TASK 10 - TECHNOLOGY DEVELOPMENT INTEGRATION

1.0 INTRODUCTION

The Energy & Environmental Research Center (EERC) in conjunction with the Waste Policy Institute (WPI) will identify and integrate new technologies to meet site-specific environmental management (EM) requirements at contaminated sites appropriate to U.S. Department of Energy (DOE) interests. EM technologies offered by developers will be evaluated to determine their complementary contribution to new cleanup systems focused on particular characterization and remediation problems at specific EM sites. The technology clusters identified will provide EM cleanup capabilities that are significantly faster, better, safer, and cheaper than systems that are currently available. Work will be performed under the DOE-EERC EM Cooperative Agreement (EMCA), which includes provisions "to develop, demonstrate, and commercialize technologies that address environmental management needs of contaminated sites 'together with' management activities which accelerate transfer of technologies." The effort began July 1, 1995.

2.0 OBJECTIVES AND ACTIVITIES

This task will develop new approaches for evaluating technology focus areas and other research and development technical programs and activities. This includes creating technology development scenarios and formulating streamlined technical approaches that will expedite technology focus area initiatives, other technical programs, and projects. In addition, this task is designed to validate technologies and systems through all phases of research, development, demonstration, testing, and evaluation and ensure public involvement during the development process.

The work is divided into three activities. In Task 10.1, Technology Management, technical reviews of requirements, needs, and assessments related to waste characterization, containment, in situ and ex situ treatment, waste storage, disposal, robotics handling, monitoring, laboratory analysis, and site characterization and remediation will be performed. The activities include but are not limited to the following: development of systems, experimental design, and plans; verification of technology performance; establishing regulatory documentation and intermediate products required for testing, demonstration, and validation; and preparation of review documentation. In addition, studies will be performed in various focus areas to facilitate rapid deployment of waste management technologies to the specific DOE sites and transfer to the private sector.

In Task 10.2, Project Management, the participants will conduct reviews and analyze and develop strategies for program management systems to integrate and control programs, projects, tasks, and documentation. This includes financial and technical management systems; decision analysis tools and program-planning software; and cost or schedule variance analysis and related software. In addition, the following activities will be carried out: conduct project reviews, public hearings, meetings, and public briefings; develop technical briefings; prepare related materials; plan for the transportation of hazardous waste, including acting as a liaison with the public on routes, safety, and preparedness; provide emergency management plans, training, and exercises for

facility and transportation preparedness; and develop protocols for collecting, handling, analyzing, and shipping environmental samples.

As part of the Task 10.3, Technology Integration, activities to the private sector, criteria for identifying risks to public health and safety posed by conditions at weapons complex facilities will be established; the extent of these risks will be evaluated; the urgency and priorities for eliminating or minimizing the risks will be determined; and the cost of activities required to meet applicable compliance agreements will be assessed.

3.0 ACCOMPLISHMENTS/WORK PERFORMED

- A packet of information on EMCA technologies was sent to Mr. Paul Rudnick of the Pacific Rim Enterprise Center (PREC, formerly Environmental Technology Partnership) in Seattle, Washington. PREC responded with several questions on the technologies, and the EERC is dealing with these inquiries. PREC is supported, in part by EM-50, to facilitate technology deployment at Hanford and in other technology-marketing activities.
- The EERC provided administrative support for the Waste Policy Institute (WPI) subcontract. The WPI subcontract ended in November of 1996. The WPI activities are dealt with in detail in the October and November monthly reports attached.
- Requests were placed for a number of program source materials, including the draft 10-year plans, background on the Rapid Commercialization Initiative, and the 1995 Waste Database. These materials were received and made available to the project managers.
- The report from Van Ness Feldman, Attorneys-at-Law, entitled "Integration of Innovative Technologies at Federal Waste Sites," examines 1) existing cleanup and waste remediation programs at federal facilities, 2) efforts to improve the implementation of innovative environmental technology programs by the federal government, and 3) options through which existing government processes can be improved to encourage and advance the development of innovative technologies. A copy of the report is attached.

4.0 WORK PLANNED FOR NEXT 6 MONTHS

The EERC will continue to identify technologies to DOE for integration into the EM Program.

