**TASK 2 – EXTRACTION AND ANALYSIS OF POLLUTANT ORGANICS FROM
CONTAMINATED SOLIDS USING OFF-LINE SUPERCRITICAL FLUID
EXTRACTION (SFE) AND ON-LINE SFE-INFRARED SPECTROSCOPY**

The work for this task was canceled as of February 1997. At that time, Suprex Corporation, the commercial partner, was purchased by a competitor (ISCO of Lincoln, Nebraska). ISCO had no plans to continue the development of the interface which the EERC and Suprex were developing since ISCO had recently developed a similar product based on a window (rather than a fiber optic) interface.

The EERC is currently waiting for approval from the U.S. Department of Energy to close out this task.
