical support program for DOE Office of Environmental Management. Annual report, October 1994–September 1995, 96:1153 (R;US)
ANL technical support program for DOE environmental restoration and waste management. Annual report, October 1993–September 1994, 96:1151 (R;US)

Lessons Learned Report for the radioactive mixed waste land disposal facility (Trench 31, Project W-025), 96:1097 (R;US)

Low-impact sampling under an active solid low-level radioactive waste disposal unit using horizontal drilling technology, 96:939 (R;US)

Quality Assurance Project Plan for the treatability study of in situ vitrification of Seepage Pit 1 in Waste Area Grouping 7 at Oak Ridge National Laboratory, 96:221 (R;US)

Site characterization summary report for the Old Hydrofracture Facility, Waste Area Grouping 5, at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2521 (R;US)

Use of a sensitivity study to identify risk assessment modeling data gaps at the Idaho National Engineering Laboratory's subsurface disposal area, 96:883 (R;US)

Waste Area Grouping 4 Site Investigation Data Management Plan, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:952 (R;US)

Hydrogen Production

Introduction to Radcalc: A computer program to calculate the radiolytic production of hydrogen gas from radioactive wastes in packages, 96:1612 (R;US)

In-Situ Processing

Quality Assurance Project Plan for the treatability study of in situ vitrification of Seepage Pit 1 in Waste Area Grouping 7 at Oak Ridge National Laboratory, 96:221 (R;US)

Information Systems

Greater-than-Class C low-level radioactive waste characterization. Appendix A-1: Nuclear utility data outputs from the GNUPS database, 96:753 (R;US)

Interagency Cooperation

Low-Level Waste (LLW) forum meeting report, 96:704 (R;US)

Inventories

Current and projected liquid low-level waste generation at ORNL, 96:974 (R;US)

Evaluation of Department of Energy-Held Potential Greater-Than-Class C Low-Level Radioactive Waste. Revision 1, 96:771 (R;US)

LOW-LEVEL RADIOACTIVE WASTES Inventories

Greater-than-Class C low-level radioactive waste characterization. Appendix A-1: Nuclear utility data outputs from the GNUPS database, 96:753 (R;US)

Greater-than-Class C low-level radioactive waste characterization. Appendix A-2: Timing of greater-than-Class C low-level radioactive waste from nuclear power plants, 96:754 (R;US)

Greater-than-Class C low-level radioactive waste characterization. Appendix A-3: Basis for greater-than-Class C low-level radioactive waste light water reactor projections, 96:755 (R;US)

Greater-than-Class C low-level radioactive waste characterization. Appendix D-3: Characterization of greater-than-Class C low-level radioactive waste from other generators, 96:756 (R;US)

Greater-than-Class C low-level radioactive waste characterization. Appendix E-1: Historical development of GTCC LLW characterization, 96:757 (R;US)

Greater-than-Class C low-level radioactive waste characterization. Appendix E-2: Mixed GTCC LLW assessment, 96:758 (R;US)

Greater-than-Class C low-level radioactive waste characterization. Appendix E-3: GTCC LLW assumptions matrix, 96:759 (R;US)

Greater-than-Class C low-level radioactive waste characterization. Appendix E-4: Packaging factors for greater-than-Class C low-level radioactive waste, 96:760 (R;US)

Greater-than-Class C low-level radioactive waste characterization. Appendix E-5: Impact of the 1993 NRC draft Branch Technical Position on concentration averaging of greater-than-Class C low-level radioactive waste, 96:761 (R;US)

Greater-than-Class C low-level radioactive waste characterization. Appendix H: Packaging factors for greater-than-Class C low-level radioactive waste, 96:764 (R;US)

Greater-than-Class C low-level waste characterization. Appendix F: Greater-than-Class C low-level radioactive waste light water reactor projections, 96:762 (R;US)

Greater-than-Class C low-level waste characterization. Appendix G: Evaluation of potential for greater-than-Class C classification of irradiated hardware generated by utility-operated reactors, 96:763 (R;US)

Greater-than-Class C low-level waste characterization. Appendix I: Impact of concentration averaging low-level radioactive waste volume projections, 96:765 (R;US)

Information related to low-level mixed waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy Waste Management programmatic environmental impact statement, 96:641 (R;US)

Land Transport

1994 state-by-state assessment of low-level radioactive wastes received at commercial disposal sites, 96:788 (R;US)

Risk assessment for the transportation of hazardous waste and hazardous waste components of low-level mixed waste and transuranic waste for the U.S. Department of Energy waste management programmatic environmental impact statement, 96:20 (R;US)

Supplemental information related to risk assessment for the off-site transportation of low-level mixed waste for the U.S. Department of Energy Waste Management programmatic environmental impact statement, 96:21 (R;US)

Transportation and disposal configuration for DOE-managed low-level and mixed low-level waste, 96:774 (R;US)

Materials Recovery

Recovery and removal of mercury from mixed wastes. Final report, September 1994–June 1995, 96:818 (R;US)

Meetings

LLW Forum meeting report, 96:714 (R;US)

LLW Forum meeting report, April 18–19, 1991, 96:676 (R;US)

LLW Forum meeting report, April 25–27, 1994, 96:688 (R;US)

LLW Forum meeting report, February 13–16, 1996, 96:712 (R;US)

LLW Forum meeting report, January 24–26 1990, 96:672 (R;US)

LLW Forum meeting report, January 31–February 3, 1995, 96:696 (R;US)

LLW Forum meeting report, July 20–22, 1994, 96:690 (R;US)

LLW Forum meeting report, October 26–27, 1994, 96:693 (R;US)

Low-Level Waste Forum meeting report. Quarterly meeting, April 25–27, 1990, 96:673 (R;US)

Low-Level Waste Forum meeting report. Quarterly meeting, July 23–24, 1990, 96:674 (R;US)

Low-level Waste Forum meeting report. Fall meeting, October 20–22, 1993, 96:685 (R;US)

Low-level Waste Forum meeting report. Quarterly meeting, July 25–26, 1991, 96:677 (R;US)

Low-level Waste Forum meeting report. Spring meeting, April 28–30, 1993, 96:683 (R;US)

Low-level Waste Forum meeting report. Summer meeting, July 21–23, 1993, 96:684 (R;US)

Low-level Waste Forum meeting report. Winter meeting, January 26–28, 1994, 96:686 (R;US)

Proceedings: 17th annual US Department of Energy low-level radioactive waste management conference, 96:706 (R;US)

Melting

Advanced Mixed Waste Treatment Project melter system preliminary design technical review meeting, 96:863 (R;US)

Minimization

Identifying industrial best practices for the waste minimization of low-level radioactive materials, 96:1035 (R;US)

National Institutes of Health: Mixed waste minimization and treatment, 96:784 (R;US)

Waste minimization handbook, Volume 1, 96:1989 (R;US)

Mixtures

Performance evaluation of the technical capabilities of DOE sites for disposal of mixed low-level waste: Volume 3, Site evaluations, 96:743 (R;US)

Packaging

A source release model with application to the LANL LLRW disposal site performance assessment, 96:938 (R;US)

Chemical compatibility screening results of plastic packaging to mixed waste simulants, 96:253 (R;US)

Disposal facility data for the interim performance, 96:1103 (R;US)

Qualitative Chemical Analysis

Waste Inspection Tomography (WIT), 96:814 (R;US)

Radiation Hazards

Supplemental information related to risk assessment for the off-site transportation of low-level waste for the U.S. Department of Energy Waste Management Programmatic Environmental Impact Statement, 96:636 (R;US)

Radiation Monitoring

Lightguide-coupled sensor for in-situ radiation monitoring, 96:2359 (R;US)

Radioactive Waste Disposal

100 and 300 Area Burial Ground remediation study, 96:664 (R;US)

1994 annual report on low-level radioactive waste management progress, 96:728 (R;US)

1994 state-by-state assessment of low-level radioactive wastes received at commercial disposal sites, 96:788 (R;US)

A source release model with application to the LANL LLRW disposal site performance assessment, 96:938 (R;US)

Accident analysis for the low-level mixed waste "No-Flame" option in the U.S. Department of Energy Waste Management Programmatic Environmental Impact Statement, 96:623 (R;US)

Complex-wide review of DOE's Low-Level Waste Management ES&H vulnerabilities. Volume I. Final report, 96:729 (R;US)

Complex-wide review of DOE's Low-Level Waste Management ES&H vulnerabilities. Volume III appendices. Final report, 96:732 (R;US)

Complex-wide review of DOE's Low-Level Waste Management ES&H vulnerabilities. Volume II. Final report, 96:730 (R;US)

Complex-wide review of DOE's low-level waste management ES&H vulnerabilities. Volume III. Final report, 96:731 (R;US)

Evaluation of Department of Energy-Held Potential Greater-Than-Class C Low-Level Radioactive Waste. Revision 1, 96:771 (R;US)

Maintenance Action Readiness Assessment Plan for Waste Area Grouping 1 inactive Tanks 3001-B, 3004-B, T-30, and 3013 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:956 (R;US)

Managing commercial low-level radioactive waste beyond 1992: Issues and potential problems of temporary storage, 96:795 (R;US)

Measurements of the corrosion of low-carbon steel drums under environmental conditions at Hanford: One-year test results, 96:1049 (R;US)

Radcalc: A computer program to calculate the radiolytic production of hydrogen gas from radioactive wastes in packages, 96:1614 (R;US)

Review of private sector and Department of Energy treatment, storage, and disposal capabilities for low-level and mixed low-level waste, 96:906 (R;US)

Solid Waste Program Fiscal Year 1996 Multi-Year Program Plan WBS 1.2.1, Revision 1, 96:1110 (R;US)

Radiochemical Analysis

Batch test equilibration studies examining the removal of Cs, Sr, and Tc from supernatants from ORNL underground storage tanks by selected ion exchangers, 96:1209 (R;US)

Sampling and analysis of inactive radioactive waste tanks W-17, W-18, WC-5, WC-6, WC-8, and WC-11 through WC-14 at ORNL, 96:1345 (R;US)

Radiolysis

Introduction to Radcalc: A computer program to calculate the radiolytic production of hydrogen gas from radioactive wastes in packages, 96:1612 (R;US)

Radionuclide Migration

Estimation of contaminant transport in groundwater beneath radioactive waste disposal facilities, 96:405 (R;US)

Integration of computational modeling for the Los Alamos National Laboratory low level radioactive waste disposal performance assessment, 96:937 (R;US)

Recycling

Radiologically contaminated lead shot reuse at the Idaho National Engineering Laboratory (INEL), 96:881 (R;US)

Remedial Action

FY-95 technology catalog. Technology development for buried waste remediation, 96:2091 (R;US)

Maintenance Action Work Plan for Waste Area Grouping 1 inactive tanks 3001-B, 3004-B, T-30, and 3013 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Environmental Restoration Program, 96:957 (R;US)

LOW-LEVEL RADIOACTIVE WASTES

Remedial Action

Remedial investigation report on waste area grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Volume 4, Appendix C, Risk assessment, 96:2396 (R;US)
Vitrification of low-level radioactive mixed waste at Argonne National Laboratory, 96:619 (R;US)

Removal

General design criteria for Richland Environmental Restoration Project, 96:662 (R;US)
Laser-based coatings removal, 96:2109 (R;US)

Risk Assessment

Waste-clearance strategy for DOE waste processed at commercial facilities, 96:633 (R;US)

Solidification

Evaluation of interim and final waste forms for the newly generated liquid low-level waste flowsheet, 96:970 (R;US)
Immobilization index of liquid low-level waste in cementitious grouts, 96:1064 (R;US)
Pore solution chemistry of simulated low-level liquid waste incorporated in cement grouts, 96:1063 (R;US)
Portland cement: A solidification agent for low-level radioactive waste, 96:844 (R;US)

Specifications

Acceptability of Bettis Laboratories waste shipment to WHC solid waste, 96:1635 (R;US)

Stability

Analysis and stabilization of Lawrence Berkeley Laboratory's multiphase mixed waste, 96:1104 (R;US)

Stabilization

Chemically bonded phosphate ceramics for stabilizing low-level radioactive wastes, 96:647 (R;US)
Evaluation of interim and final waste forms for the newly generated liquid low-level waste flowsheet, 96:970 (R;US)
Leaching behavior of phosphate-bonded ceramic waste forms, 96:648 (R;US)
Zirconium phosphate waste forms for low-temperature stabilization of cesium-137-containing waste streams, 96:649 (R;US)

Statistical Data

1994 state-by-state assessment of low-level radioactive wastes received at commercial disposal sites, 96:788 (R;US)
Development of low-level radioactive waste disposal capacity in the United States - progress or stalemate?, 96:618 (R;US)

Tanks

Statements of work for FY 1996 to 2001 for the Hanford Low-Level Tank Waste Performance Assessment Project, 96:1099 (R;US)

Long-term surveillance plan for the Tuba City, Arizona disposal site, 96:2046 (R;US)

Mitigation

An assessment of potential hydrologic and ecologic impacts of constructing mitigation wetlands, Rifle, Colorado, UMTRA project sites, 96:2049 (R;US)

Monitoring

Guidance for implementing the long-term surveillance program for UMTRA Project Title I Disposal Sites, 96:2053 (R;US)

Long-term surveillance plan for the Gunnison, Colorado, disposal site, 96:2074 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Falls City, Texas. Remedial action selection report, attachment 2, geology report; attachment 3, groundwater hydrology report; and attachment 4, water resources protection strategy. Final report, 96:408 (R;US)

Radioactive Waste Disposal

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Maybell, Colorado, 96:453 (R;US)

Comment and response document for the long-term surveillance plan for the Bodo Canyon Disposal Site, Durango, Colorado, Revision 0, 96:2064 (R;US)

Guidance for implementing the long-term surveillance program for UMTRA Project Title I Disposal Sites, 96:2053 (R;US)

Long-term surveillance plan for the Bodo Canyon Disposal Site, Durango, Colorado. Revision 1, 96:2040 (R;US)

Long-term surveillance plan for the Mexican Hat Disposal Site, Mexican Hat, Utah, 96:2062 (R;US)

Remedial Action Plan and Site design for stabilization of the inactive Uranium Mill Tailings sites at Slick Rock, Colorado: Revision 1. Remedial action selection report, Attachment 2, geology report, Attachment 3, ground water hydrology report, Attachment 4, water resources protection strategy. Final, 96:2031 (R;US)

Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado. Appendix D, Final report, 96:2079 (R;US)

UMTRA Ground Water Project management action process document, 96:459 (R;US)

UMTRA project disposal cell cover biointrusion sensitivity assessment, Revision 1, 96:2057 (R;US)

UMTRA project technical assistance contractor quality assurance implementation plan for surface and ground water, Revision 2, 96:414 (R;US)

Uranium Mill Tailings Remedial Action Project (UMTRAP), Slick Rock, Colorado, Revision 1, Volume 4. Calculations, Final design for construction, 96:2038 (R;US)

Uranium Mill Tailings Remedial Action Project (UMTRAP), Slick Rock, Colorado, Revision 1, Volume 1, Calculations, Final design for construction, 96:2035 (R;US)

Uranium Mill Tailings Remedial Action Project (UMTRAP), Slick Rock, Colorado, Revision 1, Volume 2, Calculations, Final design for construction, 96:2036 (R;US)

Uranium Mill Tailings Remedial Action Project (UMTRAP), Slick Rock, Colorado, Revision 1, Volume 3. Calculations, Final design for construction, 96:2037 (R;US)

Uranium Mill Tailings Remedial Action Project 1994 environmental report, 96:2048 (R;US)

Remedial Action

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Maybell, Colorado, 96:453 (R;US)

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Green River, Utah. Revision 1, 96:420 (R;US)

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Sites near Slick Rock, Colorado. Revision 1, 96:432 (R;US)

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Sites near Rifle, Colorado. Revision 2, 96:441 (R;US)

Buffer zone monitoring plan for the Dos Rios subdivision, Gunnison, Colorado, 96:458 (R;US)

Comment and response document for the final remedial action plan and site design for stabilization of the inactive uranium mill tailings sites at Slick Rock, Colorado. Revision 2, 96:2055 (R;US)

Comment and response document for the final remedial action plan site design for stabilization of the Inactive Uranium Mill Tailings Sites at Slick Rock, Colorado, 96:2054 (R;US)

Comment and response document for the ground water protection strategy for the Uranium Mill Tailings Site at Green River, Utah, 96:446 (R;US)

ERD UMTRA Project quality assurance program plan, Revision 7, 96:2039 (R;US)

Economic impact study of the Uranium Mill Tailings Remedial Action project in Colorado: Colorado state fiscal year 1995, 96:2066 (R;US)

Economic impact study of the Uranium Mill Tailings Remedial Action project in Colorado: Colorado state fiscal year 1995. Revision 1, 96:2067 (R;US)

Geophysical surveys at the UMTRA project Shiprock, New Mexico site, 96:2077 (R;US)

Guidance for implementing the long-term surveillance program for UMTRA Project Title I Disposal Sites, 96:2053 (R;US)

Integrated Project Management System description, 96:2042 (R;US)

Long-term Surveillance Plan for the Falls City Disposal Site, Falls City, Texas. Revision 1, 96:2051 (R;US)

Long-term surveillance plan for the Ambrosia Lake, New Mexico disposal site, 96:2065 (R;US)

Long-term surveillance plan for the Bodo Canyon Disposal Site, Durango, Colorado. Revision 1, 96:2040 (R;US)

Long-term surveillance plan for the Falls City Disposal Site, Falls City, Texas, 96:2050 (R;US)

Long-term surveillance plan for the Gunnison, Colorado disposal site, 96:2073 (R;US)

Long-term surveillance plan for the Gunnison, Colorado, disposal site, 96:2074 (R;US)

Long-term surveillance plan for the Mexican Hat Disposal Site, Mexican Hat, Utah, 96:2062 (R;US)

Long-term surveillance plan for the Mexican Hat disposal site, Mexican Hat, Utah, 96:2061 (R;US)

Long-term surveillance plan for the Tuba City, Arizona disposal site, 96:2046 (R;US)

Position paper on the applicability of supplemental standards to the uppermost aquifer at the Uranium Mill Tailings Vitro Processing Site, Salt Lake City, Utah, 96:460 (R;US)

Publications desktop survival guide, 96:2030 (R;US)

Remedial action plan and site conceptual design for stabilization of the inactive uranium mill tailings sites at Rifle, Colorado. Appendix D, Final report, 96:2079 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Falls City, Texas. Remedial action selection report, attachment 2, geology report; attachment 3, groundwater hydrology report; and attachment 4, water resources protection strategy. Final report, 96:408 (R;US)

Report of ground water monitoring for expansion of the golf course, Salt Lake City, Utah, Vitro Processing Site. Revision 0, 96:461 (R;US)

Site observational work plan for the UMTRA Project Site at Grand Junction, Colorado, 96:457 (R;US)

Radioactive Tank Waste Remediation Focus Area. Technology summary, 96:1254 (R;US)

Stratigraphy

Effective porosity and pore-throat sizes of mudrock saprolite from the Nolichucky Shale within Bear Creek Valley on the Oak Ridge Reservation: Implications for contaminant transport and retardation through matrix diffusion, 96:555 (R;US)

Surface Waters

Estimating surface water risk at Oak Ridge National Laboratory: Effects of site conditions on modeling results, 96:2339 (R;US)

Waste Management

Oak Ridge Reservation Waste Management Plan, 96:158 (R;US)

Water Pollution

Remedial investigation/feasibility study of the Clinch River/Poplar Creek operable unit. Volume 5, 96:2406 (R;US)

Watersheds

Waste area grouping 2 Phase I task data report: Ecological risk assessment and White Oak Creek watershed screening ecological risk assessment, 96:549 (R;US)

OBSIDIANITES

See TEKTITES

OCCUPATIONAL SAFETY

Westinghouse Hanford Company health and safety performance report. Third quarter calendar year 1995, 96:327 (R;US)

OFF-GAS SYSTEMS

- Decontamination and demolition of a former plutonium processing facility's process exhaust system, firescreen, and filter plenum buildings, 96:2158 (R;US)
- HC-21C off-gas test report, 96:1072 (R;US)
- Operation of a 1/10 scale mixed water incinerator air pollution control system, 96:1149 (R;US)
- Technical evaluation of the in situ vitrification melt expulsion at the Oak Ridge National Laboratory on April 21, 1996, Oak Ridge, Tennessee, 96:2526 (R;US)
- Technology survey for real-time monitoring of plutonium in a vitrifier off-gas system, 96:1966 (R;US)

OFF-GAS SYSTEMS

- Decontamination and demolition of a former plutonium processing facility's process exhaust system, firescreen, and filter plenum buildings, 96:2158 (R;US)

OFFSHORE OPERATIONS

- Remote controlled tool systems for nuclear sites have subsea applications, 96:2276 (R;US)

OHIO

- Results of the independent radiological verification survey of the remedial action performed at 525 S. Main Street, Oxford, Ohio, (OXO002), 96:2178 (R;US)
- Results of the independent radiological verification survey of the remedial action performed at the former Alba Craft Laboratory site, Oxford, Ohio, (OXO001), 96:2183 (R;US)

OIL SHALE WASTE WATER

See WASTE WATER

OIL SPILL FINGERPRINTING

See OIL SPILLS

OIL SPILLS

- Applying automated data acquisition and management technology to bioremediation, 96:621 (R;US)

OIL WELLS

- Measurement of ^{222}Rn flux, ^{222}Rn emanation and ^{226}Ra concentration from injection well pipe scale, 96:191 (R;US)

OMEGA WEST REACTOR

See OWR REACTOR

ON-LINE COMPUTERS

See COMPUTERS

ON-LINE MEASUREMENT SYSTEMS

- Chemometrics review for chemical sensor development, task 7 report, 96:2352 (R;US)

OPERATION

- DOE limited standard: Operations assessments, 96:90 (R;US)

OPIX PROCESS

See RADIOACTIVE WASTE PROCESSING

OPTICAL COMPUTERS

See COMPUTERS

OPTICAL EQUIPMENT

- Fiber optic/cone penetrometer system for subsurface heavy metals detection, 96:2379 (R;US)

OPTICAL RADAR

- A self-directing elastic backscatter lidar system for debris cloud tracking and characterization, 96:2506 (R;US)
- Fiber optic coherent laser radar 3d vision system, 96:2237 (R;US)

OPTICAL SCANNERS

See OPTICAL EQUIPMENT

OREGON

- Baseline risk assessment of ground water contamination at the uranium mill tailings site near Lakeview, Oregon. Revision 1, 96:429 (R;US)

ORGANIC CHLORINE COMPOUNDS

See also CHLORINATED ALIPHATIC HYDROCARBONS
CHLORINATED AROMATIC HYDROCARBONS
KEL-F
METHYLENE CHLORIDE

- 100-FR-3 groundwater/soil gas supplemental limited field investigation report, 96:507 (R;US)
- Effect of temperature on perchloroethylene dechlorination by a methanogenic consortium, 96:991 (R;US)

Field-usable portable analyzer for chlorinated organic compounds, 96:2365 (R;US)

Field-usable portable analyzer for chlorinated organic compounds. Topical report, September 1992–May 1994, 96:2366 (R;US)

Subsurface microbial communities and degradative capacities during trichloroethylene bioremediation, 96:401 (R;US)

Surfactant-enhanced aquifer remediation at the Portsmouth Gaseous Diffusion Plant, 96:482 (R;US)

ORGANIC COMPOUNDS

See also HYDROCARBONS

ORGANIC HALOGEN COMPOUNDS

ORGANIC POLYMERS

Absorption Spectroscopy

Environmental management technology demonstration and commercialization: Tasks 2, 3, 4, and 8. Semiannual report, October 1994–March 1995, 96:819 (R;US)

Biodegradation

Stakeholder acceptance analysis: In-well vapor stripping, in-situ bioremediation, gas membrane separation system (membrane separation), 96:575 (R;US)

Chemical Analysis

Cyclodextrin-based surface acoustic wave chemical microsen-
sors, 96:2507 (R;US)

Chemical Reactions

Test for Fauske and Associates to perform tube propagation experiments with simulated Hanford tank wastes, 96:1473 (R;US)

Decomposition

Nonthermal plasma technology for organic destruction, 96:994 (R;US)

Desorption

VAC*TRAX - Thermal desorption for mixed wastes, 96:808 (R;US)

Detection

Field portable detection of VOCs using a SAW/GC system, 96:487 (R;US)

Ecological Concentration

Barometric pumping with a twist: VOC containment and remediation without boreholes, 96:2381 (R;US)

Demonstration, testing, & evaluation of in situ heating of soil. Draft final report, Volume I, 96:2414 (R;US)

Direct and inverse modeling of multiphase flow systems, 96:216 (R;US)

In situ bioremediation using horizontal wells. Innovative technology summary report, 96:472 (R;US)

Innovative technology for expedited site remediation of extensive surface and subsurface contamination, 96:2024 (R;US)

Emission

Ambient monitoring of volatile organic compounds at Los Alamos National Laboratory in technical area 54, areas G and L. Final report, 96:926 (R;US)

Routine organic air emissions at the Radioactive Waste Management Complex Waste Storage Facilities fiscal year 1995 report, 96:896 (R;US)

Evaporation

Dynamic underground stripping. Innovative technology summary report, 96:473 (R;US)

Extraction

Demonstration, testing, & evaluation of in situ heating of soil. Draft final report, Volume II: Appendices A to E, 96:2415 (R;US)

Six phase soil heating. Innovative technology summary report, 96:474 (R;US)

Gas Chromatography

Measuring fuel contamination using high speed gas chromatography and cone penetration techniques, 96:2377 (R;US)

Hydrothermal Alteration

Removal of strontium and transuranics from Hanford waste via hydrothermal processing – FY 1994/95 test results, 96:2555 (R;US)

ORGANIC COMPOUNDS

Monitoring

Monitoring

- Routine organic air emissions at the Radioactive Waste Management Complex Waste Storage Facilities fiscal year 1995 report, 96:896 (R;US)
- Waste Area Grouping 2 Remedial Investigation Phase 1 Seep Task data report: Contaminant source area assessment, 96:2523 (R;US)
- Work plan for preliminary investigation of organic constituents in ground water at the New Rifle site, Rifle, Colorado. Revision 2, 96:454 (R;US)
- Z-Area Saltstone Disposal Facility groundwater monitoring report. Second quarter 1995, 96:614 (R;US)

Oxidation

- Development studies of a novel wet oxidation process, 96:809 (R;US)
- Ozone destruction of Hanford Site tank waste organics, 96:1906 (R;US)
- Transpiring wall supercritical water oxidation test reactor design report, 96:2575 (R;US)

Quantitative Chemical Analysis

- Comparison of vapor sampling system (VSS) and in situ vapor sampling (ISVS) methods on Tanks C-107, BY-108, and S-102, 96:1522 (R;US)

Radiolysis

- Organic tanks safety program FY95 waste aging studies, 96:1439 (R;US)

Reduction

- Mixed waste treatment using the ChemChar thermolytic detoxification technique, 96:817 (R;US)

Remedial Action

- Demonstration, testing, & evaluation of in situ heating of soil. Draft final report, Volume I, 96:2414 (R;US)

Removal

- Chemically enhanced mixed region vapor stripping of TCE-contaminated saturated peat and silty clay soils, 96:2539 (R;US)
- Demonstrating and implementing innovative technologies: Case studies from the USDOE Office of Technology Development, 96:996 (R;US)
- Demonstration testing and evaluation of in situ soil heating. Management Plan, Revision 2, 96:2413 (R;US)
- Development of HUMASORB™, a lignite derived humic acid for removal of metals and organic contaminants from groundwater, 96:491 (R;US)
- Dynamic underground stripping. Innovative technology summary report, 96:473 (R;US)
- Electromagnetic mixed-waste processing system for asbestos decontamination, 96:812 (R;US)
- In situ enhanced soil mixing. Innovative technology summary report, 96:2349 (R;US)
- Laboratory testing of the in-well vapor-stripping system, 96:578 (R;US)
- Safety assessment for the proposed pilot-scale treatability tests for the 200-UP-1 and 200-ZP-1 groundwater operable units. Revision 1, 96:356 (R;US)
- Stakeholder acceptance analysis: Tunable hybrid plasma, 96:1000 (R;US)
- Technology application analyses at five Department of Energy Sites, 96:2090 (R;US)

Separation Processes

- Arid sites stakeholder participation in evaluating innovative technologies: VOC-Arid Site Integrated Demonstration, 96:980 (R;US)

Supercritical Gas Extraction

- Environmental management technology demonstration and commercialization: Tasks 2, 3, 4, and 8. Semiannual report, October 1994–March 1995, 96:819 (R;US)

Underground Storage

- Bubble retention in synthetic sludge: Testing of alternative gas retention apparatus, 96:1407 (R;US)

Wet Oxidation Processes

- Removal of strontium and transuranics from Hanford waste via hydrothermal processing – FY 1994/95 test results, 96:2555 (R;US)

ORGANIC HALOGEN COMPOUNDS

See also ORGANIC CHLORINE COMPOUNDS

- Initial field test of High-Energy Corona process for treating a contaminated soil-offgas stream, 96:2542 (R;US)

ORGANIC ION EXCHANGERS

- Comparison of organic and inorganic ion exchangers for removal of cesium and strontium from simulated and actual Hanford 241-AW-101 DSSF tank waste, 96:1516 (R;US)
- Initial evaluation of two organic resins and their ion exchange column performance for the recovery of cesium from Hanford alkaline wastes, 96:2655 (R;US)

ORGANIC MATTER

- Demonstration test and evaluation of ultraviolet/ultraviolet catalyzed peroxide oxidation for groundwater remediation at Oak Ridge K-25 Site, 96:495 (R;US)

ORGANIC POLYMERS

See also PLASTICS
RESINS

- Evaluation of polyacrylonitrile (PAN) as a binding polymer for absorbers used to treat liquid radioactive wastes, 96:2659 (R;US)
- Phase 2 report on the evaluation of polyacrylonitrile (PAN) as a binding polymer for absorbers used to treat liquid radioactive wastes, 96:1036 (R;US)

ORGANIC SOLVENTS

- Laboratory treatability studies preparatory to field testing a resting-cell in situ microbial filter bioremediation strategy, 96:1040 (R;US)
- Surfactant-modified zeolites as permeable barriers to organic and inorganic groundwater contaminants, 96:490 (R;US)
- Waste and cost reduction using dual wall reverse circulation drilling with multi-level groundwater sampling for contaminant plume delineation, 96:404 (R;US)

ORGANIC WASTES

- Advanced organic analysis and analytical methods development: FY 1995 progress report. Waste Tank Organic Safety Program, 96:1435 (R;US)
- Comparison of passive soil vapor survey techniques at a Tijeras Arroyo site, Sandia National Laboratories, Albuquerque, New Mexico, 96:1037 (R;US)
- Development of advanced waste treatment technologies for demonstration in the Mixed Waste Management Facility, 96:1041 (R;US)
- Facility status and progress of the INEL's WERF MLLW and LLW incinerator, 96:897 (R;US)
- Nitric-phosphoric acid oxidation of organic waste materials, 96:1119 (R;US)
- Pollution prevention opportunity assessment for the K-25 Site Toxic Substances Control Act Incinerator Operations, Level III, 96:2482 (R;US)
- Preliminary analysis of NAPL behavior in soil-heated vapor extraction for in-situ environmental restoration, 96:2570 (R;US)
- Summary of FY 1994 Raman spectroscopy technology cold test activities, 96:2611 (R;US)
- Tank characterization report for single-shell Tank B-201, 96:1350 (R;US)
- Use of organic functional group concentrations as a means of screening for energetics, 96:1468 (R;US)