Mr. John G. Hendrikson
Assistant to the Director
Energy and Environmental Research Center
University of North Dakota
15 North 23rd Street
Grand Forks, ND 58203

Subject: UNDEERC Fund No. 4624-0936, Technology Development Integration
WPI Subcontract No. 359636

Dear Mr. Hendrikson:

The Waste Policy Institute (WPI) is pleased to submit the enclosed report of activities conducted during the period of October 1, 1996 through October 31, 1996, in compliance with Article VI and Appendix A of Subcontract Number 359636. A list of products developed during this period is provided as Attachment A to the activities report.

Through October 31, WPI has expended \$13,614,769. Our monthly cost and labor report provides the details of our costs to date.

Please do not hesitate to call me if you have any questions or require additional information.

Sincerely,

A handwritten signature in black ink, appearing to read "John S. Wilson", is written over a circular stamp.

John S. Wilson, Program Manager
Waste Policy Institute

SUBCONTRACT NUMBER: 359636

Report Period: 10/1/96-10/31/96

CONTRACTOR NAME: Waste Policy Institute
555 Quince Orchard Road
Suite 600
Gaithersburg, MD 20878-1437

CONTRACT PERIOD: 6/28/95 -12/01/96

1. SUBCONTRACT DELIVERABLES:

This report is submitted in fulfillment of requirements specified for the University of North Dakota Energy and Environmental Research Center (UNDEERC) Subcontract Number 359636. A list of products developed under this subcontract is provided as Attachment A.

2. SUMMARY OF ACTIVITIES:

WPI team members continued to provide support in the review activity involved with the Ten Year Plans during October. Additionally, a significant level of effort was expended in preparation for and support during the Kick-Off Meetings in Atlanta, GA early in the month.

TASK A-TECHNOLOGY ASSESSMENT

TANKS FOCUS AREA (TFA)

SUBSURFACE CONTAMINANTS FOCUS AREA (SCFA)

The WPI team reviewed the draft milestone report from TTP#: RL-36-LF-32, Work Element E titled: Waste Form Development for a DC Arc Furnace. The report seemed to meet the requirements for milestone E1, and there were no significant issues identified.

Staff members developed printouts and a diskette to meet a recurring need to supply data that related TTPs to certain technology categories and needs categories. Although developed independently of the EM-50 Decision Support System (DSS), these tables will become a part of the DSS and represent current SCFA projects. The lists of categories will also be valuable to the site needs description process for FY97.

DECONTAMINATION AND DECOMMISSIONING (D&D) FOCUS AREA

In response to a METC request, the WPI team reviewed a letter from Lockheed-Martin regarding METC's decision to discontinue funding of the Microspi Project. The review asserted that the contents of the letter were not sufficient to affect a decisional change.

In response to a METC request, the WPI team compiled information regarding concrete scabbling methods from the Preferred Decommissioning Technologies Guide, the Decommissioning Handbook, and internet resources.

Team members performed a cursory review of the draft Preferred Alternatives Matrix for Characterization. The review determined that there were no major technological flaws in the document in regards to D&D activities.

A WPI staff member attended a meeting of the Fernald Plant-1 Large-Scale Demonstration (LSDP) Integrating Contractor (IC) Team on October 3, 1996. A meeting record was prepared for delivery to METC.

The WPI team prepared a draft conference paper, entitled "Assessment of DOE Radioactive Scrap Metal Disposition Options," and a draft briefing for presentation at Beneficial Reuse '96 in Knoxville, Tennessee, October 22-24, 1996. Mr. Steve Bossart, DOE-METC, made the presentation. Preparation of the paper stemmed from research and analysis performed by the WPI team for an issue paper on the same subject.

MIXED WASTE FOCUS AREA (MWFA)

TASK B-PROJECT ASSESSMENT

TANKS FOCUS AREA (TFA)

A draft presentation for the Tanks Focus Area (TFA) Kickoff Meeting held in Atlanta, Georgia was prepared by the staff. The presentation was a report on the Post Workshop Task Groups from the TFA Denver Meeting in June 1996. Also included in the presentation were talking points for DOE-RL on policy and communication within the TFA.

A Statement of Non-Federal Participation for the TFA was prepared by the staff and sent to DOE-RL and DOE-HQ for inclusion in the FY1997 Performance Plan.

Staff prepared a draft memorandum to introduce the TFA to the Council of Energy Resource Tribes (CERT) Tribal Working Group members. This memorandum also transmitted the *Radioactive Tank Waste Remediation Focus Area Technology Summary* (Rainbow Book) and the *Hanford Tank Clean Up: Guide to Understanding the Technical Issues* primer.

Verification that the TFA completed FY1996 Performance Plan Measures 50-01 and 50-02 was done by the staff and transmitted back to DOE-HQ. Also verified were the completion of all demonstrations and technologies available for transfer. This information was to be used in a briefing to Clyde Frank, DOE-HQ.

Agendas for all October TFA Teleconferences and the Updates and Actions from the previous weeks' calls were prepared by the staff and electronically distributed to the attendees. This task involves attending the call and taking detailed minutes and recording actions as assigned by the TFA Lead. This office also serves as a point of contact for distribution of information to the attendees of any TFA-related material that is pertinent to the call.

Staff prepared the TFA Business Review using budget information as of July 31, 1996. This briefing is an update of the TFA with regard to budget and program management and also highlights any major accomplishments and/or issues that need to be reported to DOE-HQ.

The team responded to a request from DOE-RL to help in answering a call for information from DOE-HQ listing reports, plans, data input, etc. that goes from the Field Offices to DOE-HQ on a regular basis.

DOE-RL's Legal Department had reviewed the PNNL Call for Proposals for the TFA and made numerous comments concerning the document. The WPI staff then consolidated the comments into a comprehensive report, as requested by the TFA Lead.

Staff members prepared an informal memorandum to the TFA Site Representatives, PNNL Technical Team, and DOE-HQ transmitting copies of the Hanford Tanks Initiative (HTI) Plan and the HTI Technology Demonstration and Waste Retrieval Acquisition Strategy and made the distribution.

SUBSURFACE CONTAMINANTS FOCUS AREA (SCFA)

Members of the team prepared draft briefing slides for the Kick-Off Meeting in Atlanta, GA on October 8-9, 1996. Topics covered were: FY96 Carryover and Carryover disposition, FY96/97 TTP Crosswalk table and guidance.

The WPI team prepared a draft memo providing a summary of the EM-50 Decision Support System (DSS). The report focused on the identification of system capabilities and links and the identification of those system components that require immediate or routine maintenance. The initiation of system maintenance will provide for full implementation of the DSS throughout SCFA in FY97.

DECONTAMINATION AND DECOMMISSIONING (D&D) FOCUS AREA

Team members completed a review of the EM-40-developed Preferred Decommissioning Technologies Guide. Following the review, they prepared a suggested response to the Guide's issuance primarily regarding the treatment of innovative technologies.

The WPI team reviewed the proposed Large-Scale Demonstration (LSDP) Projects for their impact on the draft Ten Year Plans. The review provided insight as to the potential commonality of LSDP Proposal activities and those activities cited in the Ten Year Plans.

Team members assisted DOE in developing communication to LSDP Projects regarding the creation of communication plans.

The WPI team continued the development of the D&D Technology Development Investment Opportunities Assessment for the focus area. This assessment will support the strategic planning effort for technology investment by the focus area and was approved by the D&D Focus Area lead. A formal project plan will be delivered in late November. The assessment is being performed along two concurrent research paths. The first path will clearly define the DOE D&D program using the site Ten Year Plans. The second path assesses baseline and commercially available technologies, and technologies in development to address D&D program problem areas. The result of the assessment will be identification of the gaps in and opportunities for technology development to support the D&D program.

A WPI team staff member attended the FY97 LSDP kickoff meeting and IC Team information exchange to be held in Cincinnati, Ohio on October 4, 1996. A meeting record was prepared and delivered to METC for delivery under a DOE cover letter to the meeting participants and other interested parties.

MIXED WASTE FOCUS AREA (MWFA)

TASK C-TECHNOLOGY INTEGRATION

Members of the staff produced the latest update to the FY96/97 crosswalk table sent from the Chief Financial Office, DOE-HQ. The table was issued at the Atlanta Kick-Off Meeting. Assistance will be given to update the list and provide an electronic file for transmittal to DOE-HQ.