ORGDP

- Advances in the development of FTIR continuous emission monitor for incinerators, 96:2296 (R;US)
- Demonstration test and evaluation of ultraviolet/ultraviolet catalyzed peroxide oxidation for groundwater remediation at Oak Ridge K-25 Site, 96:495 (R;US)
- Environmental restoration risk-based prioritization work package planning and risk ranking methodology. Revision 2, 96:153 (R;US)
- Microgravity survey of the Oak Ridge K-25 Site, Oak Ridge, Tennessee, 96:524 (R;US)

Pilot-scale treatability testing – Recycle, reuse, and disposal of materials from decontamination and decommissioning activities: Soda blasting demonstration, 96:2114 (R;US)
Remote Operated Vehicle with CO₂ Blasting (ROVCO₂). Phase 1, 96:2251 (R;US)
Site descriptions of environmental restoration units at the Oak Ridge K-25 Site, Oak Ridge, Tennessee, 96:200 (R;US)
Technical specification for transferring tank construction data to the Oak Ridge Environmental Information System (OREIS), 96:157 (R;US)
Wetland survey of selected areas in the K-24 Site Area of responsibility, 96:2537 (R;US)

ORION COMPUTERS

See COMPUTERS

ORNL

Decontamination

Annual summary report on the surveillance and maintenance activities for the Oak Ridge National Laboratory Environmental Restoration Program for fiscal year 1995, 96:2171 (R;US)

Diagrams

Site characterization summary report for Waste Area Grouping 10 Wells at the Old Hydrofracture Facility, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2514 (R;US)

Ground Water

Work plan for the Oak Ridge National Laboratory groundwater program: Continuous groundwater collection, 96:545 (R;US)

Historical Aspects

Attitudes and practices regarding disposal of liquid nuclear waste at Clinton Laboratories in the very early years: A historical analysis, 96:224 (R;US)

Hot Labs

Health and safety plan for the Isotopes Facilities Deactivation Project at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2174 (R;US)

Hydrology

FY94 site characterization and multilevel well installation at a west Bear Creek Valley research site on the Oak Ridge Reservation, 96:2536 (R;US)

Wetland survey of the X-10 Bethel Valley and Melton Valley groundwater operable units at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:548 (R;US)

Isotope Production

Work plan for the Isotopes Facilities Deactivation Project at Oak Ridge National Laboratory, 96:2163 (R;US)

Isotope Separation Plants

Project management plan for the isotopes facilities deactivation project at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2175 (R;US)

Mapping

Terrestrial mapping of the Oak Ridge Reservation: Phase 1. Environmental Restoration Program, 96:156 (R;US)

Nonradioactive Waste Management

Oak Ridge National Laboratory program plan for certification of nonradioactive hazardous waste, 96:976 (R;US)

Pilot Plants

Level 3 Baseline Risk Assessment for Building 3515 at Oak Ridge National Lab., Oak Ridge, TN, 96:2165 (R;US)

Radiation Hazards

Site characterization of ORNL D&D facilities, 96:2023 (R;US)

Radiation Protection

Site Safety and Health Plan (Phase 3) for the treatability study for in situ vitrification at Seepage Pit 1 in Waste Area Grouping 7, Oak Ridge National Laboratory, Oak Ridge, TN, 96:2515 (R;US)

Radioactive Waste Disposal

Attitudes and practices regarding disposal of liquid nuclear waste at Clinton Laboratories in the very early years: A historical analysis, 96:224 (R;US)

Site characterization summary report for Waste Area Grouping 10 Wells at the Old Hydrofracture Facility, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2514 (R;US)

Radioactive Waste Facilities

HAZWOPER project documents for demolition of the Waste Evaporator Facility, Building 3506, at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2172 (R;US)

Recent improvements to the SOURCE1 and SOURCE2 computer codes, 96:707 (R;US)

Site Safety and Health Plan (Phase 3) for the treatability study for in situ vitrification at Seepage Pit 1 in Waste Area Grouping 7, Oak Ridge National Laboratory, Oak Ridge, TN, 96:2515 (R;US)

Site characterization report for the Old Hydrofracture Facility at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2527 (R;US)

Radioactive Waste Management

Completion report for the Inactive Liquid Low-Level Waste Tank Remediation Project at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2170 (R;US)

Current and projected liquid low-level waste generation at ORNL, 96:974 (R;US)

Evaluation of interim and final waste forms for the newly generated liquid low-level waste flowsheet, 96:970 (R;US)

Liquid and Gaseous Waste Operations Department annual operating report, CY 1995, 96:975 (R;US)

On-site laboratory support of Oak Ridge National Laboratory environmental restoration field activities, 96:53 (R;US)

Preliminary engineering report waste area grouping 5, Old Hydrofracture Facility Tanks content removal project, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:960 (R;US)

Project management plan for inactive tanks 3001-B, 3004-B, 3013, and T-30 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Environmental Restoration Program, 96:955 (R;US)

Readiness review plan for the in situ vitrification demonstration of Seepage Pit 1 in Waste Area Grouping 7, 96:2513 (R;US)

Results of 1995 characterization of Gunite and Associated Tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:1342 (R;US)

Root cause analysis for waste area grouping 1, Batch I, Series 1 Tank T-30 project at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:959 (R;US)

The selective removal of ⁹⁰Sr and ¹³⁷Cs from liquid low-level waste at Oak Ridge National Laboratory, 96:699 (R;US)

Treatability study operational testing program and implementation plan for the Gunite and Associated Tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2522 (R;US)

Underground radioactive waste tank remote inspection and sampling, 96:2335 (R;US)

Use of remote sensing to identify waste sources at ORNL's SWSA 4, 96:2333 (R;US)

Waste Area Grouping 4 Site Investigation Sampling and Analysis Plan, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2397 (R;US)

Waste management plan for inactive LLLW tanks 3001-B, 3004-B, 3013, and T-30 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Environmental Restoration Program, 96:953 (R;US)

Radioactive Waste Storage

A facility design for repackaging ORNL CH-TRU legacy waste in Building 3525, 96:1346 (R;US)

Addendum to the health and safety plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Environmental Restoration Program, 96:217 (R;US)

Maintenance Action Readiness Assessment Plan for Waste Area Grouping 1 inactive Tanks 3001-B, 3004-B, T-30, and 3013 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:956 (R;US)

Results of Fall 1994 sampling of gunite and associated tanks at the Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:1341 (R;US)

Site investigation report for Waste Area Grouping 4 at Oak Ridge National Laboratory. Volume 1, Text: Environmental Restoration Program, 96:2517 (R;US)

ORNL
Radioactive Waste Storage

Site investigation report for Waste Area Grouping 4 at Oak Ridge National Laboratory. Volume 2, Appendixes: Environmental Restoration Program, 96:2518 (R;US)
Technical specification for transferring tank construction data to the Oak Ridge Environmental Information System (OREIS), 96:157 (R;US)

Radiometric Surveys

Surface radiological investigations along State Highway 95, Lagoon Road, and Melton Valley Drive, Oak Ridge Reservation, Oak Ridge, Tennessee, 96:2516 (R;US)

Remedial Action

Annual summary report on the surveillance and maintenance activities for the Oak Ridge National Laboratory Environmental Restoration Program for fiscal year 1995, 96:2171 (R;US)
Applying a life cycle decision methodology to Fernald waste management alternatives, 96:716 (R;US)
Case study of ¹³⁷Cesium plots remediation at Oak Ridge National Laboratory, 96:692 (R;US)
Data base management plan for the remedial investigation/feasibility study at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:222 (R;US)
Discovery, interception, and treatment of a groundwater plume: Oak Ridge National Laboratory, 96:407 (R;US)
Environmental restoration risk-based prioritization work package planning and risk ranking methodology. Revision 2, 96:153 (R;US)
Remedial investigation report on Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Volume 2, Appendix A: Characterization methods and data summary, 96:2390 (R;US)
Remedial investigation report on Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Volume 3 – Appendix B: Technical findings and conclusions, 96:2395 (R;US)
Remedial investigation report on Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Volume 2 – Appendix A: Characterization methods and data summary, 96:2394 (R;US)
Remedial investigation report on Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Volume 1: Technical summary, 96:2393 (R;US)
Remedial investigation report on Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Volume 3, Appendix B, Technical findings and conclusions, 96:2391 (R;US)
Site characterization of ORNL D&D facilities, 96:2023 (R;US)
Technical report for a fluidless directional drilling system demonstrated at Solid Waste Storage Area 6 shallow buried waste sites, 96:2519 (R;US)
Waste Area Grouping 2 Remedial Investigation Phase 1 Seep Task data report: Contaminant source area assessment, 96:2523 (R;US)
Waste area Grouping 2 Phase I remedial investigation: Sediment and Cesium-137 transport modeling report, 96:2524 (R;US)
Work plan for the Isotopes Facilities Deactivation Project at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2164 (R;US)

Risk Assessment

Waste area Grouping 2 Phase I remedial investigation: Sediment and Cesium-137 transport modeling report, 96:2524 (R;US)

Safety

Site Safety and Health Plan (Phase 3) for the treatability study for in situ vitrification at Seepage Pit 1 in Waste Area Grouping 7, Oak Ridge National Laboratory, Oak Ridge, TN, 96:2515 (R;US)

Site Characterization

Addendum to the health and safety plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Environmental Restoration Program, 96:217 (R;US)

FY94 site characterization and multilevel well installation at a west Bear Creek Valley research site on the Oak Ridge Reservation, 96:2536 (R;US)

Site characterization of ORNL D&D facilities, 96:2023 (R;US)

Site investigation report for Waste Area Grouping 4 at Oak Ridge National Laboratory. Volume 1, Text: Environmental Restoration Program, 96:2517 (R;US)

Site investigation report for Waste Area Grouping 4 at Oak Ridge National Laboratory. Volume 2, Appendixes: Environmental Restoration Program, 96:2518 (R;US)

Wetland survey of the X-10 Bethel Valley and Melton Valley groundwater operable units at Oak Ridge National Laboratory Oak Ridge, Tennessee, 96:548 (R;US)

Storage Facilities

Case study to remove radioactive hazardous sludge from long horizontal storage tanks, 96:1211 (R;US)
Evaluation of phase 1 and phase 2 sampling and analysis data for the Gunite and Associated Tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:1340 (R;US)
Maintenance Action Readiness Assessment Plan for Waste Area Grouping 1 inactive Tanks 3001-B, 3004-B, T-30, and 3013 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:956 (R;US)
Remote systems for waste retrieval from the Oak Ridge National Laboratory gunite tanks, 96:2239 (R;US)
Technical specification for transferring tank construction data to the Oak Ridge Environmental Information System (OREIS), 96:157 (R;US)
W-12 valve pit decontamination demonstration, 96:2538 (R;US)

Surplus Nuclear Facilities

D and D alternatives risk assessment for Building 3515 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2168 (R;US)

Waste Management

Function analysis for waste information systems, 96:160 (R;US)

OSMIUM SULFATES

PACKAGING

Chemical Composition

Mixed waste chemical compatibility: A testing program for plastic packaging components, 96:1013 (R;US)

Compatibility

Effects of Hanford tank simulant waste on plastic packaging to components, 96:1543 (R;US)

Corrosion

Corrosion of low-carbon steel under environmental conditions at Hanford: Two-year soil corrosion test results, 96:1056 (R;US)

Criticality

Addendum 6 to CSAR 79-038 out-of-hood plutonium storage (burial box), 96:1979 (R;US)

Design

A status report on the development and certification of the Beneficial Uses Shipping System (BUSS) cask, 96:271 (R;US)

An overview of the Radioisotope Thermoelectric Generator Transportation System Program, 96:297 (R;US)

Estimates of fire environments in ship holds containing radioactive material packages, 96:251 (R;US)

Impact limiter design for a lightweight tritium hydride vessel transport container, 96:252 (R;US)

Integration of finite element analysis and numerical optimization techniques for RAM transport package design, 96:255 (R;US)

System specification for the plutonium stabilization and packaging system, 96:1956 (R;US)

Destructive Testing

Analytical determination of package response to severe impact, 96:258 (R;US)

Development on inelastic analysis acceptance criteria for radioactive material transportation packages, 96:260 (R;US)

Integration of finite element analysis and numerical optimization techniques for RAM transport package design, 96:255 (R;US)

Radioisotope Thermoelectric Generator Transportation System licensed hardware second certification test series and package shock mount system test, 96:298 (R;US)

The development of a visualization tool for displaying analysis and test results, 96:254 (R;US)

Thermal effects of an advanced wire mesh packaging material, 96:269 (R;US)

Directories

Hanford Site radioactive hazardous materials packaging directory, 96:1602 (R;US)

Fabrication

An overview of the Radioisotope Thermoelectric Generator Transportation System Program, 96:297 (R;US)

Corrosion resistance of candidate transportation container materials, 96:1014 (R;US)

Impact Tests

Use of inelastic analysis to determine the response of packages to puncture accidents, 96:280 (R;US)

Liners

Chemical compatibility screening results of plastic packaging to mixed waste simulants, 96:253 (R;US)

Recommendations

Classification of poison inhalation hazard materials into severity groups, 96:275 (R;US)

Regulations

Westinghouse Hanford Company plan for certifying newly generated contact – handled transuranic waste. Revision 1, 96:1910 (R;US)

Safety

Safety Evaluation for Packaging for onsite Transfer of plutonium recycle test reactor ion exchange columns, 96:1079 (R;US)

Sealing Materials

Chemical compatibility screening results of plastic packaging to mixed waste simulants, 96:253 (R;US)

PACKAGING RULES

Needs assessment activity report: Fiscal year 1995, 96:141 (R;US)

PADUCAH PLANT

Cost savings associated with landfilling wastes containing very low levels of uranium, 96:632 (R;US)

Determination of operating limits for radionuclides for a proposed landfill at Paducah Gaseous Diffusion Plant, 96:694 (R;US)

Dual wall reverse circulation drilling with multi-level groundwater sampling for groundwater contaminant plume delineation at Paducah Gaseous Diffusion Plant, Paducah, Kentucky, 96:558 (R;US)

Tank 241-U-111 headspace gas and vapor characterization results for samples collected in February 1995, 96:1784 (R;US)

Tank 241-U-203 headspace gas and vapor characterization results for samples collected in August 1995, 96:1807 (R;US)

Tank 241-U-204 headspace gas and vapor characterization results for samples collected in August 1995, 96:1808 (R;US)

Criticality

Consideration of criticality when directly disposing highly enriched spent nuclear fuel in unsaturated tuff: Bounding estimates, 96:1575 (R;US)

Decision Making

Decision support tools for policy and planning, 96:207 (R;US)

Decommissioning

HWMA closure plan for the Waste Calcining Facility at the Idaho National Engineering Laboratory, 96:1330 (R;US)

Quality Assurance Project Plan for the treatability study of in situ vitrification of Seepage Pit 1 in Waste Area Grouping 7 at Oak Ridge National Laboratory, 96:221 (R;US)

Site characterization of ORNL D&D facilities, 96:2023 (R;US)

Site characterization summary report for the Old Hydrofracture Facility, Waste Area Grouping 5, at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2521 (R;US)

Successful remediation of four uranium calibration pits at Technical Area II, Sandia National Laboratories, Albuquerque, New Mexico, USA, 96:1012 (R;US)

Waste Area Grouping 4 Site Investigation Data Management Plan, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:952 (R;US)

Decontamination

Site characterization of ORNL D&D facilities, 96:2023 (R;US)

Demolition

HAZWOPER project documents for demolition of the Waste Evaporator Facility, Building 3506, at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2172 (R;US)

Design

Applying modular concepts to process and authorization basis issues for plutonium residue stabilization, 96:1967 (R;US)

Assessment for development of an industrial wet oxidation system for burning waste and low-grade fuels. Final report, October 18, 1989–February 28, 1995, 96:752 (R;US)

Brine release based on structural calculations of damage around an excavation at the Waste Isolation Pilot Plant (WIPP), 96:1549 (R;US)

Development studies for a novel wet oxidation process. Phase 2, 96:810 (R;US)

Feasibility analysis of recycling radioactive scrap steel, 96:751 (R;US)

Geological site characterization for the proposed Mixed Waste Disposal Facility, Los Alamos National Laboratory, 96:915 (R;US)

Letter report: Pre-conceptual design study for a pilot-scale Non-Radioactive Low-Level Waste Vitrification Facility, 96:1006 (R;US)

Remote waste handling and feed preparation for Mixed Waste Management, 96:1042 (R;US)

Solid Waste Operations Complex W-113, Detail Design Report (Title II). Volume 1: Title II design report, 96:1084 (R;US)

Solid waste operations complex W-113: Preliminary design report. Volume I, 96:838 (R;US)

Tank Waste Remediation System High-Level Waste Melter Vitrification System Development and Testing Strategy, 96:1867 (R;US)

Uranium Mill Tailings Remedial Action Project (UMTRAP), Slick Rock, Colorado, Revision 1, Volume 3. Calculations, Final design for construction, 96:2037 (R;US)

Diagnostic Techniques

Application of modern diagnostic methods to environmental improvement. Annual progress report, October 1994–September 1995, 96:2341 (R;US)

Economics

Feasibility analysis of recycling radioactive scrap steel, 96:751 (R;US)

Efficiency

Idaho Chemical Processing Plant Process Efficiency improvements, 96:194 (R;US)

Electromagnetic Surveys

Geophex Airborne Unmanned Survey System, 96:2376 (R;US)

Emergency Plans

Liquid Effluent Retention Facility/Effluent Treatment Facility Hazards Assessment, 96:1077 (R;US)

Engineering

Long-term decontamination engineering study. Volume 3: Appendix E, Appendix F, Appendix G, Appendix H, 96:2229 (R;US)

Environmental Exposure Pathway

An exposure assessment of radionuclide emissions associated with potential mixed-low level waste disposal facilities at fifteen DOE sites, 96:715 (R;US)

Environmental Impact Statements

Draft environmental assessment - Closure of the Waste Calcining Facility (CPP-633), Idaho National Engineering Laboratory, 96:2084 (R;US)

Hazardous waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy Waste Management Programmatic Environmental Impact Statement, 96:637 (R;US)

High-level waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy Environmental Management Programmatic Environmental Impact Statement, 96:1178 (R;US)

Low-level waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy Waste Management Programmatic Environmental Impact Statement, 96:635 (R;US)

Environmental Impacts

Ecotoxicological screen of Potential Release Site 50-006(d) of Operable Unit 1147 of Mortand Canyon and relationship to the Radioactive Liquid Waste Treatment Facilities project, 96:203 (R;US)

Groundwater screening evaluation/monitoring plan: 200 Area Treated Effluent Disposal Facility (Project W-049H). Revision 1, 96:598 (R;US)

Equipment

Equipment sizing calculations for the Extensive Separations Alternative engineering data package, 96:1697 (R;US)

Evaluation

A source release model with application to the LANL LLRW disposal site performance assessment, 96:938 (R;US)

Exhaust Systems

296-B-10 stack monitoring and sampling system annual system assessment report, 96:1878 (R;US)

Operational test procedure for SY tank farm replacement exhaust unit, 96:1835 (R;US)

Fire Hazards

Fire hazard analysis for Project W-320 Tank 241-C-106 waste retrieval, 96:1657 (R;US)

Fire hazard analysis of the radioactive mixed waste trenches, 96:1094 (R;US)

Fires

A method for estimating ground areas contaminated by a postulated fire in a facility containing radioactive material, 96:1075 (R;US)

Flammability

Flammable gas tank safety program: Technical basis for gas analysis and monitoring, 96:1818 (R;US)

Floors

T Plant canyon deck-level allowable floor-load study, 96:2230 (R;US)

Flow Models

UNSAT-H infiltration model calibration at the Subsurface Disposal Area, Idaho National Engineering Laboratory, 96:519 (R;US)

Gases

Flammable gas tank safety program: Technical basis for gas analysis and monitoring, 96:1818 (R;US)

Geophysical Surveys

Application of non-intrusive geophysical techniques at the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories, New Mexico, 96:1018 (R;US)

Geophysical investigation of the 116-B-11 retention basin, 116-B-1 liquid waste disposal trench, and 116-B-13 sludge trench, 100-BC-1 Operable Unit, 96:2313 (R;US)

Hazardous Materials Spills

B Plant aggregate area management study technical baseline report, 96:1190 (R;US)

PUREX Plant aggregate area management study technical baseline report, 96:1189 (R;US)

Hazards

Liquid Effluent Retention Facility/Effluent Treatment Facility Hazards Assessment, 96:1077 (R;US)

Historical Aspects

B Plant aggregate area management study technical baseline report, 96:1190 (R;US)

PUREX Plant aggregate area management study technical baseline report, 96:1189 (R;US)

Hydrology

Hydrogeologic analyses in support of the conceptual model for the LANL Area G LLRW performance assessment, 96:2496 (R;US)

Inspection

Ultra wide band radar holographic imaging of buried waste at DOE sites, 96:2563 (R;US)

Levels

Tank 241-C-106 thermal hydraulic analysis to establish the cooling liquid at a minimum level, 96:1799 (R;US)

License Applications

1994 annual report on low-level radioactive waste management progress, 96:728 (R;US)

Permitting plan for the high level waste vitrification plant, 96:1823 (R;US)

Licensing

1994 annual report on low-level radioactive waste management progress, 96:728 (R;US)

Development of low-level radioactive waste disposal capacity in the United States - progress or stalemate?, 96:618 (R;US)

Low-level waste forum meeting reports, 96:680 (R;US)

Life-Cycle Cost

Waste Management facilities cost information: System Cost Model Software Quality Assurance Plan. Revision 2, 96:856 (R;US)

Magnetic Surveys

Geophex Airborne Unmanned Survey System, 96:2376 (R;US)

Management

CPP-603 Underwater Fuel Storage Facility Site Integrated Stabilization Management Plan (SISMP), Volume I, 96:1318 (R;US)

Mathematical Models

Issues related to estimating potential radiological doses from treatment, storage, and disposal facilities handling waste containing trace amounts of radioactive material, 96:630 (R;US)

Meteorology

Meteorological monitoring sampling and analysis plan for the environmental monitoring plan at Waste Area Grouping 6, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:218 (R;US)

Moisture Gages

Design Requirements Document (DRD) for Surface Moisture Measurement System (SMMS), 96:2608 (R;US)

Monitoring

Acceptance/operational test procedure 103-AN tank camera purge system and 103-AN video camera system, 96:1832 (R;US)

RADIOACTIVE WASTE FACILITIES

Monitoring

Environmental monitoring plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2388 (R;US)

Long-term surveillance plan for the Ambrosia Lake, New Mexico disposal site, 96:2065 (R;US)

Long-term surveillance plan for the Mexican Hat disposal site, Mexican Hat, Utah, 96:2061 (R;US)

Standard-C hydrogen monitoring system. Acceptance test report, 96:1669 (R;US)

Unsaturated hydrologic flow parameters based on laboratory and field data for soils near the mixed waste landfill, technical area III, Sandia National Laboratories/New Mexico, 96:1039 (R;US)

Z-Area Saltstone Disposal Facility groundwater monitoring report. Second quarter 1995, 96:614 (R;US)

Occupational SafeTy

Site health and safety plan/work plan for further characterization of waste drums at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2512 (R;US)

Operating Licenses

Model training curriculum for Low-Level Radioactive Waste Disposal Facility Operations, 96:785 (R;US)

Operation

Developing operating procedures for a low-level radioactive waste disposal facility, 96:778 (R;US)

Lessons Learned Report for the radioactive mixed waste land disposal facility (Trench 31, Project W-025), 96:1097 (R;US)

Ownership

Review of private sector and Department of Energy treatment, storage, and disposal capabilities for low-level and mixed low-level waste, 96:906 (R;US)

Performance

A source release model with application to the LANL LLRW disposal site performance assessment, 96:938 (R;US)

Effects of closure cap and liner on contaminant release rates from grouted wastes, 96:608 (R;US)

Hydrogeologic analyses in support of the conceptual model for the LANL Area G LLRW performance assessment, 96:2496 (R;US)

Impact of revised 10 CFR 20 on existing performance assessment computer codes used for LLW disposal facilities, 96:847 (R;US)

Introduction to radiological performance assessment, 96:777 (R;US)

Performance evaluation of the technical capabilities of DOE sites for disposal of mixed low-level waste. Volume 1: Executive summary, 96:741 (R;US)

Performance evaluation of the technical capabilities of DOE sites for disposal of mixed low-level waste. Volume 2: Technical basis and discussion of results, 96:742 (R;US)

The role of a detailed aqueous phase source release model in the LANL Area G performance assessment, 96:943 (R;US)

Performance Testing

Cost benefit and risk assessment for selected tank waste process testing alternatives, 96:1815 (R;US)

Preliminary parametric performance assessment of potential final waste forms for alpha low-level waste at the Idaho National Engineering Laboratory. Revision 1, 96:866 (R;US)

Pressure Measurement

Variable-density flow and transport modeling to evaluate anomalous nitrate concentrations and pressures in GW-134, 96:962 (R;US)

Procurement

Survey of commercial firms with mixed-waste treatability study capability, 96:902 (R;US)

Productivity

Idaho Chemical Processing Plant Process Efficiency improvements, 96:194 (R;US)

Pumps

Design analysis supporting 101-SY Water Decon System, 96:1680 (R;US)

Flexible receiver adapter and secondary bagger support frame analysis for 241AP102 mixer pump removal, 96:1089 (R;US)

Test report - 241-AN-274 Caustic Pump Control Building, 96:1673 (R;US)

Quality Control

Statistical analysis of shard and canister glass correlation test, 96:1406 (R;US)

Radiation Accidents

B Plant aggregate area management study technical baseline report, 96:1190 (R;US)

PUREX Plant aggregate area management study technical baseline report, 96:1189 (R;US)

Waste management facility accident analysis (WASTE ACC) system: software for analysis of waste management alternatives, 96:624 (R;US)

Radiation Doses

Issues related to estimating potential radiological doses from treatment, storage, and disposal facilities handling waste containing trace amounts of radioactive material, 96:630 (R;US)

Radiation Monitoring

Environmental surveillance results for 1995 for the Hazelwood Interim Storage Site, 96:2089 (R;US)

Z-Area Saltstone Disposal Facility groundwater monitoring report. Second quarter 1995, 96:614 (R;US)

Radiation Protection

Project W-320 ALARA Plan, 96:1658 (R;US)

Site Safety and Health Plan (Phase 3) for the treatability study for in situ vitrification at Seepage Pit 1 in Waste Area Grouping 7, Oak Ridge National Laboratory, Oak Ridge, TN, 96:2515 (R;US)

Radioactive Waste Disposal

1994 state-by-state assessment of low-level radioactive wastes received at commercial disposal sites, 96:788 (R;US)

Radioactive Waste Management

Waste management facility accident analysis (WASTE ACC) system: software for analysis of waste management alternatives, 96:624 (R;US)

Regulations

Compliance matrix for the mixed waste disposal facilities, trenches 31 and 34, burial ground 218-W-5. Revision 2, 96:1102 (R;US)

Remedial Action

100 Area rock screening study, 96:2315 (R;US)

100 Area source operable unit focused feasibility study. Volume 1, 96:127 (R;US)

118-B-1 burial ground excavation treatability test report, 96:2430 (R;US)

Action-oriented characterization at Argonne National Laboratory, 96:2291 (R;US)

Application of non-intrusive geophysical techniques at the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories, New Mexico, 96:1018 (R;US)

Interim remedial measure proposed plan for the 200-UP-1 operable unit, Hanford, Washington, Revision 0, 96:501 (R;US)

N-Springs barrier wall drilling program data package. Revision 1, 96:360 (R;US)

Nonradioactive air emissions notice of construction for the stabilization of the 1300-N emergency dump basin, 96:2431 (R;US)

Phase I remedial investigation report of Waste Area Grouping 2 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2387 (R;US)

RCRA Facility investigation/corrective measures study work plan for the 100-DR-2 Operable Unit, Hanford Site, Richland, Washington. Revision 2, 96:2420 (R;US)

Radiation screening of excavated waste at Hanford's 118-B-1 burial site, 96:2560 (R;US)

Site characterization report for the Old Hydrofracture Facility at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2527 (R;US)

Summary of FY-95 NIR moisture measurement development and implementation activities, 96:1864 (R;US)

Risk Assessment

Evaluation of a potential nuclear fuel repository criticality: Lessons learned, 96:1293 (R;US)

Potential waste-clearance strategy for U.S. Department of Energy waste processed at treatment, storage, and disposal facilities, 96:631 (R;US)

Safety

Headspace gas and vapor characterization summary for the 43 vapor program suspect tanks, 96:1809 (R;US)

Site Safety and Health Plan (Phase 3) for the treatability study for in situ vitrification at Seepage Pit 1 in Waste Area Grouping 7, Oak Ridge National Laboratory, Oak Ridge, TN, 96:2515 (R;US)

Site health and safety plan/work plan for further characterization of waste drums at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2512 (R;US)

Tank waste remediation system heat stress control program report, 1995, 96:1863 (R;US)

Safety Analysis

Central waste complex interim safety basis, 96:1096 (R;US)

Hazard and operability study of the multi-function Waste Tank Facility. Revision 1, 96:1651 (R;US)

Safety Engineering

Evaluation of HWVP feed preparation chemistry for an NCAW simulant - Fiscal year 1993: Effect of noble metals concentration on offgas generation and ammonia formation, 96:1354 (R;US)

Safety Standards

Bechtel Hanford, Inc./ERC team health and safety plan Environmental Restoration Disposal Facility operations, 96:661 (R;US)

Samplers

System design specification for rotary mode core sample trucks No. 2, 3, and 4 programmable logic controller, 96:1869 (R;US)

Sampling

60-day safety screen results for tank 241-BY-106, rotary mode, cores 64 and 65, 96:1683 (R;US)

Compatibility Grab Sampling and Analysis Plan, 96:1899 (R;US)

Tank 241-BY-108 vapor sampling and analysis tank characterization report. Revision 1, 96:1732 (R;US)

Service Life

Evaluation of remaining life of the double-shell tank waste systems, 96:1752 (R;US)

Shutdown

Draft environmental assessment - Closure of the Waste Calcining Facility (CPP-633), Idaho National Engineering Laboratory, 96:2084 (R;US)

Site Characterization

1994 annual report on low-level radioactive waste management progress, 96:728 (R;US)

Development of low-level radioactive waste disposal capacity in the United States - progress or stalemate?, 96:618 (R;US)

Geological site characterization for the proposed Mixed Waste Disposal Facility, Los Alamos National Laboratory, 96:915 (R;US)

Interpretation of large-strain geophysical crosshole tests, 96:295 (R;US)

N-Springs barrier wall drilling program data package. Revision 1, 96:360 (R;US)

Report to Congress: 1995 Annual report on low-level radioactive waste management progress, 96:735 (R;US)

Site characterization report for the Old Hydrofracture Facility at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2527 (R;US)

Variability and scaling of hydraulic properties for 200 Area soils, Hanford Site, 96:2590 (R;US)

Site Selection

An exposure assessment of radionuclide emissions associated with potential mixed-low level waste disposal facilities at fifteen DOE sites, 96:715 (R;US)

Development of low-level radioactive waste disposal capacity in the United States - progress or stalemate?, 96:618 (R;US)

Development studies for a novel wet oxidation process. Phase 2, 96:810 (R;US)

Low-level waste forum meeting reports, 96:682 (R;US)

Source Terms

Recent improvements to the SOURCE1 and SOURCE2 computer codes, 96:707 (R;US)

The comparison of element partitioning in two types of thermal treatment facilities and the effects on potential radiation dose, 96:990 (R;US)

Specifications

Solid Waste Operations Complex W-113, Detail Design Report (Title II). Volume 3: Specifications, 96:1085 (R;US)

Surface Contamination

Site characterization report for the Old Hydrofracture Facility at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2527 (R;US)

Tanks

Acceptance Test Report for the 241-AN-107 Enraf Advanced Technology Gauges, 96:2606 (R;US)

Acceptance criteria for non-destructive examination of double-shell tanks, 96:1662 (R;US)

Acceptance/operational test procedure 104-AN tank camera purge system and 104-AN video camera system, 96:1833 (R;US)

Acceptance/operational test procedure 105-AN tank camera purge system and 105-AN video camera system, 96:1834 (R;US)

Operational waste volume projection, 96:1708 (R;US)

Supporting Document for the Southeast Quadrant Historical Tank Content Estimate Report for AW-Tank Farm - Volume I and II, 96:1711 (R;US)

Supporting document for the southeast quadrant historical tank content estimate report for AY-tank farm, 96:1712 (R;US)

Supporting document for the southeast quadrant historical tank content estimate report for AZ-tank farm (Volume 1 and 2), 96:1713 (R;US)

Technical basis for a minimum hydroxide concentration in tanks containing dilute waste, 96:1933 (R;US)

Technology Assessment

Integrated thermal treatment system study - Phase 2 results. Revision 1, 96:872 (R;US)

Testing

Tank Waste Remediation System High-Level Waste Melter Vitrification System Development and Testing Strategy, 96:1867 (R;US)

Vapors

Data quality objectives for generic in-tank health and safety vapor issue resolution. Revision 1, 96:1701 (R;US)

Tank 241-BY-103 headspace gas and vapor characterization results for samples collected in May 1994 and November 1994, 96:1747 (R;US)

Tank 241-BY-104 headspace gas and vapor characterization results for samples collected in April 1994 and June 1994, 96:1721 (R;US)

Tank 241-BY-112 headspace gas and vapor characterization results for samples collected in November 1994, 96:1762 (R;US)

Ventilation

Software Development Plan for the 241-AY and 241-AZ Tank Farm MICON automation system, 96:1868 (R;US)

Viscosimeters

Viscometer software, Version 1.1, Acceptance test report, 96:1672 (R;US)

Vitrification

Site Safety and Health Plan (Phase 3) for the treatability study for in situ vitrification at Seepage Pit 1 in Waste Area Grouping 7, Oak Ridge National Laboratory, Oak Ridge, TN, 96:2515 (R;US)

Void Fraction

Void fraction instrument software, Version 1.2, Acceptance test report, 96:1671 (R;US)

Void fraction instrument software, Version 1.2: Acceptance test procedure, 96:2605 (R;US)

Volume

Waste volume reduction factors for potential 242-A evaporator feed, 96:1876 (R;US)

RADIOACTIVE WASTE FACILITIES

Waste Retrieval

Waste Retrieval

Functions and requirements for a waste dislodging and conveyance system for the Gunitite and Associated Tanks Treatability Study at Oak Ridge National Laboratory, 96:2610 (R;US)

Remediation and cleanout levels for Hanford site single-shell tanks, 96:1882 (R;US)

Water Influx

UNSAT-H infiltration model calibration at the Subsurface Disposal Area, Idaho National Engineering Laboratory, 96:519 (R;US)

Working Conditions

Tank waste remediation system heat stress control program report, 1995, 96:1863 (R;US)

RADIOACTIVE WASTE MANAGEMENT

See also RADIOACTIVE WASTE DISPOSAL

Technical requirements document for the waste flow analysis, 96:197 (R;US)

Bibliographies

TWRS privatization bibliography, 96:238 (R;US)

Charges

Development of waste chargeback systems at the Idaho National Engineering Laboratory (INEL), 96:193 (R;US)

Contract Management

Integration/coordination contractor support to Environmental Restoration Program and Program Support Office. Contract status report, September 1, 1995–September 30, 1995, 96:110 (R;US)

Summary of treatment, storage, and disposal facility usage data collected from U.S. Department of Energy sites, 96:787 (R;US)

Contractors

Lessons learned from the EG&G consolidated hazardous waste subcontract and ESH&Q liability assessment process, 96:869 (R;US)

Cost

Estimating and understanding DOE waste management costs', 96:189 (R;US)

Cost Benefit Analysis

Life cycle cost estimation and systems analysis of Waste Management Facilities, 96:876 (R;US)

Cost Estimation

A comparison of the costs of treating wastes from a radio analytical laboratory, 96:901 (R;US)

System cost model user's manual, version 1.2, 96:175 (R;US)

Waste Management Facilities cost information for low-level waste, 96:859 (R;US)

Waste Management Facilities cost information for mixed low-level waste. Revision 1, 96:860 (R;US)

Data Acquisition

Analyze imagery and other data collected at the Los Alamos National Laboratory, 96:2384 (R;US)

Road Transportable Analytical Laboratory (RTAL) system, 96:2362 (R;US)

Three dimensional characterization and archiving system, 96:2373 (R;US)

Data Base Management

Waste-Mgmt: A computer model for calculation of waste loads, profiles, and emissions, 96:640 (R;US)

Decision Making

Running scenarios using the Waste Tank Safety and Operations Hanford Site model, 96:1454 (R;US)

Documentation

1330-N Waste Handling Facility waste designation sampling requirements, 96:2305 (R;US)

Economic Analysis

Site management system executive summary report – March 1995, 96:330 (R;US)

Economic Impact

Geological aspects of the nuclear waste disposal problem, 96:214 (R;US)

Environmental Impact Statements

Department of Energy Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs: Final Environmental Impact Statement. Summary, 96:1242 (R;US)

Draft Environmental Impact Statement on a proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel. Volume 1, 96:72 (R;US)

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Volume 4, Appendix E: Transportation, Appendix F: Accidents, Appendix G: Waste minimization, Appendix H: Technology development, Appendix I: Minority and low-income population distribution, 96:722 (R;US)

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Volume 3, Appendix A: Public response to revised NOI, Appendix B: Environmental restoration, Appendix C, Environmental impact analysis methods, Appendix D, Risk, 96:721 (R;US)

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Summary, 96:718 (R;US)

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Volume 1, 96:719 (R;US)

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel: Appendix A, environmental justice analysis. Volume 2, 96:73 (R;US)

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel: Appendix D, selection and evaluation of potential ports of entry. Volume 2, 96:76 (R;US)

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel: Appendix C, marine transport and associated environmental impacts. Volume 2, 96:75 (R;US)

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel: Appendix B, foreign research reactor spent nuclear fuel characteristics and transportation casks. Volume 2, 96:74 (R;US)

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel. Summary, 96:71 (R;US)

Environmental Impacts

Draft Waste Management Programmatic Environmental Impact Statement for managing treatment, storage, and disposal of radioactive and hazardous waste. Volume 2, Site data tables, 96:720 (R;US)

Environmental Assessment Radioactive Source Recovery Program, 96:1949 (R;US)

Scenarios of the TWRS low-level waste disposal program, 96:1046 (R;US)

Evaluation

Statements of work for FY 1996 to 2001 for the Hanford Low-Level Tank Waste Performance Assessment Project, 96:1099 (R;US)

Information Retrieval

Enterprise wide transparent information access, 96:1464 (R;US)

Information Systems

- N-Springs Pump and Treat Database user guide, 96:2012 (R;US)

- Sludge washing and dissolution of Melton Valley Storage Tank waste, 96:1206 (R;US)
- Solvent extraction of technetium from alkaline waste media using bis-4,4'-(5')[(tert-butyl)cyclohexano]-18-crown-6, 96:2633 (R;US)

Accidents

- Technical evaluation summary of the in situ vitrification melt expulsion at the Oak Ridge National Laboratory on April 21, 1996, Oak Ridge, Tennessee, 96:2525 (R;US)

Adsorbents

- Phase 2 report on the evaluation of polyacrylonitrile (PAN) as a binding polymer for adsorbents used to treat liquid radioactive wastes, 96:1036 (R;US)

Adsorption

- Effects of soluble organic complexants and their degradation products on the removal of selected radionuclides from high-level waste. Part 3, Distributions of Sr, Cs, Tc, Pu, and Am onto 33 adsorbents from four variations of a 3:1 dilution of Hanford complexant concentrate (CC) simulant: Part 4, The effects of varying dilution ratios on the distribution, 96:1334 (R;US)

Attitudes

- Tribal and public involvement in the U.S. Department of Energy Mixed Waste Focus Area - First quarter status report for the period ending December 31, 1995, 96:905 (R;US)

RADIOACTIVE WASTE PROCESSING

Bench-Scale Experiments

Bench-Scale Experiments

Modelling the unsteady growth state population balance for a nonlinear growth model in an MSMR crystallizer, 96:1112 (R;US)

Bibliographies

TWRS privatization bibliography, 96:239 (R;US)

Chamber Furnaces

Report on the treatability study for inerting small quantities of radioactive explosives and explosive components, 96:1025 (R;US)

Combustion

1993 RCRA Part B permit renewal application, Savannah River Site: Volume 10, Consolidated Incineration Facility, Section C, Revision 1, 96:1114 (R;US)

Comparative Evaluations

Design alternatives report for the cesium removal demonstration, 96:967 (R;US)

Compiled Data

Mixed waste treatment model: Basis and analysis, 96:913 (R;US)

Cost

Information related to low-level mixed waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy Waste Management programmatic environmental impact statement, 96:641 (R;US)

National procurement of private-sector treatment for U.S. Department of Energy mixed low-level wastes, 96:705 (R;US)

Demonstration Programs

Buried Waste Integrated Demonstration fiscal Year 1994 close-out report, 96:2466 (R;US)

Development of advanced waste treatment technologies for demonstration in the Mixed Waste Management Facility, 96:1041 (R;US)

Innovative vitrification for soil remediation, 96:2367 (R;US)

Digestion

Preliminary engineering evaluation of heat and digest treatment for in-tank removal of radionuclides from complexed waste, 96:1884 (R;US)

Economic Analysis

100 Area rock screening study, 96:2315 (R;US)

Electrochemistry

Electrochemical treatment of mixed (hazardous and radioactive) wastes, 96:931 (R;US)

Feasibility Studies

Vitrification of NAC process residue, 96:995 (R;US)

Hazards

Noble metal-catalyzed homogeneous and heterogeneous processes in treating simulated nuclear waste media with formic acid, 96:1462 (R;US)

International Cooperation

Mid-year report: IPC liaison and chemistry of thermal reconstitution, 96:1912 (R;US)

Meetings

Efficient separations and processing crosscutting program 1996 technical exchange meeting. Proceedings, 96:2656 (R;US)

Proceedings of the Efficient Separations and Processing Cross-Cutting Program Annual Technical Exchange Meeting, 96:2653 (R;US)

Microwave Radiation

Microwave technology for waste management applications including disposition of electronic circuitry, 96:1115 (R;US)

Organic Wastes

Steam reforming as a method to treat Hanford underground storage tank (UST) wastes, 96:1540 (R;US)

Planning

Savannah River Site mixed waste Proposed Site Treatment Plan (PSTP). Volumes 1 and 2 and reference document: Revision 2, 96:1131 (R;US)

Process Control

XRF and leaching characterization of waste glasses derived from wastewater treatment sludges, 96:1957 (R;US)

Radioactive Waste Facilities

Liquid Effluent Retention Facility/Effluent Treatment Facility Hazards Assessment, 96:1077 (R;US)

Research Programs

Department of Energy pretreatment of high-level and low-level wastes, 96:1213 (R;US)

Risk Assessment

Information related to low-level mixed waste inventory, characteristics, generation, and facility assessment for treatment, storage, and disposal alternatives considered in the U.S. Department of Energy Waste Management programmatic environmental impact statement, 96:641 (R;US)

S Codes

Evaluation of processing alternatives for the in-tank precipitation facility using flowsheet modeling to reduce waste streams, 96:1147 (R;US)

Schedules

DNFSB Recommendation 94-1 Hanford Site Integrated Stabilization Management Plan. Volume 2, 96:1593 (R;US)

Simulation

Noble metal-catalyzed homogeneous and heterogeneous processes in treating simulated nuclear waste media with formic acid, 96:1462 (R;US)

Supercritical Gas Extraction

Hanford/Rocky Flats collaboration on development of supercritical carbon dioxide extraction to treat mixed waste, 96:1057 (R;US)

Technology Assessment

Alternatives to incineration. Technical area status report, 96:822 (R;US)

Development of waste minimization and decontamination technologies at the Idaho Chemical Processing Plant, 96:2137 (R;US)

ICPP radioactive liquid and calcine waste technologies evaluation final report and recommendation, 96:1294 (R;US)

Innovative vitrification for soil remediation, 96:2367 (R;US)

Integrated thermal treatment systems study. Internal review panel report, 96:727 (R;US)

International technology catalogue: Foreign technologies to support the environmental restoration and waste management needs of the DOE complex, 96:262 (R;US)

Technology Utilization

Development of components for waste management systems using aerospace technology, 96:815 (R;US)

Vitrification

Engineering report of plasma vitrification of Hanford tank wastes, 96:1090 (R;US)

Glass composition development for plasma processing of Hanford high sodium content low-level radioactive liquid waste, 96:1136 (R;US)

Hanford high-level waste melter system evaluation data packages, 96:1496 (R;US)

Letter report: Cold crucible melter assessment, 96:1497 (R;US)

Recycle Waste Collection Tank (RWCT) simulant testing in the PVT feed preparation system, 96:1492 (R;US)

Solid waste handling, 96:1880 (R;US)

Test Plan: Phase 1 demonstration of 3-phase electric arc melting furnace technology for vitrifying high-sodium content low-level radioactive liquid wastes, 96:1108 (R;US)

XRF and leaching characterization of waste glasses derived from wastewater treatment sludges, 96:1957 (R;US)

RADIOACTIVE WASTE STORAGE

Double-Shell Tank Retrieval Allowable Heel Trade Analysis, 96:1873 (R;US)

Site investigation report for Waste Area Grouping 4 at Oak Ridge National Laboratory. Volume 2, Appendixes: Environmental Restoration Program, 96:2518 (R;US)

Site investigation report for Waste Area Grouping 4 at Oak Ridge National Laboratory. Volume 1, Text: Environmental Restoration Program, 96:2517 (R;US)

Aging

Organic tanks safety program FY95 waste aging studies, 96:1439 (R;US)

Chemical Analysis

Results of Fall 1994 sampling of gunite and associated tanks at the Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:1341 (R;US)

Containers

Reliability evaluation methodologies for ensuring container integrity of stored transuranic (TRU) waste, 96:1306 (R;US)
Structural and seismic analyses of waste facility reinforced concrete storage vaults, 96:650 (R;US)

Containment Systems

Gamma irradiation testing of montan wax barrier materials for in-situ waste containment, 96:671 (R;US)

Cost

Waste management facilities cost information for transuranic waste, 96:2449 (R;US)

Data Base Management

Work plan for defining a standard inventory estimate for wastes stored in Hanford site underground tanks, 96:1904 (R;US)

Evaluation

Addendum 6 to CSAR 79-038 out-of-hood plutonium storage (burial box), 96:1979 (R;US)
Evaluation of Rocky Flats Plant stored plutonium inventory at the Idaho National Engineering Laboratory, 96:1964 (R;US)

Forecasting

1995 solid waste 30-year container volume summary, 96:1052 (R;US)

Health Hazards

Addendum to the health and safety plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Environmental Restoration Program, 96:217 (R;US)

Inventories

1995 solid waste 30-year container volume summary, 96:1052 (R;US)
Work plan for defining a standard inventory estimate for wastes stored in Hanford site underground tanks, 96:1904 (R;US)

Monitoring

Chemometrics review for chemical sensor development, task 7 report, 96:2352 (R;US)
Results of the gamma-neutron mapper performance test on 55-gallon drums at the RWMC, 96:2463 (R;US)

Performance Testing

Combustion and fuel loading characteristics of Hanford Site transuranic solid waste, 96:1604 (R;US)

Program Management

Compliance agreements at the INEL: A success story, 96:880 (R;US)

Recommendations

Passive versus active mitigation cost analysis, 96:1648 (R;US)

Remote Sensing

Use of remote sensing to identify waste sources at ORNL's SWSA 4, 96:2333 (R;US)

Safeguard Regulations

Compliance agreements at the INEL: A success story, 96:880 (R;US)

Safety

Addendum to the health and safety plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Environmental Restoration Program, 96:217 (R;US)
Combustion and fuel loading characteristics of Hanford Site transuranic solid waste, 96:1604 (R;US)
Quarterly report on the Ferrocyanide Safety Program for the period ending June 30, 1995, 96:1584 (R;US)

Safety Analysis

Ferrocyanide Safety Program: Analysis of postulated energetic reactions and resultant aerosol generation in Hanford Site Waste Tanks, 96:1600 (R;US)
Tank safety screening data quality objective. Revision 1, 96:1870 (R;US)
Vapor space characterization of waste Tank 241-B-103: Results from samples collected on 2/8/95, 96:1414 (R;US)

Vapor space characterization of waste Tank 241-BY-106 (in situ): Results from samples collected on 5/4/94 and 5/5/94, 96:1358 (R;US)

Vapor space characterization of waste Tank 241-BY-108: Results from samples collected on 10/27/94, 96:1376 (R;US)

Vapor space characterization of waste Tank 241-C-104: Results from samples collected on 2/17/94 and 3/3/94, 96:1378 (R;US)

Vapor space characterization of waste Tank 241-C-107: Results from samples collected on 9/29/94, 96:1424 (R;US)

Vapor space characterization of waste Tank 241-C-108: Results from samples collected through the vapor sampling system on 8/5/94, 96:1360 (R;US)

Vapor space characterization of waste Tank 241-C-109 (in situ): Results from samples collected on 6/23/94, 96:1363 (R;US)

Vapor space characterization of waste Tank 241-C-111 (in situ): Results from samples collected on 6/20/94, 96:1364 (R;US)

Vapor space characterization of waste Tank 241-SX-103: Results from samples collected on 3/23/95, 96:1447 (R;US)

Vapor space characterization of waste Tank 241-SX-106: Results from samples collected on 3/24/95, 96:1387 (R;US)

Vapor space characterization of waste Tank 241-TX-118 (in situ): Results from samples collected on 9/7/94, 96:1422 (R;US)

Vapor space characterization of waste Tank 241-TY-101: Results from samples collected on 4/6/95, 96:1415 (R;US)

Vapor space characterization of waste Tank 241-U-103: Results from samples collected on 2/15/95, 96:1446 (R;US)

Safety Engineering

45-Day safety screen results for Tank 241-BY-103, auger samples 95-AUG-012 and 95-AUG-013, 96:1684 (R;US)

45-Day safety screen results for Tank 241-U-201, push mode, cores 70, 73 and 74, 96:1687 (R;US)

Analysis of organic carbon and moisture in Hanford single-shell tank waste, 96:1361 (R;US)

Functional design criteria for the retained gas sampler system, 96:1825 (R;US)

Gas generation from Tank 241-SY-103 waste, 96:1480 (R;US)

Moisture monitoring and control system engineering study, 96:1816 (R;US)

Permeation of Tank C-103 sludge simulant by organic solvent, 96:1368 (R;US)

Quarterly report on the Ferrocyanide Safety Program for the period ending December 31, 1995, 96:1586 (R;US)

Tank 241-BY-104 vapor sampling and analysis tank characterization report, 96:1719 (R;US)

Tank 241-BY-105 vapor sampling and analysis tank characterization report, 96:1722 (R;US)

Tank 241-BY-106 vapor sampling and analysis tank characterization report, 96:1725 (R;US)

Tank 241-BY-108 vapor sampling and analysis tank characterization report, 96:1731 (R;US)

Tank 241-BY-110 vapor sampling and analysis tank characterization report, 96:1748 (R;US)

Tank 241-C-111 vapor sampling and analysis tank characterization report, 96:1739 (R;US)

Tank 241-C-112 vapor sampling and analysis tank characterization report, 96:1742 (R;US)

Vapor space characterization of Waste Tank 241-S-111: Results from samples collected on 3/21/95, 96:1423 (R;US)

Vapor space characterization of Waste Tank 241-TY-104 (in situ): Results from samples collected on 8/5/94, 96:1425 (R;US)

Vapor space characterization of Waste Tank 241-TY-104: Results from samples collected on 4/27/95, 96:1403 (R;US)

Vapor space characterization of Waste Tank 241-U-105: Results from samples collected on 2/24/95, 96:1412 (R;US)

Vapor space characterization of Waste Tank 241-U-106 (in situ): Results from samples collected on 8/25/94, 96:1421 (R;US)

Vapor space characterization of Waste Tank 241-U-107: Results from samples collected on 2/17/95, 96:1420 (R;US)

Vapor space characterization of waste Tank 241-BY-103: Results from samples collected on 11/1/94, 96:1413 (R;US)

RADIOACTIVE WASTE STORAGE

Safety Engineering

Vapor space characterization of waste Tank 241-BY-104 (in situ):
Results from samples collected on 4/22/94, 96:1362 (R;US)

Sampling

Functions and requirements for the INEL light duty utility arm gripper end effector, 96:2262 (R;US)
Functions and requirements for the INEL light duty utility arm sampler end effector, 96:2261 (R;US)
Results of Fall 1994 sampling of gunite and associated tanks at the Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:1341 (R;US)

Specifications

Data quality objectives for tank farms waste compatibility program. Revision 1, 96:1700 (R;US)

Tanks

Annual radioactive waste tank inspection program: 1995, 96:1942 (R;US)
Sloshing impact in roofed tanks, 96:1184 (R;US)
Supporting document for the Southeast Quadrant historical tank content estimate report for AN-Tank Farm. Vols. I and II, 96:1709 (R;US)
Supporting document for the Southeast quadrant historical tank content estimate report for AP-tank farm. Volume 1 and 2, 96:1710 (R;US)

Volume

Waste volume reduction factors for potential 242-A evaporator feed, 96:1876 (R;US)

Waste Retrieval

Initial ACTR retrieval technology evaluation test material recommendations, 96:1498 (R;US)

RADIOACTIVE WASTES

LOW-LEVEL RADIOACTIVE WASTES

RADIOACTIVE EFFLUENTS

Physical property characterization of 183-H Basin sludge, 96:1105 (R;US)

Alpha Dosimetry

45-Day safety screen results for Tank 241-C-101, auger sample 95-AUG-019, 96:1691 (R;US)
45-Day safety screen results for Tank 241-U-201, push mode, cores 70, 73 and 74, 96:1687 (R;US)

Calcination

Calcination/dissolution residue treatment, 96:1591 (R;US)
Dry-out and low temperature calcination of DST/SST waste blend high temperature melter feed, 96:1489 (R;US)

Chemical Analysis

45-Day safety screen results for Tank 241-B-112, auger samples 95-AUG-014 and 95-AUG-015, 96:1685 (R;US)
45-Day safety screen results for Tank 241-C-101, auger sample 95-AUG-019, 96:1691 (R;US)
45-Day safety screen results for Tank 241-U-201, push mode, cores 70, 73 and 74, 96:1687 (R;US)
45-Day safety screen results for tank 241-C-105, push mode, cores 72 and 76, 96:1688 (R;US)
45-Day safety screen results for tank 241-U-202, push mode, cores 75 and 78, 96:1690 (R;US)
Aqueous sample from B-Plant, Tank 9-1. Revision 1, 96:1682 (R;US)
Development and implementation of an analytical quality assurance plan at the Hanford site, 96:235 (R;US)
Ferrocyanide safety project: Comparison of actual and simulated ferrocyanide waste properties, 96:1351 (R;US)
Forty-five day safety screen results for Tank 241-C-107, push mode, cores 68 and 69, 96:1686 (R;US)
Historical Tank Content Estimate (HTCE) and sampling estimate comparisons, 96:1452 (R;US)
Hot sample archiving. Revision 3, 96:1640 (R;US)
Review of sensors for the in situ chemical characterization of the Hanford underground storage tanks, 96:1580 (R;US)
TWRS privatization support project waste characterization database development, 96:1475 (R;US)

Tank characterization report for single-shell tank 241-C-108, 96:1800 (R;US)

Tank waste source term inventory validation. Volume 1. Letter report, 96:1717 (R;US)

Tank waste source term inventory validation. Volume II. Letter report, 96:1718 (R;US)

Chemical Composition

Analysis of organic carbon and moisture in Hanford single-shell tank waste, 96:1361 (R;US)
Data quality objectives for tank farms waste compatibility program. Revision 1, 96:1700 (R;US)
TWRS privatization support project waste characterization database development. Volume 2, 96:1477 (R;US)
TWRS privatization support project waste characterization database development. Volume 1, 96:1476 (R;US)
The determination of PCBs in Rocky Flats Type IV waste sludge by gas chromatography/electron capture detection. Part 2, 96:2281 (R;US)
Use of remote sensing to identify waste sources at ORNL's SWSA 4, 96:2333 (R;US)

Chemical Properties

45-Day safety screen results for Tank 241-BY-103, auger samples 95-AUG-012 and 95-AUG-013, 96:1684 (R;US)

Classification

Savannah River Site offsite hazardous waste shipment data validation report. Revision 1, 96:773 (R;US)
The CAMU Rule: A tool for implementing a protective, cost-effective remedy at the Fernald Environmental Management Project, 96:2132 (R;US)
Waste treatability guidance program. User's guide. Revision 0, 96:1289 (R;US)

Combustion

Mixed-waste treatment – What about the residuals? A comparative analysis of MSO and incineration, 96:746 (R;US)
Ready, set,...quit! A review of the controlled-air incinerator, 96:945 (R;US)
The comparison of element partitioning in two types of thermal treatment facilities and the effects on potential radiation dose, 96:990 (R;US)

Compatibility

Data quality objectives for tank farms waste compatibility program. Revision 1, 96:1700 (R;US)
Effects of simulant Hanford tank waste on plastic packaging components, 96:1567 (R;US)
Tank Farm Waste Transfer Compatibility Program, 96:1827 (R;US)

Containment

105-KE Basin isolation barrier leak rate test analytical development. Revision 1, 96:603 (R;US)
An assessment of simplified methods to determine damage from ship-to-ship collisions, 96:272 (R;US)
Analysis of a ship-to-ship collision, 96:273 (R;US)
Hanford Site Long-term Surface Barrier Development Program: Fiscal year 1994 highlights, 96:563 (R;US)
Hanford prototype-barrier status report: FY 1995, 96:988 (R;US)
Natural physical and biological processes compromise the long-term performance of compacted soil caps, 96:55 (R;US)
Waste streams that preferentially corrode 55-gallon steel storage drums, 96:2462 (R;US)

Containment Systems

Focused feasibility study of engineered barriers for waste management units in the 200 areas, 96:124 (R;US)

Data Base Management

MWIR-1995 DOE national mixed and TRU waste database users guide, 96:792 (R;US)

Data Compilation

Mixed waste focus area integrated technical baseline report. Phase I, Volume 2: Revision 0, 96:745 (R;US)

Decontamination

Development of waste minimization and decontamination technologies at the Idaho Chemical Processing Plant, 96:2137 (R;US)

Nuclear fuel reprocessing deactivation plan for the Idaho Chemical Processing Plant, Revision 1, 96:2135 (R;US)
Testing and evaluation of light ablation decontamination, 96:2134 (R;US)

Dissolution

Calcination/dissolution residue treatment, 96:1591 (R;US)

Encapsulation

Polyethylene encapsulation full-scale technology demonstration. Final report, 96:669 (R;US)
Technology transfer: A cooperative agreement and success story, 96:907 (R;US)

Environmental Impacts

Radiological survey results at 1 Shady Lane, Lodi, New Jersey (LJ095), 96:2179 (R;US)

Environmental Transport

Development of an educational partnership for enhancement of a computer risk assessment model, 96:234 (R;US)
Multimedia Environmental Pollutant Assessment System (MEPAS®): Groundwater pathway formulations, 96:574 (R;US)
Overview of research and development in subsurface fate and transport modeling, 96:398 (R;US)

Evaluation

Utility of neural networks in nondestructive waste assay measurement methods, 96:2474 (R;US)

Excavation

Results of performance tests on chemical and radiation measurement systems for use at a dig-face, 96:2450 (R;US)

Ferrocyanides

Ferrocyanide safety program: Final report on adiabatic calorimetry and tube propagation tests with synthetic ferrocyanide materials, 96:1810 (R;US)

Flammability

Gas bubble retention and its effect on waste properties: Retention mechanisms, viscosity, and tensile and shear strengths, 96:1426 (R;US)

Gas Analysis

Functional design criteria for the retained gas sampler system, 96:1825 (R;US)
Tank 241-BY-104 vapor sampling and analysis tank characterization report, 96:1719 (R;US)
Tank 241-BY-105 vapor sampling and analysis tank characterization report, 96:1722 (R;US)
Tank 241-BY-106 vapor sampling and analysis tank characterization report, 96:1725 (R;US)
Tank 241-BY-108 vapor sampling and analysis tank characterization report, 96:1731 (R;US)
Tank 241-BY-110 vapor sampling and analysis tank characterization report, 96:1748 (R;US)
Tank 241-C-101 vapor sampling and analysis tank characterization report, 96:1785 (R;US)
Tank 241-C-111 vapor sampling and analysis tank characterization report, 96:1739 (R;US)
Tank 241-C-112 vapor sampling and analysis tank characterization report, 96:1742 (R;US)
Vapor space characterization of Waste Tank 241-S-111: Results from samples collected on 3/21/95, 96:1423 (R;US)
Vapor space characterization of Waste Tank 241-TY-104 (in situ): Results from samples collected on 8/5/94, 96:1425 (R;US)
Vapor space characterization of Waste Tank 241-TY-104: Results from samples collected on 4/27/95, 96:1403 (R;US)
Vapor space characterization of Waste Tank 241-U-105: Results from samples collected on 2/24/95, 96:1412 (R;US)
Vapor space characterization of Waste Tank 241-U-106 (in situ): Results from samples collected on 8/25/94, 96:1421 (R;US)
Vapor space characterization of Waste Tank 241-U-107: Results from samples collected on 2/17/95, 96:1420 (R;US)
Vapor space characterization of waste Tank 241-B-103: Results from samples collected on 2/8/95, 96:1414 (R;US)
Vapor space characterization of waste Tank 241-BY-103: Results from samples collected on 11/1/94, 96:1413 (R;US)

Vapor space characterization of waste Tank 241-BY-104 (in situ): Results from samples collected on 4/22/94, 96:1362 (R;US)
Vapor space characterization of waste Tank 241-BY-108: Results from samples collected on 10/27/94, 96:1376 (R;US)
Vapor space characterization of waste Tank 241-C-104: Results from samples collected on 2/17/94 and 3/3/94, 96:1378 (R;US)

Vapor space characterization of waste Tank 241-C-107: Results from samples collected on 9/29/94, 96:1424 (R;US)
Vapor space characterization of waste Tank 241-C-108: Results from samples collected through the vapor sampling system on 8/5/94, 96:1360 (R;US)
Vapor space characterization of waste Tank 241-C-109 (in situ): Results from samples collected on 6/23/94, 96:1363 (R;US)
Vapor space characterization of waste Tank 241-C-111 (in situ): Results from samples collected on 6/20/94, 96:1364 (R;US)
Vapor space characterization of waste Tank 241-SX-103: Results from samples collected on 3/23/95, 96:1447 (R;US)
Vapor space characterization of waste Tank 241-SX-106: Results from samples collected on 3/24/95, 96:1387 (R;US)
Vapor space characterization of waste Tank 241-TX-118 (in situ): Results from samples collected on 9/7/94, 96:1422 (R;US)
Vapor space characterization of waste Tank 241-TY-101: Results from samples collected on 4/6/95, 96:1415 (R;US)
Vapor space characterization of waste Tank 241-U-103: Results from samples collected on 2/15/95, 96:1446 (R;US)

Grinding

Application of cryogenic grinding to achieve homogenization of transuranic wastes, 96:917 (R;US)