The WPI team produced the draft July Monthly Business Review for Landfill and Plumes Focus Areas, including detailed information on Financial Plans, cost variances and overdue milestones.

A member of the staff facilitated the SCFA FY97 Kickoff Meeting held on October 8-9, 1996, in Atlanta, Georgia. The purpose of the meeting was to inform managers of the FY97 budget picture and to understand how to point SCFA toward meshing with the EM Ten Year Plan.

Staff members provided support to the Office of Science and Technology stand-alone Ten Year Plan (TYP) which included devising a schedule for the TYP, and development of an outline and thesis statement.

Staff members assisted in compiling data for the 12 sites on applicable OST technologies to support site visits by the Army Corps of Engineers in support of the TYP. Staff members also assisted with assembling of site briefing books for the visits.

WPI team members provided assistance with the review of Table 1 from the field to verify applicability of OST technologies to specific projects in the TYP.

TASK D- SYSTEMS ENGINEERING

A member of the staff reviewed three Systems Engineering papers presented at INCOSE by INEL Systems Engineers.

Staff continued support of project participants vis telephone, fax and e-mail messages.

ATTACHMENT A

PRODUCTS DELIVERED: TASK A - TECHNOLOGY ASSESSMENT

TANKS FOCUS AREA (TFA)

SUBSURFACE CONTAMINANTS FOCUS AREA (SCFA)

- Review of Draft Milestone Report from TTP #: RL-46-LF-32
- Technical Database of SCFA Tasks Including Fields to Answer Queries

DECONTAMINATION AND DECOMMISSIONING (D&D) FOCUS AREA

- Review of Microspi Project Discontinuation Rebuttal (10/2/96)
- Concrete Scabbling Methods (10/2/96)
- Draft Conference paper entitled, "Assessment of DOE Radioactive Scrap Metal Disposition Options" and briefing for presentation at Beneficial Reuse '96 Conference in Knoxville, Tennessee, October 22-24, 1996

MIXED WASTE FOCUS AREA (MWFA)

PRODUCTS DELIVERED: TASK B: PROJECT ASSESSMENT

TANKS FOCUS AREA (TFA)

- Post Workshop Task Groups Presentation
- Statement of Non-Federal Participation for the Tanks Focus Area
- Draft Council of Energy Resource Tribes Memorandum
- Verification of completion of FY96 Tanks Focus Area Performance Measures
- Agendas for the Tanks Focus Area Teleconferences and Updates/Actions from previous calls for the period of October 1-15, 1996
- Tanks Focus Area Business Review
- List of DOE-HQ plans, reports, and data input provided by the Tanks Focus Area
- Call for Proposal comments

- Draft DSI (informal memorandum) regarding the Hanford Tanks Initiative Plan and Technology Demonstration and Waste Retrieval Acquisition Strategy

SUBSURFACE CONTAMINANTS FOCUS AREA (SCFA)

- Briefing Slides for the Atlanta Kick-Off Meeting, October 8-9, 1996
- EM-50 Decision Support System Summary

DECONTAMINATION AND DECOMMISSIONING (D&D) FOCUS AREA

- Suggested response to the Preferred Decommissioning Technologies Guide issuance.
- Assessment of LSDP Proposals against Ten-Year Plans
- Meeting Record- Large-Scale Demonstration Program Integrating Contractor Team Information Exchange, October 4, 1996

MIXED WASTE FOCUS AREA (MWFA)

PRODUCTS DELIVERED: TASK C: TECHNOLOGY INTEGRATION

- Updated Crosswalk Table for FY96/97 TTPs
- Delivery of August FY96 Monthly Business Review
- Delivery of July FY96 Monthly Business Review
- Trip Report from the SCFA FY97 Kickoff Meeting held on October 8-9, 1996, in Atlanta, Georgia.
- Draft schedule for the Ten Year Plan (TYP).
- Draft outline and thesis statement for the Ten Year Plan (TYP).
- Richland and Chicago site briefing books for the Army Corps of Engineers site visits.