Ground Disposal

A comprehensive inventory of radiological and nonradiological contaminants in waste buried or projected to be buried in the subsurface disposal area of the INEL RWMC during the years 1984-2003, Volume 1, 96:873 (R;US)
Analysis of instantaneous profile test data from soils near the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories/New Mexico, 96:1020 (R;US)
Approach and plan for cleanup actions in the 100-FR-2 operable unit of the Hanford Site, Revision 0, 96:834 (R;US)
Compliance matrix for the mixed waste disposal facilities, trenches 31 and 34, burial ground 218-W-5. Revision 2, 96:1102 (R;US)
Decommissioning of the 216-B-3 Effluent Disposal Pond, 96:2017 (R;US)
Description of work for vadose zone characterization of the 1301-N and 1325-N liquid waste disposal facilities, Revision 1, 96:2428 (R;US)
Development of a cumulative risk assessment for the Idaho National Engineering Laboratory's waste area group 2, 96:173 (R;US)
Environmental restoration disposal facility applicable or relevant and appropriate requirements study report. Revision 00, 96:2303 (R;US)
Final hazard classification for N basin water filtration and sediment relocation operations, 96:656 (R;US)
Focused feasibility study of engineered barriers for waste management units in the 200 areas, 96:124 (R;US)
Frozen soil barrier technology. Innovative technology summary report, 96:475 (R;US)
Geologic processes in the RWMC area, Idaho National Engineering Laboratory: Implications for long term stability and soil erosion at the radioactive waste management complex, 96:895 (R;US)
Geophysical investigation of the 116-H-1 liquid waste disposal trench, 100-HR-1 operable unit, 96:2311 (R;US)
Geophysical investigations in the group II sites 100-D area, 96:2318 (R;US)
Interim-status groundwater monitoring plan for the 216-B-63 trench. Revision 1, 96:594 (R;US)
Mitigation action plan for liquid waste sites in the 100-BC-1, 100-DR-1, and 100-HR-1 units, 96:837 (R;US)
Mixed waste focus area integrated technical baseline report. Phase I, Volume 2: Revision 0, 96:745 (R;US)

RADIOACTIVE WASTES

Ground Disposal

N basin stabilization project independent readiness evaluation plan for high exposure rate hardware removal, 96:2013 (R;US)

Passive and active soil gas sampling at the Mixed Waste Landfill, Technical Area III, Sandia National Laboratories/New Mexico, 96:1017 (R;US)

Probabilistic risk assessment for the Sandia National Laboratories Technical Area V Liquid Waste Disposal System surface impoundments, 96:1031 (R;US)

Readiness review plan for the in situ vitrification demonstration of Seepage Pit 1 in Waste Area Grouping 7, 96:2513 (R;US)

Remedial investigation/feasibility study of the Clinch River/Poplar Creek Operable Unit. Volume 3. Risk assessment information. Appendixes E, F, 96:493 (R;US)

Remedial investigation/feasibility study of the Clinch River/Poplar Creek Operable Unit. Volume 4. Appendixes G, H, and I and information related to the feasibility study and ARARs, 96:2404 (R;US)

Remedial investigation/feasibility study of the Clinch River/Poplar Creek Operable Unit. Volume 2. Biota and representative concentrations of contaminants. Appendixes A, B, C, D, 96:2400 (R;US)

Remedial investigation/feasibility study of the Clinch River/Poplar Creek Operable Unit. Volume 2. Appendixes A, B, C, and D-Biota and representative concentrations of contaminants, 96:2401 (R;US)

Remedial investigation/feasibility study of the Clinch River/Poplar Creek Operable Unit. Volume 5. Appendixes J, K, L, M, and N-other supporting information, 96:2407 (R;US)

Report on the biological monitoring program for Bear Creek at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 1989-1994, 96:2531 (R;US)

S Plant Aggregate Area Management study technical baseline report, 96:1187 (R;US)

Streamlined environmental remediation characterization using remote sensing techniques: Case studies for the US Department of Energy, Oak Ridge Operations, 96:68 (R;US)

T Plant Aggregate Area Management Study technical baseline report, 96:1188 (R;US)

The results of an ecological risk assessment screening at the Idaho National Engineering's waste area group 2, 96:2457 (R;US)

Three-dimensional subsurface imaging synthetic aperture radar, 96:2375 (R;US)

U Plant Aggregate Area Management study technical baseline report, 96:1186 (R;US)

Unsaturated hydrologic flow parameters based on laboratory and field data for soils near the mixed waste landfill, technical area III, Sandia National Laboratories/New Mexico, 96:1039 (R;US)

Virtual environmental applications for buried waste characterization technology evaluation report, 96:2444 (R;US)

Waste area grouping 2 Phase I task data report: Ecological risk assessment and White Oak Creek watershed screening ecological risk assessment, 96:549 (R;US)

Health Hazards

Development of a cumulative risk assessment for the Idaho National Engineering Laboratory's waste area group 2, 96:173 (R;US)

Development of an educational partnership for enhancement of a computer risk assessment model, 96:234 (R;US)

In-Situ Processing

In Situ Remediation Integrated Program: FY 1994 program summary, 96:503 (R;US)

Information

Hanford Site annual dangerous waste report: Volume 2, Generator dangerous waste report, radioactive mixed waste, 96:830 (R;US)

Hanford Site annual dangerous waste report: Volume 4, Waste Management Facility report, Radioactive mixed waste, 96:833 (R;US)

Information Systems

A consolidated and standardized relational database for ER data, 96:54 (R;US)

Inventories

A comprehensive inventory of radiological and nonradiological contaminants in waste buried or projected to be buried in the subsurface disposal area of the INEL RWMC during the years 1984-2003, Volume 2, 96:874 (R;US)

A comprehensive inventory of radiological and nonradiological contaminants in waste buried or projected to be buried in the subsurface disposal area of the INEL RWMC during the years 1984-2003, Volume 3, 96:875 (R;US)

A comprehensive inventory of radiological and nonradiological contaminants in waste buried or projected to be buried in the subsurface disposal area of the INEL RWMC during the years 1984-2003, Volume 1, 96:873 (R;US)

Double shell tanks plutonium inventory assessment, 96:1874 (R;US)

INEL metal recycle radioactive scrap metal survey report, 96:2445 (R;US)

Solid Waste Information Tracking System (SWITS), Backlog Waste Modifications, Software Requirements Specification (SRS), 96:1678 (R;US)

The Savannah River Site Waste Inventory Management Program, 96:1139 (R;US)

Waste-Mgmt: A computer model for calculation of waste loads, profiles, and emissions, 96:640 (R;US)

Isotope Ratio

A technical review of the SWEPP gamma-ray spectrometer system, 96:2477 (R;US)

Land Transport

Offsite Shipment Campaign Readiness Assessment (OSCRA): A tool for offsite shipment campaigns, 96:59 (R;US)

Risk assessment for the on-site transportation of radioactive wastes for the U.S. Department of Energy Waste Management programmatic environmental impact statement, 96:17 (R;US)

Maritime Transport

An assessment of simplified methods to determine damage from ship-to-ship collisions, 96:272 (R;US)

Analysis of a ship-to-ship collision, 96:273 (R;US)

Estimates of fire environments in ship holds containing radioactive material packages, 96:251 (R;US)

Mass Transfer

Tank Farm Waste Transfer Compatibility Program, 96:1827 (R;US)

Materials Handling

Solid waste handling, 96:1880 (R;US)

Materials Handling Equipment

Automated system for handling tritiated mixed waste, 96:2275 (R;US)

Materials Recovery

Efficient separations and processing crosscutting program: Develop and test sorbents, 96:2650 (R;US)

Meetings

Radioactive and mixed waste - risk as a basis for waste classification. Symposium proceedings No. 2, 96:950 (R;US)

Minimization

Annual report on waste generation and waste minimization progress 1993, 96:2346 (R;US)

Development of waste minimization and decontamination technologies at the Idaho Chemical Processing Plant, 96:2137 (R;US)

Life cycle benefit-cost analysis of alternatives for deployment of the transportable vitrification system, 96:850 (R;US)

Los Alamos Waste Management FY96 and FY97 Tactical Plan, March 1, 1996, 96:948 (R;US)

The Los Alamos National Laboratory Chemistry and Metallurgy Research Facility upgrades project - A model for waste minimization, 96:2159 (R;US)

The Savannah River Site Waste Inventory Management Program, 96:1139 (R;US)

Waste minimization through high-pressure microwave digestion of soils for gross α/β analyses, 96:2283 (R;US)

Mixing

Fire hazards analysis for the 241-AN-107 mixer pump installation and caustic addition, 96:1824 (R;US)

Using tank 107-AN caustic addition for confirmation of mixing scale relationship, 96:1646 (R;US)
Waste mixing and diluent selection for the planned retrieval of Hanford Tank 241-SY-102: A preliminary assessment, 96:1469 (R;US)
Waste segregation analysis for salt well pumping in the 200 W Area – Task 3.4, 96:1650 (R;US)

Moisture

Analysis of organic carbon and moisture in Hanford single-shell tank waste, 96:1361 (R;US)
Engineering evaluation of alternatives: Technologies for monitoring interstitial liquids in single-shell tanks, 96:1589 (R;US)
Moisture measurement for high-level-waste tanks using copper activation probe in cone penetrometer, 96:1451 (R;US)
Moisture monitoring and control system engineering study, 96:1816 (R;US)

Monitoring

Alpha contamination assessment for D&D activities: Technology overview, 96:2150 (R;US)
Annual report on waste generation and waste minimization progress 1993, 96:2346 (R;US)
Comparison of photoacoustic radiometry to gas chromatography/mass spectrometry methods for monitoring chlorinated hydrocarbons, 96:2495 (R;US)
Strategic Environmental Research and Development Project FY 1994: Assessing national remote sensing technologies for use in US Department of Energy Environmental Restoration Activities, Oak Ridge Solid Waste Storage Area 4 case study, 96:2532 (R;US)
Supporting document for the Southeast Quadrant historical tank content estimate report for AN-Tank Farm. Vols. I and II, 96:1709 (R;US)
Supporting document for the Southeast quadrant historical tank content estimate report for AP-tank farm. Volume 1 and 2, 96:1710 (R;US)

Nondestructive Analysis

A technical review of the SWEPP gamma-ray spectrometer system, 96:2477 (R;US)
LANL's mobile nondestructive assay and examination systems for radioactive wastes, 96:2502 (R;US)
Mobile waste inspection real time radiography system, 96:2491 (R;US)

Oxidation

Mixed-waste treatment – What about the residuals? A comparative analysis of MSO and incineration, 96:746 (R;US)

Packaging

Compatibility of packaging components with simulant mixed waste, 96:1033 (R;US)
Effects of Hanford tank simulant waste on plastic packaging to components, 96:1543 (R;US)
Effects of simulant Hanford tank waste on plastic packaging components, 96:1567 (R;US)
Integration of finite element analysis and numerical optimization techniques for RAM transport package design, 96:255 (R;US)
Offsite Shipment Campaign Readiness Assessment (OSCRA): A tool for offsite shipment campaigns, 96:59 (R;US)
Thermal effects of an advanced wire mesh packaging material, 96:269 (R;US)
Waste characterization activities at the Lawrence Livermore National Laboratory, 96:2577 (R;US)
Waste shipment engineering data management plan, 96:1837 (R;US)

Physical Properties

Identification of physical properties for the retrieval data quality objective process, 96:1397 (R;US)

Plasma Heating

Application of modern diagnostic methods to environmental improvement. Annual progress report, October 1994–September 1995, 96:2341 (R;US)

Pollution Abatement

Pollution prevention program plan 1996, 96:842 (R;US)

Pyrolysis

Mixed waste treatment using the ChemChar thermolytic detoxification technique, 96:817 (R;US)
The comparison of element partitioning in two types of thermal treatment facilities and the effects on potential radiation dose, 96:990 (R;US)

Qualitative Chemical Analysis

Waste characterization activities at the Lawrence Livermore National Laboratory, 96:2577 (R;US)

Quantitative Chemical Analysis

Vapor space characterization of waste tank 241-C-101: Results from samples collected on 9/1/94, 96:1375 (R;US)

Radiation Accidents

A review of the radiological treatment, 96:634 (R;US)

Radiation Hazards

Facility accident considerations in the US Department of Energy Waste Management Program, 96:11 (R;US)

Radiation Monitoring

Evaluation of phase 1 and phase 2 sampling and analysis data for the Gunitite and Associated Tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:1340 (R;US)
Field test of a post-closure radiation monitor, 96:2093 (R;US)
Groundwater monitoring plan for the 300 Area process trenches, 96:597 (R;US)
Quarterly environmental radiological survey summary: First quarter 1995 100, 200, 300, and 600 Areas, 96:2615 (R;US)

Radioactive Waste Disposal

Characterization of mixed waste for shipment to TSD Facilities Program, 96:942 (R;US)
Geophysical investigation of the 116-C-5 Retention Basin 100-BC-1, Operable Unit, 96:2312 (R;US)
Hanford Site Long-term Surface Barrier Development Program: Fiscal year 1994 highlights, 96:563 (R;US)
Los Alamos Waste Management FY96 and FY97 Tactical Plan, March 1, 1996, 96:948 (R;US)
Mitigation action plan for the environmental restoration disposal facility, 96:133 (R;US)
Mixed waste characterization, treatment & disposal focus area, 96:736 (R;US)
Operational Environmental Monitoring Program Quality Assurance Project Plan, 96:2587 (R;US)
Preliminary assessments the shortcut to remediation (category III-surplus facility assessments), 96:2154 (R;US)
Quarterly environmental radiological survey summary: Second Quarter 1995 100, 200, 300, and 600 Areas, 96:328 (R;US)
Review of selected 100-N waste sites related to N-Springs remediation projects, 96:363 (R;US)
Routine environmental monitoring schedule, calendar year 1995, 96:325 (R;US)
Treatability study operational testing program and implementation plan for the Gunitite and Associated Tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2522 (R;US)
Z plant aggregate area management study technical baseline report, 96:34 (R;US)

Radioactive Waste Management

120-D-1 (100-D) Ponds training plan. Revision 1, 96:659 (R;US)
Air pollution control at a DOE facility, 96:300 (R;US)
Assessment of remote sensing technologies to discover and characterize waste sites, 96:2484 (R;US)
Assessment of remote sensing technologies to discover and characterize waste sites, 96:2485 (R;US)
Dig-face monitoring during excavation of a radioactive plume at Mound Laboratory, Ohio, 96:520 (R;US)
Disposal of sediments from the 1300-N Emergency Dump Basin, 96:2317 (R;US)
Estimating and understanding DOE waste management costs', 96:189 (R;US)
Facility accident considerations in the US Department of Energy Waste Management Program, 96:11 (R;US)
Hanford site performance summary: EM funded programs August 1995, 96:332 (R;US)

RADIOACTIVE WASTES

Radioactive Waste Management

Numerical modeling of the groundwater contaminant transport for the Lake Karachai Area: The methodological approach and the basic two-dimensional regional model, 96:542 (R;US)
 Proposed site treatment plan (PSTP) Volumes I & II & reference document, Revision 3, 96:1132 (R;US)
 Site descriptions of environmental restoration units at the Oak Ridge K-25 Site, Oak Ridge, Tennessee, 96:200 (R;US)
 The unsaturated hydraulic characteristics of the Bandelier Tuff, 96:527 (R;US)

Radioactive Waste Processing

300 Area waste acid treatment system closure plan. Revision 1, 96:2116 (R;US)
 Centrifugal contractors for laboratory-scale solvent extraction tests, 96:1163 (R;US)
 Comparison of organic and inorganic ion exchangers for removal of cesium and strontium from simulated and actual Hanford 241-AW-101 DSSF tank waste, 96:2652 (R;US)
 Description of recommended non-thermal mixed waste treatment technologies: Version 1.0, 96:734 (R;US)
 Efficient separations & processing crosscutting program, 96:2635 (R;US)
 Efficient separations and processing crosscutting program 1996 technical exchange meeting. Proceedings, 96:2656 (R;US)
 Efficient separations and processing crosscutting program: Develop and test sorbents, 96:2650 (R;US)
 Electromagnetic mixed waste processing system for asbestos decontamination, 96:811 (R;US)
 Electronic Denitration Savannah River Site Radioactive Waste, 96:1138 (R;US)
 Environmental restoration disposal facility applicable or relevant and appropriate requirements study report. Revision 00, 96:2303 (R;US)
 Geological site characterization for the proposed Mixed Waste Disposal Facility, Los Alamos National Laboratory, 96:915 (R;US)
 Integrated test plan for the field demonstration of the supported liquid membrane unit, 96:359 (R;US)
 Ion exchange performance of commercial crystalline silicotitanates for cesium removal, 96:2660 (R;US)
 Long-term decontamination engineering study: Appendix A, Appendix B, Appendix C, Appendix D. Volume 2, 96:2228 (R;US)
 Mitigation action plan for the environmental restoration disposal facility, 96:133 (R;US)
 Mixed waste characterization, treatment & disposal focus area, 96:736 (R;US)
 Mixed waste focus area integrated master schedule (current as of May 6, 1996), 96:908 (R;US)
 Oxidative dissolution of chromium from Hanford Tank sludges under alkaline conditions, 96:1526 (R;US)
 Platelet-cooled plasma arc torch. Final report, 96:816 (R;US)
 Present and future roles of solvent extraction in treatment of nuclear wastes, 96:2631 (R;US)
 Solvent extraction of radionuclides from aqueous tank waste, 96:1216 (R;US)
 TRUEX flowsheet development as applied to ICPP sodium-bearing waste using centrifugal contactors, 96:1301 (R;US)
 Tank waste remediation system operational scenario, 96:1595 (R;US)
 Task summary: Hot demonstration of proposed commercial nuclide removal technology, 96:1215 (R;US)
 Testing and evaluation of light ablation decontamination, 96:2134 (R;US)
 The effect of compositional parameters on the TCLP and PCT durability of environmental glasses, 96:1915 (R;US)
 Treatability studies and large-scale treatment of aqueous mixed waste containing heavy metals, 96:2443 (R;US)
 VAC*TRAX - Thermal desorption for mixed wastes, 96:808 (R;US)
 Waste minimization through high-pressure microwave digestion of soils for gross α/β analyses, 96:2283 (R;US)

Radioactive Waste Storage

Hanford Site radioactive hazardous materials packaging directory, 96:1602 (R;US)

Preliminary hazard classification for N-Basin intrusive activities, 96:2021 (R;US)
 Routine organic air emissions at the Radioactive Waste Management Complex Waste Storage Facilities fiscal year 1995 report, 96:896 (R;US)
 Waste streams that preferentially corrode 55-gallon steel storage drums, 96:2462 (R;US)

Radioassay

Mobile waste inspection real time radiography system, 96:2491 (R;US)

Radiometric Sorting

Radiation screening of excavated waste at Hanford's 118-B-1 burial site, 96:2560 (R;US)

Recycling

Applying a life cycle decision methodology to Fernald waste management alternatives, 96:716 (R;US)
 Evaluation of radioactive scrap metal recycling, 96:642 (R;US)

Remedial Action

Approach and plan for cleanup actions in the 100-FR-2 operable unit of the Hanford Site, Revision 0, 96:834 (R;US)
 High exposure hardware removal activity readiness evaluation, 96:2019 (R;US)
 Interactive computer-enhanced remote viewing system, 96:2096 (R;US)
 Long-term decontamination engineering study: Appendix A, Appendix B, Appendix C, Appendix D. Volume 2, 96:2228 (R;US)
 Three-dimensional subsurface imaging synthetic aperture radar, 96:2375 (R;US)
 Virtual environmental applications for buried waste characterization technology evaluation report, 96:2444 (R;US)

Remote Handling

Functions and requirements for the INEL light duty utility arm gripper end effector, 96:2262 (R;US)
 Functions and requirements for the INEL light duty utility arm sampler end effector, 96:2261 (R;US)
 Integrated computer-enhanced remote viewing system. Quarterly report Number 5, October 1993–December 1993, 96:2248 (R;US)
 Interactive computer-enhanced remote viewing system, 96:2093 (R;US)
 Performance benefits of telerobotics and teleoperation - enhancements for an arm-based tank waste retrieval system, 96:2268 (R;US)

Remote Sensing

An intelligent inspection and survey robot, 96:2249 (R;US)
 Assessment of remote sensing technologies to discover and characterize waste sites, 96:2485 (R;US)
 Assessment of remote sensing technologies to discover and characterize waste sites, 96:2484 (R;US)
 Daytime multispectral scanner aerial surveys of the Oak Ridge Reservation, 1992–1994: Overview of data processing and analysis by the Environmental Restoration Remote Sensing Program, Fiscal year 1995, 96:2440 (R;US)
 Strategic Environmental Research and Development Project FY 1994: Assessing national remote sensing technologies for use in US Department of Energy Environmental Restoration Activities, Oak Ridge Solid Waste Storage Area 4 case study, 96:2532 (R;US)

Removal

Electromagnetic mixed-waste processing system for asbestos decontamination, 96:812 (R;US)
 Safety assessment for the proposed pilot-scale treatability tests for the 200-UP-1 and 200-ZP-1 groundwater operable units. Revision 1, 96:356 (R;US)

Rheology

Effect of colloidal aggregation on the sedimentation and rheological properties of tank waste, 96:1429 (R;US)
 Rheology of Savannah River site tank 42 and tank 51 HLW radioactive sludges, 96:1917 (R;US)

Routing

Replacement of the cross-site transfer system liquid waste transport alternatives evaluation, Project W-058, 96:1639 (R;US)

Safety

Site health and safety plan/work plan for further characterization of waste drums at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2512 (R;US)

Sampling

Application of cryogenic grinding to achieve homogenization of transuranic wastes, 96:917 (R;US)
Chemometrics review for chemical sensor development, task 7 report, 96:2352 (R;US)
Functions and requirements for the INEL light duty utility arm gripper end effector, 96:2262 (R;US)
Functions and requirements for the INEL light duty utility arm sampler end effector, 96:2261 (R;US)
Half-liter supernatant sampler system engineering work plan, 96:1903 (R;US)
Improving sample recovery, 96:2609 (R;US)
Operability test procedure for rotary mode core sampling system #3, 96:1828 (R;US)
Operability test procedure for rotary mode core sampling system #4, 96:1829 (R;US)
Preliminary hazard classification for N-Basin intrusive activities, 96:2021 (R;US)
Probability of ignition of reactive wastes by rotary sampling drills, 96:1525 (R;US)
TWRS privatization support project waste characterization database development, 96:1475 (R;US)
Tank 241-B-101 tank characterization plan, 96:1889 (R;US)
Tank 241-S-107 tank characterization plan, 96:1888 (R;US)
Tank 241-SX-108 auger sampling and analysis plan, 96:1898 (R;US)
Tank characterization report for single-shell tank 241-C-108, 96:1800 (R;US)
Test plan for auger sampler improvements, 96:1892 (R;US)

Sedimentation

Effect of colloidal aggregation on the sedimentation and rheological properties of tank waste, 96:1429 (R;US)

Separation Processes

Design, operations, and maintenance of the soil vapor extraction systems for the 200 West Area Carbon Tetrachloride Expedited Response Action, 96:657 (R;US)
Electromagnetic mixed waste processing system for asbestos decontamination, 96:811 (R;US)
Evaluation of polyacrylonitrile (PAN) as a binding polymer for absorbers used to treat liquid radioactive wastes, 96:2659 (R;US)
Ion exchange performance of commercial crystalline silicotitanates for cesium removal, 96:2660 (R;US)

Shielding

ISO-PC Version 1.98: User's guide, 96:324 (R;US)

Solidification

High exposure hardware removal activity readiness evaluation, 96:2019 (R;US)
Rheology of Savannah River site tank 42 and tank 51 HLW radioactive sludges, 96:1917 (R;US)

Stabilization

N basin stabilization project independent readiness evaluation plan for high exposure rate hardware removal, 96:2013 (R;US)

Structural Chemical Analysis

Microscopic characterization of crystalline phases in waste forms, 96:1159 (R;US)

Thermochemical Processes

Mid-year report: IPC liaison and chemistry of thermal reconstitution, 96:1912 (R;US)

Toxicity

Facility accident considerations in the US Department of Energy Waste Management Program, 96:11 (R;US)

Transport

Effects of simulant Hanford tank waste on plastic packaging components, 96:1567 (R;US)
Waste shipment engineering data management plan, 96:1837 (R;US)

Underground Disposal

A comprehensive inventory of radiological and nonradiological contaminants in waste buried or projected to be buried in the subsurface disposal area of the INEL RWMC during the years 1984-2003, Volume 3, 96:875 (R;US)
A comprehensive inventory of radiological and nonradiological contaminants in waste buried or projected to be buried in the subsurface disposal area of the INEL RWMC during the years 1984-2003, Volume 2, 96:874 (R;US)
Buried Waste Integrated Demonstration fiscal Year 1994 close-out report, 96:2466 (R;US)
EMFLUX® soil-gas survey of Technical Area 54, Los Alamos National Laboratory, New Mexico, 96:2487 (R;US)
Groundwater protection plan for the Environmental Restoration Disposal Facility, 96:358 (R;US)
Radionuclides in an underground environment, 96:537 (R;US)
Transport through low porosity media – microstructure and uncertainty analysis, 96:345 (R;US)
Use of probabilistic methods for analysis of cost and duration uncertainties in a decision analysis framework, 96:1566 (R;US)
Waste disposal in underground mines – A technology partnership to protect the environment, 96:1281 (R;US)

Underground Storage

300 Area waste acid treatment system closure plan. Revision 1, 96:2116 (R;US)
45-Day safety screen results and final report for Tank 241-SX-113, Auger samples 94-AUG-028 and 95-AUG-029, 96:1699 (R;US)
45-Day safety screen results for Tank 241-C-201, Auger samples 95-AUG-025 and 95-AUG-026, 96:1696 (R;US)
45-Day safety screen results for tank 241-C-105, push mode, cores 72 and 76, 96:1688 (R;US)
45-Day safety screen results for tank 241-U-202, push mode, cores 75 and 78, 96:1690 (R;US)
45-day safety screen results and final report for tank 241-C-202, auger samples 95-Aug-026 and 95-Aug-027, 96:1698 (R;US)
45-day safety screen results for tank 241-C-204, auger samples 95-Aug-022 and 95-Aug-023, 96:1695 (R;US)
45-day safety screen results for tank 241-U-204, push mode, cores 81 and 82, 96:1693 (R;US)
60-day safety screen results and final report for tank 241-C-111, auger samples 95-Aug-002, 95-Aug-003, 95-Aug-016, and 95-Aug-017, 96:1694 (R;US)
A human factors engineering evaluation of the Multi-Function Waste Tank Facility. Final report, 96:1653 (R;US)
Acceptance Test Procedure: SY101 air pallet system, 96:1667 (R;US)
Actinide extraction from ICPP sodium bearing waste with 0.75 M DHDECMP/TBP in Isopar L®, 96:1324 (R;US)
Annual Radioactive Waste Tank Inspection Program 1994, 96:1929 (R;US)
Application of multisorbent traps to characterization and quantification of workplace exposure source terms, 96:1208 (R;US)
Bayesian methods for the combination of core sampling data with historical models for tank characterization, 96:1410 (R;US)
Calculation of reaction energies and adiabatic temperatures for waste tank reactions, 96:1348 (R;US)
Carbonylation as a separation technique for removal of non-radioactive species for tank waste, 96:1458 (R;US)
Comparison of organic and inorganic ion exchangers for removal of cesium and strontium from simulated and actual Hanford 241-AW-101 DSSF tank waste, 96:2652 (R;US)
Comprehensive supernate treatment: Task summary, 96:1217 (R;US)
Development and determination of a single-shell tank interim stabilization pumping strategy, 96:1817 (R;US)
Double shell tanks plutonium inventory assessment, 96:1874 (R;US)
Dropping of mixing pump in Tank 102-AP, 96:1753 (R;US)
Electrical resistivity tomography at the DOE Hanford site, 96:2197 (R;US)

RADIOACTIVE WASTES

Underground Storage

- Evaluation of the potential for significant ammonia releases from Hanford waste tanks, 96:1527 (R;US)
- External corrosion of tanks 8D-1 and 8D-2. Final report, 96:1385 (R;US)
- Facility effluent monitoring plan for the tank farms facilities, 96:1587 (R;US)
- Ferrocyanide safety project ferrocyanide aging studies. Final report, 96:1523 (R;US)
- Ferrocyanide safety project: Comparison of actual and simulated ferrocyanide waste properties, 96:1351 (R;US)
- Flammable Gas Safety Program: Mechanisms of gas generation from simulated SY Tank Farm wastes. Progress report, FY 1994, 96:1450 (R;US)
- Focused feasibility study of engineered barriers for waste management units in the 200 areas, 96:124 (R;US)
- Frozen soil barrier technology. Innovative technology summary report, 96:475 (R;US)
- Gas bubble retention and its effect on waste properties: Retention mechanisms, viscosity, and tensile and shear strengths, 96:1426 (R;US)
- Geologic processes in the RWMC area, Idaho National Engineering Laboratory: Implications for long term stability and soil erosion at the radioactive waste management complex, 96:895 (R;US)
- H-Area/ITP safety analysis summary report for subsurface liquid waste transport, 96:1934 (R;US)
- Hanford single-shell tank grouping study, 96:1427 (R;US)
- Hanford tank clean up: A guide to understanding the technical issues, 96:1434 (R;US)
- Hanford waste tank cone penetrometer, 96:1626 (R;US)
- Historical Tank Content Estimate (HTCE) and sampling estimate comparisons, 96:1452 (R;US)
- Historical tank content estimate for the southeast quadrant of the Hanford 200 Areas, 96:1715 (R;US)
- Hot sample archiving. Revision 3, 96:1640 (R;US)
- In situ vapor sampling system test procedure, 96:1666 (R;US)
- Integrity assessment plan for PNL 300 area radioactive hazardous waste tank system. Final report, 96:1349 (R;US)
- Long-term safety issues associated with mixer pump operation, 96:1337 (R;US)
- Mechanisms of gas generation from simulated SY tank farm wastes: FY 1995 progress report, 96:1528 (R;US)
- Multi-Function Waste Tank Facility phase out basis. Revision 2, 96:2222 (R;US)
- Nondestructive examination technologies for inspection of radioactive waste storage tanks, 96:1315 (R;US)
- Nuclear waste management and criticality safety, 96:1610 (R;US)
- Organic analysis of ambient samples collected near Tank 241-C-103: Results from samples collected on May 12, 1994, 96:1366 (R;US)
- Oxidative dissolution of chromium from Hanford Tank sludges under alkaline conditions, 96:1526 (R;US)
- Position paper: Live load design criteria for Project W-236A Multi-Function Waste Tank Facility, 96:2223 (R;US)
- Position paper: Seismic design criteria, 96:1654 (R;US)
- Potential enhancements to addressing programmatic risk in the tank waste remediation system (TWRS) program, 96:1512 (R;US)
- Practical Modeling of aluminum species in high-pH waste, 96:1053 (R;US)
- Probabilistic finite element modeling of waste rollover, 96:1440 (R;US)
- Probability of ignition of reactive wastes by rotary sampling drills, 96:1525 (R;US)
- Project W-236A multi-function waste tank facility waste feed projections, 96:1655 (R;US)
- Pump strongback re-design, pump storage, PM procedures, 96:1820 (R;US)
- Radioactive tank waste remediation focus area, 96:1255 (R;US)
- Removal of mixing pump in tank 102-AP – pump drop onto central pit, 96:1754 (R;US)
- Replacement of the cross-site transfer system liquid waste transport alternatives evaluation, Project W-058, 96:1639 (R;US)
- Results of 1995 characterization of Gunitite and Associated Tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:1342 (R;US)
- Review of sensors for the in situ chemical characterization of the Hanford underground storage tanks, 96:1580 (R;US)
- S Plant Aggregate Area Management study technical baseline report, 96:1187 (R;US)
- Screening the Hanford tanks for trapped gas, 96:1449 (R;US)
- Selection of replacement material for the failed surface level gauge wire in Hanford waste tanks, 96:1623 (R;US)
- Solid-phase characterization in flammable-gas-tank sludges by electron microscopy, 96:1418 (R;US)
- Solvent extraction of radionuclides from aqueous tank waste, 96:1216 (R;US)
- Status report for inactive miscellaneous underground storage tanks at Hanford Site 200 Areas, 96:1596 (R;US)
- Structural evaluation of mixer pump installed in Tank 241-AN-107 for caustic addition project, 96:1679 (R;US)
- T Plant Aggregate Area Management Study technical baseline report, 96:1188 (R;US)

- In Situ Remediation Integrated Program: FY 1994 program summary, 96:503 (R;US)
- Innovative Technology Development Program. Final summary report, 96:2469 (R;US)

Projects at the Western Environmental Technology Office. Quarterly technical progress report, July 1, 1995–September 30, 1995, 96:750 (R;US)

Risk Assessment

D and D alternatives risk assessment for Building 3515 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2168 (R;US)

Hanford Site Risk Assessment Methodology. Revision 3, 96:123 (R;US)

Options for improving hazardous waste cleanups using risk-based criteria, 96:346 (R;US)

Proposed plan for interim remedial measures at the 100-BC-1 Operable Units, 96:2423 (R;US)

Risk evaluation of remedial alternatives for the Hanford Site, 96:2117 (R;US)

Risk-based prioritization at Hanford Nuclear Site, 96:237 (R;US)

The System Cost Model: A tool for life cycle cost and risk analysis, 96:904 (R;US)

The development and application of a risk-based prioritization model for the Oak Ridge Environmental Restoration Program, 96:2025 (R;US)

Robots

View graph presentations of the sixth DOE industry/university/lab forum on robotics for environmental restoration and waste management, 96:2271 (R;US)

Safety Standards

Idaho National Engineering Laboratory (INEL) Environmental Restoration (ER) Program Baseline Safety Analysis File (BSAF), 96:106 (R;US)

Site Characterization

Addendum to the remedial investigation report on Bear Creek Valley Operable Unit 2 (Rust Spoil Area, Spoil Area 1, and SY-200 Yard) at the Oak Ridge Y-12 Plant Oak Ridge, Tennessee. Volume 1: Main text, 96:2389 (R;US)

Baseline risk assessment of ground water contamination at the uranium mill tailings site near Lakeview, Oregon. Revision 1, 96:429 (R;US)

Environmental management technology demonstration and commercialization, 96:115 (R;US)

Remedial investigation report on Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Volume 3, Appendix B, Technical findings and conclusions, 96:2391 (R;US)

Remedial investigation work plan for the Upper East Fork Poplar Creek characterization area, Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 96:2409 (R;US)

Site observational work plan for the UMTRA project site at Grand Junction, Colorado, 96:456 (R;US)

Standards

Documenting cost and performance for environmental remediation projects: Department of Energy Office of Environmental Management, 96:2351 (R;US)

General design criteria for Richland Environmental Restoration Project, 96:662 (R;US)

Technology Assessment

Decontamination systems information and research program. Quarterly report, January–March 1995, 96:2097 (R;US)

Decontamination systems information and research program. Quarterly report, October 1995–December 1995, 96:2100 (R;US)

FY-95 technology catalog. Technology development for buried waste remediation, 96:2091 (R;US)

Identification of remediation needs and technology development focus areas for the Environmental Restoration (ER) Project at Sandia National Laboratories/New Mexico (SNL/NM), 96:2568 (R;US)

International technology catalogue: Foreign technologies to support the environmental restoration and waste management needs of the DOE complex, 96:262 (R;US)

Laboratory "proof of principle" investigation for the acoustically enhanced remediation technology, 96:486 (R;US)

Mobile worksystems for decontamination and dismantlement, 96:2095 (R;US)

Radioactive Tank Waste Remediation Focus Area. Technology summary, 96:1254 (R;US)

Record of the facility deactivation, decommissioning, and material disposition (D and D) workshop: A new focus for technology development, opportunities for industry/government collaboration, 96:2110 (R;US)

SEAMIST™. Innovative technology summary report, 96:2348 (R;US)

SRS environmental technology development field test platform, 96:2618 (R;US)

Six phase soil heating. Innovative technology summary report, 96:474 (R;US)

VAMOS: The verification and monitoring options study: Current research options for in-situ monitoring and verification of contaminant remediation and containment within the vadose zone, 96:2192 (R;US)

Technology Transfer

Demonstrating and implementing innovative technologies: Case studies from the USDOE Office of Technology Development, 96:996 (R;US)

Technology catalogue. Second edition, 96:80 (R;US)

The Center for Environmental Technology Innovative Technology Screening Process, 96:223 (R;US)

Technology Utilization

The GETE approach to facilitating the commercialization and use of DOE-developed environmental technologies, 96:114 (R;US)

Verification

Results of the independent radiological verification survey at 4400 Piehl Road, Ottawa Lake, Michigan (BTO002), 96:2182 (R;US)

REMOTE CONTROL

Workload, flow, and telepresence during teleoperation, 96:2245 (R;US)

REMOTE HANDLING EQUIPMENT

See also MANIPULATORS

Flexible receiver adapter formal design review, 96:2226 (R;US)

Functions and requirements for the INEL light duty utility arm gripper end effector, 96:2262 (R;US)

Functions and requirements for the INEL light duty utility arm sampler end effector, 96:2261 (R;US)

Micro-manipulator motion control to suppress macro-manipulator structural vibrations, 96:2267 (R;US)

Performance benefits of telerobotics and teleoperation - enhancements for an arm-based tank waste retrieval system, 96:2268 (R;US)

Remote controlled tool systems for nuclear sites have subsea applications, 96:2276 (R;US)

Remote systems for waste retrieval from the Oak Ridge National Laboratory gunite tanks, 96:2239 (R;US)

Shielded Cells D&D and Dismantlement System Requirements, 96:2233 (R;US)

System analysis: Developing tools for the future, 96:2273 (R;US)

System design for safe robotic handling of nuclear materials, 96:2272 (R;US)

REMOTE VIEWING EQUIPMENT

Environmental technology development through industry partnership, 96:2257 (R;US)

Integrated computer-enhanced remote viewing system. Quarterly report Number 5, October 1993–December 1993, 96:2248 (R;US)

Interactive Computer-Enhanced Remote Viewing System (ICERVS). Phase 2, 96:2259 (R;US)

Interactive computer-enhanced remote viewing system, 96:2096 (R;US)

Long range position and orientation tracking system, 96:2238 (R;US)

Topographical mapping system for hazardous and radiological environments, 96:2240 (R;US)

RESEARCH AND TEST REACTORS

RISK ANALYSIS

See RISK ASSESSMENT

RISK ASSESSMENT

- Application of spreadsheets to standardize transportation radiological risk assessments, 96:267 (R;US)
Applying RESRAD-CHEM for chemical risk assessment, 96:2289 (R;US)
Approach and strategy for performing ecological risk assessments for the US Department of Energy's Oak Ridge Reservation: 1995 revision, 96:151 (R;US)
Assessment of risks to individuals from the transportation of radioactive materials, 96:10 (R;US)
Benchmarking analysis of three multimedia models: RESRAD, MMSOILS, and MEPAS, 96:2418 (R;US)
Developing RESRAD-BASELINE for environmental baseline risk assessment, 96:628 (R;US)
Development of an educational partnership for enhancement of a computer risk assessment model, 96:234 (R;US)
Environmental Hazards Assessment Program quarterly report, January–March 1995, 96:91 (R;US)
Environmental hazards assessment program. Quarterly report, October–December 1995, 96:96 (R;US)
Expected residence time model, 96:278 (R;US)
LANL environmental restoration site ranking system: System description. Final report, 96:2152 (R;US)
Preliminary assessment of the ecological risks to wide-ranging wildlife species on the Oak Ridge Reservation, 96:119 (R;US)
Preliminary remediation goals for ecological endpoints, 96:2439 (R;US)
Preliminary remediation goals for use at the US Department of Energy Oak Ridge Operations Office. Revision 1, 96:2438 (R;US)
Transportation risks associated with moving special nuclear material from RFETS to Lowry AFB, Denver, 96:274 (R;US)
Use of Monte Carlo methods in environmental risk assessments at the INEL: Applications and issues, 96:2478 (R;US)

RISKS

See HAZARDS

RIVER DELTAS

- Tulane/Xavier Universities hazardous materials in aquatic environments of the Mississippi River Basin. Quarterly progress report, October 1, 1995–December 31, 1995, 96:101 (R;US)

ROAD TRANSPORT

- Validation of the transportation computer codes HIGHWAY, INTERLINE, RADTRAN 4, and RISKIND, 96:107 (R;US)

ROADS

- Surface radiological investigations along State Highway 95, Lagoon Road, and Melton Valley Drive, Oak Ridge Reservation, Oak Ridge, Tennessee, 96:2516 (R;US)

ROBOTS

- BOA: Asbestos pipe insulation removal robot system. Phase 1, 96:2254 (R;US)
- SWAMI, Stored Waste Autonomous Mobile Inspector, 96:2278 (R;US)

Artificial Intelligence

- An intelligent inspection and survey robot, 96:2249 (R;US)

Construction

- Rosie: A mobile worksystem for decontamination and dismantlement operations, 96:2247 (R;US)

Control

- Mechanical deployment system on aries an autonomous mobile robot, 96:2250 (R;US)

Control Systems

- Control issues for a hydraulically powered dissimilar teleoperated system, 96:2241 (R;US)

Design

- BOA: Asbestos pipe-insulation removal robot system. Phase I. Topical report, November 1993–December 1994, 96:2255 (R;US)
- Houdini: Reconfigurable in-tank robot, 96:2258 (R;US)
- Rapid world modelling for robotics, 96:2274 (R;US)
- Rosie: A mobile worksystem for decontamination and dismantlement operations, 96:2247 (R;US)

Image Processing

- Fiber optic coherent laser radar 3d vision system, 96:2237 (R;US)

Meetings

- View graph presentations of the sixth DOE industry/university/lab forum on robotics for environmental restoration and waste management, 96:2271 (R;US)

Navigation

- Motion planning for multiple moving objects, 96:2269 (R;US)
- Trajectory generation for two robots cooperating to perform a task, 96:2270 (R;US)

Operation

- BOA: Pipe asbestos insulation removal robot system, 96:2253 (R;US)

Performance

- Cooperative Telerobotic Retrieval system Phase 1 technology evaluation report, 96:2264 (R;US)

Performance Testing

- Geophex Airborne Unmanned Survey System (GAUSS). Topical report, October 1993–March 1995, 96:2252 (R;US)

Remote Control

- Remote operated vehicle with carbon dioxide blasting (ROVCO₂), 96:2103 (R;US)

Technology Assessment

- Robotics Technology Crosscutting Program. Technology summary, 96:2246 (R;US)

Testing

- BOA: Asbestos pipe-insulation removal robot system. Phase I. Topical report, November 1993–December 1994, 96:2255 (R;US)

ROCK MECHANICS

- WIPP Benchmark calculations with the large strain SPECTROM codes, 96:1535 (R;US)
- WIPP panel simulations with gas generation, 96:1546 (R;US)

ROCK SALT

S**S CODES**

- Version 1.00 programmer's tools used in constructing the INEL RML/analytical radiochemistry sample tracking database and its user interface, 96:2471 (R;US)
- Waste Management facilities cost information: System Cost Model Software Quality Assurance Plan. Revision 2, 96:856 (R;US)

S8G PROTOTYPE REACTOR

- See SHIP PROPULSION REACTORS

SAFEGUARD REGULATIONS

- Compliance agreements at the INEL: A success story, 96:880 (R;US)

SAFEGUARDS

SAFEGUARDS

Conceptual baseline document for the nuclear materials safeguards system, 96:304 (R;US)

SAFETY (NUCLEAR)

See RADIATION PROTECTION

SAFETY ANALYSIS

Idaho National Engineering Laboratory (INEL) Environmental Restoration (ER) Program Baseline Safety Analysis File (BSAF), 96:106 (R;US)

SAFETY STANDARDS

Compliance agreements at the INEL: A success story, 96:880 (R;US)

DOE limited standard: Operations assessments, 96:90 (R;US)
Westinghouse Hanford Company Health and Safety Performance Report. First quarter calendar year 1995, 96:326 (R;US)

SALMON

Pore water chromium concentration at 100-H Reactor Area adjacent to fall chinook salmon spawning habitat of the Hanford Reach, Columbia River. Revision 1, 96:373 (R;US)

SALT DEPOSITS

A summary of methods for approximating salt creep and disposal room closure in numerical models of multiphase flow, 96:1532 (R;US)

Computational implementation of the multi-mechanism deformation coupled fracture model for salt, 96:1565 (R;US)

Draft no-migration variance petition. Volume 5, Appendices: GCR (Vol. 2), HSC, PAR, 96:1230 (R;US)

Draft no-migration variance petition. Volume 6, Appendices: QAPD, REG, RM, SCR, SER, 96:1231 (R;US)

Draft no-migration variance petition. Volume 7, Appendices: SUM, SURV, VOC, WAP, 96:1232 (R;US)

Large-scale dynamic compaction demonstration using WIPP salt: Fielding and preliminary results, 96:1550 (R;US)

Strongly coupled single-phase flow problems: Effects of density variation, hydrodynamic dispersion, and first order decay, 96:213 (R;US)

Ultrafine cement grout for sealing underground nuclear waste repositories, 96:1568 (R;US)

Using a multiphase flow code to model the coupled effects of repository consolidation and multiphase brine and gas flow at the Waste Isolation Pilot Plant, 96:1562 (R;US)

SALTEX PROCESS

See PUREX PROCESS

SALTS

See also MOLTEN SALTS

94-1 Research and Development Project Lead laboratory support. Status report, October 1–December 31, 1995, 96:202 (R;US)

Evaluation of constitutive models for crushed salt, 96:1572 (R;US)

Initial Experience to Determine the Solubility of Salts in Low-Level Mix Waste Glasses, 96:1120 (R;US)

Large-scale dynamic compaction of natural salt, 96:1573 (R;US)

SAMPLERS

See also AIR SAMPLERS

Analysis of the Retained Gas Sample (RGS) Extruder Assembly, 96:2607 (R;US)

Comparison of passive soil vapor survey techniques at a Tijeras Arroyo site, Sandia National Laboratories, Albuquerque, New Mexico, 96:1037 (R;US)

Functional design criteria for the retained gas sampler system, 96:1825 (R;US)

Half-liter supernatant sampler system engineering work plan, 96:1903 (R;US)

Operability test procedure for PFP wastewater sampling facility, 96:2598 (R;US)

Operability test procedure for rotary mode core sampling system #3, 96:1828 (R;US)

Operability test procedure for rotary mode core sampling system #4, 96:1829 (R;US)

Operability test procedure for the Rotary Mode Core Sampling System Exhausters 3 and 4, 96:1830 (R;US)

PFP Wastewater Sampling Facility, 96:2205 (R;US)

SEAMIST™ in-situ instrumentation and vapor sampling system applications in the Sandia Mixed Waste Landfill Integrated Demonstration program: Final report, 96:1021 (R;US)

Test plan for auger sampler improvements, 96:1892 (R;US)

SAMPLING

300 area TEF NPDES Permit Compliance Monitoring Plan, 96:1076 (R;US)

A general method for the efficient selection of sampling locations for problems in environmental restoration, 96:1030 (R;US)

Application of EPA quality assurance procedures to a soil characterization study at the DOE Nevada Test Site, 96:2386 (R;US)

Environmental surveillance master sampling schedule, 96:577 (R;US)

Operational Environmental Monitoring Program Quality Assurance Project Plan, 96:2587 (R;US)

Plan for characterization of K Basin spent nuclear fuel and sludge, 96:2602 (R;US)

SANDIA LABORATORIES

Identification of remediation needs and technology development focus areas for the Environmental Restoration (ER) Project at Sandia National Laboratories/New Mexico (SNL/NM), 96:2568 (R;US)

Multiair utility analysis as a framework for public participation siting a hazardous waste facility, 96:279 (R;US)

South Fence Road – Phase 1 field operations summary, 96:579 (R;US)

Summary of field operations Magazine Road North Wells MRN-1 and MRN-2, 96:584 (R;US)

Summary of field operations Powerline Wells PL-1, PL-2, PL-3, 96:583 (R;US)

Unsaturated hydrologic flow parameters based on laboratory and field data for soils near the mixed waste landfill, technical area III, Sandia National Laboratories/New Mexico, 96:1039 (R;US)

Nonradioactive Waste Management

Analysis of instantaneous profile test data from soils near the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories/New Mexico, 96:1020 (R;US)

Passive and active soil gas sampling at the Mixed Waste Landfill, Technical Area III, Sandia National Laboratories/New Mexico, 96:1017 (R;US)

Radioactive Waste Facilities

Application of non-intrusive geophysical techniques at the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories, New Mexico, 96:1018 (R;US)

Radioactive Waste Management

Analysis of instantaneous profile test data from soils near the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories/New Mexico, 96:1020 (R;US)

Passive and active soil gas sampling at the Mixed Waste Landfill, Technical Area III, Sandia National Laboratories/New Mexico, 96:1017 (R;US)

Remedial Action

Application of a NAPL partitioning interwell tracer test (PITT) to support DNAPL remediation at the Sandia National Laboratories/New Mexico chemical waste landfill, 96:1034 (R;US)

Geochemical study of groundwater at Sandia National Laboratories/New Mexico and Kirtland Air Force Base, 96:513 (R;US)

Preliminary data from an instantaneous profile test conducted near the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories/New Mexico, 96:1032 (R;US)

South Fence Road – Phase 1 field operations summary, 96:579 (R;US)

Stakeholder acceptance analysis: Passive soil vapor extraction using borehole flux, 96:2565 (R;US)

Summary of field operations Magazine Road North Wells MRN-1 and MRN-2, 96:584 (R;US)

Summary of field operations Powerline Wells PL-1, PL-2, PL-3, 96:583 (R;US)

TOUGH2 simulations of the TEVES Project including the behavior of a single-component NAPL, 96:1008 (R;US)

Tritium in surface soils at the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories, New Mexico, 96:1019 (R;US)

Sanitary Landfills

SEAMIST™ in-situ instrumentation and vapor sampling system applications in the Sandia Mixed Waste Landfill Integrated Demonstration program: Final report, 96:1021 (R;US)

Site Characterization

Application of a NAPL partitioning interwell tracer test (PITT) to support DNAPL remediation at the Sandia National Laboratories/New Mexico chemical waste landfill, 96:1034 (R;US)

Unsaturated hydrologic flow parameters based on laboratory and field data for soils near the mixed waste landfill, technical area III, Sandia National Laboratories/New Mexico, 96:1039 (R;US)

SANITARY LANDFILLS

Determination of operating limits for radionuclides for a proposed landfill at Paducah Gaseous Diffusion Plant, 96:694 (R;US)

Containment Systems

Assessment of dry barriers for containment of mobile constituents in the unsaturated zone, 96:580 (R;US)

Electromagnetic Surveys

Geopex Airborne Unmanned Survey System, 96:2376 (R;US)

Three-dimensional electromagnetic modeling and inversion on massively parallel computers, 96:2574 (R;US)

Emergency Plans

216-U-12 Crib supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:33 (R;US)

Geochemical Surveys

126-F-1 radiological investigation and downposting. Final report, 96:668 (R;US)

Liners

Remote mining for in-situ waste containment. Final report, 96:485 (R;US)

Magnetic Surveys

Geopex Airborne Unmanned Survey System, 96:2376 (R;US)

Maximum Acceptable Contamination

Operating limit evaluation for disposal of uranium enrichment plant wastes, 96:709 (R;US)

Monitoring

SEAMIST™ in-situ instrumentation and vapor sampling system applications in the Sandia Mixed Waste Landfill Integrated Demonstration program: Final report, 96:1021 (R;US)

Radiation Monitoring

126-F-1 radiological investigation and downposting. Final report, 96:668 (R;US)

Regulations

Cost savings associated with landfilling wastes containing very low levels of uranium, 96:632 (R;US)

Remedial Action

Assessment of dry barriers for containment of mobile constituents in the unsaturated zone, 96:580 (R;US)

SEAMIST™ in-situ instrumentation and vapor sampling system applications in the Sandia Mixed Waste Landfill Integrated Demonstration program: Final report, 96:1021 (R;US)

Sodium dichromate expedited response action assessment, Revision 3, 96:2118 (R;US)

TOUGH2 simulations of the TEVES Project including the behavior of a single-component NAPL, 96:1008 (R;US)

Tritium in surface soils at the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories, New Mexico, 96:1019 (R;US)

Removal

Sodium Dichromate expedited response action assessment. Revision 2, 96:828 (R;US)

Risk Assessment

Characterization of the Burma Road Rubble Pit at the Savannah River Site, Aiken, South Carolina, 96:2619 (R;US)

Sampling

Cost effectiveness of sonic drilling, 96:2504 (R;US)

Site Characterization

Characterization of the Burma Road Rubble Pit at the Savannah River Site, Aiken, South Carolina, 96:2619 (R;US)

Environmental waste site characterization utilizing aerial photographs and satellite imagery: Three sites in New Mexico, USA, 96:2501 (R;US)

SEAMIST™ in-situ instrumentation and vapor sampling system applications in the Sandia Mixed Waste Landfill Integrated Demonstration program: Final report, 96:1021 (R;US)

Waste Management

216-A-10 Crib supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:29 (R;US)

216-A-37-1 Crib supplemental information to the Hanford Facility Contingency Plan (DOE/RL-93-75), 96:30 (R;US)

Water Influx

Assessment of dry barriers for containment of mobile constituents in the unsaturated zone, 96:580 (R;US)

SEDIMENTATION

Sedimentation models, 96:2554 (R;US)

SEDIMENTS

A tube-excited x-ray fluorescence spectrometer for use in small-diameter boreholes, 96:2558 (R;US)

Characterization of sediments in the Clinch River, Tennessee, using remote sensing and multi-dimensional GIS techniques, 96:2324 (R;US)

Conceptual plan for 100-N Emergency Dump Basin (EDB) deactivation, 96:2020 (R;US)

Cost effectiveness studies of environmental technologies: Volume 1, 96:206 (R;US)

Disposal of sediments from the 1300-N Emergency Dump Basin, 96:2317 (R;US)

Dynamic underground stripping. Innovative technology summary report, 96:473 (R;US)

In situ bioremediation of chlorinated solvent with natural gas, 96:607 (R;US)

Interpolation of bottom bathymetry and potential erosion in a large Tennessee reservoir system using GRASS, 96:2325 (R;US)

Nonradioactive air emissions notice of construction for the stabilization of the 1300-N emergency dump basin, 96:2431 (R;US)

Plutonium mobility studies in soil sediment decontaminated by means of a soil-washing technology, 96:355 (R;US)

Remedial investigation/feasibility study report for the 300-FF-5 Operable Unit, 96:2124 (R;US)

Sorption and desorption of cesium and strontium on TA-2 and TA-41 soils and sediments, 96:529 (R;US)

The removal of mercury from solid mixed waste using chemical leaching processes, 96:965 (R;US)

Thickness of surficial sediment at and near the Idaho National Engineering Laboratory, Idaho, 96:481 (R;US)

Waste area Grouping 2 Phase I remedial investigation: Sediment and Cesium-137 transport modeling report, 96:2524 (R;US)

Well drilling summary report for well 199-N-106A, 96:379 (R;US)

Work plan for the excavation of contaminated materials from 100-D Ponds, 96:666 (R;US)

SEISMIC EFFECTS

Consideration of kinematic interaction in determining seismic responses of underground structures, 96:1200 (R;US)

Natural phenomena hazards evaluation of concrete silos 1, 2, 3 and 4 at Fernald, Ohio, 96:853 (R;US)

SEISMIC SURVEYS

Integration of geophysics within the Argonne expedited site characterization Program at a site in the southern High Plains, 96:353 (R;US)

Interpretation of large-strain geophysical crosshole tests, 96:295 (R;US)

SEMICONDUCTOR COUNTERS

See **SEMICONDUCTOR DETECTORS**

SEMICONDUCTOR DETECTORS

A method to improve spectral resolution in planar semiconductor gamma-ray detectors, 96:2594 (R;US)

SEPARATION EQUIPMENT

See also **EXTRACTION APPARATUSES**

Design, operations, and maintenance of the soil vapor extraction systems for the 200 West Area Carbon Tetrachloride Expedited Response Action, 96:657 (R;US)

SEPARATION PROCESSES

See also **EXTRACTION**
TRUEX PROCESS

Arid sites stakeholder participation in evaluating innovative technologies: VOC-Arid Site Integrated Demonstration, 96:980 (R;US)

Efficient separations and processing crosscutting program 1996 technical exchange meeting. Proceedings, 96:2656 (R;US)

Removal of cesium from a high-level calcined waste by high temperature volatilization, 96:2637 (R;US)

Thermal desorption treatability test conducted with VAC*TRAX Unit, 96:747 (R;US)

VAC*TRAX - Thermal desorption for mixed wastes, 96:808 (R;US)

SETTLING PONDS

120-D-1 (100-D) Ponds training plan. Revision 1, 96:659 (R;US)

A rational approach for evaluation and screening of treatment and disposal options for the solar pond sludges at Rocky Flats, 96:703 (R;US)

Conceptual plan for 100-N Emergency Dump Basin (EDB) deactivation, 96:2020 (R;US)

Decommissioning of the 216-B-3 Effluent Disposal Pond, 96:2017 (R;US)

Disposal of sediments from the 1300-N Emergency Dump Basin, 96:2317 (R;US)

Field screening sampling and analysis strategy and methodology for the 183-H Solar Evaporation Basins: Phase 2, Soils, 96:2018 (R;US)

SHALES

Effective porosity and pore-throat sizes of mudrock saprolite from the Nolichucky Shale within Bear Creek Valley on the Oak Ridge Reservation: Implications for contaminant transport and retardation through matrix diffusion, 96:555 (R;US)

Simulation of a field scale tritium tracer experiment in a fractured, weathered shale using discrete-fracture/matrix-diffusion and equivalent porous medium models, 96:554 (R;US)

SHALLOW LAND BURIAL

See **GROUND DISPOSAL**

SHAPED CHARGES

See **CHEMICAL EXPLOSIVES**

SHARPITE

See **CARBONATE MINERALS**

SHEAR PROPERTIES

Sloshing analysis of viscous liquid storage tanks, 96:1183 (R;US)

SHEAR STRENGTH

See **SHEAR PROPERTIES**

SHEATHS (FUEL)

See **FUEL CANS**

SHIELDING

Determination of buildup factors in titanium and depleted uranium, 96:268 (R;US)

ISOSHLD 4.0, 96:303 (R;US)

SHIELDING MATERIALS

Experimental validation of lead cross sections for scale and MCNP, 96:179 (R;US)

SHIP PROPULSION REACTORS

Department of Energy Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs: Final Environmental Impact Statement. Volume 1, Appendix B, 96:1244 (R;US)

Department of Energy Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs final environmental impact statement. Volume 1, Appendix D: Part A, Naval Spent Nuclear Fuel Management, 96:1246 (R;US)

Department of Energy Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs: Final Environmental Impact Statement. Volume 1, Appendix D, Part B, 96:1247 (R;US)

SHIPS

Structural analysis in support of the waterborne transport of radioactive materials, 96:1578 (R;US)

SHIRLEY BASIN URANIUM MILL

See **FEED MATERIALS PLANTS**

SIALON

See **ALUMINIUM OXIDES**

SILICA GEL

Injectable barriers for waste isolation, 96:538 (R;US)

SILICON OXIDES

SILICON OXIDES

Waste forms based on Cs-loaded silicotitanates, 96:1463 (R;US)

SILOXANES

Injectable barriers for waste isolation, 96:538 (R;US)

SILVER CARBONATES

See CARBONATES

SITE CHARACTERIZATION

Addendum to the health and safety plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee. Environmental Restoration Program, 96:217 (R;US)

Environmental management technology demonstration and commercialization, 96:115 (R;US)

Final report on the Vitro CRADA, 96:2412 (R;US)

Innovative Technology Development Program. Final summary report, 96:2469 (R;US)

Site investigation report for Waste Area Grouping 4 at Oak Ridge National Laboratory. Volume 1, Text: Environmental Restoration Program, 96:2517 (R;US)

Site investigation report for Waste Area Grouping 4 at Oak Ridge National Laboratory. Volume 2, Appendixes: Environmental Restoration Program, 96:2518 (R;US)

The development and application of a risk-based prioritization model for the Oak Ridge Environmental Restoration Program, 96:2025 (R;US)

Work plan for monitor well installation water and sediment sample collection aquifer testing and topographic surveying at the Riverton, Wyoming, UMTRA Project Site, 96:449 (R;US)

SITE REHABILITATION

See REMEDIAL ACTION

SITE SELECTION

A successful effort to involve stakeholders in a facility siting decision using LIPS with stakeholder involvement, 96:270 (R;US)

SITE SURVEYS

See SITE CHARACTERIZATION

SL-1 REACTOR

Stationary low power reactor No. 1 (SL-1) accident site decontamination & dismantlement project, 96:2140 (R;US)

SLAGS

126-F-1 radiological investigation and downposting. Final report, 96:668 (R;US)

The comparison of element partitioning in two types of thermal treatment facilities and the effects on potential radiation dose, 96:990 (R;US)

SLIGHTLY ENRICHED URANIUM

Evaluation of a potential nuclear fuel repository criticality: Lessons learned, 96:1293 (R;US)

SLUDGES

183-H Basin sludge treatability test report, 96:1106 (R;US)

A simplified model of saltcake moisture distribution. Letter report, 96:1441 (R;US)

Bubble Growth

Gas bubble retention and its effect on waste properties: Retention mechanisms, viscosity, and tensile and shear strengths, 96:1426 (R;US)

Calcination

Physical property characterization of 183-H Basin sludge, 96:1105 (R;US)

Chemical Analysis

Tank 241-BY-104 rotary core sampling and analysis plan, 96:1900 (R;US)

The chemistry of sludge washing and caustic leaching processes for selected Hanford tank wastes, 96:1513 (R;US)

Corrosion

Fiscal year 1995 laboratory scale studies of Cs elution in Tank 8D-1 and sludge dissolution in tank 8D-2, 96:1471 (R;US)

Dissolution

Fiscal year 1995 laboratory scale studies of Cs elution in Tank 8D-1 and sludge dissolution in tank 8D-2, 96:1471 (R;US)

Mechanical Properties

Gas bubble retention and its effect on waste properties: Retention mechanisms, viscosity, and tensile and shear strengths, 96:1426 (R;US)

Mixing

Fiscal year 1993 1/25-scale sludge mobilization testing, 96:1371 (R;US)

Physical Properties

Physical property characterization of 183-H Basin sludge, 96:1105 (R;US)

Quantitative Chemical Analysis

Tank Waste Treatment Science Task quarterly report for January–March 1995, 96:1431 (R;US)

Radioactive Waste Disposal

A rational approach for evaluation and screening of treatment and disposal options for the solar pond sludges at Rocky Flats, 96:703 (R;US)

Radioactive Waste Management

Westinghouse Hanford Company recommended strategy for K Basin sludge disposition, 96:1634 (R;US)

Radioactive Waste Processing

Tank Waste Treatment Science Task quarterly report for October–December 1994, 96:1430 (R;US)

Vitrification demonstration with surrogate Oak Ridge Reservation K-25 B and C pond sludge, 96:1127 (R;US)

Washing and caustic leaching of Hanford tank sludges: Results of FY 1995 studies, 96:1416 (R;US)