Telephone (304) 598-9383 • Telefax (304) 598-9392

December 13, 1996

Mr. John G. Hendrikson
Assistant to the Director
Energy and Environmental Research Center
University of North Dakota
15 North 23rd Street
Grand Forks, ND 58203

Subject: UNDEERC Fund No. 4624-0936, Technology Development Integration
WPI Subcontract No. 359636

Dear Mr. Hendrikson:

The Waste Policy Institute (WPI) is pleased to submit the enclosed report of activities conducted during the period of November 1, 1996 through November 30, 1996, in compliance with Article VI and Appendix A of Subcontract Number 359636. A list of products developed during this period is provided as Attachment A to the activities report.

Through November 30, WPI has expended \$13,890,508. Our monthly cost and labor report provides the details of our costs to date.

Please do not hesitate to call me if you have any questions or require additional information.

Sincerely,

A handwritten signature in black ink, appearing to read "John S. Wilson", is written over a horizontal line.

John S. Wilson, Program Manager
Waste Policy Institute

A Virginia Tech Affiliated Corporation

SUBCONTRACT NUMBER: 359636

Report Period: 11/1/96-11/30/96

CONTRACTOR NAME: Waste Policy Institute
555 Quince Orchard Road
Suite 600
Gaithersburg, MD 20878-1437

CONTRACT PERIOD: 6/28/95 -12/01/96

1. SUBCONTRACT DELIVERABLES:

This report is submitted in fulfillment of requirements specified for the University of North Dakota Energy and Environmental Research Center (UNDEERC) Subcontract Number 359636. A list of products developed under this subcontract is provided as Attachment A.

2. SUMMARY OF ACTIVITIES:

This final period of the cooperative agreement was devoted extensively to support of the OST Ten Year Plan activities.

TASK B-PROJECT ASSESSMENT

DECONTAMINATION AND DECOMMISSIONING (D&D) FOCUS AREA

The final deliverable, *Record of the Decontamination and Decommissioning (D&D) Workshop: Defining Research Needs* for the D&D Workshop held in Roanoke last summer was prepared and delivered. This deliverable consisted of a camera-ready single-sided copy for printing and an electronic file (in Acrobat PDF format) for posting on the client's website.

TASK C-TECHNOLOGY INTEGRATION

Members of the team continued compiling a list of all technologies for which developmental funding was provided by the Office of Science and Technology from 1991 through the present. This list will be produced in spreadsheet form with associated information on focus area or crosscutting program relevance, applicable media for the technology, and documentation where further information on the technology can be found.

Staff members developed a full color presentation on the need for the Office of Science and Technology (OST) in the Ten Year Plan (TYP).

WPI team members assisted in the development of strategies for the OST Ten Year Plan.

Team members developed 12 Site Reference Books for use by the Army Corps of Engineers Site TYP review teams.

Staff members assisted in the refinement, editing and further development of the OST TYP annotated outline.

A review of the various Site TYP tables 1, 2, and 3 was conducted and a summary chart of parameters was developed from those tables.

WPI team members assisted in the development of TYP data for use in the OMB briefing on the FY98 budget.

Staff members assisted in the updating of TYP development guidance.

The WPI team provided technical support in the development of Deployment Fund strategies.

In support of the Technology Integration/Technology Assessment, Availability, Acceptance and Use Initiatives, WPI team members have provided the following support for the purpose of tracking the achievement of EM supported technologies and to classify these technologies according to the definition of key terms approved by Clyde Frank in March, 1996.

Team members assisted in the identification of additional EM-50 supported technologies. These technologies are additional in the sense of expanding the current list of about 200 technologies identified by such tools as the baseball cards, BEMR list, EMAB list, and technology summary books.

The WPI team assisted in the assessment of commercial availability and implementation status of five technologies commercialized during 1996. These technologies will be the focus of a future publication.

Staff members assessed the availability of EM-50 EMAB and BEMR technologies to the Department of Defense and the implementation status of these technologies at DOD locations. This information was collected for a presentation by Clyde Frank to DOD's SERDP Program.

Team members investigated the availability of EM-50 supported EMAB and BEMR technologies to DOE and their use as part of a true implementation, demo implementation, or a selection for implementation. The information for the technologies was organized by FA.