Removal

Fiscal year 1994 1/25-scale sludge mobilization testing, 96:1386 (R;US)

Rheology

Effect of colloidal aggregation on the sedimentation and rheological properties of tank waste, 96:1429 (R;US)

Sampling

Tank 241-BX-103 tank characterization plan, 96:1887 (R;US)

Tank 241-BY-104 rotary core sampling and analysis plan, 96:1900 (R;US)

Tank characterization report for Double-Shell Tank 241-SY-102, 96:1716 (R;US)

Sedimentation

Effect of colloidal aggregation on the sedimentation and rheological properties of tank waste, 96:1429 (R;US)

Sedimentation models, 96:2554 (R;US)

Solidification

Rheology of Savannah River site tank 42 and tank 51 HLW radioactive sludges, 96:1917 (R;US)

Stability

Basis document for sludge stabilization. Revision 1, 96:2203 (R;US)

Permeation of Tank C-103 sludge simulant by organic solvent. Revision 1, 96:1369 (R;US)

Temperature Measurement

Tank 241-C-106 process test report, 96:1745 (R;US)

Vitrification

Design of microwave vitrification systems for radioactive waste, 96:1214 (R;US)

Fiscal year 1995 final report for TTP SR-1320-04, 96:1143 (R;US)

The effect of chemical composition on the PCT durability of mixed waste glasses from wastewater treatment sludges, 96:697 (R;US)

Vitrification demonstration with surrogate Oak Ridge Reservation K-25 B and C pond sludge, 96:1127 (R;US)

Washing

Documentation of a decision framework to support enhanced sludge washing, 96:1091 (R;US)

Waste Retrieval

Case study to remove radioactive hazardous sludge from long horizontal storage tanks, 96:1211 (R;US)

Sludge mobilization with submerged nozzles in horizontal cylindrical tanks, 96:971 (R;US)

Water Removal

Permeation of Tank C-103 sludge simulant by organic solvent. Revision 1, 96:1369 (R;US)

SLUREX PROCESS

See SEPARATION PROCESSES

SLURRIES

Convective heat transfer behavior of the product slurry of the nitrate to ammonia and ceramic (NAC) process, 96:702 (R;US)
Rheological properties of the product slurry of the Nitrate to Ammonia and Ceramic (NAC) process, 96:701 (R;US)

SMALL BUSINESSES

Product and market study for Los Alamos National Laboratory. Building resources for technology commercialization: The SciBus Analytical, Inc. paradigm, 96:204 (R;US)

SNAKE RIVER PLAIN

Characterizing aquifer hydrogeology and anthropogenic chemical influences on groundwater near the Idaho Chemical Processing Plant, Idaho National Engineering Laboratory, Idaho, 96:480 (R;US)

Estimation of hydraulic properties and development of a layered conceptual model for the Snake River plain aquifer at the Idaho National Engineering Laboratory, Idaho, 96:479 (R;US)

SNAP 4 REACTOR

See SNAP REACTORS

SNAP REACTORS

A document review to characterize Atomic International SNAP fuels shipped to INEL 1966–1973, 96:1302 (R;US)

SODIUM

Hanford site sodium management plan, 96:1073 (R;US)

SODIUM CITRATES

See CITRATES

SODIUM COMPOUNDS

SODIUM COMPOUNDS

See also SODIUM HYDROXIDES

SODIUM NITRATES

Calculation of reaction energies and adiabatic temperatures for waste tank reactions, 96:1348 (R;US)

Glass waste forms for the Na-bearing high activity waste fractions, 96:1959 (R;US)

Pilot-scale treatability testing – Recycle, reuse, and disposal of materials from decontamination and decommissioning activities: Soda blasting demonstration, 96:2114 (R;US)

SNL-1, a highly selective inorganic crystalline ion exchange material for Sr^{2+} in acidic solutions, 96:2658 (R;US)

Sodium dichromate expedited response action assessment, Revision 3, 96:2118 (R;US)

SODIUM HYDROXIDES

Fire hazards analysis for the 241-AN-107 mixer pump installation and caustic addition, 96:1824 (R;US)

SODIUM LAURYL SULFATES

SOILS

Aeration

Assessment of dry barriers for containment of mobile constituents in the unsaturated zone, 96:580 (R;US)

Alpha Detection

Alpha detection for decontamination and decommissioning: Results and possibilities, 96:2153 (R;US)

Chemical Analysis

Description of work for vadose zone characterization of the 1301-N and 1325-N liquid waste disposal facilities, 96:2427 (R;US)

Evaluation of metal and radionuclide data from neutron activation and acid-digestion-based spectrometry analyses of background soils: Significance in environmental restoration, 96:2327 (R;US)

Report of the Department of Energy, Office of Environmental Management, Quality Assessment Program, inorganic inter-comparison study, 96:150 (R;US)

Road Transportable Analytical Laboratory (RTAL) system. Quarterly report, May–July 1995, 96:2364 (R;US)

Cleaning

Demonstrating and implementing innovative technologies: Case studies from the USDOE Office of Technology Development, 96:996 (R;US)

Contamination

1907-DR Process Sewer Outfall soil contamination assessment sampling and analysis plan, 96:665 (R;US)

A field test of permeation grouting in heterogeneous soils using a new generation of barrier liquids, 96:2510 (R;US)

A method for estimating ground areas contaminated by a postulated fire in a facility containing radioactive material, 96:1075 (R;US)

Air modelling as an alternative to sampling for low-level radioactive airborne releases, 96:933 (R;US)

Air quality impacts analysis for area G. Final report, 96:2489 (R;US)

Analytical electron microscopy characterization of Fernald soils. Annual report, October 1993–September 1994, 96:2280 (R;US)

Aqueous biphasic extraction of uranium and thorium from contaminated soils. Final report, 96:2626 (R;US)

Barometric pumping with a twist: VOC containment and remediation without boreholes, 96:2381 (R;US)

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Naturita, Colorado. Revision 1, 96:448 (R;US)

Carbonate and citric acid leaching of uranium from uranium-contaminated soils: Pilot-scale studies (Phase II), 96:2533 (R;US)

Cesium sorption and desorption on selected Los Alamos soils, 96:528 (R;US)

Chemical oxidation of volatile and semi-volatile organic compounds in soil, 96:403 (R;US)

Chemically enhanced mixed region vapor stripping of TCE-contaminated saturated peat and silty clay soils, 96:2539 (R;US)

Description of work for vadose zone characterization of the 1301-N and 1325-N liquid waste disposal facilities, Revision 1, 96:2428 (R;US)

Development of the integrated in situ Lasagna process, 96:489 (R;US)

EMFLUX® soil-gas survey of Technical Area 54, Los Alamos National Laboratory, New Mexico, 96:2487 (R;US)

Ecotoxicological screen of Potential Release Site 50-006(d) of Operable Unit 1147 of Mortandad Canyon and relationship to the Radioactive Liquid Waste Treatment Facilities project, 96:203 (R;US)

Effect of subsurface electrical heating and steam injection on the indigenous microbial community, 96:588 (R;US)

Electrical resistivity for detecting subsurface non-aqueous phase liquids: A progress report, 96:2509 (R;US)

Engineering evaluation/cost analysis for the proposed removal action at the Southeast Drainage near the Weldon Spring Site, Weldon Spring, Missouri, 96:823 (R;US)

Evaluation of metal and radionuclide data from neutron activation and acid-digestion-based spectrometry analyses of background soils: Significance in environmental restoration, 96:2327 (R;US)

Fiber optic/cone penetrometer system for subsurface heavy metals detection, 96:2379 (R;US)

Field screening sampling and analysis strategy and methodology for the 183-H Solar Evaporation Basins: Phase 2, Soils, 96:2018 (R;US)

SOILS Contamination

Fixed capital investments for the uranium soils integrated demonstration soil treatment technologies, 96:2535 (R;US)

Groundwater monitoring and assessment plan for the 100-K Area fuel storage basins, 96:595 (R;US)

Horizontal grout barrier project results of the latest testing, 96:512 (R;US)

In situ bioremediation using horizontal wells. Innovative technology summary report, 96:472 (R;US)

In situ enhanced soil mixing. Innovative technology summary report, 96:2349 (R;US)

Innovative vitrification for soil remediation, 96:2367 (R;US)

Laboratory "proof of principle" investigation for the acoustically enhanced remediation technology, 96:486 (R;US)

Mercury retorting of calcine waste, contaminated soils and railroad ballast at the Idaho National Engineering Laboratory, 96:2472 (R;US)

Multiphased use of an X-MET 880 XRF to survey lead in soil at the Idaho National Engineering Laboratory, 96:2451 (R;US)

Phase I remedial investigation report of Waste Area Grouping 2 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2387 (R;US)

Plutonium mobility studies in soil sediment decontaminated by means of a soil-washing technology, 96:355 (R;US)

Probabilistic risk assessment for the Sandia National Laboratories Technical Area V Liquid Waste Disposal System surface impoundments, 96:1031 (R;US)

Remedial investigation/feasibility study report for the 300-FF-5 Operable Unit, 96:2124 (R;US)

Site characterization report for the Old Hydrofracture Facility at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2527 (R;US)

Six phase soil heating. Innovative technology summary report, 96:474 (R;US)

Steerable/distance enhanced penetrometer delivery system, 96:488 (R;US)

Subsurface contaminants focus area, 96:477 (R;US)

Summary analysis of a Monte Carlo simulation of ecology's statistical guidance and a proposed alternative, 96:2309 (R;US)

Technical evaluation summary of the in situ vitrification melt expulsion at the Oak Ridge National Laboratory on April 21, 1996, Oak Ridge, Tennessee, 96:2525 (R;US)

The Savannah River Environmental Technology Field Test Platform: Phase 2, 96:341 (R;US)

Uranium characterization at the St. Louis Airport Site, 96:2547 (R;US)

Use of thermal desorption/gas chromatography as a performance-based screening method for petroleum hydrocarbons, 96:1038 (R;US)

VAMOS: The verification and monitoring options study: Current research options for in-situ monitoring and verification of contaminant remediation and containment within the vadose zone, 96:2192 (R;US)

Zero-tension lysimeters: An improved design to monitor colloid-facilitated contaminant transport in the vadose zone, 96:523 (R;US)

Corrosive Effects

Measurements of the corrosion of low-carbon steel drums under environmental conditions at Hanford: One-year test results, 96:1049 (R;US)

Decontamination

Cost results from the 1994 Fernald characterization field demonstration for uranium-contaminated soils, 96:2534 (R;US)

Operating and life-cycle costs for uranium-contaminated soil treatment technologies, 96:2511 (R;US)

Soil treatment to remove uranium and related mixed radioactive heavy metal contaminants. Ninth quarterly technical and financial progress report, January 1, 1995–March 31, 1995, 96:2357 (R;US)

Degassing

Stakeholder acceptance analysis: Passive soil vapor extraction using borehole flux, 96:2565 (R;US)

Detoxification

Development of an ultrasonic process for soil remediation, 96:2297 (R;US)

Electric Conductivity

Electrical resistivity tomography at the DOE Hanford site, 96:2197 (R;US)

Electric Heating

Six phase soil heating. Innovative technology summary report, 96:474 (R;US)

Electrodynamics

Development of the integrated in situ Lasagna process, 96:489 (R;US)

Environmental Transport

100-FR-3 groundwater/soil gas supplemental limited field investigation report, 96:507 (R;US)

Barometric pumping with a twist: VOC containment and remediation without boreholes, 96:2381 (R;US)

Carbonate and citric acid leaching of uranium from uranium-contaminated soils: Pilot-scale studies (Phase II), 96:2533 (R;US)

Characterization and immobilization of cesium-137 in soil at Los Alamos National Laboratory, 96:2503 (R;US)

Demonstration, testing, & evaluation of in situ heating of soil. Draft final report, Volume I, 96:2414 (R;US)

Effect of subsurface electrical heating and steam injection on the indigenous microbial community, 96:588 (R;US)

Engineering evaluation/cost analysis for the proposed removal action at the Southeast Drainage near the Weldon Spring Site, Weldon Spring, Missouri, 96:823 (R;US)

In situ bioremediation using horizontal wells. Innovative technology summary report, 96:472 (R;US)

Innovative technology for expedited site remediation of extensive surface and subsurface contamination, 96:2024 (R;US)

Long-term surveillance plan for the Gunnison, Colorado, disposal site, 96:2074 (R;US)

Multiphased use of an X-MET 880 XRF to survey lead in soil at the Idaho National Engineering Laboratory, 96:2451 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Falls City, Texas. Remedial action selection report, attachment 2, geology report; attachment 3, groundwater hydrology report; and attachment 4, water resources protection strategy. Final report, 96:408 (R;US)

Steerable/distance enhanced penetrometer delivery system, 96:488 (R;US)

Subsurface contaminants focus area, 96:477 (R;US)

Erosion Control

Geologic processes in the RWMC area, Idaho National Engineering Laboratory: Implications for long term stability and soil erosion at the radioactive waste management complex, 96:895 (R;US)

Excavation

Field screening sampling and analysis strategy and methodology for the 183-H Solar Evaporation Basins: Phase 2, Soils, 96:2018 (R;US)

Technical basis and radiological release plan for trackhoe #H0-17-5669 at 100 BC-1, 96:2011 (R;US)

Field Tests

Unsaturated hydrologic flow parameters based on laboratory and field data for soils near the mixed waste landfill, technical area III, Sandia National Laboratories/New Mexico, 96:1039 (R;US)

Fluid Flow

Analysis of instantaneous profile test data from soils near the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories/New Mexico, 96:1020 (R;US)

Unsaturated hydrologic flow parameters based on laboratory and field data for soils near the mixed waste landfill, technical area III, Sandia National Laboratories/New Mexico, 96:1039 (R;US)

Freezing

- Evaluation of ground freezing for environmental restoration at waste area grouping 5, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:547 (R;US)
- Frozen soil barrier technology. Innovative technology summary report, 96:475 (R;US)

Gas Chromatography

- Use of thermal desorption/gas chromatography as a performance-based screening method for petroleum hydrocarbons, 96:1038 (R;US)

Heating

- Demonstration, testing, & evaluation of in situ heating of soil. Draft final report, Volume I, 96:2414 (R;US)
- Demonstration, testing, & evaluation of in situ heating of soil. Draft final report, Volume II: Appendices A to E, 96:2415 (R;US)
- Demonstration, testing, and evaluation of in situ heating of soil. Final report, Volume 2, Appendices A to E, 96:2417 (R;US)
- Demonstration, testing, and evaluation of in situ heating of soil. Volume 1, Final report, 96:2416 (R;US)

Hydraulic Conductivity

- Effects of closure cap and liner on contaminant release rates from grouted wastes, 96:608 (R;US)
- Laboratory analysis of soil hydraulic properties of G-5 soil samples, 96:2486 (R;US)
- Modeling of capillary barriers and comparison to data, 96:1016 (R;US)
- Preliminary data from an instantaneous profile test conducted near the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories/New Mexico, 96:1032 (R;US)
- Variability and scaling of hydraulic properties for 200 Area soils, Hanford Site, 96:2590 (R;US)

In-Situ Processing

- Demonstration, testing, & evaluation of in situ heating of soil. Draft final report, Volume II: Appendices A to E, 96:2415 (R;US)

Land Pollution

- Characterization of mercury forms in contaminated floodplain soils, 96:689 (R;US)
- Determination of the toxicity characteristic for metals in soil: A comparison of the toxicity characteristic leaching procedure and total metal determination, 96:2282 (R;US)

Leaching

- The removal of mercury from solid mixed waste using chemical leaching processes, 96:965 (R;US)

Mapping

- The status of soil mapping for the Idaho National Engineering Laboratory, 96:2452 (R;US)

Materials Recovery

- Recovery and removal of mercury from mixed wastes. Final report, September 1994–June 1995, 96:818 (R;US)

Materials Testing

- Analysis of instantaneous profile test data from soils near the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories/New Mexico, 96:1020 (R;US)
- Laboratory analysis of soil hydraulic properties of G-5 soil samples, 96:2486 (R;US)
- Laboratory analysis of soil hydraulic properties of TA-49 soil samples. Volume I: Report summary, 96:533 (R;US)

Mechanical Properties

- Formulation and computational aspects of plasticity and damage models with application to quasi-brittle materials, 96:1544 (R;US)

Mixing

- In situ enhanced soil mixing. Innovative technology summary report, 96:2349 (R;US)

Monitoring

- 100-FR-3 groundwater/soil gas supplemental limited field investigation report, 96:507 (R;US)
- Hanford Site environmental report for calendar year 1994, 96:227 (R;US)
- SRS environmental technology development field test platform, 96:2618 (R;US)

- Surveillance of Site A and Plot M report for 1994, 96:344 (R;US)
- VAMOS: The verification and monitoring options study: Current research options for in-situ monitoring and verification of contaminant remediation and containment within the vadose zone, 96:2192 (R;US)

Permeability

- Laboratory analysis of soil hydraulic properties of G-5 soil samples, 96:2486 (R;US)
- Laboratory analysis of soil hydraulic properties of TA-49 soil samples. Volume I: Report summary, 96:533 (R;US)

Pollution

- A Bayesian/geostatistical approach to the design of adaptive sampling programs, 96:347 (R;US)

Radiation Heating

- Technical evaluation report for the demonstration of radio frequency soil decontamination at Site S-1, 96:737 (R;US)

Radiation Monitoring

- Radioactivity measurements using storage phosphor technology, 96:2380 (R;US)
- Results of the supplementary radiological survey at the former C. H. Schnoor and Company site, 644 Garfield Street, Springdale, Pennsylvania (CVP001), 96:2176 (R;US)

Radioactive Waste Processing

- 100 Area rock screening study, 96:2315 (R;US)

Radionuclide Migration

- Area G perimeter surface-soil and single-stage water sampling: Environmental surveillance for fiscal year 1993, 96:2483 (R;US)
- Argonne's Expedited Site Characterization: An integrated approach to cost- and time-effective remedial investigation, 96:2292 (R;US)
- Cesium sorption and desorption on selected Los Alamos soils, 96:528 (R;US)
- Dig-face monitoring during excavation of a radioactive plume at Mound Laboratory, Ohio, 96:520 (R;US)
- Effects of closure cap and liner on contaminant release rates from grouted wastes, 96:608 (R;US)
- Evaluation of retrieval activities and equipment for removal of containers from the transuranic storage area retrieval enclosure, 96:190 (R;US)
- Facility effluent monitoring plan for K Area Spent Fuel. Revision 1, 96:2582 (R;US)
- H-Area/ITP safety analysis summary report for subsurface liquid waste transport, 96:1934 (R;US)
- Hanford Site background: Evaluation of existing soil radionuclide data, 96:2432 (R;US)
- Review of selected 100-N waste sites related to N-Springs remediation projects, 96:363 (R;US)
- Sorption and desorption of cesium and strontium on TA-2 and TA-41 soils and sediments, 96:529 (R;US)
- Subsidence above in situ vitrification: Evaluation for Hanford applications, 96:2552 (R;US)
- Tank leak detection using electrical resistance methods, 96:1582 (R;US)
- Transport through low porosity media – microstructure and uncertainty analysis, 96:345 (R;US)
- Use of probabilistic methods for analysis of cost and duration uncertainties in a decision analysis framework, 96:1566 (R;US)

Raman Spectroscopy

- Field Raman spectrograph for environmental analysis, 96:2360 (R;US)

Remedial Action

- 100 Area rock screening study, 96:2315 (R;US)
- 1994 Fernald field characterization demonstration program data report, 96:2571 (R;US)
- 218 E-8 Borrow Pit Demolition Site clean closure soil evaluation report, 96:2208 (R;US)
- Applying RESRAD-CHEM for chemical risk assessment, 96:2289 (R;US)
- Aqueous biphasic extraction of uranium and thorium from contaminated soils. Final report, 96:2626 (R;US)

SOILS

Remedial Action

- Argonne's Expedited Site Characterization: An integrated approach to cost- and time-effective remedial investigation, 96:2292 (R;US)
- Arid sites stakeholder participation in evaluating innovative technologies: VOC-Arid Site Integrated Demonstration, 96:980 (R;US)
- Assessment of remote sensing technologies to discover and characterize waste sites, 96:2484 (R;US)
- Barometric pumping with a twist: VOC containment and remediation without boreholes, 96:2381 (R;US)
- Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Naturita, Colorado. Revision 1, 96:448 (R;US)
- Bench-scale vitrification studies with Savannah River Site mercury contaminated soil, 96:1126 (R;US)
- Bioreduction amenability testing of actinide contaminated soils. The systems: $\text{Am}^{241}\text{-Pu}^{238}$, $\text{Am}^{241}\text{-Pu}^{239/40}$, U, 96:924 (R;US)
- Case study of $^{137}\text{Cesium}$ plots remediation at Oak Ridge National Laboratory, 96:692 (R;US)
- Characterization and immobilization of cesium-137 in soil at Los Alamos National Laboratory, 96:2503 (R;US)
- Chemically enhanced mixed region vapor stripping of TCE-contaminated saturated peat and silty clay soils, 96:2539 (R;US)
- Comparison of photoacoustic radiometry to gas chromatography/mass spectrometry methods for monitoring chlorinated hydrocarbons, 96:2495 (R;US)
- Complex electrical resistance tomography of a subsurface PCE plume, 96:589 (R;US)
- Conceptual Thermal Treatment Technologies Feasibility Study, 96:2623 (R;US)
- Conceptual air sparging decision tool in support of the development of an air sparging optimization decision tool, 96:2355 (R;US)
- Cost effectiveness of in situ bioremediation at Savannah River, 96:535 (R;US)
- DOE's Innovative Treatment Remediation Demonstration Program accelerating the implementation of innovative technologies, 96:1015 (R;US)
- Daytime multispectral scanner aerial surveys of the Oak Ridge Reservation, 1992-1994: Overview of data processing and analysis by the Environmental Restoration Remote Sensing Program, Fiscal year 1995, 96:2440 (R;US)
- Degradation of high concentrations of glycols, antifreeze, and deicing fluids, 96:698 (R;US)
- Demonstration testing and evaluation of in situ soil heating. Management Plan, Revision 2, 96:2413 (R;US)
- Demonstration, testing, & evaluation of in situ heating of soil. Draft final report, Volume II: Appendices A to E, 96:2415 (R;US)
- Demonstration, testing, & evaluation of in situ heating of soil. Draft final report, Volume I, 96:2414 (R;US)
- Derivation of guidelines for uranium residual radioactive material in soil at the former Baker Brothers, Inc., Site, Toledo, Ohio, 96:351 (R;US)
- Description of work for vadose zone characterization of the 1301-N and 1325-N liquid waste disposal facilities, Revision 1, 96:2428 (R;US)
- Determination of kinetic coefficients for the simultaneous reduction of sulfate and uranium by *Desulfovibrio desulfuricans* bacteria, 96:2190 (R;US)
- Developing innovative environmental technologies for DOE needs, 96:2287 (R;US)
- Development of the integrated in situ Lasagna process, 96:489 (R;US)
- Dynamic underground stripping. Innovative technology summary report, 96:473 (R;US)
- Effect of temperature on perchloroethylene dechlorination by a methanogenic consortium, 96:991 (R;US)
- Environment, safety, health, and quality plan for the TRU- Contaminated Arid Soils Project of the Landfill Stabilization Focus Area Program, 96:2459 (R;US)
- Evaluation of ground freezing for environmental restoration at waste area grouping 5, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:547 (R;US)
- Evaluation of retrieval activities and equipment for removal of containers from the transuranic storage area retrieval enclosure, 96:190 (R;US)
- Existing air sparging model and literature review for the development of an air sparging optimization decision tool, 96:2354 (R;US)
- Final Report on Testing of Off-Gas Treatment Technologies for Abatement of Atmospheric Emissions of Chlorinated Volatile Organic Compounds, 96:1128 (R;US)
- Flameless thermal oxidation. Innovative technology summary report, 96:2347 (R;US)
- Frozen soil barrier technology. Innovative technology summary report, 96:475 (R;US)
- Geophysical investigation of the 116-B-11 retention basin, 116-B-1 liquid waste disposal trench, and 116-B-13 sludge trench, 100-BC-1 Operable Unit, 96:2313 (R;US)
- Geophysical investigation of the 116-C-5 Retention Basin 100-BC-1, Operable Unit, 96:2312 (R;US)
- Geophysical investigation of the 120-KE-3 and 118-K-2 sites, 100-KR-2 operable unit, 96:367 (R;US)
- Graphite electrode arc melter demonstration Phase 2 test results, 96:892 (R;US)
- Hanford stakeholder participation in evaluating innovative technologies: VOC product line, Passive soil vapor extraction using borehole flux tunable hybrid plasma, 96:562 (R;US)
- In situ air stripping using horizontal wells. Innovative technology summary report, 96:471 (R;US)
- In situ enhanced soil mixing. Innovative technology summary report, 96:2349 (R;US)
- In situ techniques for the characterization and monitoring of a radioactively contaminated site for in situ vitrification, 96:2332 (R;US)
- Initial field test of High-Energy Corona process for treating a contaminated soil-offgas stream, 96:2542 (R;US)
- Injectable barriers for waste isolation, 96:538 (R;US)
- Innovative technologies for the remediation of transuranic-contaminated landfills, 96:2467 (R;US)
- Innovative technology for expedited site remediation of extensive surface and subsurface contamination, 96:2024 (R;US)
- Innovative vitrification for soil remediation, 96:2367 (R;US)
- Laboratory "proof of principle" investigation for the acoustically enhanced remediation technology, 96:486 (R;US)
- Long-term surveillance plan for the Canonsburg, Pennsylvania, disposal site, 96:2058 (R;US)
- Minimum Additive Waste Stabilization (MAWS), Phase I: Soil washing final report, 96:1 (R;US)
- Mixed waste characterization, treatment, and disposal focus area. Technology summary, 96:724 (R;US)
- Mound-ACT*DE*CONSM feasibility study. Phase 2: Final report, 96:1998 (R;US)
- Overview of research and development in subsurface fate and transport modeling, 96:398 (R;US)
- Passive and active soil gas sampling at the Mixed Waste Landfill, Technical Area III, Sandia National Laboratories/New Mexico, 96:1017 (R;US)
- Performance of immunoassay kits for site characterization and remediation, 96:2334 (R;US)
- Possible stakeholder concerns regarding volatile organic compound in arid soils integrated demonstration technologies not evaluated in the stakeholder involvement program, 96:2564 (R;US)
- Preliminary analysis of NAPL behavior in soil-heated vapor extraction for in-situ environmental restoration, 96:2570 (R;US)
- Preliminary investigation of the 317 Area, ANL-E, 96:1999 (R;US)
- Probabilistic risk assessment for the Sandia National Laboratories Technical Area V Liquid Waste Disposal System surface impoundments, 96:1031 (R;US)

Proposed plan for interim remedial measures at the 100-HR-1 Operable Unit, Hanford Site, Richland, Washington, 96:2425 (R;US)

Proposed plan for interim remedial measures at the 100-KR-1 Operable Unit. Revision 1, 96:2126 (R;US)

RARA FY 1994 summary report, 96:655 (R;US)

Radiological survey results at 1 Shady Lane, Lodi, New Jersey (LJ095), 96:2179 (R;US)

Recovery and removal of mercury from mixed wastes. Final report, September 1994–June 1995, 96:818 (R;US)

Remedial design work plan for Lower East Fork Poplar Creek Operable Unit, Oak Ridge, Tennessee, 96:2408 (R;US)

Remote technologies for buried waste retrieval, 96:2263 (R;US)

Results of the independent radiological verification survey at 4400 Piehl Road, Ottawa Lake, Michigan (BTO002), 96:2182 (R;US)

Results of the independent radiological verification survey at the former C.H. Schnoor and Company Site, 644 Garfield Street, Springdale, Pennsylvania (CPV001), 96:2177 (R;US)

Results of the independent radiological verification survey of the remedial action performed at the former Alba Craft Laboratory site, Oxford, Ohio, (OXO001), 96:2183 (R;US)

Results of the independent radiological verification survey of the remedial action performed at 525 S. Main Street, Oxford, Ohio, (OXO002), 96:2178 (R;US)

Revegetation plan for the 116-C-1 site, 96:39 (R;US)

Site descriptions of environmental restoration units at the Oak Ridge K-25 Site, Oak Ridge, Tennessee, 96:200 (R;US)

Soil washing pilot plant treatability test for the 100-DR-1 Operable Unit, 96:835 (R;US)

Soil washing technology evaluation, 96:2622 (R;US)

Stabilization and reuse of heavy metal contaminated soils by means of quicklime sulfate salt treatment. Final report, September 1992–February 1995, 96:484 (R;US)

Stakeholder acceptance analysis ResonantSonic drilling, 96:576 (R;US)

Stakeholder acceptance analysis: In-well vapor stripping, in-situ bioremediation, gas membrane separation system (membrane separation), 96:575 (R;US)

Stakeholder acceptance analysis: Tunable hybrid plasma, 96:1000 (R;US)

Steerable/distance enhanced penetrometer delivery system, 96:488 (R;US)

Subsidence above in situ vitrification: Evaluation for Hanford applications, 96:2552 (R;US)

Successful remediation of four uranium calibration pits at Technical Area II, Sandia National Laboratories, Albuquerque, New Mexico, USA, 96:1012 (R;US)

Summary of the LLNL gasoline spill demonstration - dynamic underground stripping project, 96:587 (R;US)

Technical evaluation report for the demonstration of radio frequency soil decontamination at Site S-1, 96:737 (R;US)

Technology application analyses at five Department of Energy Sites, 96:2090 (R;US)

Tritium in surface soils at the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories, New Mexico, 96:1019 (R;US)

UMTRA Surface Project management action process document. Final report: Revision 1, 96:2069 (R;US)

UMTRA Surface Project management action process document: Final. Revision 2, 96:2070 (R;US)

VAMOS: The verification and monitoring options study: Current research options for in-situ monitoring and verification of contaminant remediation and containment within the vadose zone, 96:2192 (R;US)

Value engineering study report on Lower East Fork Poplar Creek Project. Alternative No. 3, 96:2625 (R;US)

Waste minimization through high-pressure microwave digestion of soils for gross α/β analyses, 96:2283 (R;US)

Removal

Floodplain/wetlands assessment for the remediation of Vicinity Property 9 at the Weldon Spring Site, Weldon Spring, Missouri, 96:352 (R;US)

Sampling

100-FR-3 groundwater/soil gas supplemental limited field investigation report, 96:507 (R;US)

1907-DR Process Sewer Outfall soil contamination assessment sampling and analysis plan, 96:665 (R;US)

An arid zone lysimeter facility for performance assessment and closure investigations at the Nevada Test Site, 96:2112 (R;US)

Analysis of instantaneous profile test data from soils near the Mixed Waste Landfill, Technical Area 3, Sandia National Laboratories/New Mexico, 96:1020 (R;US)

Application of EPA quality assurance procedures to a soil characterization study at the DOE Nevada Test Site, 96:2386 (R;US)

Comparison of passive soil vapor survey techniques at a Tijeras Arroyo site, Sandia National Laboratories, Albuquerque, New Mexico, 96:1037 (R;US)

Description of work for vadose zone characterization of the 1301-N and 1325-N liquid waste disposal facilities, 96:2427 (R;US)

Field screening sampling and analysis strategy and methodology for the 183-H Solar Evaporation Basins: Phase 2, Soils, 96:2018 (R;US)

Natural background geochemistry, geomorphology, and pedogenesis of selected soil profiles and Bandelier Tuff, Los Alamos, New Mexico, 96:526 (R;US)

Physical sampling for site and waste characterization, 96:2620 (R;US)

Project plan for the background soils project for the Paducah Gaseous Diffusion Plant, Paducah, Kentucky, 96:2411 (R;US)

Road Transportable Analytical (RTAL) laboratory system. Quarterly report, February 1995–April 1995, 96:2363 (R;US)

Sampling and analysis plan for the 116-C-5 retention basins characteristic dangerous waste determination, 96:2304 (R;US)

Site Characterization

Fiber optic/cone penetrometer system for subsurface heavy metals detection, 96:2379 (R;US)

Sorting

100 Area rock screening study, 96:2315 (R;US)

Stabilization

Final report for the dismantlement and interim stabilization of the 107-C, 107-KE, and 107-KW retention basins, 96:2009 (R;US)

Geologic processes in the RWMC area, Idaho National Engineering Laboratory: Implications for long term stability and soil erosion at the radioactive waste management complex, 96:895 (R;US)

Vitrification

Defining the Glass Composition Limits for SRS Contaminated Soils, 96:1122 (R;US)

Fiscal year 1995 final report for TTP SR-1320-04, 96:1143 (R;US)

Subsidence above in situ vitrification: Evaluation for Hanford applications, 96:2552 (R;US)

Technical evaluation of the in situ vitrification melt expulsion at the Oak Ridge National Laboratory on April 21, 1996, Oak Ridge, Tennessee, 96:2526 (R;US)

Vitrification of surrogate mixed wastes in a graphite electrode arc melter, 96:2460 (R;US)

Washing

Plutonium mobility studies in soil sediment decontaminated by means of a soil-washing technology, 96:355 (R;US)

Soil washing pilot plant treatability test for the 100-DR-1 Operable Unit, 96:835 (R;US)

X-Ray Fluorescence Analysis

A tube-excited x-ray fluorescence spectrometer for use in small-diameter boreholes, 96:2558 (R;US)

Multiphased use of an X-MET 880 XRF to survey lead in soil at the Idaho National Engineering Laboratory, 96:2451 (R;US)

SOLAR PONDS

Unit-specific contingency plan for the 183-H solar evaporation basins. Revision 1, 96:36 (R;US)

SOLID SCINTILLATION DETECTORS

SOLID SCINTILLATION DETECTORS

Development of a long-term post-closure radiation monitor: Phase 2, Topical report, March 1994–July 1995, 96:2094 (R;US)

SOLID WASTES

Department of Energy Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs final environmental impact statement. Volume 1, Appendix E: Spent Nuclear Fuel Management Programs at other generator/storage locations, 96:1248 (R;US)

Maritime Transport

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel: Appendix C, marine transport and associated environmental impacts. Volume 2, 96:75 (R;US)

Mechanical Decladding

Criticality safety for deactivation of the Rover dry headend process, 96:1314 (R;US)

Monitored Retrievable Storage

Progress on the Hanford K basins spent nuclear fuel project, 96:1629 (R;US)

Nondestructive Testing

Capabilities for spent fuel characterization at Argonne National Laboratory, 96:1181 (R;US)

Packaging

DUSCOBS - a depleted-uranium silicate backfill for transport, storage, and disposal of spent nuclear fuel, 96:1347 (R;US)

Physical Properties

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel: Appendix B, foreign research reactor spent nuclear fuel characteristics and transportation casks. Volume 2, 96:74 (R;US)

Program Management

Technology integration plan, 96:1299 (R;US)

Radiation Detection

Spent-fuel verification measurements using passive and active radiation techniques, 96:1579 (R;US)

Radioactive Waste Disposal

Alternative dispositioning methods for HEU spent nuclear fuel at the Savannah River Site, 96:1936 (R;US)

Capabilities for spent fuel characterization at Argonne National Laboratory, 96:1181 (R;US)

Characteristics of DOE spent nuclear fuel affecting pretreatment and final disposition, 96:1311 (R;US)

DUSCOBS - a depleted-uranium silicate backfill for transport, storage, and disposal of spent nuclear fuel, 96:1347 (R;US)

Performance assessment of the direct disposal in unsaturated tuff or spent nuclear fuel and high-level waste owned by US-DOE: Volume 2, Methodology and results, 96:1539 (R;US)

Potential benefits and impacts on the CRWMS transportation system of filling spent fuel shipping casks with depleted uranium silicate glass, 96:70 (R;US)

Radioactive Waste Management

Draft Environmental Impact Statement on a proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel. Volume 1, 96:72 (R;US)

National spent fuel program preliminary report RCRA characteristics of DOE-owned spent nuclear fuel DOE-SNF-REP-002. Revision 3, 96:1267 (R;US)

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel: Appendix A, environmental justice analysis. Volume 2, 96:73 (R;US)

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel. Summary, 96:71 (R;US)

Spent Nuclear Fuel Project technical baseline document fiscal year 1995. Volume 2: Supporting data, 96:2218 (R;US)

Radioactive Waste Processing

Application of spent fuel treatment technology to plutonium immobilization, 96:1947 (R;US)

Characteristics of DOE spent nuclear fuel affecting pretreatment and final disposition, 96:1311 (R;US)

Transfer of Plutonium-Uranium Extraction Plant and N Reactor irradiated fuel for storage at the 105-KE and 105-KW fuel storage basins, Hanford Site, Richland Washington, 96:2083 (R;US)

Radioactive Waste Storage

DNFSB Recommendation 94-1 Hanford Site Integrated Stabilization Management Plan. Volume 1, 96:1592 (R;US)

Evaluation of a potential nuclear fuel repository criticality: Lessons learned, 96:1293 (R;US)

Remedial Action

High exposure hardware removal activity readiness evaluation, 96:2019 (R;US)

Reprocessing

Actinide partitioning from actual ICPP dissolved zirconium calcine using the TRUEX solvent, 96:1308 (R;US)

Experimental results: Pilot plant calcine dissolution and liquid feed stability, 96:1298 (R;US)

Nuclear fuel reprocessing deactivation plan for the Idaho Chemical Processing Plant, Revision 1, 96:2135 (R;US)

TRUEX partitioning from radioactive ICPP sodium bearing waste, 96:1307 (R;US)

The use of selective extraction chromatographic columns as an alternative to solvent extraction for the separation of uranium followed by the use of Arsenazo III as a calorimetric reagent for uranium determination, 96:2638 (R;US)

Risk Assessment

Spent Nuclear Fuel Project FY 1996 Multi-Year Program Plan WBS No. 1.4.1, Revision 1, 96:1909 (R;US)

Road Transport

Recent experience in planning, packaging and preparing non-commercial spent fuel for shipment within the United States, 96:69 (R;US)

Routing

Proposed nuclear weapons nonproliferation policy concerning foreign research reactor spent nuclear fuel: Appendix D, selection and evaluation of potential ports of entry. Volume 2, 96:76 (R;US)

Separation Processes

Characterization of nuclear decontamination solutions at the Idaho Chemical Processing Plant from 1982-1990, 96:2476 (R;US)
 TRUEX process applied to radioactive Idaho Chemical Processing Plant high-level waste calcine, 96:1322 (R;US)

Shielding

Maintenance Action Readiness Assessment Plan for Waste Area Grouping 1 inactive Tanks 3001-B, 3004-B, T-30, and 3013 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:956 (R;US)

Mixed and low-level radioactive waste disposal from the Argonne National Laboratory-East Map Tube Facility, 96:643 (R;US)

Modeling needs assessment for Hanford Tank Farm Operations. Vadose Zone Characterization Project at the Hanford Tank Farms, 96:1259 (R;US)

Radioactive Tank Waste Remediation Focus Area. Technology summary, 96:1254 (R;US)

Remote systems for waste retrieval from the Oak Ridge National Laboratory gunite tanks, 96:2239 (R;US)

Removal of strontium and transuranics from Hanford waste via hydrothermal processing – FY 1994/95 test results, 96:2555 (R;US)

Single-shell tank closure work plan. Revision A, 96:1266 (R;US)

Solid Waste Operations Complex W-113, Detail Design Report (Title II). Volume 1: Title II design report, 96:1084 (R;US)

Solid Waste Operations Complex W-113, Detail Design Report (Title II). Volume 3: Specifications, 96:1085 (R;US)

TWRS privatization bibliography. Revision 2, 96:240 (R;US)

TWRS privatization support project waste characterization database development, 96:1475 (R;US)

Tank Waste Treatment Science Task quarterly report for October–December 1994, 96:1430 (R;US)

Tank waste remediation system: An update, 96:1606 (R;US)

Topographical mapping system for hazardous and radiological environments, 96:2240 (R;US)

Vitrification technology for Hanford Site tank waste, 96:1615 (R;US)

Removal
Los Alamos National Laboratory environmental restoration program group audit report for underground storage tank removal: Audit ER-92-04, July 22–August 11, 1992, 96:1336 (R;US)

Risk Assessment
Evaluation of a potential nuclear fuel repository criticality: Lessons learned, 96:1293 (R;US)

Safety
DNFSB Recommendation 94-1 Hanford Site Integrated Stabilization Management Plan. Volume 1, 96:1594 (R;US)

Seismic Effects
Seismic analyses of equipment in 2736-Z complex. Revision 1, 96:1975 (R;US)

Site Characterization
Cooperative Telerobotic Retrieval system Phase 1 technology evaluation report, 96:2264 (R;US)

Modeling needs assessment for Hanford Tank Farm Operations. Vadose Zone Characterization Project at the Hanford Tank Farms, 96:1259 (R;US)

Specifications
Technical specification for transferring tank construction data to the Oak Ridge Environmental Information System (OREIS), 96:157 (R;US)

Stress Analysis
Stress evaluation of the primary tank of a double-shell underground storage tank facility, 96:1608 (R;US)

Thermal Analysis
Thermal analysis of the failed equipment storage vault system, 96:1937 (R;US)

Valves
W-12 valve pit decontamination demonstration, 96:2538 (R;US)

Waste Retrieval
Cooperative Telerobotic Retrieval system Phase 1 technology evaluation report, 96:2264 (R;US)

Fiscal year 1994 1/25-scale sludge mobilization testing, 96:1386 (R;US)

Solid Waste Operations Complex W-113, Detail Design Report (Title II). Volume 1: Title II design report, 96:1084 (R;US)

Solid Waste Operations Complex W-113, Detail Design Report (Title II). Volume 3: Specifications, 96:1085 (R;US)

STRATIGRAPHY
Integration of computational modeling for the Los Alamos National Laboratory low level radioactive waste disposal performance assessment, 96:937 (R;US)

STREAMS
Discovery, interception, and treatment of a groundwater plume: Oak Ridge National Laboratory, 96:407 (R;US)

Effective use of risk assessments and the public comment process to achieve acceptable remediation goals for mercury-contaminated sites, 96:710 (R;US)

Interpolation of bottom bathymetry and potential erosion in a large Tennessee reservoir system using GRASS, 96:2325 (R;US)

Migration of Sr-20, Cs-137, and Pu-239/240 in Canyon below Los Alamos outfall, 96:2498 (R;US)

Remedial design work plan for Lower East Fork Poplar Creek Operable Unit, Oak Ridge, Tennessee, 96:2408 (R;US)

Remedial investigation/feasibility study of the Clinch River/Poplar Creek operable unit. Volume 4. Information related to the feasibility study and ARARs. Appendixes G, H, I, 96:2403 (R;US)

Report on the biological monitoring program for Bear Creek at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 1989-1994, 96:2531 (R;US)

Third report on the Oak Ridge K-25 Site Biological Monitoring and Abatement Program for Mitchell Branch, 96:2530 (R;US)

Waste Area Grouping 2 Remedial Investigation Phase 1 Seep Task data report: Contaminant source area assessment, 96:2523 (R;US)

Waste area grouping 2 Phase I task data report: Ecological risk assessment and White Oak Creek watershed screening ecological risk assessment, 96:549 (R;US)

White Oak Creek embayment sediment retention structure design and construction, 96:400 (R;US)

STRONTIUM

A combined cesium-strontium extraction/recovery process, 96:1154 (R;US)

Comparison of organic and inorganic ion exchangers for removal of cesium and strontium from simulated and actual Hanford 241-AW-101 DSSF tank waste, 96:1516 (R;US)

Comparison of organic and inorganic ion exchangers for removal of cesium and strontium from simulated and actual Hanford 241-AW-101 DSSF tank waste, 96:2652 (R;US)

Comprehensive supernate treatment: Task summary, 96:1217 (R;US)

Demonstration of radionuclides removal at the 105-N basin using the 3M system, 96:2014 (R;US)

Effects of soluble organic complexants and their degradation products on the removal of selected radionuclides from high-level waste. Part 3, Distributions of Sr, Cs, Tc, Pu, and Am onto 33 absorbers from four variations of a 3:1 dilution of Hanford complexant concentrate (CC) simulant: Part 4, The effects of varying dilution ratios on the distribution, 96:1334 (R;US)

Effects of soluble organic complexants and their degradation products on the removal of selected radionuclides from high-level waste. Part II: Distributions of Sr, Cs, Tc, and Am onto 32 absorbers from four variations of Hanford tank 101-SY simulant solution, 96:1333 (R;US)

Efficient separations and processing crosscutting program: Develop and test sorbents, 96:2650 (R;US)

Environmental monitoring plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2388 (R;US)

Evaluation of improved techniques for the removal of ⁹⁰Sr and ¹³⁷Cs from process wastewater and groundwater: Chabazite zeolite baseline study, 96:557 (R;US)

HWVP submerged bed scrubber waste treatment by ion exchange at high pH, 96:1500 (R;US)

Inorganic ion exchange evaluation and design: Silicotitanate ion exchange waste conversion, 96:2649 (R;US)

Removal of strontium and transuranics from Hanford tank waste via addition of metal cations and chemical oxidant: FY 1995 test results, 96:1432 (R;US)

SNL-1, a highly selective inorganic crystalline ion exchange material for Sr²⁺ in acidic solutions, 96:2658 (R;US)

Sorption and desorption of cesium and strontium on TA-2 and TA-41 soils and sediments, 96:529 (R;US)

Volatility literature of chlorine, iodine, cesium, strontium, technetium, and rhenium; technetium and rhenium volatility testing, 96:1002 (R;US)

STRONTIUM 90
Ecological Concentration

STRONTIUM 90

Ecological Concentration

Concentrations of radionuclides in terrestrial vegetation on the Hanford site of potential interest to Native Americans, 96:2545 (R;US)

The selective removal of ⁹⁰Sr and ¹³⁷Cs from liquid low-level waste at Oak Ridge National Laboratory, 96:699 (R;US)

Environmental Transport

Reevaluation of the N-Springs barrier wall, 96:368 (R;US)

Packaging

A status report on the development and certification of the Beneficial Uses Shipping System (BUSS) cask, 96:271 (R;US)

Precipitation

In-tank processes for destruction of organic complexants and removal of selected radionuclides, 96:1812 (R;US)

Report of scouting study on precipitation of strontium, plutonium, and americium from Hanford complexant concentrate waste, 96:1707 (R;US)

Radiation Monitoring

Waste Area Grouping 2 Remedial Investigation Phase 1 Seep Task data report: Contaminant source area assessment, 96:2523 (R;US)

Radioactive Waste Disposal

Summary of radioactive solid waste received in the 200 Areas during calendar year 1994, 96:2580 (R;US)

Radioactive Waste Management

N-Springs aquifer test report for Well 199-N-103A, 96:394 (R;US)

Radioactive Waste Processing

N-Springs Pump and Treat Database user guide, 96:2012 (R;US)

Radioactive Waste Storage

Summary of radioactive solid waste received in the 200 Areas during calendar year 1994, 96:2580 (R;US)

Radiochemical Analysis

Data validation summary report for the 100-BC-5 Operable Unit Round 9 Groundwater Sampling. Revision 0, 96:389 (R;US)

Radioecological Concentration

Hanford Site background: Evaluation of existing soil radionuclide data, 96:2432 (R;US)

Radionuclide Migration

Migration of Sr-20, Cs-137, and Pu-239/240 in Canyon below Los Alamos outfall, 96:2498 (R;US)

Remote Sensing

Waste Area Grouping 4 Site Investigation Sampling and Analysis Plan, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2397 (R;US)

Removal

Discovery, interception, and treatment of a groundwater plume: Oak Ridge National Laboratory, 96:407 (R;US)

Evaluation of improved technologies for the removal of ⁹⁰Sr and ¹³⁷Cs from process wastewater and groundwater: FY 1995 status, 96:561 (R;US)

N Springs expedited response action performance monitoring plan. Revision 1, 96:366 (R;US)

N Springs pump-and-treat well design. Revision 2, 96:361 (R;US)

Subproject plan for demonstration of 3M technology for treatment of N Basin water, 96:2628 (R;US)

Sorption

In-tank processes for destruction of organic complexants and removal of selected radionuclides, 96:1812 (R;US)

Storage

Waste Encapsulation and Storage Facility mission analysis report, 96:323 (R;US)

STRONTIUM NITRATES

Mass transfer of SCWO processes: Molecular diffusion and mass transfer coefficients of inorganic nitrate species in sub- and supercritical water, 96:2500 (R;US)

STRUCTURAL MATERIALS

STREAMS

Chemical Analysis

Road Transportable Analytical Laboratory (RTAL) system. Quarterly report, May–July 1995, 96:2364 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Maybell, Colorado, 96:425 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Mexican Hat, Utah, 96:422 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Monument Valley, Arizona, 96:424 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Riverton, Wyoming, 96:421 (R;US)

Supplement to the UMTRA project water sampling and analysis plan, Slick Rock, Colorado, 96:431 (R;US)

UMTRA Project water sampling and analysis plan, Canonsburg, Pennsylvania. Revision 1, 96:417 (R;US)

Contamination

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Lakeview, Oregon. Revision 2, 96:430 (R;US)

Benchmarking analysis of three multimedia models: RESRAD, MMSOILS, and MEPAS, 96:2418 (R;US)

Determination of radium in water, 96:517 (R;US)

Engineering evaluation/cost analysis for the proposed removal action at the Southeast Drainage near the Weldon Spring Site, Weldon Spring, Missouri, 96:823 (R;US)

Estimating surface water risk at Oak Ridge National Laboratory: Effects of site conditions on modeling results, 96:2339 (R;US)

Construction

External pressure limitations for 0-15 PSI storage tanks, 96:1607 (R;US)
Project W-236A multi-function waste tank facility waste feed projections, 96:1655 (R;US)

Cooling Systems

Replacement inhibitors for high level waste tank cooling coils, 96:1922 (R;US)

Corrosion

A robotic end effector for inspection of storage tanks, 96:2256 (R;US)
Corrosion analysis of decommissioned carbon steel waste water tanks at Brookhaven National Laboratory, 96:2022 (R;US)
Detection of localized and general corrosion of mild steel in simulated defense nuclear waste solutions using electrochemical noise analysis, 96:1625 (R;US)
Limits on Annulus Air Outages in Types 1, 2, and 3 Waste Tanks, 96:1931 (R;US)
WVNS Tank Farm Process Support: Experimental evaluation of an inert gas (nitrogen) to mitigate external corrosion of high-level waste storage tanks, 96:1479 (R;US)

Corrosion Protection

Acceptance Test Procedure for Cathodic Protection, Rectifier 11, 96:1638 (R;US)
Acceptance test procedure for cathodic protection, rectifier 31, 96:1636 (R;US)
Acceptance test procedure for cathodic protection, rectifier 41, 96:1637 (R;US)
Functional design criteria SY tank farm cathodic protection, 95G-EWW-430, 96:1660 (R;US)
Technical basis for a minimum hydroxide concentration in tanks containing dilute waste, 96:1933 (R;US)

Corrosion Resistance

Laboratory studies of gas generation and potential for tank wall corrosion during blending of high-level wastes at the West Valley Demonstration Project, 96:1381 (R;US)

Cracking

A robotic end effector for inspection of storage tanks, 96:2256 (R;US)

Decommissioning

Annual Status Report for the F/H Area High Level Waste Tank Farms, 96:1926 (R;US)

Decontamination

Final report for the 1304-N Emergency Dump Tank dose reduction, 96:2010 (R;US)

Degassing

Gas generation from Tank 241-SY-103 waste, 96:1480 (R;US)

Densimeters

Acceptance Test Report for the 241-AN-107 Enraf Advanced Technology Gauges, 96:2606 (R;US)

Design

Seismic design and evaluation guidelines for the Department of Energy High-Level Waste Storage Tanks and Appurtenances, 96:1193 (R;US)
Underground nuclear waste containments, 96:1199 (R;US)

Drainage

Permeation of Tank C-103 sludge simulant by organic solvent, 96:1368 (R;US)

Drill Cores

45-Day safety screen results for tank 241-U-203, push mode, cores 79 and 80, 96:1689 (R;US)

Dynamic Loads

Overview of the Savannah River Site high level waste storage tank structural qualification program, 96:1918 (R;US)

Embrittlement

Limits on Annulus Air Outages in Types 1, 2, and 3 Waste Tanks, 96:1931 (R;US)

Engineered SafeTy Systems

Inactive Tanks Remediation Program Batch I, Series I tanks 3001-B, 3004-B, 3013, and T-30 technical memorandum. Environmental Restoration Program, 96:954 (R;US)

Evaluation

A human factors engineering evaluation of the Multi-Function Waste Tank Facility. Final report, 96:1653 (R;US)
Double-shell tank waste system assessment status and schedule, 96:1822 (R;US)
Ferrocyanide tank safety program: Cesium uptake capacity of simulated ferrocyanide tank waste. Final report, 96:1411 (R;US)
Inactive Tanks Remediation Program Batch I, Series I tanks 3001-B, 3004-B, 3013, and T-30 technical memorandum. Environmental Restoration Program, 96:954 (R;US)

Evaporators

242-A Control System device logic software documentation. Revision 2, 96:1632 (R;US)

Explosions

Ferrocyanide tank safety program: Cesium uptake capacity of simulated ferrocyanide tank waste. Final report, 96:1411 (R;US)
The effect of dilution on the gas-retention behavior of Tank 241-SY-101 waste, 96:1437 (R;US)

Fire Hazards

FTIR fiber optic methods for the analysis of Hanford Site waste, 96:1616 (R;US)

Flow Models

Sloshing impact in roofed tanks, 96:1184 (R;US)

Gas Analysis

Functional design criteria for the retained gas sampler system, 96:1825 (R;US)
Tank 241-A-101 headspace gas and vapor characterization results for samples collected in June 1995, 96:1801 (R;US)
Tank 241-AX-102 headspace gas and vapor characterization results for samples collected in June 1995, 96:1802 (R;US)
Tank 241-BY-104 vapor sampling and analysis tank characterization report, 96:1719 (R;US)
Tank 241-BY-105 vapor sampling and analysis tank characterization report, 96:1722 (R;US)
Tank 241-BY-106 vapor sampling and analysis tank characterization report, 96:1725 (R;US)
Tank 241-BY-107 headspace gas and vapor characterization results for samples collected in March 1994 and October 1994, 96:1730 (R;US)
Tank 241-BY-108 vapor sampling and analysis tank characterization report, 96:1731 (R;US)
Tank 241-BY-110 vapor sampling and analysis tank characterization report, 96:1748 (R;US)
Tank 241-C-101 vapor sampling and analysis tank characterization report, 96:1785 (R;US)
Tank 241-C-102 headspace gas and vapor characterization results for samples collected in August 1994, 96:1788 (R;US)
Tank 241-C-110 headspace gas and vapor characterization results for samples collected in August 1994, 96:1798 (R;US)
Tank 241-C-111 vapor sampling and analysis tank characterization report, 96:1739 (R;US)
Tank 241-C-112 vapor sampling and analysis tank characterization report, 96:1742 (R;US)
Tank 241-S-111 headspace gas and vapor characterization results for samples collected in March 1995, 96:1803 (R;US)
Tank 241-SX-103 headspace gas and vapor characterization results for samples collected in March 1995, 96:1804 (R;US)
Tank 241-T-111 headspace gas and vapor characterization results for samples collected in January 1995, 96:1805 (R;US)
Tank 241-TY-101 headspace gas and vapor characterization results for samples collected in August 1994 and April 1995, 96:1792 (R;US)
Tank 241-TY-103 headspace gas and vapor characterization results for samples collected in August 1994 and April 1995, 96:1794 (R;US)
Tank 241-TY-104 headspace gas and vapor characterization results for samples collected in April 1995, 96:1796 (R;US)
Vapor space characterization of Waste Tank 241-S-111: Results from samples collected on 3/21/95, 96:1423 (R;US)

Phase I remedial investigation report of Waste Area Grouping 2 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2387 (R;US)

Remedial investigation/feasibility study report for the 300-FF-5 Operable Unit, 96:2124 (R;US)

Work plan for the remedial investigation/feasibility study for the groundwater operable units at the Chemical Plant Area and the Ordnance Works Area, Weldon Spring, Missouri, 96:496 (R;US)

Decontamination

Aqueous-stream uranium-removal technology cost/benefit and market analysis, 96:494 (R;US)

Environmental Transport

Engineering evaluation/cost analysis for the proposed removal action at the Southeast Drainage near the Weldon Spring Site, Weldon Spring, Missouri, 96:823 (R;US)

Sample activity report for cobalt sampling at the 300-FF-1 South Process Pond, 96:2307 (R;US)

M Codes

Large-scale multimedia modeling applications, 96:999 (R;US)

Radionuclide Migration

Area G perimeter surface-soil and single-stage water sampling: Environmental surveillance for fiscal year 1993, 96:2483 (R;US)

Large-scale multimedia modeling applications, 96:999 (R;US)

Numerical modeling of the groundwater contaminant transport for the Lake Karachai Area: The methodological approach and the basic two-dimensional regional model, 96:542 (R;US)

Three multimedia models used at hazardous and radioactive waste sites, 96:670 (R;US)

Raman Spectroscopy

Field Raman spectrograph for environmental analysis, 96:2360 (R;US)

Remedial Action

Technical Assistance Contractor management plan. Revision 1, 96:2043 (R;US)

Sampling

Physical sampling for site and waste characterization, 96:2620 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Maybell, Colorado, 96:425 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Mexican Hat, Utah, 96:422 (R;US)

Supplement to the UMTRA Project water sampling and analysis plan, Monument Valley, Arizona, 96:424 (R;US)

Vapor space characterization of waste Tank 241-BY-103: Results from samples collected on 11/1/94, 96:1413 (R;US)

Vapor space characterization of waste Tank 241-BY-104 (in situ): Results from samples collected on 4/22/94, 96:1362 (R;US)

Vapor space characterization of waste Tank 241-BY-106 (in situ): Results from samples collected on 5/4/94 and 5/5/94, 96:1358 (R;US)

Vapor space characterization of waste Tank 241-BY-108: Results from samples collected on 10/27/94, 96:1376 (R;US)

Vapor space characterization of waste Tank 241-C-104: Results from samples collected on 2/17/94 and 3/3/94, 96:1378 (R;US)

Vapor space characterization of waste Tank 241-C-107: Results from samples collected on 9/29/94, 96:1424 (R;US)

Vapor space characterization of waste Tank 241-C-108: Results from samples collected through the vapor sampling system on 8/5/94, 96:1360 (R;US)

Vapor space characterization of waste Tank 241-C-109 (in situ): Results from samples collected on 6/23/94, 96:1363 (R;US)

Vapor space characterization of waste Tank 241-C-111 (in situ): Results from samples collected on 6/20/94, 96:1364 (R;US)

Vapor space characterization of waste Tank 241-SX-103: Results from samples collected on 3/23/95, 96:1447 (R;US)

Vapor space characterization of waste Tank 241-SX-106: Results from samples collected on 3/24/95, 96:1387 (R;US)

Vapor space characterization of waste Tank 241-TX-118 (in situ): Results from samples collected on 9/7/94, 96:1422 (R;US)

Vapor space characterization of waste Tank 241-TY-101: Results from samples collected on 4/6/95, 96:1415 (R;US)

Vapor space characterization of waste Tank 241-U-103: Results from samples collected on 2/15/95, 96:1446 (R;US)

Vapor space characterization of waste tank 241-BY-105 (in situ): Results from samples collected on May 9, 1994, 96:1357 (R;US)

Historical Aspects

Double shell tanks plutonium inventory assessment, 96:1874 (R;US)

Underground nuclear waste containments, 96:1199 (R;US)

Inspection

Annual Radioactive Waste Tank Inspection Program 1994, 96:1929 (R;US)

Annual radioactive waste tank inspection program: 1995, 96:1942 (R;US)

Houdini: Reconfigurable in-tank robot, 96:2258 (R;US)

WVNS Tank Farm Process Support: Experimental evaluation of an inert gas (nitrogen) to mitigate external corrosion of high-level waste storage tanks, 96:1479 (R;US)

Investigations

Corrosion analysis of decommissioned carbon steel waste water tanks at Brookhaven National Laboratory, 96:2022 (R;US)

Leaks

SoilSaw™ demonstration. Final report, September 1992–January 1995, 96:483 (R;US)

Tank leak detection using electrical resistance methods, 96:1582 (R;US)

Level Indicators

Acceptance Test Report for the 241-AN-107 Enraf Advanced Technology Gauges, 96:2606 (R;US)

Maintenance

Accelerated safety analyses structural analyses Phase 2 ACI code evaluations of the maximum loads in the concrete dome, haunch & upper wall of double-shell waste storage tanks, 96:1866 (R;US)

Maintenance optimization plan for essential equipment reliability, 96:1914 (R;US)

Mechanical Properties

Position paper: Live load design criteria for Project W-236A Multi-Function Waste Tank Facility, 96:2223 (R;US)

Mechanical Structures

An overview of the DOE high-level waste storage tank structural integrity assessment guidelines, 96:1196 (R;US)

Mixing

Validation Analysis for the Calculation of a Turbulent Free Jet in Water Using CFDS-FLOW 3-D and FLUENT, 96:1930 (R;US)

Modifications

Acceptance Test Procedure: SY101 air pallet system, 96:1667 (R;US)

Development and determination of a single-shell tank interim stabilization pumping strategy, 96:1817 (R;US)

Dropping of mixing pump in Tank 102-AP, 96:1753 (R;US)

Structural evaluation of mixer pump installed in Tank 241-AN-107 for caustic addition project, 96:1679 (R;US)

Monitoring

241-CX-70, 241-CX-71, and 241-CX-72 underground storage tanks at the strontium semiworks facility supplemental information to the Hanford Facility Contingency Plan, 96:1191 (R;US)

300 Area waste acid treatment system closure plan. Revision 1, 96:2116 (R;US)

45-Day safety screen results for tank 241-C-105, push mode, cores 72 and 76, 96:1688 (R;US)

45-Day safety screen results for tank 241-U-202, push mode, cores 75 and 78, 96:1690 (R;US)

A parametric study of double-shell tank response to internal high-frequency pressure loading, 96:1605 (R;US)

A robotic end effector for inspection of storage tanks, 96:2256 (R;US)

Acceptance test report for the ultra high pressure bore head for use in the self-installing liquid observation well, 96:1670 (R;US)

An advanced open-path atmospheric pollution monitor for large areas, 96:2378 (R;US)

Assuring safe interim storage of Hanford high-level tank wastes, 96:1627 (R;US)

Chemometrics review for chemical sensor development, task 7 report, 96:2352 (R;US)

Completion report for the Inactive Liquid Low-Level Waste Tank Remediation Project at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:2170 (R;US)

Ferrocyanide safety project ferrocyanide aging studies FY 1995 annual report, 96:1417 (R;US)

Ferrocyanide safety project: Comparison of actual and simulated ferrocyanide waste properties, 96:1351 (R;US)

Focused feasibility study of engineered barriers for waste management units in the 200 areas, 96:124 (R;US)

Functions and requirements for Hanford single-shell tank leakage detection and monitoring, 96:1826 (R;US)

Hanford single-shell tank grouping study, 96:1427 (R;US)

Historical Tank Content Estimate (HTCE) and sampling estimate comparisons, 96:1452 (R;US)