Staff members participated in a presentation to EM-50's Office of Technology Systems on OST's Technology Achievements.

The WPI team is currently revising our information gathering tool and has initiated a Phase 2 project which will target other commercially available technologies that have been implemented and used by DOE and/or non-DOE entities. The database for EM-50 supported technologies is being expanded.

The WPI team, in support of Core Business Team activities, attended weekly meetings. Emphasis was placed on prioritization of business processes to be included in the Core Business Team Process Book. A revised draft EM-50 master schedule was submitted on November 11, 1996.

Staff members supported the EM-50 program business review by providing information and organizational recommendations. They also developed draft slide overviews in support of the business review, which was submitted on November 26, 1996.

The WPI team provided recommendations for responses to OMB inquiries concerning Performance Measurement and the Internal Budget Review (IRB).

Team members supported the Performance Measurement analysis for the Secretary's Commitment to the President. Analysis covered the FY96 Annual Performance Plan by Program Area at the task plan level. Variances from planned performance levels were explained. A draft summary of the FY96 Performance Measurement Plan Year-End Actuals was submitted on November 6, 1996.

Members of the WPI team supported the documentation of Performance Measurement criteria for OST in the Ten Year Plan. Draft performance definitions of EM-50's performance measures, along with suggestions for illustrating/charting performance metrics were also recommended.

The team supported review of OST data for the QMR. An analysis of data presented in the draft QMR was made from a HQ perspective. A draft listing of QMR data discrepancies was submitted on November 20, 1996.

Technical assistance was provided by the team for the publication of the draft FY97 & FY98 Annual Performance Plans. Draft FY97 & FY98 Annual Performance Plans dated November 6, 1996 and November 27, 1996 were submitted. Listing of data quality issues associated with Program Area inputs into the Annual Performance Plan was submitted November 21, 1996.

Staff members supported a review of the top technology systems to be implemented in FY97. These technologies will be the major key drivers of success for EM-50 over the next fiscal year. Milestones and performance metrics will be closely monitored to ensure success.

The WPI team published draft minutes of the QMR teleconference held on November 21, 1996 and draft minutes of the TPO teleconference held on November 22, 1996.

ATTACHMENT A

PRODUCTS DELIVERED: TASK B: PROJECT ASSESSMENT

DECONTAMINATION AND DECOMMISSIONING (D&D) FOCUS AREA

- Record of the Decontamination and Decommissioning (D&D) Workshop: Defining Research Needs

PRODUCTS DELIVERED: TASK C: TECHNOLOGY INTEGRATION

- Draft FY97 & FY98 Annual Performance Plans dated November 6, 1996 and November 27, 1996
- Draft slide overviews in support of the business review submitted November 26, 1996
- Revised draft EM-50 master schedule submitted November 11, 1996
- Listing of data quality issues associated with Program Area inputs into the Annual Performance Plan - submitted November 21, 1996
- Draft listing of QMR data discrepancies - submitted November 20, 1996
- Draft minutes of the QMR teleconference held on November 21, 1996 - submitted November 21, 1996
- Draft minutes of the TPO teleconference held on November 22, 1996 - submitted November 22, 1996
- Draft assessment of five technologies commercialized in 1996
- Draft full color Ten Year Plan Presentation for OST
- 12 Site Reference Books/Army Corps of Engineers Site Ten Year Plan Reviews
- Ten Year Plan Annotated Outline
- Summary Chart of Tables 1, 2, and 3 of the Site Ten Year Plan
- Draft of EM-50 supported EMAB and BEMR technologies to DOE

TASK D

1043.01.04

Waste Policy Institute Task Area Summary

Subcontract No. 359 636**Actuals through Nov 96**

12/12/96

8:53 AM

WBS: 1043.01.04 . Systems Engineering

Manager: Dr. John S. Wilson

Start Date: 2/1/96

End Date: 12/1/96

Task Description:

Cost Performance Summary:

	Current Period			Inception to Date			At Complete		
	Budget	Actuals	Variance	Budget	Actuals	Variance	Budget	Estimate	Variance
Hours:	162	0	162	1,134	7	1,127	1,134	7	1,127
Price:	21,420	0	21,420	149,940	16,243	133,697	149,940	16,243	133,697