Integrity assessment plan for PNL 300 area radioactive hazardous waste tank system. Final report, 96:1349 (R;US)

Laboratory studies of gas generation and potential for tank wall corrosion during blending of high-level wastes at the West Valley Demonstration Project, 96:1381 (R;US)

Maintenance optimization plan for essential equipment reliability, 96:1914 (R;US)

Mechanisms of gas generation from simulated SY tank farm wastes: FY 1995 progress report, 96:1528 (R;US)

TANKS Monitoring

- Potential enhancements to addressing programmatic risk in the tank waste remediation system (TWRS) program, 96:1512 (R;US)
- Preliminary engineering report waste area grouping 5, Old Hydrofracture Facility Tanks content removal project, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:960 (R;US)
- Preliminary evaluation of liquid integrity monitoring methods for gunite and associated tanks at the Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:958 (R;US)
- Radioactive tank waste remediation focus area, 96:1255 (R;US)
- Results of 1995 characterization of Gunite and Associated Tanks at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:1342 (R;US)
- Review of sensors for the in situ chemical characterization of the Hanford underground storage tanks, 96:1580 (R;US)
- Root cause analysis for waste area grouping 1, Batch I, Series 1 Tank T-30 project at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 96:959 (R;US)
- Supporting document for the Southeast Quadrant historical tank content estimate report for AN-Tank Farm. Vols. I and II, 96:1709 (R;US)
- Supporting document for the Southeast Quadrant historical tank content estimate report for SY-tank farm, 96:1714 (R;US)
- Supporting document for the Southeast quadrant historical tank content estimate report for AP-tank farm. Volume 1 and 2, 96:1710 (R;US)
- Tank 241-BY-103 vapor sampling and analysis tank characterization report, 96:1746 (R;US)
- Tank 241-BY-104 vapor sampling and analysis tank characterization report. Revision 1, 96:1720 (R;US)
- Tank 241-BY-105 vapor sampling and analysis tank characterization report. Revision 1, 96:1723 (R;US)
- Tank 241-BY-106 vapor sampling and analysis tank characterization report. Revision 1, 96:1726 (R;US)
- Tank 241-BY-107 vapor sampling and analysis tank characterization report, 96:1728 (R;US)
- Tank 241-BY-107 vapor sampling and analysis tank characterization report. Revision 1, 96:1729 (R;US)
- Tank 241-BY-111 vapor sampling and analysis tank characterization report, 96:1759 (R;US)
- Tank 241-BY-112 vapor sampling and analysis tank characterization report, 96:1761 (R;US)
- Tank 241-C-104 vapor sampling and analysis tank characterization report, 96:1763 (R;US)
- Tank 241-C-108 vapor sampling and analysis tank characterization report. Revision 1, 96:1734 (R;US)
- Tank 241-C-112 vapor sampling and analysis tank characterization report. Revision 1, 96:1743 (R;US)
- Tank 241-S-102 vapor sampling and analysis tank characterization report, 96:1771 (R;US)
- Tank 241-SX-115 tank characterization plan, 96:1885 (R;US)
- Tank 241-TX-105 vapor sampling and analysis tank characterization report, 96:1775 (R;US)
- Tank 241-TX-118 vapor sampling and analysis tank characterization report, 96:1777 (R;US)
- Tank 241-U-107 vapor sampling and analysis tank characterization report, 96:1781 (R;US)
- Tank 241-U-111 vapor sampling and analysis tank characterization report, 96:1783 (R;US)
- Test plan for Fauske and Associates to perform tube propagation experiments with simulated Hanford tank wastes, 96:1474 (R;US)

Underground radioactive waste tank remote inspection and sampling, 96:2335 (R;US)

Understanding waste phenomenology to reduce the amount of sampling and analysis required to resolve Hanford waste tank safety issues, 96:1621 (R;US)

Work plan for the identification of techniques for in-situ sensing of layering/interfaces of Hanford high level waste tank, 96:1902 (R;US)

Schedules

Operational waste volume projection, 96:1708 (R;US)

Seismic Effects

Consideration of kinematic interaction in determining seismic responses of underground structures, 96:1200 (R;US)

Overview of the Savannah River Site high level waste storage tank structural qualification program, 96:1918 (R;US)

Sloshing impact in roofed tanks, 96:1184 (R;US)

Soil structure interaction analysis of buried tank subjected to vertical excitations, 96:1618 (R;US)

Shear Properties

Effect of gravitation on the dynamic response of tanks containing two liquids, 96:1182 (R;US)

Shielding

Radiologically contaminated lead shot reuse at the Idaho National Engineering Laboratory (INEL), 96:881 (R;US)

Sludges

Tank 241-BY-104 rotary core sampling and analysis plan, 96:1900 (R;US)

Static Loads

Structural analysis of underground gunite storage tanks. Environmental Restoration Program, 96:1339 (R;US)

Stratification

Work plan for the identification of techniques for in-situ sensing of layering/interfaces of Hanford high level waste tank, 96:1902 (R;US)

Stress Corrosion

Hanford double shell tank corrosion monitoring instrument tree prototype, 96:1624 (R;US)

Testing

Standard-B auto grab sampler hydrogen monitoring system, Acceptance Test Report, 96:1668 (R;US)

Vapors

Tank 241-BY-104 rotary core sampling and analysis plan, 96:1900 (R;US)

Vapor and Gas Sampling of Single-Shell Tank 241-TX-105 Using the Vapor Sampling System, 96:1844 (R;US)

Vapor and gas sampling of Single-Shell Tank 241-T-111 using the vapor sampling system, 96:1853 (R;US)

Vapor and gas sampling of Single-Shell Tank 241-U-107 using the Vapor Sampling System, 96:1861 (R;US)

Vapor and gas sampling of Single-Shell Tank 241-U-111 using the vapor sampling system, 96:1862 (R;US)

Vapor and gas sampling of single-shell tank 241-B-103 using the vapor sampling system, 96:1854 (R;US)

Vapor and gas sampling of single-shell tank 241-BX-104 using the vapor sampling system, 96:1842 (R;US)

Vapor and gas sampling of single-shell tank 241-BY-103 using the vapor sampling system, 96:1848 (R;US)

Vapor and gas sampling of single-shell tank 241-BY-107 using the Vapor Sampling System, 96:1846 (R;US)

Vapor and gas sampling of single-shell tank 241-BY-109 using the vapor sampling system, 96:1847 (R;US)

Vapor and gas sampling of single-shell tank 241-BY-110 using the vapor sampling system, 96:1849 (R;US)

Vapor and gas sampling of single-shell tank 241-BY-111 using the vapor sampling system, 96:1850 (R;US)

Vapor and gas sampling of single-shell tank 241-BY-112 using the vapor sampling system, 96:1851 (R;US)

Vapor and gas sampling of single-shell tank 241-C-108 using the vapor sampling system, 96:1839 (R;US)
 Vapor and gas sampling of single-shell tank 241-C-109 using the vapor sampling system, 96:1840 (R;US)
 Vapor and gas sampling of single-shell tank 241-C-111 using the vapor sampling system, 96:1845 (R;US)
 Vapor and gas sampling of single-shell tank 241-C-112 using the vapor sampling system, 96:1841 (R;US)
 Vapor and gas sampling of single-shell tank 241-S-102 using the vapor sampling system, 96:1855 (R;US)
 Vapor and gas sampling of single-shell tank 241-S-111 using the vapor sampling system, 96:1856 (R;US)
 Vapor and gas sampling of single-shell tank 241-SX-103 using the vapor sampling system, 96:1857 (R;US)
 Vapor and gas sampling of single-shell tank 241-SX-106 using the vapor sampling system, 96:1858 (R;US)
 Vapor and gas sampling of single-shell tank 241-T-107 using the vapor sampling system, 96:1852 (R;US)
 Vapor and gas sampling of single-shell tank 241-TX-118 using the vapor sampling system, 96:1843 (R;US)
 Vapor and gas sampling of single-shell tank 241-TY-101 using the vapor sampling system, 96:1859 (R;US)
 Vapor and gas sampling of single-shell tank 241-TY-103 using the vapor sampling system, 96:1860 (R;US)

Ventilation

Engineering Task Plan for Tank 241-C-106 contingency chiller definitive design, 96:1821 (R;US)

Ventilation Systems

Computer software configuration management plan for the 241-AZ and 241-AZ tank farm MICON automation system, 96:1674 (R;US)

Process control computer software requirements and specifications for the 241-AZ and 241-AZ tank farm MICON automation system, 96:1677 (R;US)

Volume

Operational waste volume projection, 96:1708 (R;US)

Waste Retrieval

Fiscal year 1994 1/25-scale sludge mobilization testing, 96:1386 (R;US)

Identification of physical properties for the retrieval data quality objective process, 96:1397 (R;US)

Remote systems for waste retrieval from the Oak Ridge National Laboratory gunite tanks, 96:2239 (R;US)

TARGETS

Application of the TRUEX process to highly irradiated targets, 96:1343 (R;US)

TBP

Actinide partitioning studies using dihexyl-N,N-diethylcarbamoylmethyl phosphonate and dissolved zirconium calcine, 96:2643 (R;US)

Mercury extraction by the TRUEX process solvent: 1. Kinetics, extractable species, dependence on nitric acid concentration and stoichiometry, 96:2639 (R;US)

TECHNETIUM

Alkaline chemistry of transuranium elements and technetium and the treatment of alkaline radioactive wastes, 96:1590 (R;US)

Alkaline-side extraction of technetium from tank waste using crown ethers and other extractants, 96:2648 (R;US)

Comprehensive supernate treatment: Task summary, 96:1217 (R;US)

Effects of soluble organic complexants and their degradation products on the removal of selected radionuclides from high-level waste. Part II: Distributions of Sr, Cs, Tc, and Am onto 32 absorbers from four variations of Hanford tank 101-SY simulant solution, 96:1333 (R;US)

Effects of soluble organic complexants and their degradation products on the removal of selected radionuclides from high-level waste. Part 3, Distributions of Sr, Cs, Tc, Pu, and Am onto 33 absorbers from four variations of a 3:1 dilution of Hanford complexant concentrate (CC) simulant: Part 4, The effects of varying dilution ratios on the distribut, 96:1334 (R;US)

Efficient separations and processing crosscutting program: Develop and test sorbents, 96:2650 (R;US)

Removal of technetium from alkaline nuclear-waste media by a solvent-extraction process using crown ethers, 96:2629 (R;US)

Solvent extraction of technetium from alkaline waste media using bis-4,4'-(5')[(tert-butyl)cyclohexano]-18-crown-6, 96:2633 (R;US)

Volatility literature of chlorine, iodine, cesium, strontium, technetium, and rhenium; technetium and rhenium volatility testing, 96:1002 (R;US)

TECHNETIUM 99

200-UP-1 groundwater pump-and-treat Phase 1 quarterly report, September 1995–November 1995, 96:381 (R;US)

200-UP-1 vertical profiling activity summary report, 96:362 (R;US)

Data validation summary report for the 100-BC-5 Operable Unit Round 9 Groundwater Sampling. Revision 0, 96:389 (R;US)

Engineering evaluation/conceptual plan for the 200-UP-1 Groundwater Operable Unit interim remedial measure. Revision 2, 96:371 (R;US)

Engineering evaluation/conceptual plan for the 200-UP-1 groundwater operable unit interim remedial measure, 96:369 (R;US)

Engineering evaluation/conceptual plan for the 200-UP-1 groundwater operable unit interim remedial measure, 96:370 (R;US)

Evaluation of gas-phase technetium decontamination and safety related experiments during FY 1994. A report of work in progress, 96:2147 (R;US)

In-tank processes for destruction of organic complexants and removal of selected radionuclides, 96:1812 (R;US)

Solvent extraction of radionuclides from aqueous tank waste, 96:1216 (R;US)

Treatability study using prompt gamma neutron activation analysis (PGNAA) technology, Phase I. Topical report, 96:2374 (R;US)

Treatability test report for the 200-UP-1 Operable Unit, Hanford Site, 96:500 (R;US)

Waste and cost reduction using dual wall reverse circulation drilling with multi-level groundwater sampling for contaminant plume delineation, 96:404 (R;US)

TECHNETIUM COMPOUNDS

Studies of the chemistry of transuranium elements and technetium at the Institute of Physical Chemistry, Russian Academy of Sciences, supported by the US Department of Energy, 96:290 (R;US)

TECHNETIUM TELLURIDES

See TECHNITIUM COMPOUNDS

TECHNICAL INFORMATION CENTER

See US DOE

TECHNOLOGY ASSESSMENT

Fixed capital investments for the uranium soils integrated demonstration soil treatment technologies, 96:2535 (R;US)

TECHNOLOGY TRANSFER

A survey of environmental needs and innovative technologies in Germany, 96:249 (R;US)

Demonstrating and implementing innovative technologies: Case studies from the USDOE Office of Technology Development, 96:996 (R;US)

ITEP: A survey of innovative environmental restoration technologies in the Netherlands and France, 96:248 (R;US)

Technology catalogue. Second edition, 96:80 (R;US)

TEFLON

Effects of simulant Hanford tank waste on plastic packaging components, 96:1567 (R;US)

TEKTITES

Reproduction of natural corrosion by accelerated laboratory testing methods, 96:1174 (R;US)

TEMPERATURE MEASUREMENT

Thermal modeling of tanks 241-AW-101 and 241-AN-104 with the TEMPEST code, 96:1409 (R;US)

TENELON

TENELON

See STAINLESS STEELS

TENNESSEE

Interpolation of bottom bathymetry and potential erosion in a large Tennessee reservoir system using GRASS, 96:2325 (R;US)

TERRESTRIAL ECOSYSTEMS

Approach and strategy for performing ecological risk assessments for the US Department of Energy's Oak Ridge Reservation: 1995 revision, 96:151 (R;US)

Risk information in support of cost estimates for the Baseline Environmental Management Report (BEMR). Section 1, 96:230 (R;US)

TESTING

URANIUM

URANIUM

See also DEPLETED URANIUM

Soil treatment to remove uranium and related mixed radioactive heavy metal contaminants. Quarterly report, January–March 1995, 96:807 (R;US)

Alpha Detection

Use of passive alpha detectors to screen for uranium contamination in a field at Fernald, Ohio, 96:2323 (R;US)

Biodegradation

Bioreduction amenability testing of actinide contaminated soils. The systems: Am^{241} - Pu^{238} , Am^{241} - $\text{Pu}^{239/40}$, U, 96:924 (R;US)

Determination of kinetic coefficients for the simultaneous reduction of sulfate and uranium by *Desulfovibrio desulfuricans* bacteria, 96:2190 (R;US)

Technical considerations for the implementation of subsurface microbial barriers for restoration of groundwater at UMTRA sites, 96:586 (R;US)

Dissolution

Bioreduction amenability testing of actinide contaminated soils. The systems: Am^{241} - Pu^{238} , Am^{241} - $\text{Pu}^{239/40}$, U, 96:924 (R;US)

Environmental Impacts

Results of the independent radiological verification survey of the remedial action performed at 525 S. Main Street, Oxford, Ohio, (OXO002), 96:2178 (R;US)

Results of the independent radiological verification survey of the remedial action performed at the former Alba Craft Laboratory site, Oxford, Ohio, (OXO001), 96:2183 (R;US)

Extraction

The use of selective extraction chromatographic columns as an alternative to solvent extraction for the separation of uranium followed by the use of Arsenazo III as a calorimetric reagent for uranium determination, 96:2638 (R;US)

Ion Exchange

200-UP-1 groundwater pump-and-treat Phase 1 quarterly report, September 1995–November 1995, 96:381 (R;US)

Materials Recovery

Flowsheet for shear/leach processing of N Reactor fuel at PUREX, 96:308 (R;US)

Mill Tailings

Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Naturita, Colorado. Revision 1, 96:448 (R;US)

Determination of kinetic coefficients for the simultaneous reduction of sulfate and uranium by *Desulfovibrio desulfuricans* bacteria, 96:2190 (R;US)

Site Observational Work Plan for the UMTRA Project Site at Shiprock, New Mexico. Revision, 96:434 (R;US)

Site observational work plan for the UMTRA Project site at Falls City, Texas, 96:433 (R;US)

Technical considerations for the implementation of subsurface microbial barriers for restoration of groundwater at UMTRA sites, 96:586 (R;US)

UMTRA Project water sampling and analysis plan, Salt Lake City, Utah. Revision 1, 96:419 (R;US)

Nuclear Materials Management

Idaho National Engineering Laboratory materials in inventory natural and enriched uranium management and storage costs, 96:188 (R;US)

Quantitative Chemical Analysis

Evaluation on the use of cerium in the NBL Titrimetric Method, 96:949 (R;US)

Radiation Hazards

Postremediation dose assessment for the former Alba Craft Laboratory site, Oxford, Ohio, 96:1994 (R;US)

Radioactive Waste Disposal

Results of the independent radiological verification survey at 4400 Piehl Road, Ottawa Lake, Michigan (BTO002), 96:2182 (R;US)

Radioecological Concentration

200-UP-1 vertical profiling activity summary report, 96:362 (R;US)

Baseline radionuclide concentrations in soils and vegetation around the proposed Weapons Engineering Tritium Facility and the Weapons Subsystems Laboratory at TA-16, 96:201 (R;US)

Baseline risk assessment of ground water contamination at the Monument Valley uranium mill tailings site Cane Valley, Arizona, 96:410 (R;US)

Buffer zone monitoring plan for the Dos Rios subdivision, Gunnison, Colorado, 96:458 (R;US)

Carbonate and citric acid leaching of uranium from uranium-contaminated soils: Pilot-scale studies (Phase II), 96:2533 (R;US)

Characterizing aquifer hydrogeology and anthropogenic chemical influences on groundwater near the Idaho Chemical Processing Plant, Idaho National Engineering Laboratory, Idaho, 96:480 (R;US)

Environmental surveillance results for 1995 for the Hazelwood Interim Storage Site, 96:2089 (R;US)

Geophysical surveys at the UMTRA project Shiprock, New Mexico site, 96:2077 (R;US)

Long-term surveillance plan for the Gunnison, Colorado, disposal site, 96:2074 (R;US)

Remedial action plan and site design for stabilization of the inactive uranium mill tailings site at Falls City, Texas. Remedial action selection report, attachment 2, geology report; attachment 3, groundwater hydrology report; and attachment 4, water resources protection strategy. Final report, 96:408 (R;US)

Supplement to the site observational work plan for the UMTRA Project Site at Ambrosia Lake, New Mexico, 96:436 (R;US)

UMTRA project water sampling and analysis plan, Tuba City, Arizona, 96:455 (R;US)

Radionuclide Migration

Engineering evaluation/conceptual plan for the 200-UP-1 groundwater operable unit interim remedial measure, 96:370 (R;US)

Remote Handling

The use of selective extraction chromatographic columns as an alternative to solvent extraction for the separation of uranium followed by the use of Arsenazo III as a calorimetric reagent for uranium determination, 96:2638 (R;US)

Removal

200-UP-1 groundwater pump-and-treat Phase 1 quarterly report, September 1995–November 1995, 96:381 (R;US)

Analytical electron microscopy characterization of Fernald soils. Annual report, October 1993–September 1994, 96:2280 (R;US)

Aqueous-stream uranium-removal technology cost/benefit and market analysis, 96:494 (R;US)

Cost results from the 1994 Fernald characterization field demonstration for uranium-contaminated soils, 96:2534 (R;US)

Engineering evaluation/conceptual plan for the 200-UP-1 Groundwater Operable Unit interim remedial measure. Revision 2, 96:371 (R;US)

Engineering evaluation/conceptual plan for the 200-UP-1 groundwater operable unit interim remedial measure, 96:369 (R;US)

Evaluation of gas-phase technetium decontamination and safety related experiments during FY 1994. A report of work in progress, 96:2147 (R;US)

Minimum Additive Waste Stabilization (MAWS), Phase I: Soil washing final report, 96:1 (R;US)

Soil treatment to remove uranium and related mixed radioactive heavy metal contaminants. Ninth quarterly technical and financial progress report, January 1, 1995–March 31, 1995, 96:2357 (R;US)

Treatability test report for the 200-UP-1 Operable Unit, Hanford Site, 96:500 (R;US)

Risk Assessment

Baseline risk assessment of ground water contamination at the uranium mill tailings site near Canonsburg, Pennsylvania. Revision 1, 96:2041 (R;US)

URANIUM 233

Probability, conditional probability and complementary cumulative distribution functions in performance assessment for radioactive waste disposal, 96:1563 (R;US)
Quality assurance procedures for the analysis of TRU waste samples, 96:1212 (R;US)
Remote-handled transuranic waste study, 96:1224 (R;US)
The second iteration of the Systems Prioritization Method: A systems prioritization and decision-aiding tool for the Waste Isolation Pilot Plant: Volume 3, Analysis for final programmatic recommendations, 96:1560 (R;US)
The second iteration of the Systems Prioritization Method: A systems prioritization and decision-aiding tool for the Waste Isolation Pilot Plant: Volume 2, Summary of technical input and model implementation, 96:1559 (R;US)

Permit Applications

Resource Conservation and Recovery Act: Part B permit application. Volume 6, Revision 5, 96:1274 (R;US)
Resource Conservation and Recovery Act: Part B permit application. Volume 8, Revision 5, 96:1276 (R;US)

Planning

Carlsbad Area Office strategic plan, 96:1280 (R;US)

Program Management

Carlsbad Area Office strategic plan, 96:1280 (R;US)

Radiation Monitoring

The influence of salt aerosol on alpha radiation detection by WIPP continuous air monitors, 96:1221 (R;US)

Radioactive Waste Disposal

Computational implementation of the multi-mechanism deformation coupled fracture model for salt, 96:1565 (R;US)
Transuranic waste baseline inventory report. Revision No. 3, 96:1225 (R;US)
Waste acceptance criteria for the Waste Isolation Pilot Plant, 96:1269 (R;US)

WIPP
Radioactive Waste Facilities

Radioactive Waste Facilities

Probability, conditional probability and complementary cumulative distribution functions in performance assessment for radioactive waste disposal, 96:1563 (R;US)

Radioactive Waste Management

Basic data report for WQSP 1; WQSP 2; WQSP 3; WQSP 4; WQSP 5; WQSP6; and WQSP 6a, 96:1286 (R;US)

Review of the WIPP draft application to show compliance with EPA transuranic waste disposal standards, 96:1222 (R;US)

Waste acceptance criteria for the Waste Isolation Pilot Plant, 96:1269 (R;US)

Radioactive Waste Storage

Uncertainty analysis of the SWEPP drum assay system for graphite content code 300, 96:2473 (R;US)

Remote Viewing Equipment

Robotics and remote systems applications, 96:2279 (R;US)

Robots

Robotics and remote systems applications, 96:2279 (R;US)

Rock Mechanics

Air intake shaft performance tests (Shaft 5): In situ data report (May 1988–July 1995). Waste Isolation Pilot Plant (WIPP) Thermal/Structural Interactions Program, 96:247 (R;US)

Safety Analysis

An analysis of the annual probability of failure of the waste hoist brake system at the Waste Isolation Pilot Plant (WIPP), 96:1220 (R;US)

Hazard and consequence analysis for waste emplacement at the Waste Isolation Pilot Plant, 96:1288 (R;US)

Sealing Materials

Case studies of sealing methods and materials used in the salt and potash mining industries, 96:1545 (R;US)

Data report on the Waste Isolation Pilot Plant Small-Scale Seal Performance Test, Series F grouting experiment, 96:1529 (R;US)

Large-scale dynamic compaction demonstration using WIPP salt: Fielding and preliminary results, 96:1550 (R;US)

Seals

Large-scale dynamic compaction of natural salt, 96:1573 (R;US)

Shaft Excavations

Air intake shaft performance tests (Shaft 5): In situ data report (May 1988–July 1995). Waste Isolation Pilot Plant (WIPP) Thermal/Structural Interactions Program, 96:247 (R;US)

Site Characterization

Coupled multiphase flow and closure analysis of repository response to waste-generated gas at the Waste Isolation Pilot Plant (WIPP), 96:1531 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 8: Appendices HY-DRO, IRD, LTM, NUTS, PAR, PMR, QAPD, RBP, 96:1240 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 9: Appendices RM, SCR, SER, SUM, WRAC, 96:1241 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 6: Appendix GCR Volume 1, 96:1238 (R;US)

Draft Title 40 CFR 191 compliance certification application for the Waste Isolation Pilot Plant. Volume 7: Appendix GCR Volume 2, 96:1239 (R;US)

Geotechnical analysis report for July 1993–June 1994, 96:2436 (R;US)

Hydraulic testing around Room Q: Evaluation of the effects of mining on the hydraulic properties of Salado Evaporites, 96:1571 (R;US)

Petrographic and X-ray diffraction analyses of selected samples from Marker Bed 139 at the Waste Isolation Pilot Plant, 96:1548 (R;US)

Resource Conservation and Recovery Act. Part B permit application, Volume 3. Chapter D, Appendix D1 (beginning), 96:1271 (R;US)

Resource Conservation and Recovery Act: Part B permit application. Volume 5. Chapter D, Appendix D1 (continued), 96:1273 (R;US)

Resource Conservation and Recovery Act: Part B permit application. Volume 6, Revision 5, 96:1274 (R;US)

Tracing early breccia pipe studies, Waste Isolation Pilot Plant, southeastern New Mexico: A study of the documentation available and decision-making during the early years of WIPP, 96:1534 (R;US)

Specifications

Transuranic Waste Characterization Quality Assurance Program Plan, 96:1204 (R;US)

WIPP WAC REV. 5 applicability, 96:1283 (R;US)

Statistical Data

Carlsbad Area Office strategic plan, 96:1280 (R;US)

Stratigraphy

Effect of explicit representation of detailed stratigraphy on brine and gas flow at the Waste Isolation Pilot Plant, 96:1542 (R;US)

Thermal Testing

Air intake shaft performance tests (Shaft 5): In situ data report (May 1988–July 1995). Waste Isolation Pilot Plant (WIPP) Thermal/Structural Interactions Program, 96:247 (R;US)

Underground Disposal

Hydraulic testing around Room Q: Evaluation of the effects of mining on the hydraulic properties of Salado Evaporites, 96:1571 (R;US)

Underground Facilities

An analysis of the annual probability of failure of the waste hoist brake system at the Waste Isolation Pilot Plant (WIPP), 96:1220 (R;US)

Coupled multiphase flow and closure analysis of repository response to waste-generated gas at the Waste Isolation Pilot Plant (WIPP), 96:1531 (R;US)

Engineered alternatives cost/benefit study. Draft report, 96:1284 (R;US)

Ventilation Systems

Air intake shaft performance tests (Shaft 5): In situ data report (May 1988–July 1995). Waste Isolation Pilot Plant (WIPP) Thermal/Structural Interactions Program, 96:247 (R;US)

Water Quality

Draft no-migration variance petition. Volume 3, Appendices BH, BWQ, CLP, CONT, D&D, DEF, 96:1228 (R;US)

WOOD

Crush performance of redwood for developing design procedures for impact limiters, 96:257 (R;US)

WOOD ALCOHOL

See METHANOL

WORKERS

See PERSONNEL

WORKING (MATERIALS)

See MATERIALS WORKING

WYOMING

Baseline risk assessment of ground water contamination at the uranium mill tailings site near Riverton, Wyoming. Revision 1, 96:412 (R;US)

Work plan for monitor well installation water and sediment sample collection aquifer testing and topographic surveying at the Riverton, Wyoming, UMTRA Project Site, 96:449 (R;US)

X

X-RAY DOSIMETRY

The calibration and characterization of a research x-ray unit, 96:2529 (R;US)

X-RAY SOURCES

The calibration and characterization of a research x-ray unit, 96:2529 (R;US)

XDS COMPUTERS

See COMPUTERS

XYLENES

TOUGH2 simulations of the TEVES Project including the behavior of a single-component NAPL, 96:1008 (R;US)

Y

Y-12 PLANT

Addendum to the remedial investigation report on Bear Creek Valley Operable Unit 2 (Rust Spoil Area, Spoil Area 1, and SY-200 Yard) at the Oak Ridge Y-12 Plant Oak Ridge, Tennessee. Volume 1: Main text, 96:2389 (R;US)

Building 9201-4 at the Oak Ridge Y-12 Site annual surveillance and maintenance report 1994, 96:2235 (R;US)

Effective use of risk assessments and the public comment process to achieve acceptable remediation goals for mercury-contaminated sites, 96:710 (R;US)

Environmental restoration risk-based prioritization work package planning and risk ranking methodology. Revision 2, 96:153 (R;US)

Remedial investigation work plan for the Upper East Fork Poplar Creek characterization area, Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 96:2409 (R;US)

Report on the biological monitoring program for Bear Creek at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 1989-1994, 96:2531 (R;US)

Technical specification for transferring tank construction data to the Oak Ridge Environmental Information System (OREIS), 96:157 (R;US)

YANKEE ROWE REACTOR

See ROWE YANKEE REACTOR

YTTRIUM 90

Hanford isotope project strategic business analysis yttrium-90 (Y-90), 96:285 (R;US)

YTTRIUM ALUMINIUM GARNETS

See ALUMINIUM OXIDES

YUCCA MOUNTAIN

ANL technical support program for DOE Office of Environmental Management. Annual report, October 1994–September 1995, 96:1153 (R;US)

Chemistry and kinetics of waste glass corrosion, 96:1173 (R;US)

Colloid formation during waste glass corrosion, 96:1175 (R;US)

Long-term test results from a West Valley actinide-doped reference glass, 96:1158 (R;US)

Z

ZEOLITES

See also CLINOPTILOLITE

Effects of soluble organic complexants and their degradation products on the removal of selected radionuclides from high-level waste. Part II: Distributions of Sr, Cs, Tc, and Am onto 32 absorbers from four variations of Hanford tank 101-SY simulant solution, 96:1333 (R;US)

Surfactant-modified zeolites as permeable barriers to organic and inorganic groundwater contaminants, 96:490 (R;US)

ZIRCONIUM HYDROXIDES

Modelling the unsteady growth state population balance for a nonlinear growth model in an MSMPR crystallizer, 96:1112 (R;US)

Contract Number Index

Numbers assigned to DOE contracts announced in documents in this publication are listed. Contract numbers are sorted alphanumerically and list the primary corporate author of the document cited, the citation number, and the report number or other document identification.

Report Number Index

The report number index consists of the alphanumeric identifiers assigned to report literature as well as patent and conference literature cited in this publication. Entries provide the abstract number; the source(s) of availability of the document; the GPO file prefix for GPO depository library documents; the order number for OSTI and NTIS report ordering purposes; and, if the document was distributed under the DOE distribution program, the category number is shown for paper copy (PC), microfiche (MF), or no distribution (ND). These categories are included to assist DOE librarians in responding to requests for reports in their collections. The index also lists secondary numbers, with the corresponding abstract numbers and cross-references to other identifying numbers.

<i>Report Number</i>	<i>Abstract Number</i>	<i>Source of Availability</i>	<i>GPO Dep.</i>	<i>Order Number</i>	<i>Distribution Category</i>

How To Order from the Availability Sources

TO OBTAIN A REPORT

Report literature, usually identified by an alphanumeric identifier at the beginning of a citation, is available from the sources listed in the citation (see example of element 2 on page iii). Often the sources are listed as abbreviations. Corresponding addresses are provided at right from which documents with these abbreviations may be ordered. When "OSTI" is given, **DOE and DOE contractors may order these documents from OSTI**. (However, check with your library or information organization which may require that orders go through them to OSTI.) OSTI prices are based on total pages unless special pricing applies. The public should order from NTIS or from one of the other agencies listed in the citation. NTIS price codes may continue to appear in some records. To expedite processing, an order form is provided in the back of this publication.

NOTE: The order numbers provide quicker access for report ordering. Use the order number where possible.

GPO	Superintendent of Documents
